Long-Term Credit Bank of Japan, Limited; Proposed Acquisition of LTCB Trust Company

The Long-Term Credit Bank of Japan, Limited, Tokyo, Japan, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of LTCB Trust Company, New York, New York.

Applicant states that the proposed subsidiary would engage in the following activities: (1) Fiduciary, agency or custodial services; (2) investment of financial advisory services including portfolio advice, statistical forecasting and industry studies; and (3) data processing services such as reporting and record-keeping as an incident to the above mentioned activities. These activities would be performed from offices of Applicant's subsidiary in New York, New York. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce

benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than June 30, 1983.

Board of Governors of the Federal Reserve System, June 1, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Acquisition of Bank Shares by a Bank Holding Company; Mercantile Bancorporation, Inc.

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of St. Louis** (Delmer P. Weiss, Vice President) 411 Locust Street, St. Louis, Missouri 61366:

1. *Mercantile Bancorporation, Inc.*, St. Louis, Missouri; to acquire 100 percent of the voting shares or assets of Wright County Bank, Hartville, Missouri. Comments on this application must be received not later than June 23, 1983.

Board of Governors of the Federal Reserve System, June 1, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-15113 Filed 6-6-83; 8:45 am]

BILLING CODE 6210-01-M

Mercantile Texas Corporation; Acquisition of Bank

Mercantile Texas Corporation, Dallas, Texas, has applied for the Board's approval under section 3(a)(5) of the Bank Holding Company Act (12 U.S.C. 1842(a)(5)) to merge with First-Wichita Bancshares, Inc., Wichita Falls, Texas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than June 30, 1983. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, inditifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, June 1, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 83P-0156]

Canned Tuna in Water Deviating From Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces that a temporary permit has been issued to Ralston Purina Co., St. Louis, MO, to market test canned tuna in water seasoned with vegetable oil. The purpose of the temporary permit is to allow the applicant to measure consumer acceptance of the food.

DATES: This permit is effective for 12 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but no later than September 6, 1983.

FOR FURTHER INFORMATION CONTACT: Eugene T. McGarrahan, Bureau of Foods (HFF-215), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1155.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 130.17 concerning temporary permits to facilitate market testing of foods deviating from the requirements of the standards of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), FDA is giving notice that a temporary permit has been issued to Ralston Purina Co.

The permit covers limited interstate marketing tests of canned tuna in water. The test product deviates from the standard of identity for canned tuna, 21 CFR 161.190, because (1) it will be seasoned with soybean oil or partially hydrogenated soybean oil at levels of 1.6 percent of the water capacity of the can and (2) it will contain xanthan gum as an emulsifying and suspending agent. The test product meets all requirements of § 161.190, with the exception of these deviations. The permit provides for the temporary marketing of 750,000 cases containing forty-eight 6½ ounce cans each of the test product. The test product will be distributed throughout the United States.

The test product is to be manufactured at the Ralston Purina Co. Seafood Division plant located in San Diego, CA.

The principal display panel of the label states the product's name, which includes the fact that the food is packed in water and seasoned with oil. Each of the ingredients used in the food, including the appropriate name of the soybean oil and the emulsifying and suspending agent xanthan gum, is stated on the label as required by the applicable sections of 21 CFR Part 101. This permit is effective for 12 months beginning on the date the food is introduced or caused to be introduced into interstate commerce, but no later than September 6, 1983.

Dated: May 31, 1983.

Richard J. Ronk,

Acting Director, Bureau of Foods.

BILLING CODE 4160-01-M

Request for Nominations for Voting Members on Public Advisory Committees

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is requesting nominations for voting members to serve on certain advisory committees in the National Center for Drugs and Biologics. Nominations will be accepted for current vacancies and vacancies that will or may occur on the committees during the next 12 months.

FDA has a special interest in assuring that women, minority groups, and the physically handicapped are adequately represented on advisory committees and therefore extends particular encouragement to nominations for appropriately qualified female, minority, and handicapped candidates. Final selection from among qualified candidates for each vacancy will be determined by the expertise required to meet specific agency needs and in a manner to ensure appropriate balance of membership.

DATES: Because scheduled vacancies occur on various dates throughout each year, no cutoff date is established for receipt of nominations.

ADDRESS: All nominations for membership except for consumer-nominated members must be sent to: Joseph Price (HFN–6), National Center for Drugs and Biologics, Food and Drug Administraion 5600 Fishers Lane, Rockville, MD. 20857.

Nominations for consumer-nominated positions must be sent to: Naomi Kulakow (HFE–40), Office of Consumer Affairs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joseph Price, at the address given above (301–443–4090). Naomi Kulakow, at the address given above (301–433–5006).

SUPPLEMENTARY INFORMATION: FDA request nominations of members for the following 16 advisory committees for vacancies listed below. Individuals should have expertise in the activity of the committee.

1. Anesthetic and Life Support Drugs Advisory Committee; four vacancies occurring June 30, 1984, including the consumer-nominated member.

2. Anti-Ineffective Drugs Advisory Committee; three vacancies occurring November 30, 1983, including the consumer-nominated member;

3. Arthritis Advisory Committee; two vacancies occurring September 30, 1984.

4. Cardiovascular and Renal Drugs Advisory Committee; two vacancies occurring June 30, 1983.

5. Dermatologic Drugs Advisory Committee; three vacancies occurring August 31, 1984.

6. Endocrinologic and Metabolic Drugs Advisory Committee; one vacancy occurring June 30, 1983.

7. Fertility and Maternal Health Drugs Advisory Committee; three vacancies occurring June 30, 1984, including the consumer-nominated member.

8. Gastrointestinal Drugs Advisory Committee; four vacancies occurring June 30, 1984, including the consumer-nominated member.

9. Oncologic Drugs Advisory Committee; three vacancies occurring June 30, 1984, including the consumer-nominated member.

10. Peripheral and Central Nervous System Drugs Advisory Committee; two vacancies occurring January 31, 1984.

11. Psychopharmacologic Drugs Advisory Committee; four vacancies occurring June 30, 1984.

12. Pulmonary-Allergy Drugs Advisory Committee; three vacancies occurring June 30, 1984.

13. Radiopharmaceutical Drugs Advisory Committee; three vacancies occurring June 30, 1984.

The functions of the 13 committees listed above are to review and evaluate available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in the area of medical specialties indicated by the title of the committee and to make appropriate recommendations to the Commissioner of Food and Drugs.

14. Drug Abuse Advisory Committee; three vacancies occurring June 30, 1984, including the consumer-nominated member.

The functions of the Drug Abuse Advisory Committee are to: (1) Advise the Commissioner regarding the scientific and medical evaluation of all information gathered by both the Department of Health and Human Services (HHS) and the Department of Justice regarding the safety, efficacy, and abuse potential for drugs or other substances and (2) recommend actions to be taken by HHS regarding the marketing, investigation, and control of such drugs or other substances.

15. Blood Products Advisory Committee; three vacancies occurring September 30, 1984.

16. Vaccines and Related Biological Products Advisory Committee; three vacancies occurring January 31, 1984.

The functions of the two committees listed above are to review and evaluate available data concerning the safety, effectiveness, and appropriate use of blood and products derived from blood and serum and vaccines and other immunological products intended for use in the diagnosis, prevention, or treatment of human diseases, and make appropriate recommendations to the Commissioner of Food and Drugs.

Criteria for Members

Persons nominated for membership on the above named committees must have adequately diversified experience appropriate to the work of the committee in such fields as anesthesiology, surgery, infectious diseases, rheumatology, cardiology, dermatology, enocrinology, obstetrics and gynecology, gastroenterology, oncology, neurology, psychiatry, nuclear medicine, internal medicine, epidemiology, statistics, hematology, immunology, blood banking, virology, bacteriology, allergy, pediatrics, microbiology, and biochemistry, or other appropriate areas of expertise.

The specialized training and experience necessary to qualify the nominee as an expert suitable for appointment is subject to review, but may include experience in medical practice, teaching, research, and/or public service relevant to the field of activity of the committee. The term of office is ordinarily 4 years.

Criteria for Consumer-Nominated Members

FDA currently attempts to place on each of the committees described above one voting member who is nominated by consumer organizations. These members are recommended by a consortium of nine consumer organizations which has the responsibility for screening, interviewing, and recommending consumer-nominated candidates with appropriate scientific credentials. Candidates are sought who are aware of the consumer impact of committee issues, but who also possess enough technical background to understand and contribute to the committee's work. This would involve, for example, understanding of research design, benefit/risk, and the legal requirements for safety and efficacy of the products under review, and considerations regarding individual products. The agency notes, however, that for some advisory committees, it may require such nominees to meet the same technical qualifications and specialized training required of other expert members of the committee. The term of office for these members is 4 years. Nominations for all committees listed above are invited for consideration for

membership as openings become available.

Nomination Procedure

Any interested person may nominate one or more qualified persons for membership on one or more of the advisory committees. Nominations shall specify the committee for which the nominee is recommended. Nominations shall state that the nominee is aware of the nomination, is willing to serve as member of the advisory committee, and appears to have no conflict of interest that would preclude committee membership. Potential candidates will be asked by FDA to provide detailed information concerning such matters as financial holdings, consultancies, and research grants or contracts in order to permit evaluation of possible sources of conflict of interest.

This notice is issued under the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)) and 21 CFR Part 14, relating to advisory committees.

Dated: June 1, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 1505–01–M

Advisory Committee; Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–996 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meeting is announced:

Drug Abuse Advisory Committee

Date, time, and place. June 22, 9 a.m., Conference Rm. C, Uniformed Services University of the Health Sciences, 4301 Jones Bridge Rd., Bethesda, MD.

Type of meeting and contact person. Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 5 p.m.; Frederick J. Abramek, National Center for Drugs and Biologica (HFN–120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–433–4020.

General function of the committee. The committee advises the Commissioner of Food and Drugs regarding the scientific and medical evaluation of all information gathered by the Department of Health and Human Services and the Department of Justice with regard to safety, efficacy, and abuse potential of drugs or other substances and recommends actions to be taken by the Department of Health and Human Services with regard to marketing, investigation, and control of such drugs or other substances.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. The committee will discuss Nicorette® Gum (NDA 18–612); review of the pivotal clinical studies supporting efficacy of Nicorette® Gum as an adjunct to smoking cessation.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

Dated: June 2, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4140–01–M

Public Health Service

Availability of Carcinogenesis Reports on L-Ascorbic Acid and Diallyl Phthalate

The HHS' National Toxicology Program today announces the availability of Technical Reports on L-Ascorbic acid (Vitamin C), a natural ingredient in fresh fruits and vegetables, and diallyl phthalate, a widely-used crosslinking agent for unsaturated polyesters and as a plasticizer.

L-Ascorbic acid was given in the diets to F344/N rats and B6C3F$_1$ mice (0, 25,000, 50,000 ppm) for 103 weeks. Under these conditions, L-ascorbic acid was not carcinogenic for male and female F344/N rats or for male and female B6C3F$_1$ mice.

Diallyl phthalate was administered to B6C3F$_1$ mice in corn oil by gavage (0, 150, 300 mg/kg) five days a week for 103 weeks. Under these conditions, the development of chronic inflammation and hyperplasia in the forestomach in both male and femal B6C3F$_1$ mice was considered to be related to the administration of diallyl phthalate. The development of squamous cell papillomas of the forestomach may also have been related to chemical administration, but the available data are insufficient to indicate a clear cause and effect relationship. An increase in the incidence of male mice with lymphomas was observed, but this increase was considered only to be equivocally related to diallyl phthalate administration.

The results of this bioassay therefore do not indicate that diallyl phthalate is carcinogenic in B6C3F$_1$ mice, although a maximum tolerated dose may not have been achieved. Carcinogenesis studies of diallyl phthalate in Fischer F344/N rats using doses of 0, 50, and 100 mg/kg body weight are currently underway as part of the National Toxicology Program.

Copies of these reports—*Carcinogenesis Bioassay of L-Ascorbic Acid (Vitamin C) in F344/N Rats and B6C3F$_1$ Mice (Feed Study)* (T.R. 247) and *Carcinogenesis Bioassay of Diallyl Phthalate in B6C3F$_1$ Mice (Gavage Study)* (T.R. 242)—are available without charge by writing to: NTP Public Information Office, M.D. B2–04, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541–3991. FTS: 629–3991.

Dated: May 23, 1983.

David P. Rall,

Director.

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Yankton Sioux Tribe; Plan for the Use and Distribution of Yankton Sioux Tribe Judgment Funds in Dockets 342–70 and 343–70 Before the United States Court of Claims

May 24, 1983.

This notice is published in exercise of authority delegated by the Secretary of the Interior of the Assistant Secretary for Indian Affairs by 209 DM 8.

The Act of October 19, 1973 (Pub. L. 93–134, 87 Stat. 466), requires that a plan be prepared and submitted to Congress for the use or distribution of funds appropriated to pay a judgment of the Indian Claims Commission or Court of Claims to any Indian tribe. Funds were appropriated on April 5, 1982, in satisfaction of the award granted to theYankton Sioux Tribe in United States Court of Claims Dockets 342–70 and 343–70. The plan for the use and distribution of the funds was submitted to the Congress with a letter dated December 22, 1982, and was received (as recorded in the Congressional Record) by the House of Representatives on January 6, 1983, and by the Senate on January 27, 1983. The plan became effective on April 22, 1983, as provided by Section 5 of the 1973 Act since Congress did not adopt a resolution disapproving it.

The plan reads as follows:

The funds appropriated on April 5, 1982, in satisfaction of the award granted to the Yankton Sioux Tribe in Dockets 342–70 and 343–70 before the U.S. Court of Claims, less attorney fees and litigation expenses, and including all interest and investment income accrued, shall be invested by the Secretary of the Interior. The principal, and all interest and investment income accrued, shall be utilized by the tribal governing body for general tribal, including emergency, needs, under the provisions of administrative guidelines developed by the Yankton Sioux Business and Claims Committee and approved by the Secretary. None of the funds shall be made available for per capita payments.

None of the funds made available under this plan shall be subject to Federal or State income taxes or be considered income or resources in determining eligibility for assistance under the Social Security Act."

Kenneth Smith,

Assistant Secretary—Indian Affairs.

Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611 (1976) (ANCSA)), will be issued to Doyon, Limited for approximately 200,692 acres. The lands involved are within the Kateel River Meridian, Alaska:

T. 2 N., R. 10 E.	T. 6 N., R. 12 E.
T. 4 N., R. 10 E.	T. 3 N., R. 13 E.
T. 6 N., R. 10 E.	T. 5 N., R. 13 E.
T. 3 N., R. 11 E.	T. 2 N., R. 14 E.
T. 5 N., R. 11 E.	T. 4 N., R. 14 E.
T. 2 N., R. 12 E.	

The decision to issue conveyance will

be published once a week, for four (4) consecutive weeks, in the TUNDRA TIMES upon issuance of the decision. For information on how to obtain copies, contact the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the regulations in 43 CFR Part 4, Subpart E, as revised.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of the decision by personal service or certified mail, return receipt requested, shall have thirty days from the receipt of the decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable effforts have been expended to locate, parties who failed or refused to sign their return receipt, and parties who received a copy of the decision by regular mail which is not certified, return receipt requested, shall have until July 7, 1983 to file an appeal.

Any party known or unknown who is adversely affected by the decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the party to be served with a copy of the notice of appeal is: Doyon, Limited, Land Department, Doyon Building, 201 First Avenue, Fairbanks, Alaska 99701.

B. LaVelle Black,

Section Chief, Branch of ANCSA Adjudication.

The decision to issue conveyance will be published once a week, for four (4) consecutive weeks, in the TUNDRA TIMES upon issuance of the decision. For information on how to obtain copies, contact the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest in lands affected by the decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the regulations in 43 CFR, Part 4, Subpart E, as revised.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office of Conveyance Management (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filling an appeal are:

1. Parties receiving service of the decision by personal service or certified mail, return receipts requested, shall have thirty days from the receipt of the decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt, and parties who received a copy of the decision by regular mail which is not certified, return receipt requested, shall have until July 7, 1983 to file an appeal.

Any party known or unknown who is adversely affected by the decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of Conveyance Management.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

K'oyitl'ost'ina, Limited, 1514 Cushman Street, Room 206, Fairbanks, Alaska 99701

Doyon, Limited, Land Department, Doyon Building, 201 First Avenue, Fairbanks, Alaska 99701

B. LaVelle Black,

Section Chief, Branch of ANCSA Adjudication.

National Park Service

Canaveral National Seashore Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Commission Act that a meeting of the Canaveral National Seashore Advisory Commission will be held at 2:00 p.m. on Thursday, June 23, 1983, in the Titusville City Hall, Council Chambers, 555 S. Washington Avenue (U.S. 1), Titusville, Florida.

The purpose of the Canaveral National Seashore Advisory Commission is to consult and advise with the Secretary of the Interior or his designee on matters of planning, development and operation of the Canaveral National Seashore. The agenda will include: preservation of the ElDora House; update on offshore oil exploration, and North End development proposal.

The members of the Advisory Commission are as follows:

Mr. James Reinman, Chairman
Mr. James Powell
Mr. Ney C. Landrum

Ms. Doris Leeper
Mr. Sion Faulk
Mr. Peter E. Cardiff
Mr. T. C. Wilder

The meeting will be open to the public; however, facilities and space for accommodating members of the public are limited. Any member of the public may file with the commission a written statement concerning the matter to be discussed.

Persons wishing further information concerning the meeting or who wish to submit written statements, may contact Donald Guiton, Superintendent, Canaveral National Seashore, Post Office Box 2538, Titusville, Florida 32780, Telephone 305/867–4675. Minutes of the meeting will be available at Park Headquarters for public inspection approximately 4 weeks after the meeting.

Dated: May 26, 1983.

Robert M. Baker,

Regional Director, Southeast Region.

BILLING CODE 4310–70–M

National Register of Historic Places; Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before May 27, 1983. Pursuant to section 60.13 of 36 CFR Part 60 written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the National Register, National Park Service, U.S. Department of the Interior, Washington, DC 20243. Written comments should be submitted by June 22, 1983.

Carol D. Shull,

Chief of Registration, National Register.

Potential 1983 U.S. World Heritage Nominations; Possible Additions to U.S. Indicative Inventory of Potential Future Nominations

AGENCY: National Park Service, Interior.

ACTION: Notice and request for public comment.

SUMMARY: On February 23, 1983, the Department of the Interior, through the National Park Service, set forth in a public notice the process and schedule that will be used in calendar year 1983 to identify and prepare U.S. nominations to the World Heritage List (48 FR 7640). In addition, the February 23 notice identified the criteria and requirements that U.S. properties must satisfy before nomination for World Heritage status, and solicited public comments and suggestions regarding cultural and natural properties that should be considered as potential U.S. nominations this year. This notice announces and invites comment on the four cultural and seven natural properties described below that have been identified as potential 1983 U.S. World Heritage nominations.

In addition, responses to the February 23 notice identified properties which are not presently included on the Indicative Inventory of Potential Future Nominations to the World Heritage List, normally a prerequisite to be considered for nomination. This notice also describes one such area which the Panel proposes for further study in this regard and invites comment on its possible addition to the Indicative Inventory.

DATES: Written comments or recommendations regarding any property listed herein as a potential 1983 U.S. World Heritage nomination or on possible additions to the Indicative Inventory must be received within 30 days after publication of this notice to ensure full consideration. The final list of proposed 1983 nominations will be selected from among the potential nominations, and will be published in the **Federal Register** by July 1, 1983. A draft nomination document will be prepared for any property selected as a proposed nomination. In November 1983, the Federal Interagency Panel for World Heritage will review the accuracy and completeness of the draft 1983 nomination(s) and will make recommendations to the Assistant Secretary of the Interior for Fish and Wildlife and Parks. The Assistant Secretary subsequently transmits any approved nomination(s) on behalf of the United States to the United Nations Educational, Scientific, and Cultural Organization through the Department of State, by December 15 for evaluation by the World Heritage Committee in a process that could lead to inscription on the World Heritage List by fall 1984. Notice of transmittal of U.S. nominations will be published in the **Federal Register.**

Final decisions with regard to possible additions to the Indicative Inventory will be based upon comments received and upon further study and will be announced in the final **Federal Register** notice, as outlined above, of this year's procedure.

ADDRESS: Written comments or recommendations should be sent to the Director, National Park Service U.S. Department of the Interior, Washington, D.C. 20240. Attention: World Heritage Convention–773.

FOR FURTHER INFORMATION CONTACT: Mr. David G. Wright, Associate Director, Planning and Development, National Park Service, U.S. Department of the Interior, Washington, D.C. 20240, telephone: (202/343–6741).

SUPPLEMENTARY INFORMATION: The Convention Concerning Protection of the World Cultural and Natural Heritage, now ratified by the United States and 66 other countries, has established a system of international cooperation through which cultural and natural properties of outstanding universal value to mankind may be recognized and protected. The Convention seeks to put into place an orderly approach for coordinated and consistent heritage resource protection and enhancement throughout the world.

Participating nations identify and nominate their sites for inclusion on the World Heritage List, which currently includes 136 cultural and natural properties. The World Heritage Committee judges all nominations against established criteria. Under the Convention, each participating nation assumes responsibility for taking appropriate legal, scientific, technical, administrative, and financial measures necessary for the identification, protection, conservation, and rehabilitation of World Heritage properties situated within its borders.

In the United States, the Department of the Interior is responsible for directing and coordinating U.S. participation in the World Heritage Convention. The Department implements its responsibilities under the Convention in accordance with the statutory mandate contained in Title IV of the National Historic Preservation Act Amendments of 1980 (P.L. 96–515; 16 U.S.C. 470a–1, a–2). On May 27, 1982, the Interior Department published in the **Federal Register** the policies and procedures which it uses to carry out this legislative mandate (47 FR 23392). The rules contain additional information on the convention and its implementation in the United States, and identify the specific requirements that U.S. properties must satisfy before they can be nominated for World Heritage status, i.e., the property must have previously been determined to be of national significance, its owner must concur in writing to its nomination, and its nomination must include evidence of such legal protections as may be necessary to ensure preservation of the property and its environment.

The Federal Interagency Panel for World Heritage assists the Department in implementing the Convention by making recommendations on U.S. World Heritage policy, procedures, and nominations. The Panel is chaired by the Assistant Secretary for Fish and Wildlife and Parks, and includes representatives from the Office of the Assistant Secretary for Fish and Wildlife and Parks, the National Park Service, and the U.S. Fish and Wildlife Service within the Department of the Interior; the President's Council on Environmental Quality; the Smithsonian Institution; the Advisory Council on Historic Preservation; National Oceanic and Atmospheric Administration, Department of Commerce; and the Department of State.

Potential 1983 U.S. World Heritage Nominations

The Department of the Interior, through the National Park Service, has identified the following four cultural and seven natural properties as potential 1983 U.S. nominations to the World Heritage List. With one exception, each of these properties is included on the Indicative Inventory of potential future U.S. World Heritage nominations, published in the **Federal Register** on May 6, 1982 (47 FR 19648). The exception, Wright Brothers National Memorial, was formally nominated by the United States in 1980, but it was subsequently withdrawn. A brief description is provided for each property, along with the World Heritage criteria that it appears to satisfy. The final list of proposed 1983 U.S. nominations to the World Heritage List will be selected from among the potential nominations included herein. Identification of a property as a potential 1983 nomination does not confer World Heritage status on it. A draft nomination document will be prepared for each property that is ultimately selected as a proposed 1983 nomination. The Department encourages all interested parties to comment and

make recommendations on the potential nominations, as these comments and additional evaluation will serve as the basis for identifying proposed 1983 nominations.

The following cultural properties, arranged alphabetically by theme, and natural properties, arranged alphabetically by natural region, have been identified as potential 1983 U.S. World Heritage nominations:

I. Cultural Properties

Engineering

Brooklyn Bridge, New York. (40°42'N., 73°57 W.) Built by John A. and Washington A. Roebling, the Brooklyn Bridge was one of the world's first wire cable suspension bridges. The technical problems faced in its construction were solved by solutions that established precedents in bridge building. The cables themselves are supported by two massive Gothic pylons, each with two pointed arches. The main span is 1595 feet. *Criteria:* (iv) an outstanding example of a type of structure which illustrates a significant stage in history.

Hawaiian

PU'UHONUA O HONAUNAU National Historical Park, Hawaii. (19°25'N., 155°55 W.) This area (formerly known as City of Refuge National Historical Park) includes sacred ground, where vanquished Hawaiian warriors, noncombatants and kapu breakers were granted refuge from secular authority. Prehistoric housesites, royal fishponds, and spectacular shore scenery are features of the park. *Criteria:* (v) an outstanding example of a traditional human settlement which is representative of a culture and which has become vulnerable under the impact of irreversible change.

International Affairs

Statue of Liberty National Monument, New Jersey-New York. (40°37 N., 74°03W.) French historian Edouard Laboulaye suggested the presentation of this statue to the United States, commemorating the alliance of France and the United States during the American revolution. The copper colossus was designed by Frederic Auguste Bartholdi and erected according to plans by Gustave Eiffel. *Criteria:* (i) a unique artistic achievement and (iv) an outstanding example of a type of structure which illustrates a significant stage in history.

Science and Industry

Wright Brothers National Memorial/ First Powered Flight, Kitty Hawk, North Carolina. This site is directly and tangibly associated with the event of the flight of the world's first powered and controlled airplane, which was completed by Wilbur and Orville Wright on December 17, 1903. This event revolutionized travel patterns and modes of warfare throughout the world. The invention of the airplane has changed the course of human history, as the pace and scope of life has quickened and human endeavor broadened. *Criteria*: (vi) Directly and tangibly associated with an event of outstanding universal significance. As noted, Wright Brothers National Memorial was previously nominated in 1980 and subsequently withdrawn; it is now being considered for possible renomination. Initial study on possible renomination will focus on the desirability of a closer integration of the site nomination with natural and environmental characteristics which were requisite combination for the first powered flight.

II. Natural Properties

Cascade Range

Crater Lake National Park, Oregon. (42°55' N., 122°06' W.) This unique, deep blue lake lies at the center of Mount Mazama, an ancient volcanic peak that collapsed centuries ago. The lake is bounded by multicolored lava walls extending 500 to 2,000 feet above the lake's waters. *Criteria*: (ii) An outstanding example of significant geological processes, and (iii) contains superlative natural phenomena, formations, and areas of exceptional natural beauty.

Mount Rainier National Park, Washington. (46°52' N., 121°41' W.) Mount Rainier National Park includes the greatest single-peak glacial system in the U.S., radiating from the summit and slopes of an ancient volcano. Dense forests and subalpine meadows here are characteristics of the Cascade Range. *Criteria*: (ii) An outstanding example of significant geological processes and biological evolution; and (iii) contains superlative natural phenomena, formations, and areas of exceptional natural beauty.

North Cascades National Park, Washington. (48°40' N., 121°15' W.) The tall, jagged peaks of the North Cascades intercept moisture-laden winds off the Pacific Ocean, which produce glaciers, waterfalls, and ice falls in this wild alpine region where plant and animal communities thrive in mountain valleys. *Criteria*: (ii) An oustanding example of significant geological processes and biological evolution, and (iii) contains superlative natural phenomena, formations, and areas of exceptional natural beauty.

Chihuahuan Desert

Carlsbad Caverns National Park, New Mexico/*Guadalupe Mountains National Park*, Texas. Rising abruptly from the surrounding desert, the mountain mass known as the Guadalupe Escarpment located within Guadalupe Mountains National Park contains portions of the world's most extensive and significant Permian limestone fossil reef. A tremendous earth fault and unusual flora and fauna are also found here. Carlsbad Caverns National Park, another portion of the Guadalupe Escarpment, includes the largest underground chambers yet discovered, and has many magnificient and curious cave formations, including an array of speleothems. *Criteria*: (i) An outstanding example illustrating a major stage of the earth's evolutionary history, (ii) an outstanding example of significant geological processes, and (iii) contains superlative natural phenomena, formations, and areas of exceptional natural beauty.

Pacific Mountain System

Katmai National Park, Alaska. (58°30' N., 155°20' W.) This area's interior wilderness includes the Valley of 10,000 Smokes, the result of the 1917 volcanic eruption of Mt. Katmai. The eruption produced countless fumaroles, a few of which are still active. *Criteria*: (ii) An outstanding example of significant geological processes, and (iii) contains superlative natural phenomena and formations.

Sierra Nevada

Sequoia/Kings Canyon National Parks, California. (35°40' N., 118°30' W.) A combination of two adjoining national parks, this tract includes Mount Whitney, the tallest mountain in the United States outside of Alaska, Mineral King Valley, and two enormous canyons of the Kings River. Groves of giant sequoia, the world's largest living things, are found here. This area has been designated a Biosphere Reserve. *Criteria*: (ii) An outstanding example of significant geological processes and biological evolution, and (iii) contains superlative natural phenomena and areas of exceptional natural beauty.

Yosemite National Park, California. (37°50' N., 119°30' W.) Granite peaks and domes rise high above broad meadows in the heart of the Sierra Nevada, along with groves of sequoias and related tree species. Mountains, lakes, and waterfalls, including five of the world's ten highest, are found here. *Criteria*: (ii) An outstanding example of significant geological processes and biological evolution, and (iii) contains superlative

natural phenomena, formations, and areas of exceptional natural beauty.

Possible Additions to U.S. Indicative Inventory

Of the sites suggested for consideration this year which are not presently included on the U.S. Indicative Inventory, the Federal Interagency Panel regarded Haleakala National Park in Hawaii as a priority for further study and consideration. It was felt that its addition to the Inventory would provide excellent opportunities for subsequent consideration of a combined nomination including Haleakala and other protected natural zones in the region as a comprehensive coverage of the Hawaiian biota. The integrity and significance of such an integrated nomination would be enhanced from an international heritage perspective.

On the Panel's recommendation, therefore, the Department announces this proposed action and invites comment and suggestions. The proposed addition to the Indicative Inventory would include the following section.

II. Natural Properties

Hawaiian Islands

Haleakala National Park, Hawaii. With an elevation range from sea level to 3000 m, the park has a great variety of habitats. Alpine deserts, subalpine shrubland, dry forests, subalpine grassland, bogs, rainforests, and coastal vegetation all occur within a linear distance of 25 km. Of international botanical significance, over 95 percent of the species, and 20 percent of the genera of flowering plants are found nowhere else on earth. *Criteria:* (i) An outstanding example representing major stages of the earth's evolutionary history, (ii) outstanding example representing ongoing biological evolution, and (iii) contains superlative natural beauty.

Dated: May 23, 1983.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-70-M

North Country National Scenic Trail Advisory Council Meeting

Notice is hereby given, in accordance with the Federal Advisory Committee Act, 86 Stat. 770, 5 U.S.C. App. 1, as amended by the Act of September 13, 1976, 90 Stat. 1247, that a meeting of the North Country National Scenic Trail Advisory Council will be held June 23–24, 1983, beginning at 8:30 a.m. at Stouffer's Cincinnati Towers Hotel, 141 West Sixth Street, Cincinnati, Ohio.

The council was originally established on November 28, 1980, pursuant to provisions of the National Trails System Act, 82 Stat. 919, 16 U.S.C. 1244, to meet and consult with the Secretary of the Interior on matters relating to the administration and development of the North Country National Scenic Trail.

Matters to be discussed at the meeting will include strategies for implementing the comprehensive management plan for the North Country National Scenic Trail and the status of development and management of the trail in each state.

The meeting will be open to the public. Interested persons may submit written statements to the official listed below prior to the meeting.

Further information concerning this meeting may be obtained from Thomas L. Gilbert, Division of Recreation Resources, Midwest Region, National Park Service, 1709 Jackson Street, Omaha, Nebraska 68102, telephone (402) 221–3371 (FTS 864–3371). Minutes of the meeting will be available for public inspection at the Midwest Regional Office 3 weeks after the meeting.

Dated: May 26, 1983.

J. L. Dunning,

Regional Director, Midwest Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Approved Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of Approved Exemptions.

SUMMARY: The motor carriers shown below have been granted exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 1343,* 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: The exemptions will be effective on July 7, 1983. Petitions for reconsideration must be filed by June 27, 1983. Petitions for stay must be filed by June 17, 1983.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: For further information, see the decision(s) served in the proceeding(s) listed below. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 2227, 12th and Constitution Ave., NW., Washington, DC 20423; or call (202) 289–4357 in the DC metropolitan area; or (800) 424–5403 Toll-free outside the DC area.

Agatha L. Mergenovich,

Secretary.

[No. MC–F–15104]

Cressler Trucking, Inc.—Purchase Exemption—Spector Red Ball, Inc. (Debtor-In-Possession)

ADDRESSES: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423 and (2) Petitioners' representative, J. Raymond Chesney, 3177 Irving Blvd., P.O. Box 47407, Dallas, TX 75247, and Lawrence E. Lindeman, P.C., 4660 Kenmore Avenue, Suite 1203, Alexandria, VA 22304.

Pleadings should refer to No. MC–F–15104.

Decided: May 25, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(2), the purchase by Cressler Trucking, Inc. of a portion (as set forth in the appendix) of the operating rights of Spector Red Ball, Inc.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

[No. MC–F–15136]

Steil Transport, Inc.—Purchase Exemption—Sawyer Transport, Inc., (Nathan Yorke, Trustee-In-Bankruptcy)

ADDRESSES: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423 and (2) Petitioner's representative, Carl L. Steiner, 135 South LaSalle Street, Chicago, IL 60603.

Pleading should refer to No. MC–F–15136.

Decided: May 25, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343, the purchase by Steel Transport, Inc. (Steel) (No. MC–153552), and in turn Kenneth R. Paulan, who controls Steel, of portions of the Sub–No. 668X certificate and underlying authorities thereto of Sawyer Transport, Inc. (Nathan Yorke, Trustee-in-bankruptcy) (No. MC–123407). The portions of the Sub-No. 668X certificate and corresponding underlying authorities (in

parentheses) are listed as follows: paragraphs 1a, 1b, 1c, and 1d (base certificate), and paragraphs 44 (Sub-No. 84), 45 (Sub-No. 92), 72 (Sub-No. 136), 89 (Sub-No. 173), 92 (Sub-No. 181), 144 (Sub-No. 286), 176 (Sub-No. 343), 215 (Sub-No. 427), 266 (Sub-No. 506F), and 291 (Sub-No. 556F).

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

[No. MC–F–15128]

Royal Lines, Inc. Purchase Exemption—Universe Company, Inc.—and Irving L. Johnson—Control Exemption—Royal Lines, Inc.

ADDRESSES: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423; and (2) Petitioner's representative: Arlyn L. Westergren, Suite 201, 9202 West Dodge Road, Omaha, NE 68114.

Comments should refer to No. MC–F–15159.

Decided: May 31, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement or prior review and approval under 49 U.S.C. 11343(a), the purchase by Royal Lines, Inc., of that portion of the operating rights of Universe Company, Inc. set forth in Certificate No. MC–136816 (Sub-Nos. 3, 10X (paragraph 3), 11, 13, 14, and 15) which collectively authorize the irregular-route transportation of meats, food and related products and building materials from and to various points located primarily east of the Mississippi River. Additionally under 49 U.S.C. 11343(e), the Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(5), the acquisition of control by Irving L. Johnson, who owns 100 percent of the Universe Company, Inc., of Royal Lines, Inc.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commission Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

[No. MC–F–15131]

Stephen A. Lawrence, Alton S. Lawrence, Jay A. Lawrence and E. Ross Flowers—Control Exemption—T-Line, Inc.

ADDRESSES: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representative: Robert L. Cope, Suite 501, 1730 M Street, N.W., Washington, DC 20036.

Pleadings should refer to No. MC–F–15131.

Decided: May 26, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirements of prior review and approval under 49 U.S.C. 11343(a)(5) the acquisition of control of T-Line, Inc., by Stephen A. Lawrence, Alton S., Lawrence, Jay A. Lawrence and E. Ross Flowers.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

BILLING CODE 7035–01–M

Motor Carriers; Decision-Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 4 at (202) 275-7669.

Volume No. OP4-FC-335

MC-FC-81448. By decision of May 26, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to JAT ENTERPRISES, INC., Glen Morgan, WV, of Permit No. MC-155086, issued May 17, 1982, to RICHMOND TRUCKING, INC. (TRUMAN L. SAYRE, TRUSTEE IN BANKRUPTCY), Glen Morgan, WV, authorizing the transportation of mining equipment, and machinery, between points in the U.S., under continuing contract(s) with A. L. Lee Corporation, of Lester, WV, Fan Systems, Inc., of Beckley WV, R&F Machinery Company, of Glen White, WV, CWS, Inc., of Beckley, WV, The Dosco Corporation of Beckley, WV, and Simmons Mine Supply, of Mabscott, WV. An application for temporary authority has been filed. Representative: John M. Friedman, 2930 Putnam Ave., P.O. Box 426, Hurricane, WV 25526 for applicants (304) 562-3460.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Volume No. OP3-244

Decided: May 26, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

FF 694, filed May 16, 1983. Applicant: ALLIMODE FORWARDING, INC., 565 Old Eastlake Rd., Tarpon Springs, FL 33589. Representative: Alan F. Wohlstetter, 1700 K St., N.W., Washington, D.C. 20006, (202) 833-8884. As a freight forwarder, in connection with the transportation of *used household goods, unaccompanied baggage,* and *used automobiles,* between points in the U.S.

MC 2934 (Sub-151), filed May 9, 1983. Applicant: AERO MAYFLOWER TRANSIT COMPANY, INC., 9998 North Michigan Rd., Carmel, IN 46032. Representative: W. G. Lowry (same address as applicant), (317) 875-1142. Transporting *general commodities* (except classes A and B explosives and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with K Mart Corporation, of Troy, MI.

MC 15735 (Sub-83), filed May 12, 1983. Applicant: ALLIED VAN LINES, INC., 2120 S. 25th Avenue (P.O. Box 4403), Broadview, IL 60153. Representative: Martin T. Boratyn, P.O. Box 4403, Chicago, IL 60680, (312) 681-6377.

Transporting *general commodities* (except classes A and B explosives and commodities in bulk), between points in the U.S., under continuing contract(s) with Northern Telecom, Inc., of Minnetonka, MN.

MC 39085 (Sub-9), filed May 9, 1983. Applicant: WESTLAND FREIGHT LINES, INC., 2727 East Vernon Ave., Los Angeles, CA 90068. Representative: S. S. Eisen, 7510 193rd St., Flushing, NY 11366, (212) 465–8063. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI).

MC 72495 (Sub-28), filed May 9, 1983. Applicant: DON SWART TRUCKING, INC., Box 49, Route No. 2, Wellsburg, WV 26070. Representative: Stephen J. Habash, 100 E. Broad St., Columbus, OH 43215, (614) 228–1541. Transporting *coal and coal products*, between points in the U.S. (except AK and HI), under continuing contract(s) with Consolidation Coal Company, of Pittsburgh, PA.

MC 99535 (Sub-8), filed May 9, 1983. Applicant: STEVEN FREIGHT SERVICE CO., INC., 16 Sturtevant St., Somerville, MA 02145. Representative: Robert L. Cope, Suite 501, 1730 M St., N.W., Washington, DC 20036, (202) 296–2900. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Proctor and Gamble Company, and its subsidiaries, of New York, NY.

MC 109724 (Sub-12), filed May 11, 1983. Applicant: PAUL J. SCHMIT, d.b.a. PAUL J. SCHMIT TRUCKING, 1480 North Springdale Road, Waukesha, WI 53186. Representative: William P. Dineen, 710 North Plankinton Avenue, Milwaukee, WI 53203, (414) 273–7410. Transporting *general commodities* (except classes A and B explosives and household goods), between points in the U.S. (except AK and HI).

MC 140334 (Sub-15), filed May 9, 1983. Applicant: AM-CAN TRANSPORT SERVICE, INC., P.O. Box 859, Anderson, SC 29621. Representative: John T. Wirth, 717 17th St., Suite 2600, Denver, CO 80202, (303) 892–6700. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with American Hoechst Corporation, of Spartanburg, SC.

MC 141215 (Sub-6), filed May 11, 1983. Applicant: HICKS CORNERS TRUCKING, INC., Route 2, Hwy 18, Dodgeville, WI 53533. Representative: Richard A. Westley, 4506 Regent Street, Suite 100, P.O. Box 5086, Madison, WI 53705–0086, (608) 238–3119. Transporting *such commodities* as are dealt in by mail order catalogue stores, between points in the U.S. (except AK and HI), under continuing contract(s) with Lands' End Yacht Stores, Inc., of Dodgeville, WI.

MC 145925 (Sub-8), filed May 17, 1983. Applicant: TRANS CONTINENTAL LEASING, LTD., 8920 Pershall Rd., Hazelwood, MO 63042. Representative: Robert M. O'Donnell, 145 W. Wisconsin Ave., Neenah, WI 54956, (414) 722–2848. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI). Condition: the person or persons who appear to be engaged in common control of another regulated carrier must either file an application under 49 U.S.C. 11343(a), or submit an affidavit stating why Commission approval is unnecessary, or submit a petition of exemption to the Secretary's Office. In order to expedite issuance of any authority please submit a copy of the affidavit or petition or proof of filing the application(s) for common control to Team 3, Room 2158.

MC 147885 (Sub-2), filed May 13, 1983. Applicant: MANUEL & AMY VEGA, d.b.a. VEGA CONSTRUCTION & TRUCKING 514 So. 4th St., P.O. Box 1630, Elko, NV 89801. Representative: Manuel Vega (same address as applicant), (702) 738–5381. Transporting (1) *ores and minerals*, (2) *clay, concrete, glass or stone products*, and (3) *machinery*, between points in Elko, Eureka, Humboldt, Lander and White Pine Counties, NV.

MC 149215 (Sub-2), filed May 10, 1983. Applicant: RAYMOND SNELL, d.b.a. SNELL & SONS, 5025 Ursula Way, Denver, CO 80239. Representative: Raymond Snell (same address as applicant), (303) 373–1283. Transporting *general commodities* (except classes A and B explosives), between points in the U.S. (except HI).

MC 159384 (Sub-1), filed May 9, 1983. Applicant: DAVID KURK, INC., P.O. Box 112, Eitzen, MN 55931. Representative: Stephen F. Grinnell, 1600 TCF Tower, Minneapolis, MN 55402, (612) 333–1341. Transporting *Chemicals and related products*, between points in IA and MN, on the one hand, and, on the other, points in IA, MN, MO, NE, ND, SD, and WI.

MC 159505 (Sub-1) filed May 11, 1983. Applicant: KRT ENTERPRISES, INC., 4611 St. Johns Ave., Jacksonville, FL 32210. Representative: Kenneth R. Thomas, 3742 Ponce De Leon Ave., Jacksonville, FL 32217, (904) 731–2684. Transporting *food and related products*, between points in Orange County, FL, on the one hand, and, on the other, points in GA, SC, and NC, under continuing contract(s) with Meyers Bakery of Orlando, FL.

MC 167524, filed May 16, 1983. Applicant: JACK FANKHANEL, d.b.a. FANKHANEL OIL COMPANY, Sabin, MN 56580. Representative: Richard P. Anderson, Federal Square, 112 Roberts St., P.O. Box 2581, Fargo, ND 58108, (701) 235–3300. Transporting *petroleum products*, between points in ND and MN.

MC 167935, filed May 9, 1983. Applicant: SCHWEINFURTH TRANSFER, INC., P.O. Box 2622, Iowa City, IA 52244. Representative: Kenneth F. Dudley, P.O. Box 279, Ottumwa, IA 52501, (515) 682–8154. Transporting *general commodities* (except classes A and B explosives and household goods), between points in the U.S. (except AK and HI), under continuing contract(s) with Procter & Gamble Company, and its subsidiaries, of Cincinnati, OH, and H.P. Smith Paper Co., of Iowa City, IA.

MC 167945 filed May 9, 1983. Applicant: KENNETH TIMMONS, d.b.a. KENNETH TIMMONS TRUCKING COMPANY, P.O. Box 54, Fyffe, AL 35971. Representative: John W. Cooper, P.O. Box 162, Mentone, AL 35984, (205) 634–4885. Transporting *floor covering materials*, between points in the U.S. (except AK and HI), under continuing contract(s) with Mohawk International, d.b.a. International Supply Company, Inc., and its subsidiaries and divisions, of Portland, OR.

MC 167964 filed May 11, 1983. Applicant: BATS, INC., 1783 Forest Avenue, Des Plaines, IL 60018. Representative: Irwin D. Rozner, 134 North LaSalle Street, Chicago, IL 60602, (312) 782–6937. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except HI), under continuing contract(s) with Brokerage and Transportation Sales, Inc., of Rosemont, IL.

MC 168085, filed May 16, 1983. Applicant: P. D. Q. TRANSPORTATION, INC., Box 313 Highway 45 West, Humboldt, TN 38343. Representative: Edward G. Grogan, 20th Fl. First TN Bldg., Memphis, TN 38103, (901) 526–2000. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in TN, on the one

hand, and, or the other, points in the U.S. (except AK and HI).

BILLING CODE 7035–01–M

[Finance Docket No. 30095]

Rail Carriers; Anheuser-Busch Companies, Inc., et al.—Control Exemption—C-Trans, Inc., Busch Industrial Products Corporation and Williamsburg Transport, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Pursuant to 49 U.S.C. 10505, the Interstate Commerce Commission exempts the acquisition of control over C-Trans, Inc., Busch Industrial Products Corporation, and Williamsburg Transport, Inc., by Anheuser-Busch Companies, Inc., Campbell Taggert, Inc., and Merico, Inc.; and Manufacturers Railway Company, from the requirements of prior approval under 49 U.S.C. 11343. The petition for exemption from filing Form M is denied.

DATES: This exemption will be effective on July 7, 1983. Petitions for reconsideration must be filed by June 27, 1983, and petitions for stay must be filed by June 17, 1983.

ADDRESSES: Send pleadings to:

(1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representative: William H. Borghescuri, Jr., 1150 17th St., NW., Suite 1000, Washington, DC 20036

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, D.C. 20423, or call 289–4357 (D.C. Metropolitan Area) or toll free (800) 424–5403.

Decided: May 20, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Chairman Taylor dissented in part with a separate expression.

Agatha L. Mergenovich,

Secretary.

Chairman Taylor, dissenting in part:

I find extremely disturbing the majority's reliance on Section 11343(e) as a vehicle to grant the petition in this case. There is nothing persuasive in the record to justify the use of this Section as a basis for granting the sought exemption. There is, however, much in the record to recommend against such use.

In the first place, Section 11343(e), as Section 21 of the Bus Regulatory Reform Act, was not the product of the House Committee that oversees the Commission's rail matters. Significantly, the House Committee involved was the one that has jurisdiction over the Commission's motor carrier affairs. Clearly, no one who considered the legislation gave any thought whatsoever to the notion that this exemption would be used to exempt rail carrier transactions from the agency's regulation. Not the ICC which proposed the exemption, and not the Congress which enacted it. The majority, therefore, creates by fiat what Congress neither contemplated nor sanctioned.

An even more troubling aspect of the majority's decision is the scope of the exemption that now applies to rail carriers. Secton 21 of the Bus Act also amended 49 U.S.C. 11341(a) to provide that a carrier participating in a transaction exempted under Sections 11341 to 11351 is exempt: "from the *antitrust laws* and from all other law, including State and municipal law, as necessary to let that person carry out the transaction." (Emphasis added)

Accordingly, the majority has conferred anti-trust immunity on any rail carrier that can meet the terms of Section 11343(e)—a result that was surely not intended by Congress and one that may well produce embarrassingly anti-competitive effects.

[FR Doc. 83–15148 Filed 6–6–83; 8:45 am]

BILLING CODE 7035–01–M

[Ex Parte No. 387]

Rail Carriers; Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275–7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be constitued to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

*Note.—Tariff Supplements advancing contracts' effective date shall refer to this decision for authority.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Johns-Manville Sales Corp., et al.; Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determination regarding eligibility to apply for adjustment assistance issued during the period May 23, 1983–May 27, 1983.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) that a significant number or proportion of the workers in the workers' firm, or an apropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increase of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-13,710; Johns-Manville Sales Corp., Waukegan, IL

TA-W-13,745; Revere Cooper & Brass, Inc., Revere Div., Rome, NY

TA-W-13,736; United States Steel Corp., Trenton Plant, Fairless Works, Trenton, NJ

TA-W-13,807; Joslyn Stainless Steel, Fort Wayne, IN

TA-W-13,801; Patro Knitting Co., Inc., Burlington, NJ

TA-W-13,760; American Lace Mills, Inc., Hackensack, NJ

TA-W-13,892; Lebanon Steel Foundry, Lebanon, PA

TA-W-13,754; L.C.D. Fashions, Inc., Kearny, NJ

In the following cases the investigation revealed that criterion (3) has not been met. Increased imports did not contribute importantly to workers separations at the firm.

TA-W-13,986; Westinghouse Elevator Co., Randolph, NJ

TA-W-13,935; Exploration Logging, Inc., Sacramento, CA

TA-W-13,925; Main Woods, Livermore Falls, ME

TA-W-13,806; Climax Molybdenum Co., Climax, CO

TA-W-14,159; Climax, Molybdenum Co., Empire, CO

Affirmative Determination

TA-W-13,738; Anchor Hocking Corp., Plant #90, Clarksburg, WV

A certification was issued covering all workers separated on or after January 1, 1982.

TA-W-13,897; Wadell Equipment Co., Inc., Edison, NJ

A certification was issued covering all workers of the firm engaged in employment related to the production of automatic and numerically controlled chucking machines who became separated on or after January 1, 1982.

TA-W-14,532; Birmingham Southern Railroad Co., Fairfield, AL

A certification was issued covering all workers separated on or after February 7, 1982.

TA-W-13,905; Roane Limited, Rockwood, TN

A certification was issued covering all workers separated on or after October 20, 1981.

TA-W-13,767; Kingston Dress Co., Fayeteville, TN

A certification was issued covering all workers of the firm separated on or after August 24, 1981.

TA-W-13,844; U.S. Steel Corp., Oilwell Supply Div., Garland Works, Garland, TX

A certification was issued in response to a petition received on October 4, 1982 covering all workers separated on or after January 1, 1982.

TA-W-13,749; Butler Garment Co. (A Plant Facility of Bobbie Brooks Div., Bobbie Brooks, Inc.), Butler, PA

A certification was issued covering all workers separated on or after November 29, 1981 and before January 1, 1983.

TA-W-13,858; Cyclops Corp., Tex-Tube Div., Houston, TX

A certification was issued covering all workers of the firm engaged in employment related to the production of carbon steel pipe, tubing and structural shapes who became separated on or after January 1, 1982.

TA-W-13,683; Bethlehem Steel Corp., Seattle Plant, Seattle, WA

A certification was issued covering all workers engaged in employment related to the production of bars and barsize shapes (other than reinforcing bars), structural shapes, plate, industrial fasteners and basic and semi-finished steel separated on or after July 27, 1981.

TA-W-13,831; Sibley Machine & Foundry Corp., Machine Div., South Bend, IN

A certification was issued covering all workers of the firm separated on or after February 21, 1982.

TA-W-13,832; Sibley Machine & Foundry Corp., Foundry Div., South Bend, IN

A certification was issued covering all workers of the firm separated on or after February 21, 1982.

TA-W-13,909; D.N. Pariso Industrial Glove Co, Knox, IN

A certification was issued covering all workers separated on or after September 27, 1981.

TA-W-13,910; Indiana Fabrics, Knox, IN

A certification was issued covering all workers separated on or after September 27, 1981.

I hereby certify that the aforementioned determinations were issued during the period May 23, 1983—May 27, 1983. Copies of these determinations are available for inspection in Room 9120, U.S. Department of Labor, 601 D. Street, N.W., Washington, D.C. 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: May 31, 1983.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 83-15204 Filed 6-6-83; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-13,947]

Industrial Fabricating and Engineering Co., Howell, New Jersey; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on November 8, 1982 in response to a worker petition received on November 4, 1982 which was filed by the Company official on October 29, 1982 on behalf of workers and former workers producing pressure vessels and accessories at Industrial Fabrication and Engineering Company, Howell, New Jersey.

The petitioner, Mr. William W. Seiber, owner of Industrial Fabrication and Engineering Company, Howell, New Jersey requested withdrawal of petition TA-W-13,947 in a letter dated April 29, 1983. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this May 31, 1983.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 83-15200 Filed 6-6-83; 8:45 am]

BILLING CODE 4510-30-M

Labor Surplus Area Classifications Under Executive Orders 12073 and 10582; Additions to Annual List of Labor Surplus Areas

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

DATE: The additions to the annual list are effective on June 1, 1983.

SUMMARY: The purpose of this notice is to announce changes to the annual list of labor surplus areas.

FOR FURTHER INFORMATION CONTACT: James W. Higgins, United States Employment Service (Attention: TEEPA) 601 D Street, N.W., Washington, D.C. 20213. Telephone: 202-376-6700.

SUPPLEMENTARY INFORMATION: Executive Order 12073 requires executive agencies to emphasize procurement set-asides in labor surplus areas. The Secretary of Labor is responsible under that Order for classifying and designating areas as labor surplus areas.

Under Executive Order 10582 executive agencies may reject bids or offers of foreign materials in favor of the lowest offer by a domestic supplier, provided that the domestic supplier undertakes to produce substantially all of the materials in areas of substantial unemployment as defined by the Secretary of Labor. The preference given to domestic suppliers under Executive Order 10582 has been modified by Executive Order 12260. Federal Procurement Regulations Temporary Regulation 57 (41 CFR Chapter 1, Appendix), issued by the General Services Administration on January 15, 1981 (46 FR 3519), implements Executive Order 12260. Executive agencies should refer to Temporary Regulation 57 in procurements involving foreign businesses or products in order to assess its impact on the particular procurements.

The Department of Labor's regulations implementing Executive Orders 12073 and 10582 are set forth at 20 CFR Part 654, Subparts A and B. Subpart A requires the Assistant Secretary of Labor to classify jurisdictions as labor surplus areas pursuant to the criteria specified in the regulations and to publish annually a list of labor surplus areas. Pursuant to those regulations the Assistant Secretary of Labor published the annual list of labor surplus areas on June 4, 1982 (47 FR 24474).

Subpart B of Part 654 states that an area of substantial unemployment for purposes of Executive Order 10582 is any area classified as a labor surplus area under Subpart A. Thus, labor surplus areas under Executive Order 12073 are also areas of substantial unemployment under Executive Order 10582.

The areas described below have been classified by the Assistant Secretary of Labor as labor surplus areas pursuant to 20 CFR 654.5(b) (48 FR 15615, April 12, 1983) and are added to the annual list of labor surplus areas, effective June 1, 1983. The following additions to the annual list of labor surplus areas are published for the use of all Federal agencies in directing procurement activities and locating new plants or facilities.

Signed at Washington, D.C. on May 25, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

Additions to the Annual List of Labor Surplus Areas

June 1, 1983

Labor Surplus Area	*Civil Jurisdiction Included*
Alabama

BILLING CODE 4510-30-M

[TA-W-13,544]

National Steel Corp.; Weirton Steel Division, Weirton, West Virginia; Negative Determination on Reconsideration

On April 14, 1983, the Department issued an Affirmative Determination Regarding Application for Reconsideration for workers and former workers of National Steel Corporation's Weirton Steel Division at Weirton, West Virginia. This determination was published in the **Federal Register** on April 22, 1983 (48 FR 17,419).

The union in its application for reconsideration claims that the Department's denial notice was based specifically upon import and sales data that were combined in such a manner as to nullify what were absolute and relative increases in imports of similar products during the relevant time period. The union also claims that (1) the Department did not report on customer purchases of imported hot rolled steel and galvanized and weirzin steel in 1981 and that (2) the customer purchase information for cold rolled steel and tin plate in 1981 should commence with the April 1, 1981 date as stated in the worker petition and not on January 1, 1981.

For all products produced at the Weirton Steel Division the Department's original determination was based on the results of a customer survey which revealed that increased imports of like of directly competitive products were not an important factor contributing to declines in sales or production and to the unemployment of workers. The Department's decision did not turn on the question of whether or not imports had increased; therefore, the question of an appropriate base period as raised by the petitioners with respect to increased imports does not enter into the decision.

In the customer survey it was found for all products that customers that

imported while reducing purchases from the Weirton Steel Division did not account for important amounts of the decline in sales of the division's products.

Conclusion

After reconsideration, I reaffirm the original denial of eligibility to apply for adjustment assistance to workers and former workers of National Steel Corporation's Weirton Steel Division, Weirton, West Virginia.

Signed at Washington, D.C. this 31st day of May 1983.

Robert A. Schaerfl,

Director, Office of Program Management, UIS.

BILLING CODE 4510-30-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the Department issuing this form.

The title of the form.

The Agency form number, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small business or organizations are affected.

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental clearance Officer, Paul E. Larson, Telephone 202-523-6331. Comments and questions about the items on this list should be directd to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S-5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202-395-6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Extension (Burden Change)

Employment Standards Administration
Notice of Termination, Suspension, Reduction, or Increase in Benefit Payment
CM-908
On occasion
Business or other for-profit; small businesses or organizations
15,000 respondents; 3,000 hours

Once the coal mine operator has begun to pay benefits, the Department of Labor must be notified of any changes in the amount of benefits paid. The CM-908 allows DOL to monitor all benefit payments made to beneficiaries by coal mine operators.

Signed at Washington, D.C. this 2d day of June, 1983.

Paul E. Larson,

Department Clearance Officer.

BILLING CODE 4510-27-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 83-53]

NASA Advisory Council (NAC), Space Applications Advisory Committee (SAAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Applications Advisory Committee.

DATE: June 22, 1983, 8:30 a.m. to 5:00 p.m.; June 23, 1983, 8:30 a.m. to 3:00 p.m.

ADDRESS: National Aeronautics and Space Administration, Room B226-A, 600 Independence Avenue SW, Washington, D.C. 20546.

FOR FURTHER INFORMATION CONTACT: Dr. William P. Raney, Code E, National Aeronautics and Space Administration, Washington, D.C. 20546 (202/755-4826).

SUPPLEMENTARY INFORMATION: The NAC Space Applications Advisory Committee consults with and advises the Council as a whole and NASA on plans for, work in progress on, and accomplishments of NASA's Space Appications programs. The meeting will be open to the public up to the seating capacity of the room (approximately 50 persons including Committee members and other participants). Topics under discussion at this meeting will include discussion of the role of the Space Applications Advisory Committee, and an overview of the Office of Space Science and Applications.

Type of meeting: Open.

Agenda

June 22, 1983—8:30 a.m.—Introduction. Announcements, Meeting Logistics.

Other Administrative Matters.

9:00 a.m.—NASA Applications Program—Perspective.

10:30 a.m.—Overview of Office of Space Science and Applications Programs.

5:00 p.m.—Adjourn.

June 23, 1983—8:30 a.m.—Overview of Office of Space Science and Applications Programs (continued).

1:00 p.m.—Arrangements for next meeting, assignment, general discussion, meeting summary.

3:00 p.m.—Adjourn.

Ann P. Bradley,

Acting Associate Administrator for Management, Office of Management.

May 31, 1983.

BILLING CODE 7510-01-M

[Notice 83-54]

NASA Wage Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub.

L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Wage Committee.

DATE: June 30, 1983, 1:30 p.m. to 2:30 p.m.

ADDRESS: National Aeronautics and Space Administration, Room 5092, Federal Building 6, 400 Maryland Avenue SW, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Ms. Deborah C. Green, Code NPC–28, National Aerounautics and Space Administration, Washington, DC 20546 (202/755–3732).

SUPPLEMENTARY INFORMATION: The Committee's primary responsibility is to consider and make recommendations to the NASA Director of Personnel Programs Division on all matters involved in the development and authorization of a Wage Schedule for the Cleveland, Ohio, wage area, pursuant to Pub. L. 92–392. The Committee, Chaired by Mr. William Dey, consists of 6 members. During this meeting the Committee will consider wage data, local reports, recommendations, statistical analyses and proposed wage schedules reviewed therefrom. Discussions of these matters in a public session would consitute release of confidential commercial and financial information obtained from private industry. Since this session will be concerned with matters listed in 5 U.S.C. 552b(c)(4), it has been determined that this meeting will be entirely closed to the public. However, members of the public who may wish to do so, are invited to submit material in writing to the Chairperson concerning matters felt to be deserving of the Committee's attention.

Type of Meeting: Closed.

Purpose of Meeting: The NASA Wage Committee will recommend to the NASA Wage Fixing Authority the proposed wage schedule to be adopted.

Ann P. Bradley,

Acting Associate Administrator for Management.

May 27, 1983.

BILLING CODE 7510–01–M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–329A, 330A]

Consumers Power Co.; Finding of no Significant Antitrust Changes and Time for Filing of Requests for Reevaluation

The Director of Nuclear Reactor Regulation has made an initial finding in accordance with Section 105c(2) of the Atomic Energy Act of 1954, as amended, that no significant (antitrust) changes in the licensee's activities or proposed activities have occurred subsequent to the previous contruction permit reviews of Midland Units 1 and 2 by the Attorney General and the Commission. The finding is as follows:

"Section 105c(2) of the Atomic Energy Act of 1954, as amended, provides for an antitrust review of an application for an operating license, if the Commission determines that significant changes in the licensee's activities or proposed activities have occurred subsequent to the previous construction permit review. The Commission has delegated the authority to make the 'significant change' determination with respect to nuclear reactors to the Director, Office of Nuclear Reactor Regulation.

"The licensee, Consumers Power Co., was issued construction permits on December 15, 1972 for Units 1 and 2 of the Midland Plant. Based upon examination of events since issuance of the Midland Nuclear Generating Station construction permits to the licensee, the staffs of the Office of Nuclear Reactor Regulation and the Office of the Executive Legal Director, hereafter referred to as the 'staff' have jointly concluded, after consulting with the Department of Justice, that the changes that have occurred since the antitrust construction permit review are not 'significant' in an antitrust context to require a second formal antitrust review at the operating license stage of the application for licenses. Staff has concluded that those changes which have occurred either are not reasonably attributable to the licensee or do not have antitrust implications that would likely warrant some Commission remedy. In reaching this conclusion, the staff considered the structure of the electric utility industry in Michigan, the events relevant to the Midland construction permit antitrust review, and the events that have occurred subsequent to that review.

"The conclusion of the staff's analysis is as follows:

'The activities of Consumers Power subsequent to the construction permit antitrust review have been focused on implementing the license conditions attached to the Midland construction permits.

'Municipal and cooperative electric utilities in Michigan are coordinating their planning and operations with Consumers Power and have purchased ownership interests in some of the company's generation and transmission facilities. In addition, Consumers Power has filed transmission and wholesale service tariffs for similar service to any electric utility located in Consumers Power's service area. Under these agreements, Consumers Power provides firm bulk power at wholesale, emergency power, economy energy, and short term capacity and energy.

'Thus, the changes in the applicant's activities since the completion of the Midland construction permit antitrust review do not have any antitrust implications and, therefore, do not require a further, formal

antitrust review at the operating license stage.

"Based on the staff's analysis, it is my finding that a formal operating license antitrust review of the licensee with respect to the Midland Nuclear Generating Station, Units 1 and 2 is not required."

Signed on April 23, 1983, by Harold R. Denton, Director, Office of Nuclear Reactor Regulation.

Any person whose interest may be affected pursuant to this initial determination may file with full particulars a request for reevaluation with the Director of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 by (30 days). Requests for a reevaluation of the no significant changes determination shall be accepted after the date when the Director's finding becomes final but before the issuance of the OL only if they contain new information, such as information about facts or events of antitrust significance that have occurred since that date, or information that could not reasonably have been submitted prior to that date.

For the Nuclear Regulatory Commission.

Wm. H. Regan, Jr.,

Chief Site Analysis Branch, Division of Engineering, Office of Nuclear Reactor Regulation.

[FR Doc. 83-15197 Filed 6-6-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 40-2061]

Kerr-McGee Chemical Corp.; Opportunity for a Hearing; Availability of Final Environmental Statement for the Rare Earths Facility, West Chicago, Du Page County, Illinois

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that a Final Environmental Statement (FES) prepared by the Commission's Office of Nuclear Material Safety and Safeguards, related to the decommissioning of Kerr-McGee Chemical Corporation's Rare Earths Facility located in West Chicago, Illinois, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555. The FES is also available for inspection at the Commission's Local Public Document Room in the West Chicago Public Library, 332 E. Washington Street, West Chicago, Illinois 60185. The FES is being provided to the State Clearinghouse, Bureau of the Budget, Lincoln Tower Plaza, 524 S. Second Street, Springfield, Illinois 62706. The FES is also being sent to the Metropolitan Clearinghouse, Northeastern Illinois Planning Commission, 400 West Madison Street, Chicago, Illinois 60606. Requests for copies of the Final Environmental Statement (identified as NUREG-0904) should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Division of Technical Information and Document Control.

The licensee's stabilization plan and subsequent documents are also available for public inspection at the above-designated locations. Notice of the availability of the applicant's stabilization plan and the Commission's intent to prepare a FES was published in the **Federal Register** on December 13, 1979 (44 FR 72246). The notice of availability of the Draft Environmental Statement (DES) for the Kerr-McGee Rare Earths Facility and request for comments from interested persons was published in the **Federal Register** on May 20, 1982 (47 FR 21943). The comments received from federal, state and local agencies and interested members of the public and the NRC staff's responses to these comments have been included as an appendix to the FES.

Kerr-McGee's proposed decommissioning and stabilization plan involves demolition of the existing buildings, removal of building rubble and contaminated soil to an adjacent disposal site, and stabilization of building rubble, contaminated soil, ore tailings and ore residues on the adjacent disposal site. The Kerr-McGee proposed plan and alternatives to the plan are discussed in the FES. The NRC staff alternative of choice is stabilization and storage of the waste onsite on the same area proposed by Kerr-McGee for disposal, with future reevaluation of the options of onsite disposal or removal to another site at a time when an established offsite disposal site becomes available. The NRC staff believes that the wastes can be stored onsite in a safe and environmentally sound manner. Both the NRC alternative and the KM proposal would utilize similar engineering plans to contain the wastes.

Notice of Opportunity for a Hearing

By July 11, 1983, the licensee may file a request for a hearing; and, by the same date, any person whose interest may be affected by this proceeding may file a request for a hearing, in the form of a petition to the Commission, with respect to the licensing actions recommended in the FES for decommissioning of the Kerr-McGee Rare Earths facility. A petition for a hearing must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the specific issues or aspects of the proceeding as to which a hearing is desired. A petition must specify with particularity the facts on which the petitioner relies as to both his interest and with regard to each issue or aspect of the proceeding on which a hearing is requested. Petitions stating issues relating only to matters outside the Commission's jurisdiction will be denied.

Petitions must be filed in accordance with this Federal Register Notice, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service, Branch, by July 11, 1983. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street, N.W., Washington, D.C. 20036 attorney for the licensee.

All petitions will be acted upon by the Commission or by the Commission's designee. Petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions. In the event no request for a hearing or petition for a hearing is filed by July 11, 1983, the NRC staff may, upon satisfactory completion of all safety evaluations and without further prior notice, issue a license amendment implementing the NRC staff's alternative of choice.

Dated at Silver Springs, Maryland, this 27th day of May, 1983.

For the Nuclear Regulatory Commission.

R. G. Page,

Chief, Uranium Fuel Licensing Branch, Division of Fuel Cycle and Material Safety, NMSS.

BILLING CODE 7590-01-M

[Docket No. 50-370]

McGuire Nuclear Station, Unit No. 2; Issuance of Amendment to Facility Operating License

On March 3, 1983, the U.S. Nuclear Regulatory Commission (the Commission) issued Facility Operating License No. NPF-17 to the Duke Power Company (the licensee) authorizing operation of the McGuire Nuclear Station, Unit 2, (the facility) at reactor core power levels not in excess of 3411 megawatts thermal in accordance with the provisions of the License, the Technical Specifications and the Environmental Protection Plan with a

condition limiting operation to five percent of full power (170 megawatts thermal).

The Commission has now issued Amendment No. 2 to Facility Operating License No. NPF–17 which authorizes operation of the McGuire Nuclear Station, Unit 2, at reactor core power levels not in excess of 3411 megawatts thermal in accordance with the provisions of the amended license. As part of this authorization, the amendment also changes the license conditions related to environmental qualification of equipment and hydrogen control measures and adds a license condition requiring testing of reactor trip breakers. The amendment is effective as of the date of issuance.

The McGuire Nuclear Station, Unit 2, is a pressurized water reactor located in Mecklenburg County, North Carolina, approximately 17 miles northwest of Charlotte, North Carolina.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter 1, which are set forth in the amended license. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the **Federal Register** on October 7, 1974 (39 FR 36037). The increase in power level authorized by this amendment and the conditions contained therein are encompassed by that prior notice.

The Commission has determined that the issuance of this amendment will not result in any environmental impacts other than those evaluated in the Final Environmental Statement since the activity authorized by the license is encompassed by the overall action evaluated in the Final Environmental Statement.

For further details in respect to this action, see (1) Amendment No. 2 to License NPF–17; (2) the Commission's Safety Evaluation Report, dated March 1978 (NUREG–0422), and Supplements 1 through 7; (3) the Final Safety Analysis Report and Amendments thereto; (4) the Final Environmental Statement, dated April 1976 (NUREG–0063) and supplements thereto; (5) the Intitial Decisions of the Atomic Safety and Licensing Board, dated April 18, 1979; and May 26, 1981, the Decision of the Atomic Safety and Licensing Appeal Board dated March 30, 1982, and the Commission's Memorandum dated July 27, 1982.

These items are available at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223. A copy of Amendment No. 2 to Facility Operating License NPF–17 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing. Copies of the Safety Evaluation Report and its Supplements (NUREG–0422) and the Final Environmental Statement and its Supplements (NUREG–0063) may be purchased at current rates from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, and through the NRC GPO sales program by writing to the U.S. Nuclear Regulatory Commission, Attention: Sales Manager, Washington, D.C. 20555. GPO deposit account holders may call 301–492–9530.

Dated at Bethesda, Maryland, this 27th day of May 1983.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Chief, Licensing Branch No. 4, Division of Licensing.

[FR Doc. 83–15194 Filed 6–6–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–220]

Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station, Unit No. 1); Exemption

I

Niagara Mohawk Power Corporation (the licensee) is the holder of Facility Operating License No. DPR–63 (the license) which authorizes operation of the Nine Mile Point Nuclear Station, Unit No. 1 (the facility) at steady state reactor power level not in excess of 1850 megawatts thermal. The facility is a boiling water reactor located at the licensee's site in Oswego County, New York. The license provides, among other things, that it is subject to all rules, regulations and Orders of the Commission.

II

Section 50.54(q) of 10 CFR Part 50 requires a licensee authorized to operate a nuclear power reactor to follow and maintain in effect emergency plans which meet the standards of 10 CFR 50.47(b) and the requirements of Appendix E to 10 CFR Part 50. Section IV.F.1 of Appendix E requires each licensee to conduct an emergency preparedness exercise annually. The last annual exercise at Nine Mile Point was held on September 16, 1981.

On December 23, 1982 an exemption was granted which required that the next emergency preparedness exercise at the Nine Mile Point Nuclear Station, Unit No. 1 be conducted anytime during the twelve month period prior to achieving five percent of rated power at the completion of the current extended maintenance outage. An exercise scheduling meeting held on October 27, 1982 among representatives of the U.S. Nuclear Regulatory Commission, the Federal Emergency Management Agency (FEMA), Niagara Mohawk New York State and Oswego County officials established September 28, 1982 for the next annual emergency preparedness exercise for Nine Mile Point 1. However, the licensee expects to achieve/exceed five percent of rated power operation and to be on line prior to the scheduled annual exercise. By letter dated March 9, 1983, the licensee requested a revised exemption from the schedular requirements of Section IV.F.1 of Appendix E.

The licensee states that within recent months, discussions with New York State and FEMA confirmed that September 28, 1983 continued to be a mutually acceptable date and earlier proposed dates would interfere with other facilities' exercises, and therefore would be unacceptable. Accordingly, the licensee requested an additional exemption which extends the December 23, 1982 exemption so that the Nine Mile Point Annual Emergency Plan Exercise may be conducted during the week of September 28, 1983.

The licensee had committed to continual training of personnel to ensure that the Nine Mile Point Emergency Plan would remain fully functional during the period of the delay in performing the emergency preparedness exercise. Therefore, allowing Nine Mile Point Unit 1 to exceed five percent of rated power operation before conducting the next annual exercise will not adversely affect the overall state of emergency preparedness at the Nine Mile Point, Unit No. 1 Station. Additionally, the James A. Fitzpatrick Nuclear Power Plant, which is adjacent to the Nine Mile plant, successfully conducted a full-scale exercise on August 11, 1982, thus providing assurance regarding the capability of State and local officials to respond to an emergency.

Based on the above, we conclude that the licensee's request to conduct the next emergency preparedness exercise after the Nine Mile plant exceeds five percent of rated power is reasonable and that granting the request will not

adversely affect the state of emergency preparedness at Nine Mile Point. We conclude, therefore, that the licensee's request for an additional exemption should be granted.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the exemption requested by the licensee's letters of August 20 and October 6, 1982, as revised by letter dated March 9, 1983, as discussed above, is authorized by law and will not endanger life or property or the common defense and security, and is otherwise in the public interest. The revised exemption is hereby granted as follows:

In order to allow for offsite agencies' schedular constraints, the next emergency preparedness exercise at the Nine Mile Point Nuclear Station, Unit No. 1 shall be conducted during the week of September 28, 1983. This exercise shall include appropriate participation by the State and local authorities.

The NRC staff has determined that the granting of this additional Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 27th day of May 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 83-15196 Filed 6-6-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-361]

Southern California Edison Co., et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed no Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-10, issued to Southern California Edison Company, San Diego Gas & Electric Company, the City of Riverside, California and the City of Anaheim, California (the licensees), for operation of the San Onofre Nuclear Generating Station, Unit 2 located in San Diego County, California.

The amendment would grant temporary exceptions to the facility Technical Specifications (which presently require immediate corrective action to return at least one reactor coolant loop to operation) to permit natural circulation tests to be performed during the startup test program with no reactor coolant loops in operation in accordance with the licensees' application for amendment dated January 6, 1983.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility or a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission's proposed determination is based on its finding that the natural circulation tests will be conducted using operating procedures that provide compensatory measures that maintain a commensurate level of safety as the Technical Specifications that the proposed amendment would temporarily relax. Such compensatory measures include termination of the test and restoration of at least one reactor coolant loop to operation in the event of abnormal system parameters.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Docketing and Service Branch.

By July 7, 1983, the licensees may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any persons whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary of the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR § 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to

present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to George W. Knighton: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attn.: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111, attorneys for the licensees.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment and the licensees' submittal of April 15, 1982, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington D.C., and at the San Clemente Library, 242 Avenida Del Mar, San Clemente, California.

Dated at Bethesda, Maryland, this 31st day of May, 1983.

For the Nuclear Regulatory Commission.

George W. Knighton,

Chief, Licensing Branch No. 3, Division of Licensing.

OFFICE OF MANAGEMENT AND BUDGET

Federal Agencies Responsible for Administering Audits of Local Governments and Special Purpose Districts

AGENCY: Office of Management and Budget.

ACTION: Notice.

Last year Director Stockman wrote to the heads of executive departments and agencies and 300 of the largest cities and counties to identify the Federal agencies which would be responsible for overseeing implementation of the "single audit" provisions of Circular A–102. "Uniform requirements for grants to State and local governments". At the same time, he advised executive departments and agencies and appropriate professional organizations of the methodology to be used by smaller units of local government, school districts and special districts in identifying their cognizant agencies. The recent large increase in the number of local Government units undertaking single audits and thereby needing to establish contact with a cognizant agency, necessitates a dissemination of the methodology to a wider audience.

The purpose of this notice is to help local governments and other localities that have not been assigned a Federal cognizant agency identify the Federal cognizant agency that will be responsible for administering the single audit.

Cities, counties and towns that have not been notified of a cognizant agency assignment are assigned to the department or agency that is responsible for negotiating their indirect cost rates under Circular A–87. "Cost principles for grants to State and local governments," if one has been assigned, as listed in the February 28, 1980 Federal Register (pages 13396–13408). Cities, counties and towns not assigned a Federal agency directly or under Circular A–87 are assigned to the Federal agency that provides the greatest amount of grant funds.

School districts [1] are assigned to the Department of Education, except for those in Arkansas, Georgia, Maryland, Minnesota, Oregon, Utah, and Puerto Rico. School districts in those States and Puerto Rico are assigned to the Department of Agriculture.

Special purpose districts are assigned as follows:

Housing Agencies—Dept of Housing & Urban Development
Transit Agencies—Dept of Transportation
Planning & Development Districts—Dept of Commerce
Airport Authorities—Dept of Transportation
Port Authorities—Dept of Transportation
Sewer & Water Districts—Environmental Protection Agency
All Other—Agency providing most grant funds

FOR FURTHER INFORMATION CONTACT: Palmer A. Marcantonio, Management Reform Division, Office of Management and Budget, Washington, D.C. 20503, Telephone: 202–395–3657.

Local government or other localities desiring information about a specific cognizant assignment should contact the

[1] The special relationship between State departments of education and local education agencies will result in Federal Agencies generally working through State departments of education in fulfilling their cognizant audit responsibilities.

Federal Inspector General staff of the regional office closest to them.

Harold I. Steinberg,

Associate Director for Management, Office of Management and Budget.

SMALL BUSINESS ADMINISTRATION

[Application No. 03/03-5164]

Carbon Capital Corp.; Application for a License to Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by Carbon Capital Corporation (CCC), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1983).

The officers, directors, and stockholder of CCC are as follows:

Name and address	Title and relationship	Ownership (percent)
Roger H. Stevens, 4N262, Rte. 31, St. Charles, Ill. 60174.	President and Director	
James W. Miller, 1551 Bridge Road, Charleston, W. Va. 25301.	Vice President, Treasurer, and Director.	
Beverly S. Foltz, 3N522 Balkan Dr., St. Charles, Ill. 60174.	Secretary and Director	
Logan Resources, Inc., 2 Hale Street, Charleston, W. Va. 25301.	Parent Company	100

Roger H. Stevens is president and sole stockholder of Logan Resources, Inc. The company owns several businesses in West Virginia related to the coal industry.

CCC, a West Virginia corporation, with its principal place of business located at 2 Hale Street, Charleston, West Virginia 25301, will begin operations with $500,000 of private capital derived from the sale of common stock to Logan Resources, Inc.

CCC will conduct its activities principally in the State of West Virginia.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under this management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Charleston, West Virginia.

BILLING CODE 8025-01-M

[Proposed License No. 03/03-5158]

Security Finance and Investment Corp.; Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. et seq.), has been filed by Security Financial and Investment Corporation (Applicant) with the Small Business Administration (SBA) pursuant to 13 CFR 107.102(1983).

The officers, directors and stockholders of the Applicant are as follows:

Kenneth K. Chung, 7201 Dulany Drive, McLean, Virginia 22101, Board Chairman—3.57 percent stockholder

Gus Levathes, 5316 Moorland Lane, Bethesda, Maryland 20814, Executive Vice President, General Manager, Director

Han Y. Cho, 3706 Chanel Road, Annandale, Virginia 22003, President, Director—5.37 percent stockholder

Jang H. Jung, 6719 Eordcrest Road, Baltimore, Maryland 21237, Vice President, Director—4.46 percent stockholder

Baik S. Park, 4025 Webster Court, Annandale, Virginia 22003, Secretary—4.46 percent stockholder

Sung Y. Choi, 4852 Killebrew Drive, Annandale, Virginia 22003, Treasurer—3.57 percent stockholder

Walter I. Park, 10217 Lawyers Road, Vienna, Virginia 22180, Director—8.93 percent stockholder

20 other stockholders owning less than 10 percent individually—69.64 percent

The Applicant, a Maryland corporation with its principal place of business at 8757 Georgia Avenue, Suite 504, Silver Spring, Maryland 20910, will begin operations with $550,000 of paid-in capital and paid-in surplus derived from the sale of 5,600 shares of common stock.

The Applicant will conduct its activities primarily in the State of Maryland.

Applicant intends to provide assistance to all qualified socially or economically disadvantaged business concerns as the opportunity to profitably assist such concerns is presented.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contempleted under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under this management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Silver Spring, Maryland.

BILLING CODE 8025-01-M

Small Business Investment Co.; Maximum Annual Cost of Money to Small Business Concerns

13 CFR 107.301(c) sets forth the SBA Regulations governing the maximum annual cost of money to small business concerns for Financing by small business investment companies.

Section 107.301(c)(2) requires that SBA publish from time to time in the **Federal Register** the current Federal Financing Bank (FFB) rate for use in computing the maximum annual cost of money pursuant to § 107.301(c)(1). It is anticipated that a rate notice will be published each month.

13 CFR 107.301(c) does not supersede or preempt any applicable law that imposes an interest ceiling lower than the ceiling imposed by that regulation. Attention is directed to new subsection 308(i) of the Small Business Investment Act, added by section 524 of Pub. L. 96-221, March 31, 1980 (94 Stat. 161), to that law's Federal override of State Usury ceilings, and to its forfeiture and penalty provisons.

Effective June 1, 1983, and until further notice, the FFB rate to be used for purposes of computing the maximum cost of money pursuant to 13 CFR 107.301(c) is *10.755%* per annum.

Dated: June 1, 1983.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of June 6, 1983, at 450 5th Street, NW., Washington, D.C.

An open meeting will be held on Thursday, June 9, 1983, at 11 a.m. in Room 1C30, to discuss the following items.

1. Consideration of the adoption of rules designed, among other things, to provide minimum standards for registered transfer agents in the preparation and maintenance of accurate securityholder records and the safeguarding of funds and securities. In addition, consideration of whether to issue a release proposing amendments that would establish a minimum transfer turnaround

performance standard for certain exempt transfer agents that transfer depository-eligible securities and would require registered transfer agents to respond to inquiries from securityholders respecting dividend and interest payment claims. For further information, please contact Jonathan Kallman at (202) 272–2775.

2. Consideration of whether to repropose for comment Rule 415 under the Securities Act of 1933. Rule 415 relates to the registration of securities to be offered and sold on a delayed or continuous basis. The Rule is effective until December 31, 1983. For further information, please contact Steven L. Molinari at (202) 272–2589.

Commissioner Evans, as duty officer, voted to consider the items listed for the open meeting.

At times changes in Commision priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Michael Lefever at (202) 272–2468.

June 2, 1983.

Part II

Department of Health and Human Services

Office of the Secretary

Privacy Act of 1974; Systems of Records, Table of Contents/Index for the Annual Republication

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Privacy Act of 1974; Systems of Records, Table of Contents/Index for the Annual Republication

AGENCY: Department of Health and Human Services (HHS), Office of the Secretary (OS), Office of the Assistant Secretary for Public Affairs (OASPA).

ACTION: Publication of the Table of Contents/Index for the Department's annual republication of notices of systems of records.

SUMMARY: On October 13, 1982, the Department made its annual republication of notices of systems of records to meet the requirements of 5 U.S.C. 552a(e)(4). In order to assist the public, the Department publishes a consolidated lists of systems numbers, names, and **Federal Register** (*FR*) page numbers for the October 13 issue, as well as a subject/key word index.

SUPPLEMENTARY INFORMATION: The **Federal Register** publication for our notices is Volume 47, No. 198, Book 2 of 3 and 3 of 3, Pages 45402–45856. This document included more than 400 notices of systems of records for the following organizations of the Department:

- Executive Secretariat (ES).
- Office for Civil Rights (OCR).
- Office of Child Support Enforcement (OCSE).
- Office of Consumer Affairs (OCA).
- Office of the Assistant Secretary for Legislation (OASL).
- Office of the Assistant Secretary for Management and Budget (OASMB).
- Office of the Assistant Secretary for Personnel Administration (OASPER).

Office of the Assistant Secretary for Planning and Evaluation (OASP&E).

- Office of the Assistant Secretary for Public Affairs (OASPA).
- Office of the General Counsel (OGC).
- Office of the Inspector General (OIG).
- Region I, Administrative Support Center (ASC).
- Region IX, Office of the Regional Director (ORD).
- Office of Human Development Services (OHDS).
- Health Care Financing Administration (HCFA).
- Social Security Administration (SSA).
- Office of the Assistant Secretary for Health (OASH).
- Health Resources Administration (HRA).
- Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA).
- National Institutes of Health (NIH).
- Centers for Disease Control (CDC).
- Health Services Administration (HSA).
- Food and Drug Administration (FDA).

In order to inform the public of the Privacy Act restrictions on the disclosure of records contained in systems of records, we have set forth the "Conditions of Disoclosure" section of the Privacy Act (October 13 issue *FR* page 45516).

In addition we have set forth the following sections of the Department's Privacy Act Regulation 45 CFR Part 5b (October 13 issue *FR* 45514–45516):

5b.5 Notification of or access to records

5b.6 Special procedures for notification of or access to medical records

5b.7 Procedures for correction or amendment of records, and

5b.10 Parents and guardians

This will assist an individual by giving him or her the following information:

- How to find out if HHS has a record about him or her, and how to get a copy of that record.
- Special procedures for finding out about medical records.
- Special procedures for finding out about his or her child's medical records.
- Correcting mistakes in his or her record.
- Special procedures pertaining to parents and guardians of minors and incompetent persons.

An individual should consult the Department's systems notices to determine which systems of records are likely to contain records pertaining to him or her, to whom his or her requests should be addressed, and the degree of specificity with which he or she should make these requests. An individual's requests should then be addressed to the appropriate Department officials listed in the systems notices. In order to expedite his or her request, an individual should write on the envelope and the letter the words "Privacy Act Request."

The format for the Table of Contents/Index is as follows: Agency, System Number, System Name, Agency Initials and October 13, 1982 *FR* Page Number.

The subject/key word index has the following format: Subject, System Number, System Name, Agency Initials and October 13, 1982 *FR* Page Number.

Dated: May 12, 1983.

Claire del Real,

Acting Assistant Secretary for Public Affairs.

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 906]

Determinations By Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: June 1, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd, Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102.3: New well (1000 Ft rule)
102.4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

Department of Labor

Employment and Training Administration

Office of the Assistant Secretary for Veterans' Employment and Training

Implementation Regulations for Veterans' Employment Programe Under Title IV, Part C, of the Job Training Partnership Act

DEPARTMENT OF LABOR

Employment and Training Administration

Office of the Assistant Secretary for Veterans' Employment and Training

20 CFR Part 635

Implementation Regulations for Veterans' Employment Programs Under Title IV, Part C, of the Job Training Partnership Act

AGENCY: Assistant Secretary for Veterans' Employment and Training, Labor.

ACTION: Proposed rule.

SUMMARY: This document proposes rules regarding the implementation of Veterans' Employment Programs under Title IV, Part C, of the Job Training Partnership Act. The purpose of this publication is to request comments on these proposed rules so that final regulations may be published to allow for the timely planning and implementation of Veterans' Employment Programs by October 1, 1983.

DATES: Comments must be submitted on or before July 7, 1983.

ADDRESSES: Comments should be addressed to William C. Plowden, Jr., Assistant Secretary for Veterans' Employment and Training, 200 Constitution Avenue, N.W., Washington, D.C. 20210, *Attn:* Joseph Juarez, Director, Office of Policy, Planning and Legislation.

FOR FURTHER INFORMATION CONTACT: Joseph Juarez, Telephone: (202) 523–9110.

SUPPLEMENTARY INFORMATION:

On October 13, 1982, President Reagan signed into law the Job Training Partnership Act (JTPA), Pub. L. 97–300, which replaces the Comprehensive Employment and Training Act (CETA). Title IV, Part C, of the new statute provides for programs to meet the employment and training needs of service-connected disabled veterans, veterans of the Vietnam era, and veterans who are recently separated from military service. The statute directs that programs supported under this part be administered by the Secretary through the Assistant Secretary for Veterans' Employment and Training (ASVET). The statute further directs that the ASVET shall be responsible for the awarding of grants and the distribution of funds under this part as well as taking steps to ensure these programs are effectively coordinated with veterans activities and programs under other provisions of law.

In accordance with the general direction of the statute regarding Veterans' Employment Programs, these proposed rules are intended to provide further guidance for the proper administration and development of such programs. The proposed regulations include:

A. Definitions of the three categories of veterans identified in the Act.

B. Provision for the distribution of funds available for development of programs under this part.

C. Eligibility criteria for funds, which includes a requirement for a state to match the amount of the grant being sought under this part with funds from other sources.

D. A description of the application for funding and the review and approval processes.

E. Reference to allowable activities described in the Act.

F. A provision for the monitoring and oversight responsibilities to be conducted by the ASVET through the Regional and State Directors for Veterans' Employment and Training.

This proposed rule allows for the allocation of at least 80 percent of the funds available under this Part to the various States. Applications for funds will be accepted from Governors and/or Service delivery Area (SDA) designated administrative entities. The funding allocations are based on each State's proportionate share derived from the formula in Title 38, U.S.C. Chapter 41, Section 2003(a)(2) for the distribution of personnel under the Disabled Veteran Outreach Program (DVOP), except that no State shall be eligible for less than $50,000.

Proposed amounts to be allocated are:

State	Amount
Alabama	$104,000
Alaska	50,000
Arizona	87,000
Arkansas	69,000
California	782,000
Colorado	104,000
Connecticut	100,000
Delaware	50,000
District of Columbia	90,000
Florida	319,000
Georgia	170,000
Hawaii	50,000
Idaho	50,000
Illinois	318,000
Indiana	173,000
Iowa	87,000
Kansas	73,000
Kentucky	100,000
Louisiana	104,000
Maine	50,000
Maryland	148,000
Massachusetts	218,000
Michigan	284,000
Minnesota	145,000
Mississippi	55,000
Missouri	163,000
Montana	50,000
Nebraska	50,000
Nevada	50,000
New Hampshire	50,000
New Jersey	239,000
New Mexico	50,000
New York	492,000
North Carolina	163,000
North Dakota	50,000
Ohio	347,000
Oklahoma	104,000
Oregon	93,000
Pennsylvania	392,000
Puerto Rico	50,000
Rhode Island	50,000
South Carolina	81,000
South Dakota	50,000
Tennessee	132,000
Texas	420,000
Utah	50,000
Vermont	50,000
Virginia	170,000
Washington	156,000
West Virginia	52,000
Wisconsin	145,000
Wyoming	50,000

Performance standards for Veterans' Employment Programs under this part will be developed and issued in conjunction with each grant and/or contract instrument.

Classifications: These proposed regulations are procedural in character and give direction for implementing Veterans' Employment Programs under Part C, Title IV, of the Job Training Partnership Act. Therefore, these rules are not classified as "major" under Executive Order 12291 on Federal Regulations, and no regulatory impact analysis is required.

Regulatory Flexibility Act: The Department has determined that these rules will have no "significant economic impact" upon a substantial number of small entities "within the meaning of section 3(a) of the Regulatory Flexibility Act, Pub. L. 96–354, 91 State. 1164 (5 U.S.C. 605(b))". The vast majority of recipients of Federal funds under this regulation are the Governor's of the several States and/or the designated administrative entities of Service Delivery Areas generally with over 200,000 population.

List of Subjects in 20 CFR Part 635

Employment, Grant programs—labor, Labor, Veterans, Manpower training programs.

Accordingly, a new Part 635 of Chapter V of Title 20 of the Code of Federal Regulations is proposed to read as follows:

PART 635—VETERANS' EMPLOYMENT PROGRAMS UNDER TITLE IV, PART C OF THE JOB TRAINING PARTNERSHIP ACT

Subpart A—General Provisions

Sec.

635.1 Scope and purpose.
635.2 Program administration.

Sec.
635.3 Participant eligiblity.

Subpart B—Program Funding

635.11 Availability of funds.
635.12 Eligibility for funds.
635.13 Application for funding.
635.14 Review of application for funding.
635.15 Approval of funding request.

Subpart C—Program Design and Management

635.21 General.
635.22 Allowable activities.
635.23 Program management and performance standards.
635.24 Recordkeeping and reporting requirements.
635.25 Monitoring and oversight.

Authority: Job Training Partnership Act, Section 169, (29 U.S.C. 1501 et seq., Pub. L. 97–300, 96 Stat. 1322), unless otherwise noted.

Subpart A—General Provisions

§ 635.1 Scope and purpose.

This Part contains the regulations governing Veterans' Employment Programs as authorized under Title IV, Part C of the Act. These programs are to be designed to meet the employment and training needs of service-connected disabled veterans, veterans of the Vietnam era, and veterans who are recently separated from military service. Program administration and participant eligibility are included in this Subpart. Planning and application for funding are set forth in Subpart B of this Part. Program design, management and reporting are covered in Subpart C.

§ 635.2 Program administration.

(a) Programs supported under this Part will be administered by the Secretary through the Assistant Secretary for Veterans' Employment and Training (ASVET).

(b) All programs and activities supported under this Part will be coordinated, to the maximum extent feasible, with other programs and activities under this Act, the Wagner-Peyser Act, Title 38 of the United States Code, and other employment and training programs at the State and local level.

§ 635.3 Participant eligibility.

(a) Eligibility for participation in programs supported under this Part shall be determined pursuant to Section 441(a)(1) of the Act.

(b) For the purpose of this Part, the following definitions apply:

(1) "Service-connected disabled veteran" means the same as "disabled veteran" at Section 4(27)(B) of the Act.

(2) "Veteran of the Vietnam era" means an eligible veteran any part of whose active military service was during the Vietnam era (i.e., August 5, 1964–May 7, 1975).

(3) "Veterans who are recently separated from military service" shall mean any person on active military duty who first applies for participation in programs under this part within three months before separation or an eligible veteran who applies within twelve months after separation from military service.

Subpart B—Program Funding

§ 635.11 Availability of funds.

(a) Funds administered pursuant to Section 441 of the Act are authorized in accordance with the formula described at Section 3(a)(3)(A) of the Act.

(b) Not more than 20 percent of the funds available under this Part may be set aside by the Secretary for research and development activities, demonstration projects, providing technical assistance and training, or to support other veterans employment and training efforts as deemed appropriate.

(c) At least 80 percent of the funds under this Part will be made available consistent with the formula contained in Title 38, U.S.C., Chapter 41 Section 2003 (A) (2), except that no State shall be eligible for less than $50,000.

(1) Funds available under this paragraph may be distributed by the Secretary, through grant or contract, to the various States and/or designated Service Delivery Area administrative entities.

(2) Preliminary planning estimates will be published annually.

(d) The Secretary may reallot funds identified for distribution upon determination that no acceptable grant application has been received from a State or designated administrative entity for a Service Delivery Area within the State by December 31, 1983.

§ 635.12 Eligibility for funds.

(a) Programs supported under this Part will comply with the provisions of Section 441(a)(2) of the Act.

(b) The Department will not favorably consider an application for funding from any applicant which has failed to satisfy any major condition in a current or previous contract or grant with the Department, or has failed Departmental conditions relating to the resolution of a final finding and determination, including repayment of debts.

(c) For a State to be considered for grants under § 635.11(c) of this Part the State must demonstrate that it will expend or provide in-kind services from public or private sources an amount at least equal to the grant being sought for the proposed veterans employment program(s).

§ 635.13 Application for funding.

(a) Applications for funding under § 635.11(c) of this Part shall include, at a minimum, the following:

(1) Standard Form 424, Application for Federal Assistance;

(2) A completed comprehensive needs assessment of the Service delivery area or State to be served;

(3) A description of proposed program(s) and associated funding plans, including identification of matching funds or in-kind services; and

(4) Identification of the service provider(s) considered but not selected;

(b) Completed applications will be submitted by the Governor and/or designated Service Delivery Area administrative entity to the State Director for Veterans' Employment for comment and transmittal to the Secretary in accordance with grant planning instructions.

(c) Applications for funding under § 635.11(b) of this Part should be submitted in response to program specific Requests for Proposals (RFP's). All proposals and requests for information under this section should be submitted to: Director, Office of Procurement, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S–1521–FPB, Washington, D.C. 20210.

§ 635.14 Review of application for funding.

The Secretary will review and make a determination on all funding requests submitted under this Part. Rating criteria will include but not be limited to the provisions of §§ 635.12 and 635 13. Preference in selection will be given to proposals which clearly demonstrate plans to utilize local resources from other sources for the proposed program(s).

§ 635.15 Approval of funding requests.

(a) The Secretary, pursuant to section 441(b) of the Act, will be responsible for the approval, awarding and distribution of funds under this Part.

(b) An applicant whose grant application is not selected by the Department for funding under this Part shall be notified in writing.

(c) Any applicant whose grant application is denied by the Department may request administrative review as provided in § 629.57. The provisions of § 629.56 do not apply under this Part.

Subpart C—Program Design and Management

§ 635.21 General.

The requirements of 41 CFR Part 29–70 implementing OMB Circular Nos. A–102

and A–110 apply to all grants and agreements under this Part.

§ 635.22 Allowable activities.

Programs supported under this Part shall comply with the provisions of section 441(a)(3) of the Act.

§ 635.23 Program management and performance standards.

Each recipient of funds under this Part will be required to adhere to grant or contract provisions governing accountability, fiscal control and management, and specific program performance standards as established by the Secretary.

§ 635.24 Recordkeeping and reporting requirements.

(a) Required recordkeeping and reports shall be in accordance with Section 165 of the Act and with the provisions contained in each grant and contract instrument.

(b) Grant and contract recipients from time to time may be required to prepare and submit additional reports which may be required by the Congress.

§ 635.25 Monitoring and oversight.

(a) The Secretary, through the Assistant Secretary for Veterans' Employment and Training is responsible for the monitoring and oversight of veterans employment and training programs under the Act. Regional Directors for Veterans' Employment and Training and the State Director for Veterans' Employment and Training in each state shall have access to all records necessary for program monitoring and oversight.

(b) The audit provisions contained in § 629.42 of the regulations shall apply to funds granted to Governors under this Part.

(c) Private Industry Councils or other designated administrative entities in Service Delivery Areas receiving funds under this Part shall arrange for audits to be conducted in accordance with the provisions of § 629.42.

(d) The provisions of § 629.44 regarding sanctions for violations for the Act apply for all grants and agreements under this Part.

Signed at Washington, D.C., this 2d day of June 1983.

Raymond J. Donovan,

Secretary of Labor.

William C. Plowden, Jr.,

Assistant Secretary for Veterans' Employment and Training.

Part V

Equal Employment Opportunity Commission

Substantive Regulations on Health Insurance Benefits for Employees Age 65 to 69; Interim Rule With Comment Period

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR PART 1625

Substantive Regulations on Health Insurance Benefits for Employees Age 65 to 69

AGENCY: Equal Employment Opportunity Commission.

ACTION: Interim rule with comment period.

SUMMARY: Pursuant to Reorganization Plan No. 1 of 1978, responsibility and authority for enforcement of the Age Discrimination in Employment Act of 1967 (ADEA) was transferred from the Department of Labor to the Equal Employment Opportunity Commission. The transfer became effective and the Commission assumed enforcement of the Act on July 1, 1979.

The Commission published proposed interpretations of the ADEA on November 30, 1979 (44 FR 68858), and final interpretations on September 29, 1981 (46 FR 47724). Neither the proposed nor final interpretations, however, specifically addressed issues regarding employee benefit plans. Many of those issues were addressed by the Department of Labor in an Interpretative Bulletin on Employee Benefit Plans which was published on May 25, 1979. (*See* 44 FR 30648.) That bulletin was continued in effect by the Commission pending the completion of an exhaustive review. (*See* 44 FR 37974; June 29, 1979.) While that bulletin remains in effect, the Commission recognizes that those provisions dealing with allowable health insurance benefit offsets for Medicare payments are generally no longer applicable to employees aged 65 through 69. The inapplicability of those Medicare provisions is a direct consequence of the recent passage of the Tax Equity and Fiscal Responsibilty Act of 1982 (TEFRA). The TEFRA amendment to the ADEA significantly alters an employer's obligations regarding the maintenance of group health insurance plans for active employees aged 65 through 69. The Commission publishes the following interim regulations implementing the new requirements. Upon receipt and review of all public comments, the Commission will publish final regulations.

DATE: Effective date: June 7, 1983.

Comments must be received on or before August 8, 1983.

ADDRESS: Send comments, in quadruplicate, to Treva McCall, Executive Secretariat, EEOC, Room 5215, 2401, E Street, N.W., Washington, D.C. 20506. A copy of all public comments will be available for inspection and copying at the Commission's Second Floor Library at 2401 E Street, N.W., Washington, D.C. between the hours of 9 and 4:30, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: John Pagano at (202) 634–6592 or Christopher Mackaronis at (202) 634–6690.

SUPPLEMENTARY INFORMATION: On May 25, 1979, the Department of Labor published a comprehensive interpretative bulletin dealing with the requirements of Section 4(f)(2) of the ADEA, 29 U.S.C. 623(f)(2), with respect to virtually all forms of employee benefit plans. *See* 29 CFR 860.120; 44 FR 30648. The cornerstone of that Interpretative Bulletin was the principle that an employer must provide equal benefits or must expend equal cost on behalf of benefits for employees of all ages. Significantly, however, the Interpretative Bulletin permitted employers to take into account various benefits provided by the Federal Government in determining their benefit obligations of older employees.

More specifically, an employer was permitted by the interpretative bulletin to offset health care benefits provided by Medicare in determining its own responsibilities. *See* generally 29 CFR 860.120(f)(1)(ii). The bulletin permitted employers either to "carve out" those benefits provided by Medicare or to take advantage of Medicare availability through the use of a "supplemental" approach. Under the "carve out" option, an employer could discount those health care benefits actually provided by Medicare in determining its own benefit obligations. An employer utilizing the "supplemental" approach would attempt to estimate those benefits which would be provided by Medicare and then obtain supplemental health care coverage to provide benefits which Medicare was not expected to pay. *See* 44 FR 30654. Under either approach, the combination of Medicare and employer provided health care benefits would be expected to provide benefits as favorable as those provided to younger employees at a cost to the employer which was almost always less than the cost for comparable benefits for younger employees.

The status quo regarding health care benefits for workers aged 65 through 69 has been altered by recent congressional passage of the Tax Equity and Fiscal Responsibility Act of 1982 ("TEFRA"). TEFRA, a far reaching bill designed to reduce federal expenditures and lower the federal deficit, through the enactment of Section 116(a) added a new Section 4(g) to the ADEA, 29 U.S.C. 623(g), which reads the follows:

> (g)(1) For purposes of this section, any employer must provide that any employee aged 65 through 69 shall be entitled to coverage under any group health plan offered to such employees under the same conditions as any employee under age 65.
>
> (2) For purposes of paragraph (1), the term "group health plan" has the meaning given to such term in section 162(i)(2) of the Internal Revenue Code of 1974.

As a result, those provisions of the Interpretative Bulletin dealing with Medicare offsets for employees aged 65 through 69 are no longer applicable in most instances. All covered employers must now make available primary health insurance benefits for employees aged 65 through 69. While the wording of Section 4(g) is quite explicit, it does not address a multitude of practical questions which arise as a consequence of the shift or primary responsibility for health insurance benefits for employees aged 65 through 69. Indeed, the legislative history to Section 4(g) directs the Commission to promulgate regulations implementing the new statutory provision in a manner which will not allow employers to defeat its central purpose, namely, the reduction in Medicare expenditures for the working aged. *See* S. Rept. 97–530, 97th Cong., 2d Sess., pp. 414–415. That primary purpose of the legislation was succinctly stated by Senator Dole when he said, "Our top priority, of course, was to reduce the deficit in compliance with our reconciliation instruction." 128 Cong. Rec. S. 8645 (daily ed. July 19, 1982).

Since the passage of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) the Commission has received numerous questions and comments regarding the implementation of Section 4(g) of the ADEA, many of which have raised important issues. The most prominent of these issues are listed below and are followed with a brief discussion of the Commission's interim regulations and the accompanying rationale for those positions. Comments addressing these issues should be as specific as possible and where appropriate should include specific actuarial or cost data relevant to the issues presented.

1. Who is covered by Section 4(g) of the ADEA?

Section 11(b) of the ADEA defines an employer as "a person engaged in an industry affecting commerce who has twenty or more employees for each working day in each of twenty or more calendar weeks in the current or preceding calendar year. . . ." Employers who meet that definitional

standard are subject to the requirements of the new Section 4(g). For the purposes of that determination, no distinction should be drawn between full-time and part-time employees. Generally speaking, employers who would be covered by Section 4(g) by virtue of the maintenance of a "group health plan" as defined in Section 162(i)(2) of the Internal Revenue Code will similarly be covered if the maintenance of such a plan is accomplished indirectly through an agent of the employer. The Commission recognizes that it would be anomalous to hold that employers maintaining group health plans are subject to the requirements of Section 4(g) while those who do so in cooperation with union representation or other agents are not. For that reason, group health plans as defined by Section 4(g)(2) which are maintained or administered by Taft-Hartley trusts are also covered under Section 4(g) as agents of those participating employers. Such an interpretation is consistent with the overall intent of Section 4(g) to relieve Medicare of the responsibility of providing primary health insurance coverage for the working elderly. Employers in multi-employers trusts who do not meet the definitional standards set forth in Section 11(b) of the Act are not covered by the provisions of Section 4(g). Group health plans maintained exclusively by labor organizations in their representational capacity and not as an employer which receive no employer contributions are not subject to the provisions of the new section. Similarly, employee pay-all plans are not covered by Section 4(g), even if they are made available through a covered employer.

2. Which employees are covered by Section 4(g)?

Any employee aged 65 through 69 who is working for an employer subject to Section 4(g) is covered by the provisions of the new section. The Commission is cognizant of the fact that questions may arise as to the exact dates on which an employee becomes subject to the provisions of Section 4(g). In that regard, the Commission notes that while the ADEA amendment is silent on that issue, the complementary amendments to Section 1862(b) of the Social Security Act indicate that individuals will be covered "for the period beginning with the month in which such individual becomes entitled to benefits . . . and ending with the month in which such individual attains the age of 70." 42 U.S.C. 1862(b)(3)(A)(iii). While an identical interpretation under the ADEA would be preferable, the Commission is limited in its authority by the specific age limitations set forth in Section 12(a) of the Act, 29 U.S.C. 631(a). For that reason, any employees aged 65 through 69 are subject to Section 4(g) from the month in which they attain age 65 through the day on which they attain age 70.

The question already has arisen whether employees between the ages of 65 and 70 who have no basic Medicare eligibility are similarly covered by the provisions of Section 4(g). In some instances, employees of state or local governments, covered employees under the ADEA, *see* 29 U.S.C. 630(b), may lack Medicare eligibility. However, neither the wording of Section 4(g) nor the accompanying legislative history condition the requirements of that section on Medicare eligibility. For that reason, the Commission interprets the new Section 4(g) to apply to all employees aged 65 through 69 who are working for employers covered under the ADEA.

Similarly, a question has arisen as to coverage under Section 4(g) of employees who at the attainment of age 65 are temporarily disabled and elect to continue the receipt of disability rather than retirement pay. The position has consistently been that an employer need not make simultaneous payment of long term disability and pension benefits. *See* 29 CFR 860.120(f)(1)(iv)(B)(6). This position was predicated on the belief that disability recipients are more akin to active employees than retirees. Consistent with this approach, the Commission's proposed regulations include disability recipients as those employees entitled to health insurance coverage under the same conditions as any employee under age 65. Where an employer's group health plan provides for differential health care benefits for disabled younger workers, those same terms and conditions may be applied to the older disability recipient.

The issue has also been presented concerning an employer's obligations to employees aged 65 through 69 who are at present not actively employed but who are receiving health care benefits by virtue of extended coverage under an employer's health plan. In such a situation, the Commission will look to all the facts and circumstances to determine whether an employment situation still exists. Employees engaged in seasonal work who retain seniority rights and other indicia of a continuing employment relationship will in all likelihood fall within the meaning and spirit of Section 4(g). On the other hand, employees gratuitously provided extended coverage after the termination of employment status were not intended to fall within the scope of Section 4(g). Their status would be most like that of a retiree.

Retirees are not embraced by the term employee and are, therefore, not covered by the literal wording of the new section.

Finally, concern has already been expressed over the applicability of Section 4(g) to part-time employees. In the case of part-time employees aged 65 through 69, Section 4(g) requires that employers make available to those individuals health insurance coverage under the same conditions that coverage is made available to younger part-time employees. Employers who provide differential health care benefits for part-time employees may continue to do so as long as the coverage provided to younger part-time employees is made available to part-time employees aged 65 through 69 on a primary basis. Employers who, for legitimate non-discriminatory business reasons, do not provide health insurance coverage to part-time employees are not obligated to make health insurance benefits available to older part-time employees.

3. Can an employee retain Medicare as the primary provider of its health insurance benefits?

Employees have the right to retain Medicare as primary coverage. S. Rept. 97–530, 97th Cong., 2d Sess, p. 414. Any employer health care plans which provide benefits for items and services covered to any extent by Medicare Part A and/or Medicare Part B will be deemed primary plans of the employer. All such plans must be made available to employees aged 65 through 69. The Commission's regulations require that all employees covered by Section 4(g) be provided the opportunity to elect in writing coverage under any one of the employer's primary health insurance plans. In offering this option, an employer must notify each eligible employee in writing of the specific benefits available under the employer's health care plan or plans and the extent to which those benefits can be anticipated to be supplemented by Medicare coverage. All eligible employees similarly should be notified of the consequences of rejecting employer-provided primary coverage and apprised of any employer-provided benefits that will still be available if the employee chooses to have primary coverage through Medicare. The Commission's intent in this regard is to ensure that all eligible employees are sufficiently informed of the consequences of the election to enable them to exercise a meaningful choice. The following interim regulations allow

a "reasonable" period of time for employers to provide eligible employees with a written election and to implement the necessary administrative changes. The Commission will interpret that "reasonable period of time" to be no longer than 90 days after publication of these interim regulations. For employees rejecting the employer's primary coverage, the existing employer coverage must not be discontinued until the actual date on which the employee becomes entitled to Medicare benefits. Absent that requirement employees could be subject to a lapse in health insurance coverage. In the event that an eligible employee attains age 65 after January 1, 1983, and before an election has been offered, the employee must continue to receive primary coverage under the employer's plan until and if the employee elects to the contrary. In providing for an employee's written election, each employer must necessarily inform each eligible employee of the need to apply for Medicare and provide any necessary assistance for making an application for benefits. This is consistent with earlier positions taken by both the Commission and the Department of Labor. *See* 44 FR 30654 (May 25, 1979).

Finally, the Commission's interim regulations require that employees aged 65 through 69 be provided the same opportunities as younger workers to alter their health insurance coverage. If an employer's plan provides for semi-annual review by the employees, that same periodic review must now be afforded employees aged 65 through 69.

4. What type of health insurance coverage is required by Section 4(g)?

The plain language of Section 4(g) requires that employees "aged 65 through 69 shall be entitled to coverage under any group health plan offered to such employees under the same conditions as any employee under age 65." The Commission, therefore, interprets Section 4(g) to require equality of benefits and not just the equalization of cost. Indeed, to require only equal cost while at the same time removing Medicare from the position of primary insuror could have resulted in a drastic overall reduction in health benefits for most employees, a result contrary to the legislative history in that it would induce employees to reject the employer's plan in favor of Medicare. Moreover, congressional use of the word "conditions" evidences an intent to use that word as a term of art as it is commonly used in federal employment discrimination statutes. The Commission attributes to the word "conditions" the same meaning which it has in Section 4(a) of the Act. Under either section, equality of "conditions" can only be viewed from the perspective of the recipient. For all these reasons, the Commission's proposed regulations require that employers provide employees aged 65 through 69 with the same health plan coverage that is provided to younger workers.

(a) Non-contributory plans. For employers who maintain a non-contributory group health plan, employees aged 65 through 69 must be offered the same benefits which the plan provides to its younger workers. If the plan traditionally has made no distinction between benefits available to employees at different ages based on increased costs for older workers, it cannot now do so. Any such reduction would be considered an impermissible wage rate reduction intended to reduce the overall cost of compliance with the requirements of Section 4(g). If the plan traditionally has reduced health care benefits in accordance with the provisions of 29 CFR 860.120, the employer's coverage for employees aged 65 through 69 must be under the same conditions as the most favorable health care benefits provided to any younger individuals or groups.

In many instances, an employer previously may have offered a selection of several non-contributory group health plans to employees under the age of 65 with a special "carve-out" or "supplemental" plan for those Medicare eligible employees. As a consequence of Section 4(g), the Commission's regulations require that all employer plans offered to employees under age 65 must be offered to employees aged 65 through 69 under the same conditions, that is, with the same benefit levels.

(b) Contributory plans.

Congress was fully apprised of the financial ramifications of Section 4(g) of the ADEA. As Senator Dole said in his prefatory remarks "[o]ur top priority, of course, was to reduce the [federal] deficit in compliance with our reconciliation instruction." 120 Cong. Rec., S. 8645 (July 19, 1982). In so doing, Congress targeted the Medicare program for cost reductions. While not eliminating overall health care benefits for Medicare recipients, Section 4(g) of the ADEA attempts to shift the burden of providing those benefits from Medicare to employers. The savings to the Government will be substantial. The clear intent and the inevitable result of such a shift, however, is an increase in cost to employers providing health insurance coverage. Nothing in the legislative history suggests that employees aged 65 through 69 should bear this increased cost and the Commission is loathe to fashion a regulation to that effect absent a clear and specific congressional mandate. For these reasons, and based primarily on the literal wording of Section 4(g) and its expressed congressional purpose, the Commission's interim regulations require that an employer must offer any contributory plans to all eligible employees at the same contribution level that they are offered to younger employees. Contribution levels for all plan participants may be increased to reflect the increased costs of health insurance resulting from Section 4(g). Such increases, however, must be distributed equally to all plan participants and may not exceed the employees' proportionate share of the overall cost increases, as determined by existing contribution levels.

5. Are spouses covered by the requirements of Section 4(g)?

For all employees aged 65 through 69 an employer is obligated to provide the employee with health insurance coverage "under the same conditions as any employee under age 65." If the employer's health insurance coverage provides benefits for the spouses of employees of younger workers, it must provide similar benefit coverage for the spouses of employees aged 65 through 69. Conversely, if the employer's group health plan provides no coverage for spouses, the employer has no obligation to do so for workers aged 65 through 69.

The Commission notes that the Health Care Financing Administration has published regulations implementing Section 116(b) of TEFRA. Those regulations govern Medicare payments for employees age 65 through 69 and their spouses age 65 through 69. The HCFA regulations make Medicare the secondary payor for both the employee and his/her spouse where employer plan benefits are available. The Commission does not believe that the regulations conflict in their treatment of spouses and notes language in the Report of the Senate Committee on Finance (S. Rept. No. 97-494, July 12, 1982) that accompanied TEFRA indicating a congressional intent that Medicare be secondary for both employees and their spouses age 65 through 69.

6. What employer conduct is prohibited by Section 4(g)?

The clear purpose behind the enactment of Section 4(g) was to relieve Medicare of the burden of primary health care coverage for employees aged 65 through 69. In so doing, Congress made clear its intent that "an employee will have the option of rejecting the plan

offered by the employer, thereby, retaining Medicare as primary coverage." S. Rept. 97–530, 97th Cong. 2d Sess., p. 414. Congress feared, however, that employers attempting to minimize the cost ramifications of Section 4(g) would offer incentives or plan alternatives designed to induce employees to elect Medicare coverage. In specific response to that concern, the Senate Conference Report reflects congressional understanding that the Commission:

> Will promulgate regulations to prevent employers from offering a group health insurance plan or option which is designed to circumvent this provision in an attempt to induce employees to reject the employer general health benefit plan offered to other employees under the age of 65.
>
> S. Rept. 97–530, 97th, Cong., 2d Sess., 414–415.

Based on that explicit legislative mandate, the Commission's interim regulations prohibit an employer from offering certain types of health care options. First, an employer may no longer offer a plan whose terms limit its coverage to items or expenses not fully reimbursed by Medicare such as deductibles or expenses beyond Medicare limits. Plans of that nature were previously recognized as either "carve-out" or "supplemental" plans and were expressly designed to operate in tandem with Medicare to provide a comprehensive package of health care benefits. To permit their continuation would be to encourage reliance on Medicare as primary coverage for workers aged 65 through 69, a result directly contrary to the purposes of Section 4(g). *See* 128 Cong. Rec. S. 10902 (Aug. 19, 1982) (remarks of Sen. Dole).

In accordance with the standards set forth in response to question 4, employers will not be permitted to require greater employee contributions to contributory group health plans than are required of younger employees. Employers may continue to offer a broad range of benefit plans, commonly referred to as "cafeteria style" benefits, so long as the plans offered do not run afoul of the general principles stated earlier. Employers may continue to offer or may introduce for the first time group health plans intended to provide primary health insurance coverage as long as those plans are offered to all employees regardless of age. Each group health plan which is offered to younger employees must also be made available to employees aged 65 through 69 at no additional cost.

Employers may implement new health care alternatives so long as they are not designed to encourage employees to elect Medicare as primary coverage. An employer may not eliminate formerly offered group health plans and replace them with plans providing a benefit package which is less favorable to the employee. Employers may, on the other hand, continue to offer or introduce for the first time group health plans which are intended to provide benefit coverage for those health care services wholly uncovered by Medicare, i.e. outpatient prescription drugs. *See* 128 Cong. Rec. S. 10902 (Aug. 19, 1982). If available, these plans must be offered to all employees regardless of age. In addition, an employer may voluntarily contribute to Medicare Part B premiums for any employees.

As a consequence of Sectrion 4(g) and these implementing regulations, employers may no longer rely on the Medicare offset provisions contained in 29 CFR 860.120(f)(1)(ii) *et seq.* Entities unaffected by the provisions of section 4(g), such as labor organizations, may continue to rely on those provisions to the extent they are applicable.

Impact Analysis—Section 116(a) of Pub. L. 97–248, the Tax Equity and Fiscal Responsibility Act of 1982, requires employers to provide health insurance coverage to all employees aged 65 through 69 under the same conditions as insurance provided to younger employees. Although this change will result in an annual economic effect of over $100 million, that effect is a direct result of the statutory changes enacted by Congress and not these regulations implementing those statutory changes. These regulations, therefore, do not have an "annual effect" on the economy of $100 million or more as those terms are used in Executive Order 12291. For that reason, these regulations are not a "major rule," and a regulatory impact analysis is not required by Executive Order 12291.

Similarly, the Commission certifies under 5 U.S.C. 605(b), enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that this interim rule will not result in a significant economic impact on a substantial number of small entities. The economic impact on employers covered by the ADEA will be a direct result of congressional enactment of Section 4(g), 29 U.S.C. 623(g), and not of these implementing regulations. Moreover, employers with less then twenty employees are not covered either by Section 4(g) or the implementing regulations. For these reasons, a regulatory flexibility analysis is not required.

These interim regulations have been formally coordinated with the Health Care Financing Admininstration pursuant to Executive Order 12067. Section 4(g) of the ADEA became effective on January 1, 1983. The Commission finds, pursuant to 5 U.S.C. 553(b)(3)(B), that the effective date of Section 4(g) and the critical need for public guidance require that these rules be published on an interim basis pending receipt and review of public comments. To do otherwise would prolong a period of uncertainty for employers, employees, and health care administrators well beyond the effective date of Section 4(g) which could subject employers to unnecessary liability under the Act and employees to unfavorable health care alternatives.

List of Subjects in 29 CFR Part 1625

Advertising, Aged, Employee benefit plan, Equal employment opportunity, Retirement.

Accordingly, pursuant to the substantive rule-making authority granted to it by Section 9 of ADEA, the Commission publishes the following interim substantive regulations regarding the implementation of Section 4(g) of the ADEA, 29 U.S.C. 623(g).

PART 1625—[AMENDED]

Part 1625 is amended as follows:

1. A Subpart A is added consisting of existing §§ 1625.1–1625.13. The heading for Subpart A reads as follows:

Subpart A—Interpretations

2. A Subpart B consisting of § 1625.20 is added to read as follows:

Subpart B—Substantive Regulations

§ 1625.20 Employer obligations under Section 4(g) of the Act.

(a) *Employee Coverage under Section 4(g) of the Act.*—(1) Employees aged 65 through 69, including disabled employees, shall be entitled to coverage under any group health plan(s) offered to employees under age 65 under the same terms and conditions. The standard of compliance with this requirement shall be one of benefit equivalence.

(2) Any employees encompassed by paragraph (a)(1) of this section shall be entitled to spousal coverage under any group health plan offered to such employees under the same terms and conditions as any employee under age 65. The standard of compliance with this requirement shall be one of equality of treatment with similarly situated younger employees. In the event that the employer's plan does not provide for spousal coverage the employer need not do so for employees aged 65 through 69.

(3) Employees aged 65 through 69 are covered by the requirements of Section

4(g) of the Act from the month in which they attain age 65 through the day on which they attain age 70.

(4) Retirees are not covered by the provisions of Section 4(g) of the Act.

(b) *Employer coverage under Section 4(g) of the Act.*—(1) Any employers who meet the standards for coverage set forth in Section 11(b) of the Act are subject to the requirements of Section 4(g) of the Act and the regulations of this part. As to persons other than employers subject to the Act, the provisions of 29 CFR 860.120 shall continue to apply.

(2) Any employer meeting the standards for coverage set forth in paragraph (b)(1) of this section who provides health insurance coverage to its employees either in cooperation with a labor organization or indirectly through an agent of the employer is covered by the provisions of Section 4(g) of the Act.

(c) *Election of primary health care coverage.*—(1) Each employee aged 65 through 69 must be offered the opportunity to elect in writing coverage under any group health plan offered by its employer. Every employer must communicate to each eligible employee in writing prior to the time of election in specific terms and conditions of all available health insurance plans. Every employer must notify each eligible employee that if the employer's plan(s) covers any of the same items and services covered by Medicare, the employer plan(s) is primary for those services and Medicare pays secondary benefits. Every employer must inform all eligible employees of the consequences of choosing any employer health plan and the extent to which benefits available under an employer plan can be anticipated to be supplemented by Medicare coverage. Similarly, eligible employees must be informed of the consequences of not choosing an employer plan(s). Every employer must also inform eligible employees that if the employer's plan(s) covers only non-Medicare covered items and services, such as dental care and prescription drugs, the employer plan(s) is liable for those non-Medicare covered items and services and Medicare is liable for Medicare-covered items and services such as hospitalization. Every employer should attempt to inform each eligible employee of the need to apply for Medicare coverage. Where the employer previously paid or contributed toward the Medicare Part B premium payment, the employer must notify each eligible employee if and under what circumstances it intends to discontinue Medicare Part B contributions. Such a notice should specifically inform each eligible employee of the penalty resulting from a lapse in Medicare Part B coverage.

(i) The election described in paragraph (c)(1) of this section above must be offered to all eligible employees and implemented within 90 days following the date of publication of these regulations.

(ii) An employer's existing health plan coverage must continue in effect until an election is made and implemented or until an earlier date as requested by the employee.

(iii) Employees aged 65 through 69 who were not eligible by reason of age for the election described in paragraph (c)(1) of this section at the time it was offered must be informed of the options specified in paragraph (c)(1) of this section at least 30 days prior to their first day of eligibility.

(iv) Employees aged 65 through 69 must be afforded the same opportunities to change their primary health insurance coverage as are offered to younger employees.

(2) [Reserved].

(d) *Employer contributions.*—Contributory Plans. An employer must offer to all employees aged 65 through 69, at no additional cost, the same plan or plans that are offered to younger employees.

(e) *Group Health Care Plans Designed to Supplement Medicare.*—(1) An employer may no longer offer to an employee aged 65 through 69 a group health plan whose terms make it a secondary payor to Medicare for services covered under either Medicare Part A or Medicare Part B.

(2) An employer who offers to its employees a health benefits plan covering only non-Medicare covered items and services shall offer such a plan to all employees through age 69 on an equal basis.

(3) An employer may not offer inducements to employees age 65 through 69 to elect not to be covered by an employer plan.

(f) *Construction.*—(1) The Commission will strictly enforce the provisions of these rules to ensure that no employee aged 65 through 69 suffers a discriminatory reduction in health care benefits as a result of the enactment of Section 4(g) of the Act.

(2) Violations of these rules will be deemed willful and will subject an employer to liquidated damages as provided by the provisions of Section 7(b) of the ADEA.

(3) Health care benefits provided under this section may not be included by an employer under a "benefit package" approach.

(4) An employer is prohibited from making benefit reductions in violation of section 4(a)(3) of the ADEA. Signed at Washington, D.C. this 24th day of May, 1983.

For The Commission

Clarence Thomas,

Chairman, Equal Employment Opportunity Commission.

DEPARTMENT OF ENERGY

10 CFR Part 960

[Docket No. NE-RM-83-2]

Nuclear Waste Policy Act of 1982; Proposed General Guidelines for Recommendation of Sites for Nuclear Waste Repositories; Availability of Documents and Announcement of Public Comment Period

AGENCY: Nuclear Waste Policy Act Project Office, Department of Energy.

ACTION: Notice of Availability of DOE, Task Force Redraft of Proposed Guidelines and Draft "Comment Response Document," and Announcement of Public Comment Period.

SUMMARY: The Department of Energy, (DOE) announces the availability of, and invites public review of and comment on, two documents pertaining to the proposed general guidelines for the recommendation of sites for nuclear waste repositories that appeared in the **Federal Register** on February 7, 1983 (48 FR 5670, February 7, 1983, 48 FR 6549, February 14, 1983, 48 FR 8289, February 28, 1983). The public comment period on the February 7 proposal closed on April 7, 1983. At that time DOE assembled a task force of experts in nuclear waste repository sciences to review the proposed guidelines and the comments received. This task force has subsequently developed a redraft of the proposed guidlines and a draft "Comment Response Document" that addresses the individual comments received.

DOE is currently entering into additional consultations on the guidelines with States and Federal agencies. These consultations will utilize the February 7 proposed guidelines, the public comments received on them, and the task force redraft of the proposed guidlines, and the task force draft "Comment Response Document" as a basis for discussion. The consultation period on these documents has begun and will extend for approximately 30 days during which time individual meetings will be held with States and Federal agencies. During this period, DOE is making these additional documents available to the public for review and comment. Although neither the task force redraft of the guidlines nor the draft "Comment Response Document" represent a DOE proposal as such, they constitute an alternative to the February 7 proposal which DOE will consider.

Copies of the task force redraft of the proposed guidelines have been distributed to those persons on the original mailing lists for the February 7 proposed guidelines and to those persons who submitted oral or written comments to DOE pursuant to the **Federal Register** notices cited above. By direct mailing, this document is also being provided to approximately 4,000 individuals on a mailing list compiled from public inquiries, to persons who provided oral comments at recent hearings on proposed site nominations, and to 160 public libraries generally used to provide information on the DOE repository program.

DATES: Public comments on the task force redraft and draft "Comment Response Document" should be submitted to DOE no later than July 7, 1983 to ensure full consideration. Late comments will be considered to the extent possible.

ADDRESSES: Written comments should be sent to Critz H. George, DOE Director, Guidelines Task Force, c/o Weston, Inc., 2301 Research Boulevard, 3rd floor, Rockville, Maryland 20850. Any information or data considered by the person furnishing it to be confidential must be so identified. The DOE reserves the right to determine the confidential status of information or data and to treat it accordingly.

Copies of the task force redraft of the proposed guidelines, the task force draft "Comment Response Document," and all written comments received thereon, will be available for public inspection the DOE Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Individual copies of the task force redraft of the proposed guidelines or the task force draft "Comment Response Document" may be obtained by writing or calling: Jerome Leszkiewicz, Weston, Inc., 2301 Research Boulevard, 3rd floor, Rockville, Maryland 20850, (301)963-6819. Please indicate the document(s) being requested on the outside of the envelope. The document(s) will be sent out by first class mail no later than the first working day following receipt of the request.

FOR FURTHER INFORMATION CONTACT: Carol Hanlon, Geologic Repository, Nuclear Waste Policy Act Project Office, U.S. Department of Energy, S-10, Washington, D.C. 20545, Telephone: (301) 353-5630 or 963-6812.

SUPPLEMENTARY INFORMATION: On January 7, 1983, the Nuclear Waste Policy Act of 1982 (Pub. L. 97-425) was signed into law. The Act establishes a process and schedule for the development of nuclear waste repositories. A required part of this process is the development of general guidelines for the recommendation of sites for repositories. Proposed guidelines which are to consist for repositories. Proposed guidelines which are to consist of a new Part 960 of Chapter III of Title 10 of the Code of Federal Regulations were published in the **Federal Register** on February 7, 1983 (48 FR 5670). Subsequent **Federal Register** notices pertaining to public hearings and public comment were published on February 14 and 28, 1983 (48 FR 6549, 48 FR 8289). The public comment period announced by these notices closed on April 7, 1983.

Pursuant to the development of final guidelines, DOE assembled a task force of experts in nuclear waste repository sciences to review both written and oral comments which had been submitted to DOE. From this review the task force has developed the two documents which are the subject of this notice.

Material presented in the documents represents the views of those individuals on the task force. The documents do not represent a DOE proposal in lieu of the February 7 proposal and DOE does not endorse their contents. These documents will be used in the additional consultation with State and Federal agencies and will be considered by DOE as an alternative to the guidelines proposed February 7, 1983 in the development of the final guidelines.

In developing the draft final guidelines for Nuclear Regulatory Commission concurrence (required by Section 112 of the Nuclear Waste Policy Act) DOE will consider all comments received on both the guidelines proposed February 7, the task force redraft of the guidelines, and the task force draft "Comment Response Document."

Issued at Washington, D.C. on June 3, 1983.

Robert L. Morgan,

Project Director, Nuclear Waste Policy Act Project Office.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Presidential Documents

Title 3—

The President

Proclamation 5067 of June 6, 1983

Captive Nations Week, 1983

By the President of the United States of America

A Proclamation

Twenty-five years ago, the United Nations Declaration of Human Rights proclaimed that "all human beings are born free and equal in dignity and rights." This reaffirmed an eternal truth that Thomas Jefferson in 1776 wrote into our own Declaration of Independence. Another great thinker, Edmund Burke, observed simply that "the cause of Freedom is the cause of God." Some twenty-five centuries before, the prophet Isaiah admonished the world "To bind up the broken-hearted, to proclaim liberty to the captives."

Free people, if they are to remain free, must defend the liberty of others. As the custodians of a democratic tradition firmly established on this continent more than two centuries ago, Americans are deeply committed to the goal of representative government everywhere.

Each year, the United States reaffirms its commitment to the cause of liberty during Captive Nations Week, by reminding all those who are forced to live under the domination of foreign military power and alien ideology that the United States supports their aspirations for freedom, independence and national self-determination.

The Congress, by a joint resolution approved July 17, 1959 (73 Stat. 212), has authorized and requested the President to proclaim the third week in July as Captive Nations Week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate the week beginning July 17, 1983, as Captive Nations Week. I invite the people of the United States to observe this week with appropriate ceremonies and activities and to reaffirm their dedication to the ideals of freedom, which unite us and inspire others.

IN WITNESS WHEREOF, I have hereunto set my hand this 6th. day of June, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 111
Wednesday, June 8, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

FEDERAL RESERVE SYSTEM

12 CFR Part 211

[Docket No. R-0045]

International Banking Operations; Export Trading Companies

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Bank Export Services Act (Pub. L. 97-290, Title II (1982)) amended the Bank Holding Company Act of 1956 to permit bank holding companies, their subsidiary Edge or Agreement corporations, and bankers' banks to invest in export trading companies. The regulation implements and interprets this provision by establishing procedures for prior Board review of these investments and providing guidance on how the Board intends to administer the statute.

EFFECTIVE DATE: July 8, 1983.

FOR FURTHER INFORMATION CONTACT: Nancy Jacklin, Assistant General Counsel (202/452-3428), or Kathleen O'Day, Senior Attorney (202/452-3786), Legal Division; or Frederick R. Dahl, Associate Director (202/452-2726), or James Keller, Manager, International Banking Applications (202/452-2523), Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System.

SUPPLEMENTARY INFORMATION: On October 8, 1982, the Export Trading Company Act of 1982 ("ETC Act") was enacted into law. The purpose of the statute is to encourage U.S. exports by facilitating the formation and operation of export trading companies and the expansion of export trade services generally. Title II of the ETC Act, known as the Bank Export Services Act ("BESA"), amends section 4 of the Bank Holding Company Act ("BHC Act") to permit bank holding companies to invest in export trading companies subject to certain limitations and after prior Board review. The Board's regulations, which were published for public comment on January 17, 1983, were framed to achieve two objectives set forth in the BESA: to facilitate the export of goods and services produced in the United States by allowing for meaningful and effective participation of bank holding companies in the financing and development of export trading companies, and to help avoid adverse effects on the subsidiary banks of the bank holding companies involved.

The Board received 23 public comments on the proposed regulations as well as comments from 10 Reserve Banks. The commenters focussed primarily on the following issues: the definition of an export trading company, the application of preferential lending restrictions, the applicability of the collateral requirements of section 23A of the Federal Reserve Act to extensions of credit by a bank to an affiliated export trading company, and the establishment of general consent procedures. In light of the comments received, the Board has adopted several revisions in the draft regulations.

Definition of Export Trading Company

In the comments received on the draft regulations, several commenters took the view that the definition of "export trading company" in the draft regulations improperly limited the range of activities that are permissible under the BESA. This definition was included in the draft regulations to clarify ambiguities in the language of the BESA and to further Congressional intent. The issue raised is whether Congress intended through the BESA to authorize banking organizations only to invest in a company that provides services to facilitate trade in goods and services produced by others, or whether Congress intended to grant the much broader authority to invest in any service company that principally provides its own services to non-residents. That is, is any company that is a service company but which deals with foreign residents to be considered an "export trading company"? Such an interpretation of the statute has potentially broad implications for the separation of banking and commerce, substantially increasing the activities in which a bank holding company can engage both in the United States and abroad.

The language and purposes of the BESA, and its legislative history as a whole, provide sufficient support for the interpretation reflected in the definition of "export trading company" contained in the regulations. Throughout the hearings and subsequent Congressional actions on the export trading company legislation, there is no evidence of Congressional consideration of the significant question whether bank holding company investment was needed in U.S. service industries in order *to develop those industries* for an export market. Rather, the common thread throughout consideration of the legislation is that banking organization investment was thought to be needed in what are commonly regarded as export trading companies—companies that serve as intermediaries for producers and suppliers of goods and services in the foreign marketing and sale of their products by providing a range of export trade services. Banking organization involvement was considered particularly helpful in that the overseas networks of many such organizations could provide a basic existing infrastructure for carrying out that intermediation role.

Thus, the services that may be provided by an export trading company under the regulations are those types of services listed in the definition of "export trade services" in the statute, *where the services are provided in connection with trade in goods and services produced by others*. Consistent with the regulation the export trading company could, *inter alia*, provide transportation insurance, or product liability insurance abroad, for goods in international trade; travel insurance related to international transportation services provided by others; consulting services promoting or facilitating trade transactions; marketing goods or services produced by others, including brokering insurance on risks located abroad; and warehousing services for products in international trade.

The Board finds that the definition of "export trading company" contained in the regulation is consistent with the purposes of the Act and does not hinder the effective operation of export trading companies in which bank holding companies may invest. The alternative

statutory interpretation favored by some of the commenters does not appear to be consistent with Congressional intent and would authorize bank holding company investments in business concerns never contemplated by the Congress in its consideration of the legislation. Accordingly, the Board retained in the final regulations the definition of "export trading company" as it appeared in the draft regulations.

Under the definition of "export trading company" in the regulations, an export trading company would be able to engage, in addition to its primary business of exporting, in activities related to importing, third party and barter trade up to half of its business. In determining whether goods are produced in the United States, reference may be made to the definitions used in preparing the Shipper's Export Declaration (a Department of Commerce form) for domestic merchandise exports from the United States. In determining whether services are "produced in the United States," for purposes of the BESA, reference may be made generally to the concepts applied by the Department of Commerce in compiling the U.S. balance of payments accounts as to services exports, following the general rule that services performed by U.S. residents for non-U.S. residents would be considered covered by the term. "United States" for this purpose has the same meaning as that in Section 103(a)(6) of the Export Trading Company Act (15 U.S.C. 4002).

A number of the comments focussed on aspects of the requirement that "more than half" of the export trading company's annual revenues must be derived from exports or facilitating exports. Some considered the test too high. One commenter considered the required percentage of export activity contained in the draft regulations to be too low. In addition, many commenters recommended that the percentage of export-related revenues be assessed over a period of time longer than the one-year period originally provided for in the regulation.

The Board believes that the test that more than half an export trading company's revenues should be export-related is consistent with the purposes of the BESA, and is not so rigid as to make profitable operation of an export trading company impracticable. However, in order to allow for increased flexibility for an export trading company to adapt to unforeseen changes in market conditions, the Board decided to liberalize the time period for meeting the test. The regulation adopted provides that an export trading company must meet the test on a biannual rather than on an annual basis. The biannual test will be measured by consecutive two-year periods rather than by a two-year moving average. The Board expects that where the requirement is not met, the export trading company will indicate the reasons for noncompliance and develop and implement an adequate plan for meeting the requirement.

The definition of "revenues" was also the subject of some discussion by the commenters. The draft regulations defined revenues as gross revenues of the export trading company. The Board is in agreement with those comments that pointed out that use of "gross revenues" as the measurement for qualification of an export trading company could have unintended and somewhat arbitrary results, depending upon the activities of a particular export trading company. For example, the revenues generated by an export trading company's buying and selling of goods on a "gross revenues" basis would necessarily have a much greater weight in determining whether an export trading company meets the "principally" test than revenues generated by that export trading company's provision of services on a fee basis. For example, a company that primarily facilitates imports but also does some exporting nonetheless could qualify as an export trading company. The converse also would be true. Consequently, the Board decided that "revenues" should be defined in the regulations to include *net* sales revenues from the trading of goods by the export trading company for its own account (*i.e.*, the gross revenues received from the sale of goods less the expenditures made for the goods), and *gross* revenues derived from all other activities of the export trading company.

Another question that arose regarding the revenues test was how to treat revenues from third party trade or from countertrade. Some of the comments recommended that third party trade revenues not be included in the calculation of an export trading company's revenues for purposes of determining whether more than half the export trading company's business is U.S. export-related, nor that revenues from U.S. imports or third party trade *in a countertrade transaction* be so counted. The first proposal was based on the reasoning that third party trade should not be limited in the same manner that import activities are limited because they do not "reduce" demand for U.S. products in the same way. However, this could mean that an "export trading company" could be a company principally engaged in third party trade, which clearly is not the intent of the BESA. The argument was made, as to countertrade, that the importing or third party transaction may be the only way that a U.S. product can be exported and so the revenues derived from the importing or third party trade component of countertrade transactions should not be counted in the revenues test. However, Congress appears to have intended that these activities should be conducted where necessary or useful in the conduct of an export trading company's primary business of exporting, so that the revenues generated by the non-exporting activities should not exceed the export trading company's export revenues. Therefore, the Board adopted no changes in the regulation on these points.

Investments and Extensions of Credit

A. Limits on Amounts

The BESA authorizes banking organizations, as described above, to invest in export trading companies subject to certain prudential limits on aggregate financial exposure of each organization in this new activity. The regulations include the statutory limitations on investment, *i.e.*, a bank holding company, Edge or agreement corporation or bankers' bank may invest a total of five per cent of its consolidated capital and surplus in export trading companies. An Edge or Agreement corporation not engaged in banking (*i.e.*, deposit-taking in the United States from unaffiliated persons) may invest a total of up to 25 per cent of its consolidated capital and surplus in export trading companies. Reinvested dividends by the investor and retained earnings of the export trading company are not considered an "investment" in determining compliance with the investment limitation.

The legislation also contains certain restrictions on extensions of credit by banking organizations to affiliated export trading companies and their customers. The draft regulation limited the amount of credit that an investor could extend, directly or indirectly, to its affiliated export trading company *or export trading companies* to 10 per cent of the investor's consolidated capital and surplus. This provision elicited several comments, most of which objected to applying the 10 per cent limit on an aggregate basis to loans to all export trading companies in which a bank holding company invests. The Board believes that aggregate extensions of credit to all export trading companies in which the bank holding

company invests is the only reasonable interpretation of this provision. The contrary interpretation would make this prudential limit meaningless since a bank holding company could easily choose to conduct its export trading company activities through an unlimited number of small, *e.g.*, single service, companies and effectively avoid the statutory limitation. This limitation does not appear to pose any immediate problems. In any event, the Board must report to Congress by October 8, 1984, on its experience under the BESA. Should it develop that banking organization involvement in export trading companies may be unduly hampered by such a lending limitation, the Board will consider making appropriate recommendations for modifications in the legislation.

B. Section 23A of the Federal Reserve Act ("FRA")

A major area of comment involving extensions of credit was the applicability of the collateral requirements of section 23A of the FRA to covered transactions between a bank holding company's subsidiary bank and an affiliated export trading company. Most of the comments received from the industry recommend that the Board exempt all bank extensions of credit to an export trading company affiliate from section 23A's collateral requirements. Some of the reasons given for this position are: that it is virtually impossible to collateralize the financing of export services; that in the start-up phase an export trading company would probably not have the capital against which to borrow; and that the export trading companies of small or regional bank holding companies with limited access to financing in the commercial paper market would be competitively disadvantaged.

On May 9, the Board acted on the first notification by a bank holding company under the BESA in which the bank holding company requested a waiver in certain circumstances from the collateral requirements of section 23A. The Board waived the section 23A collateral requirements in the following transactions: where the bank provides a letter of credit for the account of its affiliated export trading company or advances funds for the purchase of goods for the resale of which the export trading company has a firm order from a bona fide customer, and where the bank has a security interest in the goods or proceeds from the sale of the goods at least equal in value to the letter of credit or advance. The Board concluded that, with this waiver, the export trading company could finance, through its affiliated bank, the purchase of goods in which it is trading without creating an undue risk to the bank.

The Board believes that the granting of the limited waiver should address many of the concerns raised in the public comments on the section 23A issue. With such a waiver, the major export trading company activities requiring substantial amounts of financing could in fact be financed by the affiliated bank, and this method could be used by large or small bank holding companies alike. The Board accordingly adopted a regulation incorporating this type of waiver. The Board may grant additional waivers from the section 23A collateral requirements based on specific requests.

C. Preferential Lending

In addition to limiting the financial risk to affiliated banks by limiting the investor's financial exposure in export trading companies, the legislation contains a further provision specifically intended to mitigate potential conflicts of interests and associated risks where a banking organization is linked with a commercial venture. A bank holding company or its subsidiary may extend credit to an affiliated export trading company or its customers on terms no more favorable than those afforded similar borrowers in similar circumstances. The proposed regulation provided that the term "customer" includes affiliates of the customer in order to prevent potential evasions of the purpose of this statutory provision.

The proposed regulation also applied the foregoing limitation on preferential lending to extensions of credit by a bank holding company to a co-investor with at least a 10 percent interest in an export trading company or to affiliates of the co-investor. The Board is concerned that joint ventures, particularly between banking and nonbanking organizations, create a serious potential for conflicts of interest and concentration of economic resources. However, the Board recognizes that the legislation specifically authorizes joint ventures both between banking organizations and between banking and nonbanking organizations. The limitations contained in the regulations on preferential lending, which are designed to reduce potential conflicts of interest and unsound banking practices that might result from joint venture export trading companies, do not in any way affect the ability of the bank holding company or its affiliated banks to offer to the esport trading company, its oustomers, or a co-investor any rate that is based on the established creditworthiness of the borrower. Rather, the provision merely incorporates principles of soumd banking practice.

The Reserve Banks' comments express the view that since all preferential lending is undesirable, the prohibition should apply to all transactions and the reference to a 10 percent minimum interest of a co-investor should be deleted. Although the Board agrees that all preferential lending is undesirable, the Board nonetheless believes that a 10 percent minimum interest in an export trading company is a reasonable threshhold for closer scrutiny of transactions and the regulatory requirement need not be changed.

Several commenters considered the preferential lending restrictions as inordinately burdensome from an administrative standpoint. In light of these comments, the Board determined that affiliate of an export trading company's customers need not be included in the preferential lending prohibition in the regulation. Of course, if it were to become apparent that the prohibition on preferential lending was being evaded through loans to an affiliate of an export trading company's customer, appropriate enforcement action could be taken at that time.

In response to one comment concerning possible problems with extraterritorial application of the regulations where a foreign banking organization subject to the BESA invests in an export trading company, the Board notes that the preferential lending restrictions apply only to U.S. activities of foreign banks.

Notification Procedures

Commenters suggested various criteria as a basis for allowing general consent procedures. The Reserve Banks generally were opposed to adoption of general consent procedures at this time. The Board concluded that on balance the establishment of such procedures would be premature until more experience with bank involvement in export trading companies is obtained, and the Board intends to reconsider this issue after some reasonable experience has been gained in the export trading company notification process, no later than one year from the effective date of these regulations.

The Board has deleted the reference in the regulations to the information required in notifications under the BESA. In considering the pending and completed notices to date, identification of activities by Standard Industrial Classification has been found to be unnecessary. Further, the use of the

Subpart A, Regulation K checklist for Proposed Investments (Attachment E to Board Form F.R. K–1) has been a suitable vehicle for obtaining needed information. The Board also deleted the activity "freight forwarding" from the list of activities for which a subsequent notification to the Board is required if the activity was not included in the bank holding company investor's original notice. Upon closer review of the activity, it was determined that the potential risks associated with that activity should not necessitate the subsequent notice requirement.

Finally, a significant issue in connection with notifications of proposed investments in export trading companies was presented to the Board with the proposed regulations. It was noted that the proposed leveraging ratios of export trading companies should be carefully examined in connection with notifications and in subsequent supervision of the bank holding companies. This is especially true where the company is engaged in trading and where the bank holding company's investment in the export trading company is significant. Capital adequacy is a critical determinant of financial strength of the export trading company and its ability to withstand unexpected adverse developments so as not to affect the financial resources of the parent holding company or the safety and soundness of affiliated banks. Capital adequacy of the export trading company also serves to assure competitive equality of bank-affiliated companies with companies that do not have the benefit of bank affiliation. Accordingly, the Board will consider the capital adequacy of an export trading company as an important factor to be taken into account in determining whether to disapprove a proposed bank holding company investment. The Board will consider adopting industry-wide capital standards generally for bank-affiliated export trading companies based on the Board's further experience with specific notifications of proposed investments (*e.g.*, after considering approximately a dozen such notices but no later than one year after adoption of these regulations). In the interim, banking organizations considering investments in export trading companies will be able to obtain guidance regarding the Board's policies on capital adequacy for export trading companies in the context of Board actions on individual notices.

Bank holding company investment in export trading companies also raises the need to review the adequacy of the capital of the parent organization. Where a bank holding company seeks to expand its activities and operations through an export trading company, the Board will, in evaluating the proposed investment, also address the capital adequacy of the holding company.

The foregoing discussion constitutes the analysis required by the Regulatory Flexibility Act (5 U.S.C. 604).

List of Subjects in 12 CFR Part 211

Banks, banking, Federal Reserve System, Foreign Banking, Investments, Reporting and recordkeeping requirements.

Pursuant to its authority under section 5 of the Bank Holding Company Act (12 U.S.C. 1844), the Board proposes to amend 12 CFR Part 211 by adding a new Subpart C, reading as follows:

PART 211—INTERNATIONAL BANKING OPERATIONS

* * * * *

Subpart C—Export Trading Companies

Sec.
211.31 Authority, purpose and scope.
211.32 Definitions.
211.33 Investments and extensions of credit.
211.34 Procedures for filing and processing notices.

Authority: Federal Reserve Act (12 U.S.C. 221 *et seq.*); Bank Holding Company Act of 1956, as amended (12 U.S.C. 1841, *et seq.*); the International Banking Act of 1978 (Pub. L. 95–369; 92 Stat. 607; 12 U.S.C. 3101 *et seq.*); and the Bank Export Services Act (Title II, Pub. L. 97–290, 96 Stat. 1235 (1982)).

* * * * *

Subpart C—Export Trading Companies

§ 211.31 Authority, purpose and scope.

(a) *Authority.* This Subpart is issued by the Board of Governors of the Federal Reserve System ("Board") under the authority of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1841 *et seq.*) ("BHC Act") and the Bank Export Services Act (Title II, Pub. L. 97–290, 96 Stat. 1235 (1982)) ("BESA").

(b) *Purpose and scope.* This Subpart is in furtherance of the purposes of the BHC Act and the BESA, the latter statute being designed to increase U.S. exports by encouraging investments and participation in export trading companies by bank holding companies and the specified investors. The provisions of this Subpart apply to: (1) Bank holding companies as defined in section 2 of the BHC Act (12 U.S.C. 1841(a)); (2) Edge and Agreement corporations, as described in § 211.1(b) of this Part, that are subsidiaries of bank holding companies but are not subsidiaries of banks; (3) bankers' banks as described in section 4(c)(14)(F)(iii) of the BHC Act (12 U.S.C. 1843(c)(14)(F)(iii)); and (4) foreign banking organizations as defined in § 211.23(a)(2) of this Part. These entities are hereinafter referred to as "eligible investors."

§ 211.32 Definitions.

The definitions of § 211.2 in Subpart A apply to this Subpart subject to the following:

(a) "Export trading company" means a company that is exclusively engaged in activities related to international trade and, by engaging in one or more export trade services, derives more than one-half its revenues in each consecutive two-year period from the export of, or from facilitating the export of, goods and services produced in the United States by persons other than the export trading company or its subsidiaries. For purposes of this subsection, revenues shall include net sales revenues from exporting, importing, or third party trade in goods by the export trading company for its own account and gross revenues derived from all other activities of the export trading company.

(b) The terms "bank," "company" and "subsidiary" have the same meanings as those contained in section 2 of the BHC Act (12 U.S.C. 1841).

§ 211.33 Investments and extensions of credit.

(a) *Amount of Investments.* In accordance with the procedures of § 211.34 of this Subpart, an eligible investor may invest no more than five per cent of its consolidated capital and surplus in one or more export trading companies, except that an Edge or Agreement corporation not engaged in banking may invest as much as 25 per cent of its consolidated capital and surplus but no more than five per cent of the consolidated capital and surplus of its parent bank holding company.

(b) *Extensions of credit.*

(1) *Amount.* An eligible investor in an export trading company or companies may extend credit directly or indirectly to the export trading company or companies in a total amount that at no time exceeds 10 per cent of the investor's consolidated capital and surplus.

(2) *Terms.* An eligible investor in an export trading company may not extend credit directly or indirectly to the export trading company or any of its customers or to any other investor holding 10 per cent or more of the shares of the export trading company on terms more favorable than those afforded similar borrowers in similar circumstances, and such extensions of credit shall not involve more than the normal risk of

repayment or present other unfavorable features. For the purposes of this provision, an investor in an export trading company includes any affiliate of the investor.

(3) *Collateral requirements.* Covered transactions between a bank and an affiliated export trading company in which a bank holding company has invested pursuant to this Subpart are subject to the collateral requirements of section 23A of the Federal Reserve Act (12 U.S.C. 371c), except where a bank issues a letter of credit or advances funds to an affiliated export trading company solely to finance the purchase of goods for which:

(i) The export trading company has a bona fide contract for the subsequent sale of the goods; and

(ii) The bank has a security interest in the goods or in the proceeds from their sale at least equal in value to the letter of credit or the advance.

§ 211.34 Procedures for filing and processing notices.

(a) *Filing notice.*—(1) *Prior notice of investment.* An eligible investor shall give the Board 60 days' prior written notice of any investment in an export trading company.

(2) *Subsequent notice.* An eligible investor shall give the Board 60 days' prior written notice of changes in the activities of an export trading company that is a subsidiary of the investor if the export trading company expands its activities beyond those described in the initial notice to include: (1) Taking title to goods; (ii) product research and design; (iii) product modification; or (iv) activities not specifically covered by the list of services contained in section 4(c)(14)(F)(ii) of the BHC Act. Such an expansion of activities shall be regarded as a proposed investment under this Subpart.

(b) *Time period for Board action.* (1) A proposed investment that has not been disapproved by the Board may be made 60 days after the Reserve Bank accepts the notice for processing. A proposed investment may be made before the expiration of the 60-day period if the Board notifies the investor in writing of its intention not to disapprove the investment.

(2) The Board may extend the 60-day period for an additional 30 days if the Board determines that the investor has not furnished all necessary information or that any material information furnished is substantially inaccurate. The Board may disapprove an investment if the necessary information is provided within a time insufficient to allow the Board reasonably to consider the information received.

(3) Within three days of a decision to disapprove an investment, the Board shall notify the investor in writing and state the reasons for the disapproval.

By order of the Board of Governors, June 2, 1983.

William W. Wiles,

Secretary of the Board.

[FR Doc. 83-15161 Filed 6-7-83; 8:45 am]

BILLING CODE 6210-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 386

[Docket No. 30518-92]

Amendment to Procedure for Shipments Exempt From Shipper's Export Declarations

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Interim rule with request for comments.

SUMMARY: The general export clearance provisions (§ 386.1) of the *Export Administration Regulations* are revised to require freight forwarders *only,* who are exempt from individual Shipper's Export Declaration (SED) filing requirements because they are authorized to report monthly, to include general license symbols or validated license numbers and expiration dates on bills of lading or other loading documents. This revision removes this requirement for exporters, because the Office of Export Administration and Office of Export Enforcement approve an exporter before authority is granted to use the SED monthly reporting procedure, and carriers because they will continue to receive SEDs or annotated loading documents and make them available for inspection with the cargo as required.

EFFECTIVE DATE: June 8, 1983. This rule may be further revised in light of any comments received. Comments must be received by August 8, 1983.

ADDRESSES: Written comments (five copies when possible) should be sent to: Richard J. Isadore, Director, Operations Division, P.O. Box 273, Office of Export Administration, Washington, D.C. 20044.

The public record concerning these regulations may be inspected at the International Trade Administration Freedom of Information Records Inspection Facility, Room 4001B, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Mr. Archie Andrews, Director, Exporters' Service Staff, Office of Export Administration (Telephone: (202) 377-5247 or 377-4811).

SUPPLEMENTARY INFORMATION:

Substance of Regulations

To reduce export paperwork requirements, the monthly SED procedure was first announced by the Bureau of the Census on August 3, 1968 (33 FR 11076) and further expanded on October 5, 1981 (46 FR 48960). This procedure permits exporters carriers, forwarders, or brokers to obtain authorization to file a monthly report of exports in lieu of individual Shipper's Export Declarations.

On October 21, 1982 (47 FR 46845), OEA revised the monthly SED procedure to require that the Export Administration general license symbol or validated license number and expiration date be included on the bill of lading, air waybill, house air waybill, or other loading document so that ITA and and Customs officials can ensure that the exporter has a current and applicable general or validated license. This rule now amends that requirement so that where formerly exporters, forwarders, carriers, or brokers were asked to supply the information described above, now only forwarders or brokers who are authorized to transmit SED information directly to the Census Bureau monthly, and thus be exempt from the individual SED filing requirement, must supply it.

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96-72, 50 U.S.C. app. 2401 *et seq.*) ("the Act") this rule is exempt from the public participation in rulemaking procedures of the Administration Procedure Act. However, because of the importance of the issues raised by these regulations and the intent of Congress set forth in section 13(b) of the Act, these regulations are issued in interim form and comments will be considered in developing final regulations. These regulations may be revised before the end of the comment period. Accordingly, interested persons who desire to comment are encouraged to do so at the earliest possible time to permit the fullest consideration of their views.

2. This rule will result in a slight reduction in the paperwork burden on the public under the Paperwork

Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C app. 601 *et seq.).*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981) "Federal Regulation."

The period for submission of comments will close August 8, 1983. All comments received before the close of the comment period will be considered by the Department in the development of final regulations. While comments received after the end of the comment period will be considered if possible, their consideration cannot be assured. Public comments that are accompanied by a request that part or all of the material be treated confidentially because of its business proprietary nature or for any other reason will not be accepted. Such comments and materials will be returned to the submitter and will not be considered in the development of final regulations.

All public comments on these regulations will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, comments in written form are preferred. If oral comments are received, they must be followed by written memoranda which will also be a matter of public record and will be available for public review and copying. Communications from agencies of the United States Government or foreign governments will not be made available for public inspection.

The public record concerning these regulations will be maintained in the International Trade Administration Freedom of Information Records Inspection Facility, Room 4001B, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about the inspection and copying of records at the facility may be obtained from Patricia L. Mann, the International Trade Administration Freedom of Information Officer at the above address or by calling (202) 377–3031.

List of Subjects in 15 CFR Part 386

Exports.

PART 386—[AMENDED]

Accordingly, the *Export Aministration Regulations,* Part 386 (15 CFR Part 386 *et seq.)* are amended to revise § 386.1(c)(2), the introductory paragraph, and (d)(2) as follows:

§ 386.1 General export clearance requirements.

* * * * *

(c) * * *

(2) *Exceptions from Shipper's Export Declarations.* All parties exempt from filing a Shipper's Export Declaration are required by the Bureau of the Census *Foreign Trade Statistics Regulations,* 15 CFR 30.50, to make a statement on the bill of lading, air waybill, or other loading document describing the basis for the exemption and referencing the specific section of the *Foreign Trade Statistics Regulations* where the exemption is provided. If the exemption is based on value and destination, no reference to the specific section containing the exemption need be made. All forwarders or brokers exempt from filing an individual Shipper's Export Declaration in accordance with monthly reporting procedures (FTSR 15 CFR 30.39) on behalf of exporters not otherwise exempted from the filing requirement must also include on the bill of lading, air waybill (including house air waybill), or other loading document, in those instances when a license is required, the Export Administration general license symbol or validated license number and expiration date. This requirement applies to any bill of lading or other loading document, including one issued by a consolidator (indirect carrier) for an export included in a consolidated shipment. However, this requirement does not apply to a "master" bill of lading or other loading document issued by a carrier to cover a consolidated shipment. The bill of lading or other loading document shall be available for inspection along with the goods or data prior to lading on the carrier. A Declaration is not required for:

* * * * *

(d) * * *

(2) *Shipments for which individual Declarations are not required.* When an export to a foreign country is made in transit through Canada, and the shipment is one for which an individual Shipper's Export Declaration is *not* required because: (i) The forwarder or broker is authorized to report export information to Census by means other than an individual Shipper's Export Declaration, or (ii) the shipment qualifies for a specific exemption (listed in Subpart D of the Census Bureau *Foreign Trade Statistics Regulations*), the forwarder or broker must include license information on his bill of lading or other loading document as directed in § 386.1(c)(2). The properly annotated bill of lading or other loading document, along with the license authorization, when required, shall be displayed to the Canadian Customs authorities at the Canadian port of entry and a copy provided, if requested by the Canadian authorities.

(Sec. 13 and 15, Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. app. 2401 *et seq.;* Executive Order No. 12214 (45 FR 29783, May 6, 1980); Department Organization Order 10–3 (45 FR 6141, January 25, 1980); International Trade Administration Organization and Function Order 41–1 (45 FR 11862, February 22, 1980) and 41–4 (45 FR 65003, October 1, 1980))

Dated: May 16, 1983.

John K. Boidock,

Director, Office of Export Administration, International Trade Administration.

[FR Doc. 83–15382 Filed 6–7–83; 8:45 am]

BILLING CODE 3510–25–M

---

15 CFR Part 399

[Docket No. 30520–93]

CCL Amendments: Inorganic Chemicals

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Office of Export Administration maintains the Commodity Control List (CCL) which includes all commodities controlled for export by the U.S. Department of Commerce. This rule amends CCL Entry 4778B by deleting references in that Entry to provisions of General License *GLV,* a license that does not apply to the export of inorganic chemicals described in Entry 4778B of the CCL.

DATE: Effective June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Archie Andrews, Director, Exporters' Service Staff (Telephone: (202) 377–4811).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. app. 2401 *et seq.*) ("the Act"), this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. This rule does not impose new controls

on exports, and is therefore exempt from section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form.

2. This rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

Exports.

PART 399—[AMENDED]

Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are amended as follows:

ECCN 4778B—[Amended]

ECCN 4778B of the Commodity Control List (Supplement No. 1 to § 399.1) is amended by revising in the "List of Inorganic Chemnicals . . ." the phrase "§§ 371.16 and 371.5(d)" to read "§ 371.16" and by revising the phrase "General Licenses *G–NNR* and *GLV*" to read "General License *G–NNR*."

(Secs. 13 and 15, Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. app. section 2401 *et seq.*; E.O. No. 12214 (45 FR 29783, May 6, 1980))

Dated: May 16, 1983.

John K. Boldock,

Director, Office of Export Administration, International Trade Administration.

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 242b

General Procedures and Delegations of the Board of Regents of the Uniformed Services University of the Health Sciences

AGENCY: Uniformed Services University of the Health Sciences, Department of Defense.

ACTION: Final rule.

SUMMARY: This document amends the General Procedures and Delegations of the Uniformed Services University of the Health Sciences to change the structure of the Administrative Affairs and Education Affairs Committees of the Board of Regents.

EFFECTIVE DATE: May 26, 1983.

ADDRESS: General Counsel, Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Bethesda, Maryland 20014.

FOR FURTHER INFORMATION CONTACT: Merel P. Glaubiger, General Counsel, 202/295–3028.

SUPPLEMENTARY INFORMATION: In FR Doc. 77–36169 published in the **Federal Register** on December 20, 1977 (42 FR 63775) the Uniformed Services University of the Health Sciences published General Procedures and Delegations of the Board of Regents of the Uniformed Services University of the Health Sciences. This was amended in FR Doc. 78–28367 published in the **Federal Register** on October 10, 1978 (43 FR 46531) to alter the number and responsibilities of officers reporting to the Dean of the University (President), in FR Doc. 81–6774 published in the **Federal Register** on March 23, 1981 (46 FR 18024) to realign certain functions of officers reporting to the Dean of the University (President), and in FR Doc. 82–15200 published in the **Federal Register** on June 4, 1982 (47 FR 25297) to add one officer reporting to the Dean (President) of the University. The purpose of this amendment is to change the structure of the Administrative Affairs and Educational Affairs Committees.

Because this rule relates solely to matters of University organization and procedure, notice of proposed rulemaking and public participation in the rulemaking are not required by Part 296 of this title.

List of Subjects in 32 CFR Part 242b

Medical and dental schools, Uniformed Services.

PART 242b—GENERAL PROCEDURES AND DELEGATIONS OF THE BOARD OF REGENTS OF THE UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

Accordingly, pursuant to the Uniformed Services Health Professions Revitalization Act, Section 552 of Title 5 of the United States Code, and § 242b.6(a) of this Title, the Board of Regents of the Uniformed Services, University of the Health Sciences, amends Par 242b of this title by amending § 242b.6 by removing § 242b.6(a)(2), amending § 242b.6(a)(3), renumbering § 242b.6(a)(3) and (4) to § 242b.6(a)(2) and (3), and amending § 242b.6(g) and (h) as follows:

§ 242b.6 Committees.

(a) *Standing committees.* (1) * * *

(2) The committees shall meet at the call of the Committee Chairman.

(3) Permanent minutes of all meetings shall be kept, and shall be open for inspection to all Regents.

* * * * *

(g) Educational Affairs Committee. This Committee shall make recommendations to the Board on academic matters referred to the Committee by the Chairman of the Board, including the administration of student and faculty academic affairs.

(h) Administrative Affairs Committee. This Committee shall make recommendations to the Board on all budget and other matters relating to the fiscal and general business management of the University, on the planning for and general development of the University, and on construction, maintenance and repair of the buildings, grounds and utilities of the University, referred to the Committee by the Chairman of the Board.

Dated: June 3, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

Regulations for the Enforcement of the Federal Insecticide, Fungicide, and Rodenticide Act; Notification to the Secretary of Agriculture of a Final Regulation on Conditional Registration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Rule related notice.

SUMMARY: Notice is given that the Administrator of EPA has forwarded to the Secretary of the U.S. Department of Agriculture a final regulation to govern the conditional registration of pesticide products which are identical or substantially similar to those currently registered, and the conditional registration of new uses of existing pesticides by the Agency. This action is required by section 25(a)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT: Jean M. Frane, Registration Division

(TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1114C, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–0592).

SUPPLEMENTARY INFORMATION: Section 25(a)(2)(B) of FIFRA provides that the Administrator shall provide the Secretary of Agriculture with a copy of any final regulation at least 30 days prior to signing it for publication in the **Federal Register**. If the Secretary comments in writing regarding the final regulation within 15 days after receiving it, the Administrator shall issue for publication in the **Federal Register**, with the final regulation, the comments of the Secretary, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. If the Secretary does not comment in writing within 15 days after receiving the final regulation, the Administrator may sign the regulation for publication in the **Federal Register** anytime after the 15-day period.

As required by FIFRA section 25(a)(3), a copy of this final regulation has been forwarded to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(Sec. 25, Pub. L. 92–516, 86 Stat. 973 as amended; (7 U.S.C. 136 et seq.))

Dated: May 31, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities Cross-linked Polyurea-Type Encapsulating Polymer (Alachlor)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for residues of the cross-linked polyurea-type encapsulating polymer formed by reacting polymethylene polyphenyl-isocyanate and hexamethylene diamine when used for encapsulating alachlor for use on certain raw agricultural commodities. This regulation was requested in a petition submitted by the Monsanto Company.

EFFECTIVE DATE: Effective on June 8, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Environmental Protection Agency, Rm. 245, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of April 6, 1983 (48 FR 15002) which announced that the Monsanto Company, 1101 17th St., NW., Washington, D.C. 20036, had submitted pesticide petition 2F2681 to EPA. The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of an exemption from the requirement of a tolerance for residues of the cross-linked polyurea-type polymer formed by reacting polymethylene polyphenylisocyanate (PAPI) with 1,6-hexamethylenediamine (HMDA) as the cross-linked reactant when used for encapsulating alahlor (2-chloro-*N*-(2,6-diethylphenyl)-*N*-(methoxymethyl) acetamide for use on the crops dry beans, lima beans, peas, potatoes, and soybeans before formation of edible portions of the crop.

There were no comments received in response to the notice of filing.

The data submitted in the petition and other relevent material have been evaluated. Based on the information submitted, the Agency has concluded that the close structural similarity of the polymer to the presently cleared polymers, PAPI with toluene diisocyanate as the cross-linked reactant (cleared under 40 CFR 180.1039) and PAPI mixed with sebacoyl chloride and a mixture of ethylenediamine and diethylenetriamine (cleared under 40 CFR 180.1028), indicates that there is no expection of signficant toxicity that could be associated with the encapsulating polymer (PAPI with HMDA as reactant).

There are no other data required for this exemption. No residues are expected from the encapsulating material since the use involves application before edible parts of the crops are formed.

There are no regulatory actions pending against the encapsulating material (polyurea-type polymer) and no rebuttable presumption against registration (RPAR) criteria have been exceeded. Since there are no residues of the encapsulating material expected in the subject crops, regulatory action is not anticipated in the case of the exemption. Therefore, no analytical method is required. Since no detectable residues are expected in the crops from the use, residues are not expected in meat, milk, poultry, or eggs.

The encapsulating material is considered useful for the purpose for which the exemption is sought. It is concluded that the exemption would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: May 23, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR Part 180 is amended by adding a new § 180.1082 to read as follows:

§ 180.1082 Cross-linked polyurea-type encapsulating polymer (Alachlor); exemption from the requirement of a tolerance.

The cross-linked polyurea-type encapsulating polymer formed by the reaction of polymethylene polyphenylisocyanate and

hexamethylene diamine is exempted from the requirement of a tolerance when used as an inert capsulating material for formulations of alachlor (2-chloro-*N*-(2,6-diethylphenyl)-*N*-(methoxymethyl) acetamide) for use on the crops dry beans, lima beans, peas, potatoes, and soybeans, when applied to the soil before edible portions of the crops form.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

[FPR Amdt. 231]

Contract Cost Principles and Procedures; Cost Principle on Defense of Fraud Proceedings

AGENCY: General Services Administration

ACTION: Final rule.

SUMMARY: This amendment adds a new cost principle dealing with the cost of defense of fraud proceedings to the cost principles for contracts with commercial organizations. This cost principle is based on a cost principle recently incorporated in the Defense Acquisition Regulation. The intended effect is to make unallowable all costs incurred in defense of criminal or civil fraud proceedings or administrative proceedings, such as those leading to suspension or debarment, when the action brought by the Government results in a conviction or judgment against the contractor, a decision to debar or suspend, or is resolved by consent or compromise.

EFFECTIVE DATE: July 7, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Frank T. Van Lierde, Office of Federal Acquisition & Regulatory Policy, Office of Acquisition Policy (202-523-4768).

SUPPLEMENTARY INFORMATION:

List of Subjects in 41 CFR Part 1-15

Cost principles, Government procurement.

PART 1-15—[AMENDED]

The table of contents for Part 1-15 is amended to add one entry under Subpart 1-15.2 as follows:

Sec.

* * * * *

1-15.205-53 Defense of fraud proceedings.

Subpart 1-15.2—Contracts With Commercial Organizations

Section 1-15.205-53 is added to read as follows:

§ 1-15.205-53 Defense of fraud proceedings.

(a) Costs incurred in connection with defense of any: (1) Criminal or civil investigation, grand jury proceeding or prosecution, (2) civil litigation, or (3) suspension, debarment or other administrative proceedings, or any combination of the foregoing brought by the Government against a contractor, its agent, or employee, are unallowable when the charges, which are the subject of the investigation, proceedings, or prosecution, involve fraud on the part of the contractor, its agent, or employee, as defined in paragraph (b) of this section, and result in conviction (including conviction entered on a plea of nolo contendere), judgment against the contractor, its agent, or employee, decision to debar or suspend, or are resolved by consent or compromise.

(b) Fraud, as used in this section, includes: (1) Acts of fraud or corruption or attempts to defraud the Government or to corrupt its agents, (2) acts which constitute a cause for debarment or suspension under § 1-1.605-2(a) and § 1-1.606-2(a), and (3) acts which violate the False Claims Act, 31 U.S.C. sections 3729-3731, or the Anti-Kickback Act, 41 U.S.C. sections 51 and 54.

(c) Costs, as used in this section, include, but are not limited to, administrative and clerical expenses; the costs of legal services performed by in-house or private counsel; the costs of the services of accountants, consultants, or others retained by the contractor to assist it; the salaries and wages of employees, officers, and directors; and any of the foregoing costs incurred prior to the commencement of the formal judicial or administrative proceedings that bear a direct relationship to the proceedings.

(d) In circumstances where the charges of fraud are resolved by consent or compromise, the parties may agree as to the extent of allowability of such costs as part of such resolution.

(e) Costs which may be unallowable under paragraph (a) through (d) of this section shall be differentiated and accounted for by the contractor so as to be separately identifiable. During the pendency of any proceeding or investigation covered by paragraph (a) of this section, the contracting officer should generally withhold payment of such costs. However, the contracting officer may in appropriate circumstances provide for conditional payment upon provision of adequate security, or other adequate assurance, and agreement by the contractor to repay all unallowable costs, plus interest, if a conviction or judgment is rendered against it.

Note.—See FPR Temporary Regulation 65 (45 FR 43092, October 4, 1982) for FPR references dealing with debarment and suspension in paragraph (b)(2) of § 1-15.205-53.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: May 31, 1983.

Ray Kline,

Acting Administrator of General Services.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[BC Docket No. 82-697; RM-4171]

Noncommercial Educational FM Stations in Ojai and Santa Barbara, California; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action amends the Table of Channel Assignments under the U.S.-Mexico FM Broadcast Agreement by assigning Channel 208A to Ojai, California, in response to a petition filed by Eugene G. White, Jr. and denies a counterproposal filed by Radio Broadcast Project Coordinators, La Casa de la Raza, to assign Channel 208A to Santa Barbara, California. The assignment could provide a first noncommercial educational service to Ojai.

DATE: Effective July 15, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT: Joel Rosenberg, Mass Media Bureau, (202) 634-6530.

Radio broadcasting.

Report and Order (Proceeding Terminated)

In the matter of an amendment of § 73.504(a), Table of Assignments, Noncommercial Educational FM Stations (Ojai and Santa Barbara,[1] California); BC Docket No. 82-697, RM-4171.

[1] This community has been added to the caption.

Adopted: April 29, 1983.
Released: May 16, 1983.
By the Chief, Policy and Rules Division.

1. The Commission has before it the *Notice of Proposed Rule Making* (47 FR 45057, published October 13, 1982) proposing to amend the Table of Channel Assignments under the U.S.A.-Mexico FM Broadcast Agreement, § 73.504(a) of the Commission's Rules, by assigning Channel 208A to Ojai, California, in response to a petition for rule making filed by Eugene G. White, Jr. ("petitioner"). The purpose of this proposal is to provide Ojai with a first noncommercial educational FM broadcast service. Petitioner states that he will operate the proposed station as a non-profit, noncommercial, community-oriented Christian religious broadcast facility. Comments and a counterproposal were filed by Radio Broadcast Project Coordinators. La Casa de la Raza ("Project Coordinators"). Petitioner filed reply comments. In the *Notice*, we observed that the proposal required the concurrence of the Mexican government. That concurrence has been obtained.

2. Project Coordinators requests the assignment of Channel 208A to Santa Barbara, California, stating that this would result in noncommercial broadcast service to a greater population than would a grant of petitioner's request. According to Project Coordinators, only two noncommercial educational FM stations serve the Santa Barbara area, with Station KCSB–FM serving primarily the student body of the University of California-Santa Barbara and Station KSCA (FM) operating as a satellite facility for the University of Southern California. Project Coordinators indicates that a typical Ojai transmitter location could reach only a limited audience. Project Coordinators states, without elaboration, that a grant of its request "would be more compatible and consistent with principles instituted under the U.S.-Mexico Treaty" than would a grant of petitioner's request. It asserts that the Ojai area is served by seven radio stations, including FM Station KOVA in Ojai, and that all address local issues. This is contrasted to Santa Barbara, whose non-commercial audience, it is claimed, is only partially served by KCSB–FM and (in the future) by KSCA. According to Project Coordinators, it intends to create programs and to manage the proposed station so as to reach the underserved minority and Hispanic populations of Santa Barbara. Project Coordinators claims that its intention to promote community-oriented broadcasts to a large population would best serve the public interest.

3. Petitioner indicates that Project Coordinators' comments having been received by the Commission on November 29, 1982, after the cut-off date of November 22, should not be considered. However petitioner states that if the counterproposal is accepted, then Ojai should be favored. In this regard the petitioner asserts that Santa Barbara is well served by radio stations and that, although Ojai does receive radio service, he intends to provide a different format specifically attuned to local community needs. Petitioner argues that Santa Barbara, being large, is best suited for service by a Class B station. As for Ojai's population being smaller, petitioner alleges that there is no minimum population requirement for allocation of a frequency and that his proposed transmitter location on a nearby mountain top would not result in a limited signal, as described by Project Coordinators.

4. Responding to petitioner's objection to its apparent late filing, Project Coordinators asserts that, on November 21, 1982, it mailed its response from a local post office and was assured that its mailing would be received at the Commission on November 22. To support this claim, Project Coordinators proffers a copy of an express mail receipt.

5. Subsequently, Project Coordinators submitted a letter, dated January 27, 1983 by which it purports to make up for a "deficiency" in its earlier filing by stating its intention to apply for a license if a frequency is allocated to Santa Barbara.

6. Initially, we note that, although Project Coordinators' comments were received after the cut-off date, those comments will, nevertheless, be considered. It appears that Project Coordinators made a good faith effort to file a timely response to the *Notice* and has provided evidence to that effect. For purposes of this proceeding, the evidence that Project Coordinators submitted its comments to a post office on November 21 and requested express mail service is sufficient for acceptance.

7. The Commission's policy regarding the priorities for resolving conflicting requests for FM channels is contained in *Revision of FM Assignment Policies and Procedures*, 90 F.C.C. 2d 88 (1982). This proceeding did not specifically refer to § 73.504(a) nor did it address matters uniquely related to the allocation of noncommercial educational frequencies. We have been unable to find a similar case in which a comparison of communities was undertaken under § 73.504(a). Thus we have not developed specific criteria for the allocation of noncommercial educational channels. Furthermore, neither party has cited precedent regarding the criteria to be used. Rather, each argues for their own proposal based on the programming each intends to provide. However since the scope of this proceeding is limited to the assignment of a channel to a community to be made available for application to any interested person, we cannot be guided by particular programming proposals. Reliance on such matters would be unjustifiable at this stage, because we do not know the identity of all potential applicants. As an allocations matter, we generally favor a first local service whether it be FM (§ 73.202(b)), TV (§ 73.606(b)) or AM (§ 73.37). The allocation of noncommercial educational channels has been treated in the same manner procedurally and substantively for drop-in assignments. The comparative priorities for allocations are well established in Table of Assignment cases and we see no reason to depart from the established priorities for the noncommercial educational FM service. Thus, we believe the approporiate criteria to be used are the priorities set forth in *Revision of FM Assignment Policies and Procedures, supra.* Pursuant to that policy, communities lacking a first noncommercial educational channel would obtain a priority. Such is the case with Ojai while Santa Barbara has two non-commercial educational channels assigned.[1] Thus, in the absence of any overriding considerations, priority should be given to Ojai for the assignment of Channel 208A.

8. Accordingly, pursuant to authority contained in Sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's rules, it is ordered, That effective July 15, 1983, the Table of Channel Assignments under the U.S.A.-Mexico FM Broadcast Agreement (§ 73.504(a) of the Commission's Rules (is amended as follows for the communities listed:

City	Channel No.
Ojai, Calif.	208A

9. It is further ordered, That the counterproposal of Project Coordinators is denied.

[1] Channels 204B and 220B.

10. It is further ordered, That this proceeding is terminated.

11. For further information concerning this proceeding, contact Joel Rosenberg, Mass Media Bureau, (202) 634–6530.

47 CFR Part 97

[FCC 83–247]

Amateur Radio Service; Amendment of the Commission's Rules Pursuant to the Commission's Regulatory Review Program

AGENCY: Federal Communications Commission.

ACTION: Final rules (Order).

SUMMARY: The rule amendments promulgated by this Order are either a deletion of an unnecessary rule, an editorial modification or revision of a rule for clarification, an amendment to relieve a restriction, or a codification of a provision of the Communications Act of 1934, as amended. The subject rules have been reviewed as part of the Commission's ongoing effort to identify and revise rules which are outdated, confusing, ambiguous or place an unnecessary burden on the public. The rule amendments being ordered here are in furtherance of that objective and are sufficiently minor in scope to be considered comprehensively by this action without recourse to prior notice and comment procedures.

EFFECTIVE DATE: June 15, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Maurice J. DePont, Private Radio Bureau, Special Services Division, (202) 632–4964.

Radio.

Order

In the matter of an amendment of Part 97 of the Commission's Rules Pursuant to the Commission's Regulatory Review Program.

Adopted: May 20, 1983.
Released: June 1, 1983.

By the Commission: Commissioner Fogarty not participating; Commissioner Sharp absent.

1. Pursuant to the Commission's Regulatory Review program, the rules addressed herein are being amended or deleted, as appropriate, in order to eliminate unnecessary restrictions and rules, codify requirements of the Communications Act of 1934, as amended, or make editorial corrections necessary for simplification or clarification of the rules. The affected rule sections are Sections 97.13, 97.32, 97.61, 97.69, 97.81, 97.84, 97.99 and 97.173.

2. We are deleting § 97.32(f), which currently prohibits the renewal of Interim Amateur Permits, since renewals may be justified in circumstances where there is an extraordinary delay in the issuance of permanent amateur operator and station licenses.

3. We are revising § 97.13(c) and § 97.13(d) to correct an omission in order that amateur operator license renewal applicants may submit a photocopy of their license in place of the original document. We are deleting § 97.69(a)(3), and revising §§ 97.61(e), 97.69(a)(2) and 97.69(b)(3) in order to rectify certain unintentional inconsistencies in our recent Order authorizing the use of the digital code "AMTOR" on Amateur Radio Service frequencies below 50 MHz.[1] We are revising § 97.99 to delete the reference to the obsolete Form 452–C. We are also revising § 97.173(d) to change the incorrect reference to § 97.41 to the correct reference, § 97.42.

4. We are adding a new paragraph to § 97.81 which codifies into the rules the existing requirements of the Communications Act of 1934, as amended, that specify that the Commission has the "* * * authority to inspect all radio installations * * * which are subject to the provisions of any Act, treaty, or convention * * *".[2] This amendment also codifies longstanding Commission policy in that the authority to inspect amateur radio stations is a general condition of grant of all amateur licenses.

5. Finally, we are revising § 97.84 to allow station identification for amateur stations to be made by video when specific transmission standards are used, or, under some circumstances, by using certain common digital codes. This will relieve a number of burdens amateur operators have faced when required to identify "packet radio" transmissions, television transmissions where audio cannot be practically transmitted on the same operating frequencies, and transmissions where international third party traffic is exchanged and identification of the station being communicated with is required.[3]

6. We are dispensing with the prior notice and comment procedure provisions of the Administrative Procedure Act (APA) in this proceeding since the subject rule changes are either interpretative (§§ 97.13, 97.69, 97.81, 97.99) or relate to agency procedure (§ 97.32), or since it is unlikely that any objections would be received in view of the obvious benefits which are being conferred and we, therefore, find it unnecessary (§§ 97.61, 97.69, 97.84, 97.99).[4] The APA's effective date requirements are also not applicable to these rule amendments because they either relieve a restriction, or are interpretative.[5] Certain rule changes also addressed merely make editorial corrections and the APA, therefore, does not apply (§ 97.173).

7. Inasmuch as general notice of proposed rule making is not required, the Regulatory Flexibility Act of 1980 does not apply.

8. Accordingly, it is ordered That, effective June 15, 1983, Part 97 of the Commission's Rules and Regulations, 47 CFR Part 97, IS AMENDED as set forth in the attached Appendix. This action is taken pursuant to authority contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended. Further information on this matter may be obtained by contacting: Maurice J. DePont, (202) 632–4964, Federal Communications Commission, Private Radio Bureau, Washington, D.C. 20554.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

PART 97—[AMENDED]

Part 97 of the Commission's Rules and Regulations, 47 CFR Part 97, is amended as follows:

1. In § 97.13, paragraphs (c) and (d) are revised to read as follows:

§ 97.13 Renewal or modification of operator license.

* * * * *

(c) Application for renewal and/or modification of an amateur operator license shall be submitted on FCC Form

---

[1] 48 FR 7457 (February 22, 1983).

[2] See Section 303(n) of the Communications Act of 1934, as amended.

[3] Article 25, § 5 of the International Radio Regulations (Geneva, 1979) permits identification signals in the form of, among others, "a telegraph code compatible with conventional printing equipment." Furthermore, the television emissions which we are authorizing to be identified by video are those which can only take place on frequencies where international propagation is unlikely.

[4] See 5 U.S.C. 553(b)(3).

[5] See 5 U.S.C. 553(d).

610 and shall be accompanied by the applicant's license or a photocopy thereof. Application for renewal of unexpired licenses must be made during the license term and should be filed within 90 days, but not later than 30 days, prior to the end of the license term. In any case in which the licensee has, in accordance with the provisions of this chapter, made timely and sufficient application for renewal of an unexpired license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

(d) If a license is allowed to expire, application for renewal may be made during a period of grace of five years after the expiration date. During this five-year period of grace, an expired license is not valid. A license renewed during the grace period will be dated currently and will not be backdated to the date of its expiration. Application for renewal shall be submitted on FCC Form 610 and shall be accompanied by the applicant's license or a photocopy thereof.

§ 97.32 [Amended]

2. In § 97.32, paragraph (f) is removed in its entirety.

§ 97.61 [Amended]

3. In § 97.61, the parenthetical phrase in paragraph (e) is revised to read as follows:

* * * * *

(e) * * *

(when type F1 or A2J emissions are employed in these bands, the radio or audio frequency shift, as appropriate, shall not exceed 1000 Hz)

4. In § 97.69, paragraph (a)(3) is removed in its entirety and paragraphs (a)(2) and (b)(3) are revised to read as follows:

§ 97.69 Digital communications.

* * * * *

(a) * * *

(2) When type A2, F1 or F2 emissions are used on frequencies below 50 MHz, the radio or audio frequency shift (the difference between the frequency for the "mark" signal and that for the "space" signal), as appropriate, shall not exceed 1000 Hz. When these emissions are used on frequencies above 50 MHz, the frequency shift, in hertz, shall not exceed the sending speed, in baud, of the transmission, or 1000 Hz, whichever is greater.

(b) * * *

(3) The International Radio Consultative Committee (CCIR) Recommendations 476–2 and 476–3 (commonly known as AMTOR); provided that the code, baud rate and emission timing shall conform to the specifications of CCIR 476–2 (1978) or CCIR 476–3 (1982), Mode A or Mode B.

* * * * *

5. Section 97.81 is revised to read as follows:

§ 97.81 Authorized apparatus.

(a) An amateur station license authorizes the use, under control of the licensee, of all transmitting apparatus at the fixed location specified in the station license which is operated on any frequency or frequencies allocated to the Amateur Radio Service, and, in addition, authorizes the use, under control of the licensee, of portable and mobile transmitting apparatus operated at other locations.

(b) The apparatus authorized for use by paragraph (a) of this section shall be available for inspection upon request by an authorized Commission representative.

6. In § 97.84, paragraph (g) is revised to read as follows:

§ 97.84 Station identification.

* * * * *

(g) The identification required by this section shall be given on each frequency being utilized for transmission and shall be made in one of the following manners:

(1) By telegraphy using the international Morse code (if this identification is made by an automatic device used only for identification, the code speed shall not exceed 20 words per minute);

(2) By telephony using the English language (the Commission encourages the use of a nationally or internationally recognized standard phonetic alphabet as an aid for correct telephone identification);

(3) By telegraphy using any code authorized by § 97.69(b), when the particular code is used for transmission of all or part of the communication or when the communication is transmitted in any digital code on frequencies above 50 MHz; or

(4) By video using readily legible characters when A5 emissions are used, the monochrome portions of which conform, at a minimum, to the monochrome transmission standards of § 73.682(a)(6) through § 73.682(a)(13), inclusive (with the exception of § 73.682(a)(9)(iii) and § 73.682(a)(9)(iv)).

* * * * *

7. In § 97.99, the introductory paragraph is revised to read as follows:

§ 97.99 Stations used only for radio control of remote model crafts and vehicles.

An amateur radio station in radio control operation with a mean output power not exceeding one watt may, when used for the control of a remote model craft or vehicle, be operated under the special provisions of this section, provided that a writing indicating the station call sign and the licensee's name and address is affixed to the transmitter.

* * * * *

8. In § 97.173, paragraph (d) is revised to read as follows:

§ 97.173 Application for RACES station license.

* * * * *

(d) If the application is for a RACES station to be in any special manner covered by § 97.42, those showings specified for non-RACES stations shall also be submitted.

[FR Doc. 83–15226 Filed 6–7–83; 8:45 am]
BILLING CODE 6712–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1011

Reorganization of Review Boards

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: In this notice the Commission announces that the three Review Boards in the Office of Proceedings have been merged into one Review Board. The merger of the Review Boards is indicated by a decline in the workload assigned to these boards. 49 CFR 1011.6 is revised to reflect this change.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Lee Alexander (202) 275–7513.

SUPPLEMENTARY INFORMATION: The Office of Proceedings currently utilizes three employee boards of general jurisdiction to decide operating rights, rates, and finance proceedings. Each Review Board consists of a Chairman and two members.

These boards have been merged into one Review Board consisting of one Chairman and six members. Decisions will be made by panels made up of three board members. The Chairman is responsible for assigning board members to panels and for assigning cases to the panels. The vote of at least two of the three Review Board members

assigned as a panel constitutes a quorum.

In the absence of the Board Chairman, the member senior in total length of service as a member of the Board is Acting Chairman. In the event of equal seniority in service as a Board member, the senior member in service with the Commission will be the Acting Chairman.

The current list of Review Board members is as follows:

Robert P. Carleton, Chairman
William J. Dowell, Member
Roger N. Fortier, Member
Paul R. Joyce, Member
Richard M. Krock, Member
William E. C. Parker, Member
Vernon A. Williams, Member

49 CFR 1011.6(e) is being amended as set forth in the Appendix to reflect the change to one Review Board.

Since this rule affects internal Commission procedures only, it is issued in final form and public comment is not required.

The revision set forth in the Appendix is adopted.

This action does not affect significantly the quality of the human environment or conservation of energy resources.

List of Subjects in 49 CFR Part 1011

Administrative practice and procedure; Authority delegations (Government agencies); Organization and functions (Government agencies).

(5 U.S.C. 553 and 49 U.S.C. 10301)

Dated: June 1, 1983.

By the Commission, Chairman Taylor.

Agatha L. Mergenovich,

Secretary.

Appendix

§ 1011.6 [Amended]

49 CFR 1011.6(e) is amended by revising the heading of the paragraph "Review Boards" to read "Review Board."

[FR Doc. 83-15357 Filed 6-7-83; 8:45 am]
BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting; Amendment to Regulations Describing Zones in Which Non-Toxic Shot Is Required for Waterfowl Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule amends descriptions of certain zones in which non-toxic shot is required for waterfowl hunting. When eaten by waterfowl, spent lead pellets may have a toxic effect. The only approved non-toxic shot available at this time is steel shot. Zone descriptions for Florida, Michigan, Illinois, and Texas are amended.

EFFECTIVE DATE: September 1, 1983.

FOR FURTHER INFORMATION CONTACT: John P. Rogers, Office of Migratory Bird Management, Fish and Wildlife Service, Washington, D.C. 20240 (202–254–3207).

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), as amended, authorizes and directs the Secretary of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds to determine when, to what extent, and by what means such birds or any part, nest, or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported, or transported.

Approriated funds for the Department of the Interior for fiscal year 1983 were restricted in their use by the following provision:

> No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation.

States wishing to amend the descriptions of non-toxic shot zones, published in the **Federal Register** on August 13, 1981, (46 FR 40879–84), were asked to notify the Service of any such proposed changes no later than twelve months prior to the anticipated implementation of such changes. In 1982 four States requested that the Service propose amendments prior to the hunting seasons commencing in 1983. These States were Florida, Michigan, Illinois, and Texas. Florida, Illinois, and Texas requested that additional areas be included in the regulation, while Michigan requested withdrawal of certain zones which were previously designated an non-toxic shot areas.

On January 13, 1983, the Service proposed for public comment (48 FR 1525–27) amendments to § 20.108 as requested by Florida, Illinois, Michigan, and Texas. Comments on the proposed amendments were accepted until February 25, 1983.

In summary the proposed amendments were as follows:

Michigan—Redescribed zones throughout the State in order to more accurately reflect areas where lead shot ingestion by waterfowl is a problem. The new descriptions represent a 23 percent reduction in the area previously covered by non-toxic shot zones in Michigan. Approximately half of the State's waterfowl harvest will occur in non-toxic shot zones as proposed for 1983.

Illinois—Rend Lake was proposed as a non-toxic shot zone.

Florida—Lake Ponte Vedra north of the Guana Dam, Occidental Wildlife Management Areas, and IMC Wildlife Management Area were proposed.

Texas—Seven southeast Texas counties and portions of five mid-coast counties were proposed. This area includes 47 percent of the waterfowl hunting activity in Texas.

Summary of Public Comment and Service Responses:

Five letters containing comments on the proposal were received between January 13, 1983, and February 25, 1983. Two letters were from individuals, two were from private organizations, and one from a State Wildlife agency. Both individuals live in Florida, and one provided comment in support of the proposal for Florida while the other expressed the view that the proposed additions were unnecessary. A letter from the Executive Director of the Sportsmen's Clubs of Texas, Inc. supported the proposal for Texas. A letter from the Director, Fisheries and Wildlife Division, National Wildlife Federation supported the proposed amendments for all four States.

A letter from the Florida Game and Fresh Water Fish Commission requested that the boundary proposed for the Occidental Wildlife Management Area and the current boundary for the Lake Okeechobee zone would be more accurately described as follows:

Occidental Wildlife Management Area—all of the Occidental phosphate mine pits east of SR 137, Black Still Road and Christie Tower Road; west of SR 135; south of SR 6 and north of White Springs, all located in Township 1 north; Range 15 and 16 east and Township 1 south, Ranges 15 and 16 east in Hamilton County.

Lake Okeechobee—the area lying lakeward of, and bounded by, the Lake Okeechobee levee, by the State Road 78, Kissimmee River bridge, and by State Road 78 from its intersections with the Lake Okeechobee levee at points near Lakeport and the Old Sportsmen's Village site.

Neither of the above changes are substantive. Their purpose is to provide more accurate boundary descriptions.

Based upon the comments received, the Service concludes that the proposed amendments for all four States and the requested wording changes suggested by the Florida Game and Fresh Water Fish Commission should be incorporated into § 20.108.

Other information: Regulations regarding use of non-toxic shot on some National Wildlife Refuges are published separately along with other regulations for these refuges.

This rule will not result in the collection of information from, or place recordkeeping requirements on, the public, under the Paperwork Reduction Act of 1980. In accordance with Executive Order 12291, it has been determined that this rule is not a major rule. However, the potential effects of this rule on certain individual consumers and businesses will continue to be monitored. In accordance with the Regulatory Flexibility Act (5 U.S.C. 601 et. seq.) it was determined that this rule, if implemented without adequate warning, could result in ammunition supplies for which there is no local demand. It is believed that adequate notice has been provided. Therefore, it was determined that the rule will not have a significant economic effect on a substantial number of small entities. A copy of the analysis relating to these decisions, *Determination of Effects of Proposed Amendment to Steel Shot Rules for 1983*, can be obtained from the U.S. Fish and Wildlife Service (MBMO), Washington, D.C. 20240. An Environmental Impact Statement on the steel shot program was signed in 1976. In addition, Environmental Assessments were prepared on various aspects of the steel shot program in 1977 through 1980. Copies of these documents can be obtained from the U.S. Fish and Wildlife Service (MBMO), Washington, D.C. 20240.

This final rule was authored by John P. Rogers, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, 202/254–3207.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

Accordingly, 50 CFR, Chapter I, Subchapter B, Subpart K, is amended by removing, adding or replacing non-toxic shot zone descriptions as indicated in the following:

§ 20.108 [Amended]

Florida—Remove all words following Alachua County; and replace with: the area lying lakeward of, and bounded by the Lake Okeechobee levee, by the State Road 78, Kissimmee River bridge, and by State Road 78 from its intersections with the Lake Okeechobee levee at points near Lakeport and the Old Sportsman's Village site; all of the Occidental phosphate mine pits east of SR 137, Black Still Road and Christie Tower Road, west of SR 135, south of SR 6 and north of White Springs (all located in Township 1 north, Ranges 15 and 16 east, and Township 1 south, Ranges 15 and 16 east, in Hamilton County).

Illinois—Remove all words following Union County Public Hunting Area, and replace with: Horseshoe Lake, Rend Lake and related subimpoundments and all adjacent lands managed by the U.S. Army Corps of Engineers and the Illinois Department of Conservation.

Michigan—Remove the present wording and replace with the following:

Michigan

A. Eastern Upper Peninsula

1. That area of Chippewa County encompassed by a line from the tip of Conely's Point (Section 4, T44N R2E) southeasterly to the tip of Winter Point (Section 14, T44N R2E) to the tip of Rocky Point (Section 25,T44N R2E); then south on Rocky Point Road and west on Gogomain Road to the Town of Pickford; north on M–129 to the junction with 15-Mile Road (Section 19,T45N R1E); to the Village of Neebish; then south on the paved road from Neebish (Scenic Drive) to the point of beginning at Conley's Point.

2. The waters of Potagannissing Flooding on Drummond Island.

B. Houghton Lake

That area of water and land encompassing Houghton Lake, Roscommon County, described by road boundaries as follows: south of Meads Landing Road, County 300 and County 100; west of M–18; north of M–55; and east of US–27.

C. Saginaw Bay

1. That area of Arenac, Bay, Tuscola, and Huron counties south of US–23; east of M–13; north of M–25; south of Cresent Beach Road (Caseville Township, Huron County); and southwest of a line from the tip of Sand Point (Section 11, T17N R9E, Huron County) to Point Lookout (Section 13, T19N R7E, Arenac County) and Shore Road (Sims Township, Arenac County).

2. On all lands and waters within the posted boundaries of the following State or Federal management areas.

a. Crow Island State Game Area—Bay and Saginaw counties.

b. Shiawassee River State Game Area—Saginaw County.

c. Shiawassee National Wildlife Refuge—Saginaw County.

D. Southeastern Michigan

1. That area of Jackson County (north of I–94 and east of M–106); Ingham County (east of M–106/M–52 and south of M–36); Livingston County (south of M–36, east of M–155, and south of M–59); Oakland County (south of M–59, west of US–24 (Telegraph Road), north of I–96, and west of I–275); Wayne County (west of I–275 and north of M–14); Washtenaw County (north of M–14 and I–94); and St. Clair, Macomb, Wayne and Monroe counties east of I–94 and I–75 including the U.S. waters of the St. Clair River, Lake St. Clair, and Detroit River, and Lake Erie.

2. On all lands and waters within the posted boundaries of the U.S. Fish and Wildlife Service Schlee Waterfowl Production Area located in Section 6, T3S R2E of Grass Lake Township, Jackson County.

E. Southwestern Michigan

1. Muskegon, Ottawa, Allegan and Kalamazoo counties, including Lake Michigan lakeward for one-half mile from the shore. All county boundary waters and lakes partially within a non-toxic shot zone are totally included.

2. All lands and waters within the posted boundary of the Muskegon County Wastewater System, Muskegon County.

Texas—Remove the present wording and replace with the following:

Texas

That area lying within boundaries beginning at the Louisiana State line, thence westward along IH 10 to the junction of U.S. Highway 90 and IH 10 to Beaumont, thence westward along U.S. 90 to its junction with IH 610 in Houston, thence north and west along IH 610 to its junction with U.S. Highway 290 in Houston, thence westward along U.S. Highway 290 to its junction with State Highway 159 in Hempstead, thence southwestward along State Highway 159 to its junction with State Highway 36 in Bellville, thence eastward along State Highway 36 to its junction with FM 2429, thence southward along FM 2429 to its junction with FM 949, thence southwestward along FM 949 to its junction with IH 10, thence westward along IH 10 to its junction with U.S. Highway 77 at Schulenburg, thence southward along U.S. Highway 77 to its junction with the U.S.-Mexico international boundary at Brownsville, thence eastward along the U.S.-Mexico

international boundary to the Gulf of Mexico, thence east and seaward to the three marine league limit, thence northeastward along the three marine league limit to the Louisiana State line, thence northward along the Texas-Louisiana State line to its junction with IH 10.

Dated: May 3, 1983.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

[Docket Nos. AO-226-A29 and AO-275-A22]

Milk in the Puget Sound, Washington, and Inland Empire Marketing Areas; Extension of Time for Filing Exceptions to the Recommended Decision on Proposed Amendments to Tentative Marketing Agreements and to Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Extension of time for filing exceptions to proposed rule.

SUMMARY: This notice extends the time for filing exceptions to a recommended decision concerning a proposed merger of the Puget Sound and Inland Empire Federal milk orders. Counsel for the Producers Base Committee requested additional time to complete an analysis of the decision.

DATE: Exceptions now are due on or before July 5, 1983.

ADDRESS: Exceptions (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7183.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued June 11, 1981; published June 16, 1981 (46 FR 31424).

Notice of Postponement of Hearing: Issued June 30, 1981; published July 6, 1981 (46 FR 34805).

Notice of Rescheduling of Hearing: Issued July 23, 1981; published July 28 1981 (46 FR 34805).

Notice of Proposed Suspension: Issued November 6, 1981; published November 12, 1981 (46 FR 55707).

Suspension Order: Issued December 7, 1981; published December 10, 1981 (46 FR 60412).

Recommended Decision: Issued April 28, 1983; published May 4, 1983 (48 FR 20058).

Notice is hereby given that the time for filing exceptions to the above listed recommended decision is hereby extended to July 5, 1983.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

BILLING CODE 3410-02-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 270

[Release No. IC-13288; S7-960]

Concept of Utilizing Private Entities in Investment Company Examinations and Imposing Examination Fees

AGENCY: Securities and Exchange Commission.

ACTION: Extension of time for comment.

SUMMARY: The Securities and Exchange Commission announced today that it has extended until June 24, 1983 the date by which comments on Investment Company Act Release No. 13044 (February 23, 1983) [March 1, 1983; 48 FR 8485] must be submitted. The Commission has received a request that the comment period be extended and believes that an extension of time until June 24, 1983 will be beneficial since it will result in the receipt of additional useful comments. The release originally had a comment period ending on May 24, 1983.

DATE: Comments must be received on or before June 24, 1983.

ADDRESS: Comments should be submmitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549 (Reference to File No. S7-960). All comments will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Jeffrey S. Puretz, (202) 272-2048, Office of Regulatory Policy, Division of Investment Management.

SUPPLEMENTARY INFORMATION: In Investment Company Act Release No. 13044, the Commission announced that it is considering the advisability of proposing rules that would contemplate the involvement of private entities in the routine examination of investment companies and the imposition of examination fees. The major goal of such an action would be to supplement the Commission's present investment company examination program. The release discussed certain alternatives for accomplishing these purposes and requested general comment as to whether any of the alternative approaches, or some other alternative, should be pursued further. The release also requested specific comment with respect to certain issues involved in the implementation of those alternatives. The comments received will be considered in connection with the development of any rulemaking proposals or legislative recommendations.

The Commission has received a request that the comment period be extended. In view of such request and in order to receive the benefit of comments from the greatest number of interested persons, the Commission has extended the comment period for Investment Company Act Release No. 13044 until June 24, 1983.

By the Commission.
June 1, 1983.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 8370

Use Authorization; Amendment to Proposed Rulemaking Amending Regulations on Special Recreation Permits, Other Than on Developed Recreation Sites

AGENCY: Bureau of Land Management, Interior.

ACTION: Amendment to proposed rulemaking.

SUMMARY: The proposed rulemaking amending 43 CFR Subpart 8372—Special Recreation Permits, Other Than on Developed Recreation Sites—was published in the **Federal Register** on May 6, 1983 (48 FR 20630). Due to an error in the assembling of a large percentage of the **Federal Register** publication of May 6, 1983, the notice was republished on May 18, 1983 (48 FR 22462). Because of this error and republication, the Department of the Interior has extended the comment period on the proposed rulemaking from June 30, 1983, to July 18, 1983. As a result of this change in the comment period, the dates that appear in the final paragraph at the bottom of page 20630, continuing on page 20631 of the **Federal Register** of May 6, 1983, and on pages 22462 and 22463 of the **Federal Register** of May 18, 1983, are incorrect and that paragraph is amended by this notice.

The proposed rulemaking is amended by:

1. Changing the comment date from June 30, 1983, to July 18, 1983.

2. Revising the paragraph on pages 20630 and 20631 of the May 6, 1983, **Federal Register** and pages 22462 and 22463 of the May 18, 1983, **Federal Register** to read:

"This proposed rulemaking is being published to coordinate with the public consideration of the Proposed Special Recreation Permit Policy of the Bureau of Land Management, which was published in the **Federal Register** on April 8, 1983 (48 FR 15275). Copies of this proposed policy document may be obtained by calling the telephone number listed above. The deadline for submitting comments on the proposed policy statement is June 30, 1983, and on this proposed rulemaking is July 18, 1983."

DATE: Comments should be submitted by June 30, 1983, on the proposed Special Recreation Permit Policy and by July 18, 1983, on the proposed rulemaking amending 43 CFR Subpart 8372—Special Recreation Permits, Other Than on Developed Recreation Sites.

ADDRESS: Comments on the proposed Special Recreation Permit Policy should be be sent to: Director (341), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20240.

Comments on the proposed rulemaking should be sent to: Director (140), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20240.

BILLING CODE 4310–84–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR PART 2

[General Dockets Nos. 82–243 and 83–30]

Frequency Allocation; Extension of Comment Period

AGENCY: Federal Communications Commission.

ACTION: Proposed rule: extension of comment period.

SUMMARY: The Federal Communications Commission grants Motions for extension of time for filing comments in General Dockets 82–243 and 83–30. The Commission was responding to requests from Airfone, Inc., and the Land Mobile Communications Council. In taking this action, the Commission made the comment periods identical to those of a companion rulemaking, Gen. Docket 83–26.

DATES: Comments must be received on or before July 15, 1983. Reply comments must be received on or before September 6, 1983.

ADDRESS: Federal Communication Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT: Mr. Melvin Murray, Office of Science and Technology, 2025 "M" Street, NW. Washington, D.C. 20554; (202) 653–8168, or Mr. Rodney Small; (202) 653–8169.

Order

In the matter of an amendment of Part 2 of the Commission's Rules to Provide for an Allocation of 6 MHz to the Government and the nongovernment for Fixed Service Usage; Gen. Docket No. 82–243.

In the matter of an amendment of the Commission's Rules to Allocate Sectrum for, and to Establish Other Rules and Policies Pertaining to the Use of Radio in Establishing a Public Air-Ground Telephone System; Gen. Docket No. 83–30, RM–3524, RM–3695; (3–23–83; 48 FR 12267).

Adopted: May 20, 1983.

Released: May 31, 1983.

By the Office of Science and Technology.

1. On January 20, 1983, the Commission adopted *Notices of Proposed Rulemaking* in the above captioned proceedings and in Docket 83–26 (Creation of an Additional Personal Radio Service). Because of the inter-relationship of these proceedings, the Commission imposed common comments and reply comment dates of June 10, 1983 and July 11, 1983, respectively.

2. On April 26, 1983, Airfone, Inc., filed a request for extension of time to file comments in Docket 83–30. On May 23, 1983, the Land Mobile Communications Council (LMCC) filed a similar request in Docket 82–243 as well as in Docket 83–30.[1]

3. By order released May 18, 1983, pursuant to a request by the Personal Radio Steering Group (PRSG), the Commission extended the time for filing comments and reply comments in Docket 83–26 to July 15, 1983, and September 6, 1983, respectively. This action was taken to permit at least reply comments to be filed after a two day seminar on the subject in Wichita, Kansas on July 29, 1983.

4. Because of the Commission's interest in treating the three proceedings together and in order to give the public the opportunity to file comments at the same time, we will grant the petitions of LMCC and Airfone, Inc., to extend the time for filing comments and reply comments to the same dates as in the above captioned dockets.

5. Accordingly, it is ordered that pursuant to Section 4(i), 302 and 303 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 302 and 303 and pursuant to § 0.241(d) of the Commission's Rules, the *Motion of the Land Mobile Commissions Council for an Extension of Time* and the *Motion for Extension of Time* filed by Airfone, Inc. in these proceedings are granted to the extent discussed above.

6. It is further ordered, that pursuant to the authorities cited above the *request by the Land Mobile Communications Council to terminate Docket 82–243 or to provide appropriate alternative relief* is dismissed as moot.

[1] In a related filing, on May 16, 1983, LMCC requested that because the National Telecommunications Information Administration (NTIA) was conducting a study of its various spectrum needs, the Commission either terminate Docket 82–243 or at least defer the comment date until after any study is completed. It is the Commission's understanding that NTIA itself intends to file comments in the proceedings.

7. For further information about these proceedings contact Melvin Murray (202) 653–8168 or Rodney Small (202) 653–8169, Office of Science and Technology, FCC, Washington, D.C. 20554.

Federal Communications Commission.

Marjorie S. Reed,

Deputy Chief Scientist for Policy.

[MM Docket No. 83–466; RM–4365]

TV Broadcast Station in El Dorado, Arkansas; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action solicits comments on a proposed substitution of UHF Television Channel 43 for Channel 18 in EL Dorado, Arkansas, as requested by Great Southern TV Broadcasting to remedy a shortspacing problem with its pending application for a new UHF television station on Channel 33 in Bossier City, Louisiana.

DATES: Comments must be filed on or before July 1, 1983, and reply comments on or before July 18, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (El Dorado, Arkansas); MM Docket No. 83–466 RM–4365.

Adopted: April 26, 1983.
Released: May 17, 1983.

By the Chief, Policy and Rules Division.

1. The Commission has before it a petition for rule making by Great Southern TV Broadcasting ("Southern") requesting the substitution of UHF Television Channel 43 for Channel 18 in El Dorado, Arkansas. Southern has a pending application (File No. BPCT 820909 KQ) for operation of a new station of Bossier City, Louisiana, on Channel 33.[1] The application involves a short spacing of 7.7 miles to Channel 18 at El Dorado. CMM, Inc. ("CMM") has recently filed an application for a construction permit on Channel 18 (File No. BPCT 830301KK). The spacing requirement between the channels in question (33 and 18) is 75 miles. See § 73.698 of the Commission's Rules.

2. Southern has submitted with its above-referenced application a request for waiver of the minimum spacing requirement. Southern asserts that if the Commission regards the short spacing to El Dorado as a significant problem, the best alternative solution would be to substitute a channel in El Dorado that eliminates the short spacing, *i.e.*, Channel 43 for Channel 18. Also, Southern alleges that the channel substitution would afford any future applicant on Channel 18 in El Dorado a wider selection of transmitter sites.[2] Southern states that each of the other six mutually exclusive applications for operation on Channel 33, Shreveport, would lessen the area in which a site could be selected for operation on Channel 18 in El Dorado. Southern states that the same kind of channel substitution requested here was granted by the Commission in *Clarksdale and Greenville, Mississippi and Birmingham, Alabama*, Docket No. 21389; RM–2852 (43 FR 1502) (1977).

3. The pendency of CMM's application for operation on Channel 18 in El Dorado raises our concern about Southern's proposed substitution of channels. Southern has alleged that the substitution of channels would allow for more site flexibility at El Dorado. However, Southern was unaware, at that time, of the pending application for Channel 18. Therefore, there appears to be no need to offer prospective applicants a greater area of site flexibility. Southern has offered no other public interest reasons for the substitution. We note that the other six applicants for Channel 33 were able to propose sites that were non short spaced to Channel 18 at El Dorado. We believe that the best procedure at this time is to seek comments on the Southern proposal and, specifically, whether CMM has an objection to operating on Channel 43 instead of Channel 18. As an alternative, Channel 18 could remain at El Dorado with a 7.7 mile site restriction. This would necessitate CMM, Inc. moving its proposed site location. Accordingly, we solicit comments on the following proposed amendment of the TV Table of Assignments, § 73.606(b) of the Rules:

	Channel No.	
	Present	Proposed
El Dorado, Ark.	10–, 18–, and +30.	10–, +30, and 43–.

4. It is ordered, That the Secretary shall send a copy of this *Notice of Proposed Rule Making* by Certified Mail, Return Receipt Requested, to: CMM, Inc., 215 Lantana Road, Crossville, Tennessee, 38555.

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before July 1, 1983, and reply comments on or before July 18, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend § 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

For further information concerning this proceeding, contact Philip S. Cross, Mass Media Bureau, (202) 632–5414. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes

[1] The channel is assigned to Shreveport, Louisiana, and applied for at Bossier City, in accordance with § 73.607(b) of our Rules. The section was deleted effective February 17, 1983 (48 FR 12094), but applications on file as of that date are processed under the old rule).

[2] The allegation was made before CMM filed its application for operation on Channel 18 in El Dorado and specified a site near the reference coordinates for El Dorado.

an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[MM Docket No. 83-472; RM-4331]

TV Broadcast Station in Little Rock, Arkansas; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes a fifth commercial television assignment to Little Rock, Arkansas, in response to a petition filed by Millard V. Oakley.

DATE: Comments must be filed on or before June 27, 1983, and reply comments on or before July 12, 1983.

ADDRESS: Federal Communications Commission.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Little Rock, Arkansas): MM Docket No. 83-472 RM-4331.

Adopted: May 2, 1983.
Released: May 12, 1983

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed on January 3, 1983, by Millard V. Oakley proposing the assignment of UHF television Channel 42 to Little Rock, Arkansas. Petitioner stated that he or an entity of which he is a part, will apply for the channel, if assigned.

2. Little Rock (population 158,461)[1] is the seat of Pulaski County (population 340,613) and the state capital. Little Rock is currently assigned commercial Channels 4, 7—, 11, and 16—, and noncommercial Channels °2— and °36.

3. In support of his request, petitioner submitted population data for the city and county. Petitioner also submitted 1981 spendable income and retail sales statistics.

4. We believe that the petitioner's proposal warrants consideration. The proposed assignment meets all spacing requirements and could provide for a fifth local commercial television station at Little Rock. In view of the above, comments are invited on the proposal to amend the Television Table of Assignments, with regard to the following community:

City	Channel No.	
	Present	Proposed
Little Rock, Arkansas	°2—, 4, 7— 11, 16—, and °36.	°2— 4, 7—, 11, 16—, °36, and 42.

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 27, 1983, and reply comments on or before July 12, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

8. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, It is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Paradise, Calif.); MM Docket No. 83–471 RM–4372.

Adopted: May 2, 1983.
Released: May 12, 1983.

1. The Commission herein considers a petition for rule making filed February 3, 1983, by William M. Holdinghausen ("petitioner"), seeking the assignment of UHF Television Channel 46 to Paradise, Calif., as its first television assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria.

2. Paradise (population 22,571),[1] in Butte County (population 143,851) is located in northern California, approximately 250 kilometers (150 miles) northeast of San Francisco, Calif.

3. In view of the fact that Paradise could receive its first local television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
Paradise, Calif.		46

4. The Commission's authority to institute rule making proceedings, showing required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 27, 1983, and reply comments on or before July 12, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend § 73.002(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau (202) 634–6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4,303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303).

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the commission's Rules and Regulations, an orignal and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

47 CFR Part 73

[MM Docket No. 83–465; RM–4258; RM–4316]

FM Broadcast Stations in Nisswa, Browerville, and Pequot Lakes, Minnesota; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the assignment of a Class A channel to Browerville, Minnesota, or a Class C assignment to Nisswa, Minnesota, in response to petitions filed by Elden Stielstra and by Midwest Radio Company, respectively. In the alternative, a Class A channel is proposed for each community. We are also proposing the reassignment of Channel 261A from Nisswa, Minnesota to Pequot Lakes, Minnesota to reflect its actual use there. The proposed assignments could provide a first local aural service at each community.

DATES: Comments must be filed on or before June 30, 1983, and reply comments on or before July 15, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau (202) 634–6530.

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Nisswa, Browerville, and Pequot Lakes, Minnesota); MM Docket No. 83–465, RM–4258, RM–4316.

Adopted: April 26, 1983.
Released: May 16, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers two separate petitions for rule making. The first was filed by Midwest Radio Company ("Midwest"), on November 19, 1982, proposing the assignment of Class C Channel 227 to Nisswa, Minnesota. The second petition was filed by Elden Stielstra ("Stielstra") on December 22,

1982, proposing to assign Channel 228A to Browerville, Minnesota. The proposals could provide a first local aural service to either Nisswa or Browerville.[1] Since the distance between Nisswa and Browerville is 40 miles, instead of the required 105 miles, these proposals are considered mutually exclusive. Both petitioners stated their intent to apply for the channel, if assigned to their requested community.

2. In support of his proposal, Stielstra asserts that Browerville (population 693),[2] in Todd County (population 24,991), is located approximately 25 miles from Alexandria and Little Falls, Minnesota. It has neither a daily newspaper nor an FM station. Nisswa (population 1,407) is located in Crow Wing County (population 41,722), approximately 40 miles northeast of Browerville. It had no local FM service.

3. Since there are no other Class A channels available to Browerville and no other Class C channels available to Nisswa, we shall provide each proponent an opportunity to further demonstrate in comments to the *Notice* why its community should receive the assignment. In this regard, the parties should be guided by our recent action in *Revision of FM Assignment Policies and Procedures*, 90 F.C.C. 2d 88 (1982).

4. The assignment of Channel 228A to Browerville would require a site restriction of approximately 2.3 miles northeast of the city. A Channel 227 assignment to Nisswa would require a site restriction of 1.8 miles north of the city. Both restrictions are necessary to avoid short spacing to Station KBMO-FM, Benson, Minnesota.

5. As an alternative, we are proposing a Class A assignment to Nisswa (Channel 224A). Our staff had determined that Channel 224A can be assigned to Nisswa in compliance with the minimum distance separation requirements, without a site restriction. This alternative does not conflict with the requested assignment of Channel 228A to Browerville, enabling both cities to obtain a first local aural service.

6. The proposed assignments of Channel 228A to Browerville and either Channel 224A or Channel 227 to Nisswa, require coordination with the Canadian Government, since both cities are within 320 kilometers (200 miles) of the U.S.-Canadian Border.

[1] Nisswa is currently assigned Channel 261A. However, that channel is being used by Station KTIG, Pequot Lakes, Minnesota (under Section 73.203(b) of the Commission's Rules). Thus, in connection with a Nisswa assignment, we are proposing to reassign Channel 261A to Pequot Lakes, to reflect its actual use in that community.

[2] Population figures are taken from the 1980 U.S. Census, Advance Reports.

7. Accordingly, we propose the following alternate revisions in the FM Table of Assignments (§ 73.202(b) of the Rules) with respect to the communities listed below:

City	Channel No.	
	Present	Proposed
Alternative I		
Browerville, Minn.	———	228A
Alternative II		
Nisswa, Minn.	261A	227
Pequot Lakes, Minn.		261A
Alternative III		
Browerville, Minn.		228A
Nisswa, Minn.	261A	224A
Pequot Lakes, Minn.		261A

8. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

9. Interested parties may file comments on or before June 30, 1983, and reply comments on or before July 15, 1983, and are advised to read the Appendix for the proper procedures.

10. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do noot apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

11. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioer constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48n Stat., as amended 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, IT IS PROPOSED TO AMEND the FM Table of Assignments, § 73.202(b) of the Commission's rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) wil be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments, and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (McMinnville, Tennessee); MM Docket No. 83-467 RM-4333.

By the Chief, Policy and Rules Division.

Adopted: April 20, 1983.

Released: May 13, 1983.

1. The Commission herein considers a petition for rule making filed January 6, 1983, by Peggy Ann Rothchild ("Petitioner"), seeking the assignment of UHF Television Channel 33 to McMinnville, Tennessee, as its first television assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned.

2. A site restriction of 4.3 miles west of McMinnville is required in order to avoid short spacing to Station WUNF-TV (Channel *33) is Asheville, North Carolina.

3. McMinnville (population 10,683),[1] seat of Warren County (population 32,653), is located approximately 108 kilometers (68 miles) southeast of Nashville, Tennessee.

4. In view of the fact that McMinnville could receive its first local television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules), with respect to the following city:

City	Channel No.	
	Present	Proposed
McMinnville, Tenn.		33+

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 27, 1983, and reply comments on or before July 12, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 to not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend § 73.002(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303).

[MM Docket No. 83-473; RM-4383]

TV Broadcast Station in Rochester, Washington; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the assignment of UHF Television Channel 25 to Rochester, Washington, in response to a petition filed by The Daily Chronicle, Inc. The proposed assignment could provide for a first television service to Rochester.

DATES: Comments must be filed on or before June 30, 1983, and reply comments on or before July 15, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Television broadcasting.

Notice of Proposed Rule Making

In the matter of Amendment of § 73.606(b), Table of Assignments TV Broadcast Stations (Rochester, Washington); MM Docket No. 83-473, RM-4383.

Adopted: April 28, 1983.
Released: May 16, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making, filed on February 16, 1983, by The Daily Chronicle, Inc. ("petitioner"), proposing the assignment of UHF Television Channel 25 to Rochester, Washington. Petitioner stated that it or an entity, of which it is a part, will apply for the channel, if assigned.

2. Rochester (population 300),[1] in Thurston County (population 124,264),[2] is located in western Washington, approximately 96 kilometers (60 miles) southwest of Seattle. Rochester is currently without local television service.

3. We believe that the petitioner's proposal warrants consideration. The proposed assignment meets all spacing requirements and could provide for a first local television service at Rochester. Accordingly, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
Rochester, Washington		25+

4. The Commission's authority to institute rule making proceedings, showings required, cut-off porcedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note. A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 30, 1983, and reply comments on or before July 15, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend § 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are

---

[1] City population figure is provided by the petitioner.

[2] County population figure is taken from the 1980 U.S. Census Advance Report.

prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Sections 0.61, 0.24(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showing Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

TV Broadcast Station in Belmont, North Carolina; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the assignment of UHF Television Channel 46 to Belmont, North Carolina, as its first television assignment in response to a petition filed by Harry C. Powell, Jr.

DATES: Comments must be filed on or before June 27, 1983, and reply comments on or before July 12, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau, (202) 634-6530.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Belmont, North Carolina); MM Docket No. 83-469 Rm-4296.

Adopted: May 2, 1983.
Released: May 13, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 3, 1983, by Harry C. Powell, Jr. ("petitioner"), seeking the assignment of UHF Television Channel 46 to Belmont, North Carolina, as its first UHF television assignment. The channel can be assigned with a site restriction of 5.8 miles west of Belmont to avoid short spacing to WTVI (Channel *42) in Charlotte, North Carolina.

2. Belmont (population 4,607),[1] in Gaston County (population 162,568), is located approximately 24 kilometers (15 miles) west of Charlotte, North Carolina.

3. Petitioner submitted information in support of the proposal and expressed his desire to apply for the channel, if assigned.

4. In view of the fact that Belmont could receive its first television broadcast service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
Belmont, North Carolina		46

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 27, 1983, and reply comments on or before July 12,

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commissions's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the puplic should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision of this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Radio broadcasting.

Notice of Proposed Rule Making

In the matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Negaunee, Michigan), MM Docket No. 83–468, RM–4392.

Adopted: May 2, 1983.
Released: May 13, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed February 22, 1983, by Edward F. Anglin ("petitioner") seeking the assignment of Class C FM Channel 277 to Negaunee, Michigan, as its first FM assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. A site restriction of 0.7 miles south of Negaunee is required to avoid short-spacing to Channel 276 in Marathon, Ontario, Canada.

2. Since the proposed assignment of Channel 277 to Negaunee, Michigan, is located within 320 kilometers (200 miles) of the U.S.-Canadian border, Canadian clearance must be obtained.

3. In view of the fact that the proposed assignment could provide a first local FM broadcast service to Negaunee, Michigan, the Commission believes it is appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the

Commission's Rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Negaunee, Michigan		277

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 27, 1983, and reply comments on or before July 12, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignmnent, § 73.202(b) of the Commission' Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concening this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Roderick K. Porter

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showing Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if its is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in intial comments, so that parties may comment on them in reply comments. They will not be condisered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effet will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

[MM Docket No. 83-331; RM-3676; FCC 83-130]

Amendment of the Commission's Rules Concerning the Fairness Doctrine and Political Cablecasting Requirements for Cable Television Systems

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Sections 76.205 and 76.209 of the Commission's Rules and Regulations require cable television operators to comply with Fairness Doctrine and political cablecasting obligations when they engage in origination cablecasting. The Commission is instituting a notice of proposed rulemaking concerning the applicability of the Fairness Doctrine (47 CFR 76.209) and the political cablecasting obligations (47 CFR 76.205) to cable television systems to determine whether these rules and policies can be improved or streamlined.

DATE: Comments are due by July 25, 1983 and replies by August 25, 1983.

ADDRESS: Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Stephen A. Bailey, Mass Media Bureau (202) 632–7793.

SUPPLEMENTARY INFORMATION: Sections 76.205 and 76.209 of the Commission's rules and regulations require cable television operators to comply with Fairness Doctrine and political cablecasting obligations when they engage in origination cablecasting.

I. Introduction

1. Notice is hereby given of proposed rule making concerning §§ 76.205 and 76.209 of the Commission's Rules and Regulations (47 CFR 76.205 and 76.209) which make cable television system operators subject to certain obligations relative to political telecasts and to Fairness Doctrine obligations.

2. The provisions of these rules, particularly those that are concerned with the requirement that candidates for public office receive equal cablecast opportunities,[1] are based on Section 315 of the Communications Act, as amended (47 U.S.C. 315). Although the equal opportunities requirements are statutory, the development of detailed policies for applying these requirements has been left to agency discretion. Moreover, although the Fairness Doctrine has been sometimes construed as a statutory requirement applicable to radio and television broadcast stations, it is not clear, as explained in greater detail below, that it is a statutorily-imposed one for cable television. The Commission has recently concluded that the requirements of the Fairness Doctrine and equal opportunities rules are generally unnecessary in view of the many sources of information now available to the public and are counterproductive in achieving their stated objectives due to the negative incentives inherent in their operation. While we await positive Congressional action on these recommendations, we will continue to apply those obligations imposed by statute on cable systems. In the meantime, however, it is important in our own administration of these policies to apply them in the least intrusive, most effective, and most constitutionally supportable manner possible, consistent with our assigned Congressional mandate. Toward this end, we believe there is room for improvement in the manner in which these policies can be applied in the cable television filed. In this proceeding, we seek to explore those alternatives and, in addition, to develop a record that will be useful to the Congress.

3. The principal proposal we are making is to afford the cable system operator greater flexibility in the methods available for achieving compliance with the obligations of these rules. In particular, we propose to make it clear that the availability of cablecast opportunities on channels specifically set aside for the presentation of programming not under the control of the system operator will generally satisfy the obligations imposed by these rules. In our estimation, it is paricularly important in the context of multi-channel cable operations to develop some means of applying these rules that do not force the system operator to enforce his own editorial judgment over the content of all nonbroadcast channels on the system. We also explore the question of whether it is statutorily permissible and consistent with good public policy to exclude totally from the governance of these rules certain types of programming. For example, we have never applied these rules to broadcast signals carried by cable systems and we believe that the same basis for exemption may exist for not applying these rules to certain types of cable network programming. We also explore the question of whether certain aspects of the Fairness Doctrine can be eliminated without undermining its overall purposes or without disservice to the public. In addition, as discussed below, we have for a considerable time taken the position that these requirements are not applicable to the distribution of newspapers in facsimile edition. With new developments occurring in the "electronic print" filed at a rapid pace, we believe it is appropriate to consider expansion of the existing exemption in this area. Finally, we also consider the whole question of the necessity for and manner of applying the Fairness Doctrine to cablecast programming.

4. Our decision to institute rule making on this subject stems from a number of considerations. First, significant changes have occurred within the cable television industry as well as in the communications sector of our economy since these policies were first applied to cable television. Second, we note that these policies and rules have been the subject of considerable discussion in government reports, academic literature, and other publications. Third, we have received a petition for rule making from the National Telecommunications and Information Administration of the Department of Commerce of the United States (NTIA) which recommends that the Commission exempt cable systems which maintain public access channels from Fairness Doctrine obligations Fourth, and of special import, several court decisions in cable or cable-related areas have raised questions, directly or indirectly, concerning whether cable systems should be immune from program content regulation, as are newspapers, under the First Amendment. Finally, although this proceeding takes existing statutory requirements as a given, it should be noted that on September 17, 1981, we adopted a package of legislative proposals for Congressional consideration, which included, among other things a proposal to repeal Section 315 of the Communications Act. This proposal, if enacted by Congress would eliminate this agency's authority to impose fairness and equal time obligations on broadcast licensees and cable operators, and thereby accord the electronic media similar protections enjoyed by the print media under the

[1] That requirement is often referred to as the "equal time" rule even though Section 315 of the Communications Act does not specifically require "equal time" but rather, under appropriate circumstances, the provision of "equal opportunities." Unless we indicate otherwise, the use of such terms as "equal time," "equal opportunities," or "equal political opportunities" in this document shall refer to provisions in Section 315 that require equal telecasting opportunities for candidates for public office.

First Amendment. Congressional enactment of these legislative measures would not only remove the basis for our imposing such obligations on broadcast licensees but would also eliminate whatever vestige of authority we might have had to impose these requirements on cable systems by statute or under the "reasonably ancillary to broadcasting" standard. Before we detail our reasons for recommending revision of the existing requirements as well as possible elimination of certain nonstatutory provisions in the rules, we shall briefly explain the origin and history of the Fairness Doctrine and political broadcasting rules as they pertain to cable television.

II. Development and History of Rules

A. General Discription of Policies

5. The Fairness Doctrine, as it has been applied to radio and television broadcasting, imposes a two part duty on broadcasters under the public interest standard.[2] First, broadcast licensees are required to devote a reasonable percentage of time to the coverage of controversial issues of public importance.[3] Second, they must afford reasonable opportunity for the presentation of contrasting points of view.[4] A subsidiary part of the Fairness Doctrine, which is oftentimes referred to as the personal attack rule, requires that a broadcast licensee provide an opportunity for individuals or groups to respond to attacks upon their honesty, character, integrity, or other like personal qualities made during the presentation of views on a controversial issue of public importance.[5] The responsibilities which arise under the Fairness Doctrine can not be delegated [6] nor can such obligations be met "merely through the adoption of a general policy of not refusing to broadcast opposing views where a demand is made of the station for boradcast time."[7] Under the doctrine, every broadcast licensee is required to "use his facilities to enlighten the public about the critical issues it faces."[8] The doctrine, as applied to broadcasting, evolved under the public interest standard of the Communications Act [9] and, at least with respect to the political editorializing and personal attack aspects of the doctrine, has been upheld by the U.S. Supreme Court as valid exercises of regulation which do not abridge First Amendment rights of broadcasters.[10]

6. Under Section 315 of the Communications Act, the Commission also has responsibility for administering policies that are intended to assure equal broadcast opportunities to candidates for public office. Section 315 of the Act requires that a licensee who permits the use of his facilities to a legally qualified candidate for public office provide equal opportunities to opposing candidates seeking the same office.[11] Under this section, however, appearances by candidates on bona fide newscasts, news interviews, news documentaries as well as on-the-spot coverage of bona fide news events are not deemed uses and, accordingly, are exempt from the equal opportunities requirement.[12] This section also restricts the charges which can be made by broadcast licensees for the use of broadcast facilities by candidates for public office. Section 315(c) of the Act makes these provisions applicable to cable systems by including "community antenna television system(s)" and the operators thereof within the terms "broadcasting station" and "station licensee" for purposes of that section.[13]

B. Commission Rules and Regulations

7. Even though Section 315 now specifically refers to cable television, the equal time rules and Fairness Doctrine were first applied by the Commission to cable without benefit of explicit statutory authority. In *First Report and Order in Docket 18397*, FCC 69–1170, 20 FCC 2d 201 (1969), these broadcast-oriented policies were first applied to cable systems engaged in program origination. Therein, the Commission found that cable television, with its multi-channel technology, had the potential to further promote broadcast-oriented objectives "by increasing the number of outlets for community self-expression and augmenting the public's choice of programs and types of services,"[14] and, accordingly, adopted a rule designed to make use of this potential by requiring cable systems serving 3,500 or more subscribers to operate to a significant extent as a local outlet by cablecasting and having facilities available for local production and presentation of programs.[15] The rationalization provided for imposition of the fairness and equal time obligations on cable originated programs was that cable systems which engaged in program origination and the carriage of broadcast signals "should comport with these important cardinal policies of the Communications Act, which are so important to the American political system and an informed electorate."[16] In addition, the

[8] 48 FCC 2d at 7 n. 8.

[9] *See Act of September 14, 1959*, section 1, 73 Stat. 556, Pub. L. 86–274, amending 47 U.S.C. 315(a).

[10] *See Red Lion Broadcasting Co. v. FCC*, 395 U.S. 367 (1969).

[11] *See Licensee Responsibility as to Political Broadcasts*, FCC 68–1070, 15 FCC 2d 94 (1968); also *Use of Broadcast and Cablecast Facilities by Candidates for Public Office*, FCC 72–231, 34 FCC 2d 510 (1972).

[12] *See also Aspen Institute*, FCC 75–1090, 55 FCC 2d 697 (1977), *affirmed sub nom. Chisholm et al. v. FCC*, 538 F. 2d 349 (D.C. Cir. 1976), *cert. denied* 429 U.S. 1042 (1976).

[13] Section 315(c) of the Act provides as follows: For purposes of this section—(1) the term "broadcasting station" includes a community antenna television system; and (2) the term "licensee" and "station licensee" when used with respect to a community antenna television system mean the operator of such system.

[14] 20 FCC 2d at 202.

[15] *Id.* at 208–209. There the Commission stated:

> In view of the importance of an informed electorate and speech concerning public affairs to self-government, the "right of the public to receive suitable access to social, political, esthetic, moral, and other ideas and experiences", and a CATV system's monopoly position over cable access to the subscriber's premises, we think that CATV operators have an obligation analogous to that of the broadcasters "to give suitable time and attention to matters of great public concern" and also to have the equipment needed for origination by others. *Red Lion Broadcasting Co. v. Federal Communications Commission*, 395 U.S. 367, 389–394. The commission is not powerless to insist that CATV do so as a condition for the use of broadcast signals, and certainly for the use of microwave radio frequencies in the conduct of its business.

The mandatory program origination rule was subsequently challenged by cable interests but nevertheless upheld by the Supreme Court in *United States v. Midwest Video Corp.*, 406 U.S. 649 (1972) (*Midwest Video I*), as a valid exercise of the Commission's board authority under the Communications Act. The Court, however, expressly declined to rule on other aspects of the Commission's report including the fairness and equal time rules but stated instead that ". . . we, of course, intimate no view on their validity." *Id.* at 652 n.4. The Commission subsequently repealed the mandatory origination rule in *Report and Order in Docket 19988, supra*, on the basis that the rule would not likely be "the most effective means of fostering local expression programming."

[16] 20 FCC 2d at 219. Included among the rules was a sponsorship identification rquirement which paralleled Section 73.654 of the Commission's Rules concerning announcement of sponsored programs. The present sponsorship identification requirements

Commission added that cable systems should not be allowed "to place broadcast signals in a setting of inequality, unfairness, and hidden sponsorship which would destroy the signals' integrity and defeat the purposes of the obligations imposed on broadcasters in the public interest." [17] The Commission rejected contentions that the regulations in some way impaired or abridged First Amendment rights by stating that "no one has a First Amendment right to provide broadcast signals in a manner contrary to the public interest" and that it is "immaterial that the scarcity of frequencies rationale underlying the First Amendment rulings in the broadcast field does not apply directly to the cable technology." [18] The scope of these requirements were further clarified by the Commission in *Memorandum Opinion and Order in Docket 18397*, FCC 70-377, 23 FCC 2d 825, 829-830 (1970), which held that these requirements were meant to cover ordinary cablecasting, not the distribution or dissemination of newspapers by cable and that the Commission had "no intention of regulating the print medium when it is distributed in facsimile by cable." [19] The Commission's basis for jurisdiction in adopting these rules did not stem at the time from any express statutory authority under the Communications Act but rather from the "reasonably ancillary to television broadcasting" standard first articulated by the Supreme Court in *United States* v. *Southwestern Cable Co.*, 392 U.S. 157 (1968). [20]

8. When the Commission determined in 1969 that cable operators should be subject to fairness and equal time requirements, it made the rules applicable to all "programming distributed on a CATV system which has been originated by the CATV operator or by another entity, exclusive of broadcast signals on the system," even though a cable operator might not have control over all the cable channels on which cable originations appeared. [21] However, the Commission subsequently made clear its intent that the rules should only "apply to programs originated by others than the CATV operator, when presented [on] the channel or channels *controlled* by the CATV operator." (emphasis added). [22]

9. The Commission retained these requirements in the *Cable Television Report and Order*, FCC 72-108, 36 FCC 2d 143 (1972). In this report, the Commission also adopted new rules that required new cable systems in the major television markets to provide access channels on a free or leased basis for use by outside parties. These channels were generally to be made available on a first-come, first-served non-discriminatory basis without the cable system operator having a general power of censorship over the programming submitted for distribution. [23] The Commission did not apply the fairness and equal time obligations to these access channels because

> The access requirements we are imposing differ considerably in scope and purpose from our origination requirement of Section 76.201. Because of the system operator's control over programming of originated material, it was necessary to impose such obligations as are involved in the "equal time" and "fairness" doctrines. Such requirements are not being imposed on use of the access channels because these channels are free of operator control and access is guaranteed. But they do remain in effect for deisgnated origination cablecasting channels. Should a cablecast by a canidate for political office on the origination channel prompt the necessity for providing equal time to an opponent, it must be provided on the origination channel. In this situation, the opponent's appearance on an access channel will not suffice. Similarly, should a controversial originated program raise a "fairness" issue, any countering views must also be presented on the origination channel. [24]

10. The cable television access rules were revised in the Commission's *Report and Order in Docket 20508*, FCC 76-313, 59 FCC 2d 294 (1976), to require only those cable systems serving 3,500 or more subscribers to provide access channels and facilities. The exemption from fairness and equal time requirements was not changed. However, the Supreme Court subsequently found that these access channel and facilities requirements exceeded the Commission's authority. [25] The Commission deleted the provisions in question in order to conform its rules with the Supreme Court's decision and, in so doing, stated that it would continue its previous policy of not applying the fairness and equal opportunities requirements to access-type programming provided, however, that "the channels in which such programming is presented themselves have inherent in their functioning access of a type which makes possible equal opportunities for political candidates and time for the provisions of programming covering all sides of controversial issues of public importance." [26] In the same order, the Commission indicated that it would follow a case-by-case approach concerning what types of channels of an access nature would be deemed to meet these requirements. [27]

C. Statutory Overview

11. In the same year that the Commission advised Congress of new major cable regulatory proposals, [28] which in large measure later became the *Cable Television Report and Order*, Congress amended the Communications Act in the *Federal Election Campaign Act of 1971*, Pub. L. 92-225, 86 Stat. 3(1972). The equal opportunities requirements of Section 315 were made directly applicable to "community antenna television system[s]" in subsection (f) through inclusion of that term within the definition of "broadcasting station". [29] The legislative history of this Act, however, suggests that expansion of Section 315 to cover cable television occurred without the benefit of extended consideration or discussion of the issue. The hearings and associated committee and conference reports appear to have focused almost entirely on campaign

---

applicable to cable systems are embodied in Section 76.221 of the Rules.

[17] *Id.* at 220-221. Our statutory authority over interstate communication by wire or radio necessarily encompasses power to prohibit CATV systems from carrying broadcast signals in conjunction with CATV origination that does not afford equal time to political candidates or present both sides of controversial issues of public importance or reveal program sponsorship. The CATV operator may conduct his origination in such fashion if he chooses to do so on a system carrying no broadcast signals. But we cannot permit the carriage of broadcast signals under circumstances so patently contrary to the public interest.

[27] *Id.*

[28] *Cable Television Proposals*, 31 FCC 2d 115(1971).

[29] The *Federal Election Campaign Act of 1971* also applied Section 312(a)(7) of the Communications Act to cable systems. Title I of the 1971 Act amended the existing Section 312 by adding a new subsection (a)(7) which in essence guaranteed candidates for Federal elective office reasonable access on broadcast stations and, by cross-referencing to Section 315(f), included cable systems within the definition of broadcast station. See *Use of Broadcast and Cablecast Facilities by Candidates for Public Office*, 34 FCC 2d 510 at n. 2(1972). As a result of Congressional enactment of the *Federal Election Campaign Act Amendments of 1974*, Pub. L. 93-443, 88 Stat. 1263 (1974), however, Title I of the 1971 Act was repealed.

expenditure limitations. Although all communications media expenditures were limited by the new law, different limits applied to broadcast and non-broadcast enterprises and, in this regard, "community antenna television system(s)", under the new statute, were treated as being on the broadcast side of the dividing line. Although the Commission's own initiative in applying the Fairness Doctrine and equal opportunities rules to cable television had been brought to Congressional attention during the preceding year,[30] there is virtually no other discussion in the public record concerning these issues.

12. Moreover, although it appears from a reading of the statute that Congress intended to apply the equal political opportunities principle to cable television, Congressional intent is not clear with respect to the application of the Fairness Doctrine. While it has generally been assumed that the Fairness Doctrine was statutorily approved by Congress as a result of the 1959 amendments to the statue,[31] the obligations which the 1959 amendments sanctioned as permissible, if not mandatory, for broadcasting, did not then apply to cable television. Thus, it is uncertain whether Congress, in amending Section 315 to include cable television in the definition of "broadcasting station" for purposes of the equal time requirements, also intended to subject cable systems to statutorily-imposed Fairness Doctrine obligations.

III. Previous Research and Studies

13. The application of these policies to cable television also had been the subject of considerable discussion from both the private and governmental sectors. For example, the Communications Law Committee Section on Science and Technology of the American Bar Association recommended after a study of the issues involved "[t]hat no fairness or equal opportunities responsibilities be imposed upon cable television systems where access channel capacity exists."[32] Similarly, the Cabinet Committee on Cable Communications in its *Cable, Report to the President* (1974), urged:

> The programming, information or other services provided over cable should not be subject to administrative regulation of content * * *[33]

A more recent Congressional staff study, discussing the subject, says:

> rather than automatically incorporating concepts developed for the regulation of the broadcaster as a public trustee using scarce spectrum space, the FCC should have found that cable, with its channel abundance calls for different treatment. We therefore recommend the elimination of the fairness doctrine and equal opportunity obligations for all nonbroadcast cable operations. (footnote omitted.)[34]

14. The common thread which appears to underlie support for, at a minimum, repeal of the Fairness Doctrine, and, theoretically, would also lead to opposition to equal time obligations imposed on cable systems, is that cable systems do not occupy radio frequency spectrum space—an allegedly scarce resource—in the same manner as broadcasters and have an abundance of channel capacity subject only to economic constraints, not the physical limitations which exist in the broadcast area.

15. This scarcity of frequencies rationale might be considered to provide a basis for the different treatment accorded broadcasters under the First Amendment but, as stated by many commentators who have written on this subject, it is an inadequate basis for imposition of such requirements on cable systems. Although under the rationale applied to broadcasting, courts have recognized a First Amendment right in the general listening and viewing public that is considered to have priority over the competing First Amendment rights of broadcasters, the courts have been reluctant to apply the same rationale to other media. While the Supreme Court upheld the political editorializing and personal attack aspects of the Commission's Fairness Doctrine in the *Red Lion* case on the basis of scarcity of over-the-air radio frequencies, it has declined to apply similar type regulations to other media. Those who argue in opposition to the application of the Fairness Doctrine to cable television generally maintain that the scarcity rationale is inapplicable to cable television because cable systems do not make direct use of the electromagnetic radio spectrum and, unlike television broadcasters, are communications systems with abundant channel capacity.[35]

16. The Commission has been asked on several occasions to consider either revision or elimination of the Fairness

---

[30] FCC Chairman Dean Burch, however, gave some testimony in June, 1970, on this subject:

> The Commission has recently issued rules which in effect make the requirements of Section 315 applicable to cable systems. The Commission has stated its view that it has ample authority to do so. Since the Congress is now considering revisions of Section 315 we believe it appropriate to bring these actions to the Subcommittee's attention.

Political Broadcasting, 1970: Hearings on H.R. 13721 and Related Bills Before the Subcommittee on Communications and Power, No. 91-57, 91st Cong., 2d Sess. at 13.

[31] Section 1 of the *Act of September 14, 1959, supra*, among other things, added the following language to Section 315:

> Nothing in the foregoing shall be construed as relieving broadcasters in connection with the presentation of newscasts, news interviews, news documentaries, and on-the-spot coverage of news events, from the obligation imposed upon them under this Act to operate in the public interest and to afford reasonable opportunity for the discussion of conflicting views on issues of public importance.

There has been some authority that the above amendment codified the Fairness Doctrine into statutory law. *See, e.g., Brandywine-Main Line Radio, Inc.*, 24 FCC 2d 18 (1970), *affirmed* 473 F. 2d 16, 37–44 (D.C. Cir. 1972), *cert. denied*, 412 U.S. 922 (1973); *but see Public Interest Research Group v. FCC*, 522 F. 2d 1060 (1st Cir. 1975), *Straus Communications, Inc. v. FCC*, 530 F. 2d 1001(D.C. Cir. 1976), as well as Manelli, *Legislative History of the Fairness Doctrine*, Staff Study for the Committee on Interstate and Foreign Commerce, 90th Cong., 1st Sess. 21–22 (1968), all of which suggest that Congress merely gave statutory recognition to the Commission's adoption of the Fairness Doctrine and that the doctrine was not codified.

[32] "Electronic Journalism and First Amendment Problems," Recommendations of Communications Law Committee Section on Science and Technology, American Bar Association, 29 *Fed. Com. B. J. 1, 3 (1976)*.

[33] At 37–38. It further stated: Administrative regulation of broadcast programs has been sanctioned by the Supreme Court on the grounds that it assists in achievement of First Admendment goals under conditions of vertical integration and a scarcity of broadcast frequencies. But with no use of public airwaves, with a large number of channels, and with implementation of a separations policy, there is no need to resort to governmentally-imposed approximations in the cable medium. Under such conditions, use of the Fairness Doctrine, the equal time rule, and other forms of program content control to regulate what the audience can or must see and hear would simply be an end in itself—an unconscionable choice for a free society.

[34] *Cable Television: Promise Versus Regulatory Performance* at 72, Staf of House Communications Subcommittee, 94th Cong., 2d Sess. (Subcommittee Print 1976). For other commentary on the subject, *see* Barrow, Roscoe ., "The Fairness Doctrine: A Double Standard for Electronic Print Media," 26 *Hastings L. .* 659 (1975); *Report on Cable Television and Cable Telecommunications in New York City*, (Friendly Report), The Mayor's Advisory Task Force on CATV and Telecommunications (1968); Simmons, Steven J., "The Fairness Doctrine and Cable TV," 11 *Harv. j. Legis.* 629 (1974); Collins, Tom A., "The Future of Cable Communications and the Fairness Codtrine," 24 *Cath. Univ. L. Rev.* 833 (1975); Schmidt, Benno C., Jr., *Freedom of the Press v. Public Access*, Aspen Institute Program on Communications and Society (New York: Praeger Publishers), 1976; and Price, Monroe E., "Requiem for the Wired Nation: Cable Rulemaking at the FCC," 61 *Va. L. Rev.* 541 (1975).[304]

[35] Of particular interest, the Supreme Court in the *Red Lion* case declined to decide the question of "whether, *quite apart from scarcity of frequencies, technological or economic*, Congress does not abridge freedom of speech or press by legislation directly or indirectly multiplying the voices and views presented to the public through tine sharing, fairness doctrines, or other devices which limit or dissipate the power of those who sit astride the channels of communication with the general public. *Cf. Citizen Publishing Co. v. United States*, 394 U.S. 131 (1969)." 395 U.S. at 400 n. 28 (emphasis added). That question, however, might well have been decided in *Miami Herald Publishing Co. v. Tornillo*, 418 U.S. 214 (1974), discussed in paras. 19 *et seq., infra*.

Doctrine and equal opportunity rules applicable to cable television. In *Report and Order in Docket 19988, supra,* it concluded that the mandatory program origination rule should be deleted but nevertheless declined to repeal the associated fairness and equal opportunities rules. Upon reconsideration, the Commission indicated that the changing of these requirements is "an important issue requiring careful consideration after the widest possible comment" but that "the context in which it has been presented in this proceeding has not afforded us the benefit of the wide range of views we might otherwise expect." *Memorandum Opinion and Order in Docket 19988,* 53 FCC 2d 1104, 1105. We stated that it would be "unwise to decide such a significant issue upon so sparse a record" and concluded that "it should be dealt with in a separate proceeding where both interested parties and the Commission can focus upon it." *Id.*

17. In 1975, the Commission received a formal request to commence rule making on the question of allowing cable systems to satisfy all of the obligations under the fairness and equal time rules through the provison of appropriate access channels and facilities. At the time of the request, the Commission had cable access rules which required certain cable systems to provide public and certain other designated access channels on a first-come first-served basis and to have available access facilities including studios. *See* former Sections 76.251–257 of the Commission's Rules. The petitioners of this request believed that these changes would be appropriate in view of the fact that cable systems did not use spectrum space and had potentially high channel capacity. The Commission responded by stating that "[f]airness and equal time through access is premised upon an abundance of available unused channel capacity readily available on demand for leased or pulic access use with audiences comparable to those of origination programming." *Fairness Doctrine and Equal Time Rules Re CATV,* 62 FCC 2d 61, 62 (1976). The Commission denied the petition, however, observing that "[t]his situation might be present in a mature cable television industry but does not exist today" but held open the possibility of re-examining the question of elimination of these requirements "at a future time upon a showing of changes within the cable industry consistent with this opinion." *Id.*

IV. Case Law Developments

18. In addition to the concerns in writings and reports from the private and govenmental sectors, judicial case law that has evolved since these policies were first applied to cable television casts some doubt on the constitutionality and overall wisdom of retaining these requirements in their present form, if at all. These developments suggest further reason why fairness and equal time principles should be reexamined in their cable television application.

19. We note, at the outset, that the Surpreme Court has cautioned against "freez[ing] a necessarily dynamic process into a constitutional holding." *CBS v. Democratic National Committee,* 412 U.S. 94, 132 (1973), and, for this reason alone, we are wary of casting in a rigid mold rules and regulations which are intertwined with constitutional considerations and which apply to an area of communications which generally is subject to dynamic technological change. Of special import for purposes of this proceeding is the Supreme Court's statement in *Red Lion Broadcasting, supra,* at 386, that "differences in the characteristics of news media justify differences in the First Amendment standards applied to them. *Joseph Burstyn, Inc. v. Wilson,* 343 U.S. 495, 503 (1952)." This suggests, if not dictates, the necessity of determining whether the differences between broadcasting and other media including cable television compel the application of different regulatory policies where First Amendment principles are involved. On this point, the Supreme Court's response has been that broadcasting and the print media are indeed subject to differing constitutional standards due to the differing natures of the two media. For example, while the Supreme Court upheld as constitutionally valid the political editorializing as well as the personal attack aspects[36] of the Fairness Doctrine imposed on broadcasters,[37] it invalidated a state statute which created a right of reply to press criticism of political candidates in *Miami Herald Publishing Co. v. Tornillo, supra*

20. In the former case the Court found that the Commission's application of the Fairness Doctrine did not have a chilling effect upon free speech but instead enhanced the First Amendment interests of viewers and listeners. In the latter case, however, it concluded that the right of reply statute as applied to the print media could in its operation have an inhibiting effect on the editorial discretion exercised by newspaper publishers. The critical difference between *Red Lion* and *Miami Herald* appears to hinge on the Supreme Court's view that broadcasting involves the use of a scarce public resource while newspapers do not.[38]

21. Of special note, two court decisions that expressly deal with cable television have seized upon the differences between cable television and broadcasting as a possible basis for according cable television differing treatment under the First Amendment. In *Home Box Office, Inc. v. FCC,* 567 F. 2d 9, 45 (D.C. Cir. 1977), *cert. denied,* 434 U.S. 829 (1977), a case which invalidated restrictions on subscription cablecasting originations, the United States Court of Appeals for the District of Columbia stated:

> The First Amendment theory espoused in *National Broadcasting Co.* and reaffirmed in *Red Lion Broadcasting Co.* cannot be directly applied to cable television service since an essential precondition of that theory—physical interference and scarcity requiring an umpiring role for government—is absent. (footnote omitted).

There, the court, in making reference to the *Miami Herald* newspaper right of reply case, observed that "scarcity which is the result solely of economic conditions is apparently insufficient to justify even limited intrusion into the First Amendment right of the conventional press" and surmised that "there is nothing in the record to suggest a constitutional distinction between cable television and newspapers on this point." (footnote omitted). *Id.* at 46. Similar views were given in *Midwest Video Corp. v. FCC,* 571 F. 2d 1025 (8th Cir. 1978), a case in which the United States Court of Appeals for the Eighth Circuit held that the Commission's cable television access rules exceeded the agency's statutory authority under the Communications Act.[39]

---

[36] In upholding these aspects of the Fairness Doctrine, the Court added that "[i]n terms of constitutional principle, and as enforced sharing of a scarce resource, the personal attack and political editorial rules are indistinguishable from the equal-time provision of section 315." 395 U.S. at 391.

[37] The Court did state, however, that "broadcasting is clearly a medium affected by a First Amendment interest. *United States v. Paramount Pictures, Inc.,* 334 U.S. 131, 166 (1948)." *Red Lion Broadcasting, supra,* at 386.

[38] This view was most recently reiterated in *CBS, Inc. v. FCC,* 453 U.S. 367 (1981), where the Supreme Court, in upholding the Commission's interpretation and application of Section 312(a)(7) of the Act, stated that "[a] licensed broadcaster is 'granted the free and exclusive use of a limited and valuable part of the public domain; when he accepts that franchise it is burdened by enforcable public obligations.' *Office of Communication of the United Church of Christ v. FCC,* 123 U.S. App. D.C. 328, 337, 359 F. 3d 994, 1003 (1966).

[39] The court, however, declined to rest its decision on its discussion of the constitutional questions

22. In both cases, the courts indicated that cablecasting is an activity that comes under the protective mantle of the First Amendment.[40] In both cases, the courts also intimated that no nexus appeared to exist between cablecasting and broadcast retransmission activities that would justify restrictions or incursions on the cablecast activities, of cable operators.[41] They also rejected the notion that the Commission in some sense owns the broadcast spectrum and therefore can condition use of broadcast signals or the programs on such signals upon compliance with restrictions in such other areas as cablecasting or access.[42] They further indicated that since no direct use of a scarce resource in the federal domain is involved in cable television operations, no governmental privilege in general attaches to the operations of cable television operator.[43]

23. In view of the opinions expressed in both *Home Box Office* and *Midwest Video* to the effect that the scarcity rationale is not directly applicable to cable television and cablecasting is a protected activity under the First Amendment, it would seem that the reasoning which sustained the restrictions on broadcasting in *Red Lion* in the form of Fairness Doctrine obligations might not suffice to sustain application of similar regulations in the cable television area.[44] These cases further suggests difficulty in finding a nexus between broadcast retransmission and cablecasting that would support restrictions on the activities of cablecasters from either a jurisdictional or constitutional viewpoint. In sum, these cases raise serious questons whether the initial reasons for promulgation of these rules would withstand constitutional challenge if they were to come under judicial scrutiny today.

V. Change in the Cable Industry and Communications Sector in General

24. Changes in technology in cable television and related industries also are, in our opinion, germane to the question of continuance or alteration of the rules under review here. As noted in the FCC staff report submitted to Senator Goldwater entitled *Cable Television and the Political Broadcasting Laws: The 1980 Election Experience and Proposals for Change* (January 1981),[45] while the majority of cable systems now in existence have relatively limited channel capacities, new systems being constructed today will have significant channel capacity in the order of 35, 50, or 100 cable channels.[46] In addition, many existing systems with small channel capacities are already in the process of being rebuilt with significantly greater channel capacities and with the potential to provide many additional new program and information services. In some instances, this is being done on a voluntary basis by cable operators in an effort to meet present or anticipated marketplace demands. In other instances, it is being undertaken by cable operators in response to pressure exerted upon them by local franchising authorities or community officials who believe that some degree of parity in service and channel capacity between new systems being built today and existing systems presently serving their communities not an unreasonable expectation. In other related communications fields, there are advances being made which have the potential for increasing the number of communication outlets available to the public.

25. We believe that these trends toward systems of increased channel capacity reflect a change in the industry from one which, from its inception, predominantly relied on broadcast signal retransmission for its existence, to one which is increasingly turning to nonbroadcast program and information sources and services. In our estimation, satellite technology has played a major role in this transformation. As a result of satellite technology, cable systems and their subscribers have access to an extremely rich and divergent mix of program and information services. For example, there are already 24-hour news services, ethnic, youth, and adult-oriented program channels. There are in operation or under development, religious program channels, political affairs channel, all weather, all sports, health channels, channels of foreign language programming, of cultural programming, women's programming, and regionally oriented satellite networks. In addition, many new program or information services are in the developmental stage and will be added to the existing list of cable satellite networks that now provide diversified information and programming to the public. Consequently, it would appear that the "scarcity, which in turn, generated a need for government supervision to ensure a robust marketplace of ideas"[47] in the broadcast area would seem to have even less relevance that it might ever have had to cable television.

26. Moreover, the abundance of channel capacity on cable television also provides increased opportunities for new degrees of diversity of programming and information originated at the local level. Such abundance presents new access opportunities to communities and their citizenry. While we no longer have the authority to compel cable operators to provide access channels and services under the *Midwest Video II* decision, we note that many cable operators are nevertheless providing access channels and services (either voluntarily or pursuant to state or local laws) for use by the general public, by educational institutions and authorities, and by local governments—a result we had sought under the aegis of our cable television access regulations. We would expect these trends to continue and to contribute further toward diversity in the

---

raised since their resolution was not essential in resolving the case. 571. F. 2d at 1052. Similarly, in affirming the lower court's decision, the Supreme Court rested its decision on statutory grounds and declined to comment on the constitutional question "save to acknowledge that it is not frivolous." *Midwest Video II, supra*, at 709 n. 19.

[40] *See Home Box Office, supra*, at 49–50 and *Midwest Video Corp., supra*, at 1054. In this rule making proceeding, the cablecast activities of cable operators and others are the subject of the restrictions under review.

[41] *See, e.g.*, in *Home Box Office*, 567 F.2d at 45 n. 80, where the court stated that "on the record before us there is no evidence that cablecasting and signal retransmission are not completely separate and distinct activities;" or in *Midwest Video*, 571 F. 2d at 1054, where the court stated that "[i]f there be any arguable relationship between cablecasting and retransmission, it would appear far too tenuous and uncertain to warrant a cavalier overriding of First Amendment rights present in cablecasting.

[42] *See Home Box Office, Inc., supra*, at 45 n. 80. The *Midwest Video* opinion is laced with statements to that effect. "The Commission does not 'own' broadcast programs, and may not lawfully condition their transmission on compliance with any and every rule it may devise." *Id.* at 1043. "[W]e reject the argument [that]the Commission] may so condition broadcast retransmission which has not even the nexus to cablecasting that highways may have to trucking." *Id.* at 1052.

[43] For example, the *Midwest Video* court stated that "[i]n retransmitting broadcast programs, cable systems use no 'limited and valuable part,' or any other part of the federal public domain." *Id.* at 1043.

[44] The same considerations would appear to apply at least on the surface to the imposition of equal time on cable operators since the fairness and equal time requirements appear to stand on essentially the same constitutional footing. See n. 30, *infra*.

[45] A copy of the report will be included in this docket and will be made available for comment by interested persons.

[46] *See, e.g., Cablevision Magazine* at 78 (July 20, 1981) which reported prospective cable television applicants for New York City franchises proposing cable systems with over 100 cable channels.

[47] *Leflore Broadcasting Company et al. v. FCC*, 636 F. 2d 454, 457 (D.C. Cir. 1980). If, as the court stated in that case, "[t]he rationale most frequently advanced for varying the First Amendment treatment of newspapers and broadcast stations-the relative scarcity of broadcast frequencies—is increasingly open to dispute, "(footnote omitted), we would expect that the application of the scarcity principle to cable television would generate even greater debate and controversy.

marketplace of ideas and toward fostering "uninhibited, robust, and wide-open" debate on public issues in the community. *See Cable Television Report and Order, supra,* at 194.

27. We are also witnessing the development of new electronic means to distribute newspaper, magazine, and other similar type information into consumers' homes. Already in existence on some cable systems are services such as teletext and videotex whereby alphanumeric and/or graphic information is transmitted via cable television to cable subscribers. In some instances, the newspaper or magazine information might be transmitted in facsimile to the cable subscriber whereas in other instances the textual information and material might be arranged or edited by a cable operator or other cablecaster and then made available for distribution or transmission on the cable system to subscribers. These developments would seem to suggest the need to reexamine the distinction in treatment between the print and electronic video media as these services continue to converge.[28]

VI. NTIA Petition

28. Also pending before us is a petition for rule making (RM–3676) from NTIA which requests that we alter these policies to allow "access" channels to operate as a complete substitute for compliance with the Fairness Doctrine. NTIA argues that the Fairness Doctrine stems from scarcity considerations in the broadcast field and should not apply to a multi-channel enterprise when it provides a public access channel. It maintains that with the modern cable system in the range of 20–30 channels and the next generation of systems serving urban areas and having double or more that channel capacity, the problem of scarcity vis-a-vis providing a public access channel on a voluntary basis has diminished. Furthermore, NTIA argues that there is no statutory requirement for fairness since the legislative history of the *Federal Election Campaign Act of 1971, supra,* does not indicate any Congressional intention to apply the doctrine to cable but rather to impose campaign expenditure limitations on broadcast and nonbroadcast media alike. Moreover, the NTIA petition states that even if a statutory requirement of fairness exists with respect to cable television, the Commission has considerable discretion in implementing such a requirement and, accordingly, is not precluded from adopting the rule changes which it proposes. In sum, NTIA requests that the Commission: (1) Propose to exempt from the Fairness Doctrine cable systems that have a public access channel; (2) inquire whether there should be any limitations or definitions as to what constitutes access; and (3) address any other legal or policy issues raised. In its opinion, the Commission should promptly initiate a rule making proceeding and should not delay be making this proceeding a general forum for in-depth consideration of all issues that may arise in the cable field.

29. Cable News Network (CNN) and the National Cable Television Association (NCTA) were the only parties to offer comment on the petition. CNN supports the petition but believes that Commission rule making in this area should include repeal of the applicability of the Fairness Doctrine to all system-originated programming whether or not the cable system operator provides a public access channel. In light of the absence of technological scarcity and the increasing number of available programming alternatives, it maintains that no constitutional basis exists for applying the Fairness Doctrine to cable television.

30. NCTA opposes the petition for the very same reason that CNN expresses reservations about it, that is, that the petition only recommends elimination of the Fairness Doctrine to cable systems with public access channels. In addition, NCTA also believes that the petition does not fully address the First Amendment ramifications of the application of this doctrine to cable. According to NCTA, the presence or absence of a public access channel is irrevlevant to the constitutional implications of the doctrine. In its opinion, cable television may properly be referred to as an "electronic newspaper" and the cable operator as a "video publisher." NCTA argues that cable technology undercuts the "scarcity" rationale and, accordingly, a different regulatory framework from that imposed upon broadcasters is dictated. NCTA maintains that the government cannot condition cable program originations on the provision of a public access channel because access requirements are of dubious constitutionality in light of *Midwest Video II, supra.*

VIII. Rule Making Proposals

31. As the preceding sections suggest, the application of these requirements to cable television is fraught with practical, theoretical, and constitutional difficulties. We ae especially concerned that the requirements in their present form, if challenged today, might not withstand constitutional scrutiny by the courts in vew of the Supreme Court's decision in *Miami Herald* and in light of dicta in both the *Home Box Office* and *Midwest Video* cases.[29] Despite these concerns, we recognize that our ability to alter certain of these requirements is constrained by statute. Under these circumstances, our task it to devise rules and policies that will avoid, to the extent possible, constitutional confrontation yet at the same time fulfill the statutory mandate imposed by Congress. With these considerations in mind, we hereby request comment on all aspects of the rules, the need for them, their practical effect on cable operators and cablecasters and on the public in general, and on whether these rules can or should be retained, modified, or eliminated.

A. Alternative Approaches

32. We are particularly interested in whether some of the infirmities which might now exist in the rules can be avoided by altering the manner in which they are administered. NTIA has proffered one such alternative for consideration. Under this proposal, cable systems providing a public access channel available for use by outside parties on an uncensored first-come, first-served basis, would be regarded as having satisfied all of the fairness and equal time obligations imposed on them by statute and the rules.[30] This would

---

[28] As reported in one newspaper article, the "[l]ines between newspapers and cable broadcast operations are likely to be less clear than they may have been between daily newspapers and related television stations in the past." See "Washington Post Plans Local Cable TV Project," *The Washington Post* (December 29, 1981).

[29] *See also* the dissenting opinion of Judge Markey in *Community Communications Company, Inc. v. City of Boulder, Colorado, et al.*, 630 F. 2d 704, 710–714 (10th Cir. 1980), *rev'd* 50 U.S.L.W. 4144 (January 13, 1982). We recognize, however, that First Amendment issues in the cable area are complex and susceptible to oversimplification. We note, for example, that the involvement of local government in the franching of cable systems and the *de facto* exclusivity of these agreements might arguable bring into play the "state action" doctrine and require that some type of access and, in particular, political access, be afforded. *Cf. Marsh v. Alabama*, 326 U.S. 501 (1946) and *Public Utilities Commission v. Pollack*, 343 U.S. 451 (1952). In addition, to the extent cable systems are regarded as "bottleneck" facilities, commercial access might e required under the antitrust laws. *U.S. v. Terminal Railroad Association*, 224 U.S. 383 (1912), notwithstanding arguments that to do so would violate the First Amendment. *See Associated Press v. U.S.*, 326 U.S. 1, 20 (1945).

[30] NTIA offers little guidance or insight concerning what type of public access or public access channel would under its proposal satisfy a cable operator's obligations. Instead, it recommends inquiry on whether any limitations or definitions

represent a departure from previous policy whereby we generally considered each channel individually in reviewing compliance with the fairness and equal time requirements. The positive attributes of this approach would be: access as an alternative would be far less intrusive into the editorial functions of cable operators and cablecasters than would strict application of fairness and equal time to cable originations; it could possibly remove whatever disincentive might exist for not presenting controversial programming and therefore have less of a chilling effect on speech; and an access alternative might be better suited for fostering public debate and diversity of opinion especially in view of the fact that access is uncensored and the operator is not forced to exercise editorial control over all the cable channels.

33. A number of difficulties with the existing rules which this, or other alternatives, might help to eliminate or mitigate are worth reviewing in some detail. First, one of the primary arguments against equal time and fairness type requirements has been that, although intended to assure that the public is better informed on issues of public importance and of issues relating to electoral choices, the rules can have a contrary "chilling" effect on the coverage of these issues—creating their own set of incentives for the avoidance of controversy and for limiting the exposure that is given to candidates for political office. While arguments continue as to the degree of such effects in the *broadcast* context, there are a number of reasons which suggest that these counterproductive incentives may be even stronger in the cable context. Broadcasters, under the Fairness Doctrine, under Section 312(a) of the Act, and as a consequence of the comparative licensing and renewal process, are not free to react to troublesome problems under these rules by simply refusing to participate in the coverage of controversial issues or of candidates for elective office. The federal regulagory structure applicable to the cable television industry, however, has generally not been interpreted as imposing such obligations, so that if onerous obligations are associated with content control requirements, a viable option might be for the system operator simply to refuse to participate in the coverage of such matters. Alternative types of rules, such as those suggested by NTIA, would have the advantage of separating the system operator's obligations for "equal time" or fairness from a consideration of the operator's own programming. Thus, the operator would not have to temper its programming with a view toward the avoidance of legal entanglements. Balance of fairness in coverage would be created through the opportunity for uncensored access.

34. A second set of problems, which this alternative might ease or eliminate, relates to the program distribution modes that now predominate in the cable television industry. In the main, cable systems perform in a largely passive mode in distributing nonbroadcast programming. While some programming is produced locally, the vast majority of cable distributed nonbroadcast programming is produced and packaged elsewhere and distributed for cable system use over the facilities of space satellites and regional microwave interconnection systems. A large number of systems distributing this programming are small systems that lack any local origination capacity. And while other systems have programming capacity, they may nevertheless find it awkward to make additional time available because that would require the deletion of other programming. For these reasons, severe technical difficulties and practical problems may be associated with the obligation of the local cable system operator (the responsible party under the rules) to make equal opportunities available for candidates or to assure balance in the coverage of controversial issues of public importance. In some respects this pattern is not that dissimilar to that which prevails between the major television networks and their affiliated stations but, in other respects, the situation is different. For a variety of historical reasons, it generally has been possible for the Commission to enforce these policies in the broadcast context directly through the networks.[51] In the broadcast field, it is to the network that, as a practical matter, affected parties look for political broadcast time or time responsive to issues of fairness and balance in programming. It is not at all clear that this pattern could be followed in the cable context where neither the program suppliers nor distributors are Commission licensees. The ability to seek enforcement through the television networks substantially reduces the burden of compliance on individual television licensees and also lessens the administrative burden of enforcement by the Commission. These same practical problems in obtaining compliance might not be capable of similar resolution in the cable context because our limited cabled jurisdiction might preclude compliance through cable networks. However, by permitting response time to be made available on the other channels, governmental involement in this area of program content might be reduced significantly.

35. There are additional practical problems that bear upon NTIA's proposed alternative and relate to the types of programming services which cable systems distribute. While the rules in the broadcast context are not format specific, they are clearly based on a system of broadcasting which is supported by commercial advertising and which consists mainly of entertainment programming interrupted by occasional newscasts or public affairs programs. However, new program formats especially for the video channels of cable systems have developed and they have created a host of potential disputes under the content control rules. Several examples may help to illustrate the point. First, questions arise as to whether some of the existing cable program services might fit entirely within exemptions to the equal opportunities requirements of Section 315. The Cable Satellite Public Affairs Network (C–SPAN), for example, devotes a considerable amount of time to coverage of the proceedings of the U.S. House of Representatives and, as a consequence, this results in appearances by many elected officials who, as incumbents, are candidates for reelection or, as aspirants for higher office, are candidates for different elective offices. But for the fact that the equal time requirements do not, as a consequence of specific exemptions in Section 315, apply to "on-the-spot coverage of bona fide news events," to a "bona fide news documentary," etc., challengers could well claim the right to equal time." The Cable News Network is a distributor of news programming, some of which consists of commentary and more indepth news analysis. Its carriage would, presumable, subject the cable operator to the requirements of the Fairness Doctrine and the equal time rules. With respect to the latter, however, it might be claimed that the entire channel of programming comes within the exemption accorded to "bona

should be adopted to resolve questions concerning what constitutes access. We agree and therefore request comment on what threshold public access standards would be suitable for adoption under this approach.

[51] *See, e.g., CBS, Inc. v. FCC*, 629 F. 2d 1, 25–27 (D.C. Cir. 1980), *aff'd 453 U.S. 367 (1981) (The Carter/Mondale Presidential Committee proceeding)* (Section 312(a)(7) imposes "an obligation to provide access not just upon individual stations but upon those who, by practice and contractual relationship, control the best practical means of efficiently acquiring national access—to wit, the networks").

fide newscast[s]." [52] To further illustrate differences in program modes between cable and conventional broadcasting, much of the satellite distributed programming consists of pay television, programming. Especially where such programming is distributed with a separate charge for each program, it is not clear that application of either fairness or equal time requirements would be meaningful since, for example, minor party candidates would not likely attract any audience whatsoever for their responses. Thus, it can be seen that, in the cable context (as well as increasingly in the broadcasting context), new types of programming formats are likely to play havoc with prior precedents. We accordingly seek comment on the best manner of application of the rules in these new areas.

36. Another important consideration weighing in favor of a change in policy, relates to the "anti-diversity" effects of the existing rules. The motivating principles in this area of the law, generallly traced back to the First Amendment to the Constitution, emphasize the societal interest in a diversity of points of view.[53] In the broadcast realm each broadcaster perrforms as an editor [54] and is charged with responsibility for virtually all programming that is transmitted.[55] While there are real questions as to the efficacy of the various policies applied to create this debate over issues in the broadcast realm, it is apparent that the existence of a variety of different "editors" or control points is vital to creating any semblance of public debate.

37. The application of fairness and equal time policies in their present form to multichannel cable television system operators, however, runs directly counter to this objective to the extent it *forces* the system operator to assume legal responsibility and hence editorial control over all of the many channels of programming that may be distributed.[56] However, by permitting the system operator, on a voluntary basis, to satisfy all obligations under the equal time and fairness rules by simply making additional channel time available to outside parties, this control concentrating aspect of the rules would be significantly diluted.

38. We do not mean to suggest, however, that there would not be difficulties with the NTIA alternative. Questions remain as to what the practical consequences of such a policy would be and as to whether this is an option available to us under existing law and precedent. With respect to the first point, it is apparent that were our only objective to provide all candidates for public office and all points of view on controversial issues with an equal audience, that this alternative would not be a satisfactory one. A beneficial aspect of this alternative would be that video access would be uncensored and uninhibited, but each programmer would be individually responsible for attracting an audience. In considering whether this makes the NTIA alternative an acceptable one, it is important to emphasize that we do not view these requirements to be attempts to guarantee absolute equality of exposure to ideas or candidates in what is after all intended to be a somewhat rough and tumble marketplace for the presentation of competing viewpoints. Under the First Amendment, the media generally participate in this process without any superintendance at all, save from the readers and viewers they must attract and serve. Although the Commission has emphasized that the availability of audience is a factor that must be considered in determining whether "equal opportunities" have been provided under Section 315 [57] and fairness granted,[58] we do not believe insurmountable problems would be created if periods of equal audience *potential* were made available with the responsibility for the size of the *actual* audience left with the party responsible for the program. In light of the general expansion of the video outlets that is taking place, the differences between broadcast and cable economics (i.e. audience in the cable context may be an unknown factor given the present state of the audience surveying art), and the constitutional considerations that suggest the desirability of limiting our intrusion into content control areas, we believe this alternative may be a desirable one.[59] However, we ask for specific comment on the details of how such a change in policy might be implemented and how it would function as a practical matter.

39. The question of whether an alternative mechanism for enforcing these rules either as suggested by NTIA or through judging the output of all cable channels to determine compliance can be squared with statutory requirements has two parts—whether such alternatives would comply with the requirements of Section 315 and whether they are forbidden to the Commission under the Supreme Court's *Midwest Video II* decision. With respect to the first point, as long as it is clear that the Commission's purpose is to further rather than undercut the stated objective of the law, we believe the courts would

---

[52] Some of the considerations that enter into whether a particular program is exempt under one of the news-type categories might arguably apply in determining whether an entire channel or program format ought to be exempt. For example, the Commission in rulings on whether a program is exempt as a "bona fide news interview" from equal time obligations has considered such factors as: (1) Whether it is regularly scheduled; (2) how long it has been broadcast; (3) whether the broadcaster produces and controls the program; (4) whether the broadcaster's decision on the format, content and participants are based on his reasonable good faith journalistic judgment rather than on an intention to advance the candidacy of a particular person; and (5) whether selection of persons to be interviewed and topics to be discussed are based on their newsworthiness. *See Law of Political Broadcasting and Cablecasting*, FCC 78–523, 69 FCC 2d 2209, 2210 (1978); *Lar Daly*, 40 FCC 314 (1960) ("Today" program exempt); *Multimedia Program Productions, Inc.*, 80 FCC 2d 217 (1980) ("Phil Donahue Show" held not exempt); *Socialist Workers Party*, FCC 77–440, 65 FCC 2d 229 (1976) ("Tomorrow" is not a news interview program).

[53] *See, e.g., United States v. Associated Press*, 52 F. Supp. 362, 372 (S.D.N.Y. 1943) ("right conclusions are more likely to be gathered out of a mulititude of tongues, than through any kind of authoritative selection"), *aff'd* 326 U.S. 1 (1945); *see also New York Times Co. v. Sullivan*, 376 U.S. 254, 270 (1964) (Supreme Court's recognition that underlying the First Amendment is a "profound national commitment to the principle that debate on public issues should be uninhibited, robust, and wide-open").

[54] For a discussion of the concept of broadcasting as editor, *see Columbia Broadcast System v. Democratic National Committee*, 412 U.S. 94, 124 (1973). In noting the editorial responsibilities of broadcasters, the Supreme Court stated: "For better or worse, editing is what editors are for; and editing is the selection and choice of material."

[55] *See e.g., 1960 Commission En Banc Programming Inquiry*, FCC 60–970, 44 FCC 2303, 2311–12 (1960); *In re Licensee Responsibility to Review Records Before Their Broadcast*, FCC 71–205, 28 FCC 2d 409 (1971); *Public Notice re Foreign Language Programs*, 9 RR 2d 1901 (1967); *Licensee Responsibility to Exercise Adequate Control Over Foreign Language Programs*, FCC 73–289, 39 FCC 2d 1037, 1039 (1973); and *Cosmopolitan Broadcasting Corporation v. FCC*, 581 F. 2d 917 (D.C. Cir. 1978) (court held Commission justified in concluding that the licensee had failed to retain responsibility for programming and had failed to retain familiarity over foreign language programming).

[56] In the extreme, these requirements could force cable operators to have translators on hand in order to ensure that the operator's obligations were met with respect to channel carriage of foreign language programming as well as a bank of editors to oversee the system's output on the multiple channels of programming.

[57] *Socialist Workers Party*, 40 FCC 2d 286 (1962) ("Factors such as the size of the potential audience because of the appearance of the first candidate on an established or popular program should obviously be considered by the parties in reaching a satisfactory and equitable adjustment of the problem").

[58] *Committee for Fair Broadcasting*, 25 FCC 2d 283, 293 (1970) ("[I]t is patently unreasonable for a licensee consistently to present one side in prime time and to relegate the contrasting viewpoint to periods outside prime time").

[59] The Supreme Court's opinion in *Columbia Broadcasting Company v. Democratic National Committee*, 412 U.S. 94, 125 (1973) is perhaps on point here when it states that "[c]alculated risks of abuse are taken in order to preserve higher values."

provide us with considerable leeway in view of the changes in the telecommunications world that have occured since Section 315 was applied to "community antenna television." For example, just as the totality of a station's programming is judged in ascertaining compliance with the Fairness Doctrine, similarly, an approach which looks to the totality of channels including access on the cable system in the community might similarly comprise the criteria for satisfaction of Fairness Doctrine obligations. In the broadcast context we have previously held that access can supplement but cannot operate as a surrogate for the broadcaster's public interest obligations under the Fairness Doctrine and, accordingly, we rejected this approach for broadcasting. *Report and Order in BC Docket 78–60,* FCC 79–706, 74 FCC 2d 163 (1979), *recons. denied,* FCC 82–185, 89 FCC 2d 916 (1982). In that report, we stated that "it appears questionable whether the Commission could act to offer a comprehensive mandatory access plan as a substitute for the present system of compliance with the Fairness Doctrine" but added that even if we were to adopt a voluntary system of access as proposed, "we would first need to evaluate the plan's viability by weighing 'the nature and scope of issued coverage actually achieved under the current system of fairness doctrine implementation.'" *Id.* at 170 *quoting from National Citizens Committee for Broadcasting v. FCC,* 567 F. 2d 1095 (D.C. Cir. 1977), *cert. denied,* 436 U.S. 775 (1978). Although we concluded that the access system proposed therein contained imperfections that made it an unsuitable alternative in the broadcast context, we did not address whether similar criteria for a workable access system could be achieved in a cable television context.[60] In addition, because cable television is a medium "not subject to the finite technological limitations of time that confromt a broadcaster," see *Miami Herald, supra,* the technological differences between the broadcast and cable media might provide the basis for employing a different regulatory approach in the cable television area.

40. The second matter concerning our authority to adopt these alternatives turns on an interpretation of Section 3(h) of the Communications Act as it has been applied to cable television. The Commission's 1972 cable television rules required larger cable television systems to make some channel time available to outside parties for use on either a free or leased basis. The Commission justified these rules and rested its authority to adopt them on the proposition that they would further the effectuation of broadcast policies set forth in Title III of the Communications Act.[61] On appeal from a later revision of these rules,[62] the Supreme Court held that they exceeded the Commission's authority because cable was being regulated in a manner ancilliary to the Commission's regulation of broadcasting and the application of rules of this type to broadcasters was specifically forbidden to the Commission under Section 3(h). These obligations were found to be "common carrier" in nature and Section 3(h) states ". . . a person engaged in radio broadcasting shall not, insofar as such person is so engaged, be deemed a common carrier."[63]

41. Since this decision applied to mandatory access and the alternative under consideration here would be entirely voluntary on the part of the system operator, it would not appear to be directly precluded by the *Midwest II* decision. The question could nevertheless be raised so at whether setting up access channels as the price for escaping another potentially onerous set of rules might be regarded as merely an indirect method of mandating access—an *ultra vires* condition. This argument, however, would seem to be inapplicable to those systems that are subject to access requirements by virtue of local municipal requirements. Moreover, while we are aware of the views expressed by NCTA in response to the NTIA petition, *see* para. 30 *supra,* we are not persuaded that the legal obstacles are insurmountable if the policy objectives are found to be desirable. An approach which both eases the burden and is completely voluntary in natrure, however, we believe should be found acceptable. We seek specific comment on this point, however, and on what guidelines, if any, should be adopted in the event that we should conclude that such an approach is a feasible and pratical alternative to the present administration and enforcement of these obligations.

B. Scope of Application

42. Whether existing rules are maintained or some alternative version is adopted, questions arise as to what types of channels or programs should be subject to these rules. Although Section 315 by its terms applies to "community antenna television system[s]," the rules interpreting Section 315 as well as the Fairness Doctrine rules (Sections 76.205 and 76.209) apply only to "origination cablecasting." This term is defined (by Section 76.5(w)) as "[p]rogramming (exclusive of broadcast signals) carried on a cable television system over one or more channels and subject to the exclusive control of the cable operator." Neither broadcast signals nor access channel programming were subjected to the requirements of these provisions because fairness and equal time obligations were thought to be applied to these either through their applications to the originating broadcast station or through applications of the first-come, first-served requirements of access channels.

43. Although as indicated earlier, the legislative intent behind those amendments that broadened Section 315's scope to cover cable television operations is not revealing, it would seem to be relatively clear that the perception at the time was that cable system operators would be programming one or more channels as *local* program originators. Such channels would perform for a single community or neighborhood the same functions as broadcasters perform for a larger service area. Given this perception, it might be possible to interpret the nature as generally not applying to cable distributed programming over which the system operator retains no practical day-to-day editorial control. Such an interpretation would vastly simpify the application of these rules. We are therefore interested in comment on this interpretation.

C. Partial or Complete Elimination of Rules

44. Because Section 315 is statutorily applicable to cable television, we are not in a position to eliminate all of the rules in this area on our own. However, it may be possible to eliminate particular parts of the requirements that are agency, rather than Congressional, creations. Because of our constitutional concerns relating to the rules we generally believe the rules should be applied in the most cautious and abridged possible version. Although the courts have not squarely decided the issue, some have assumed that the

[60] The criteria we considered as possibly acceptable on the broadcast side consisted of the following elements: (1) Licensee discretion must be preserved; (2) no right of access should accrue to particular persons or groups; (3) important issues should not escape timely public discussion; and (4) the government should not be drawn into programming decisions. 74 FCC 2d at 172. These may not necessarily have to be the same for cable television since cable possesses certain characteristics setting it apart from television broadcasting.

[61] *See Cable Television Report and Order,* at 193.

[62] *Report and Order in Docket 20508, supra.*

[63] Section 3 of the *Communications Act, as amended* (47 U.S.C. § 153).

Fairness Doctrine in its application to broadcasting was codified by Section 315.[84] The Fairness Doctrine was created in a series of agency decisions dating back to the Federal Radio Commission and the *Great Lakes Broadcasting* case.[85] It had no specific legislative content until Section 315 of the Communications Act was amended in 1959. The amendment made at that time states: "Nothing in the foregoing sentence [creating certain exceptions to the general equal opportunities requirements] shall be construed as relieving broadcasters, in connection with the presentation of newscasts, news interviews, news documentaries, and on-the-spot coverage of news events, from the obligation imposed upon them under this Act to operate in the public interest and to afford reasonable opportunity for the discussion of conflicting views on issues of public importance."[86] Even if this is assumed to have codified the doctrine for broadcasters, it is not clear that it must be interpreted as also codifying the doctrine in the cable context. There were no such public interest obligations imposed on cable operators in 1959, so that if this language is read as simply elevating existing requirements from regulatory to statutory stature, then the absence of such requirements in the cable context would have resulted in their not being codified. Accordingly, we seek comment on our authority to eliminate Fairness Doctrine obligations in the cable context entirely or, alternatively, on whether certain aspects of the doctrine can be eliminated without disservice to the public.

45. Even if we were to find that the Fairness Doctrine is not specially imposed under Section 315, we would still have to have a determination as to whether its elimination, without repeal of the equal time requirements, would be consistent with the general statutory scheme. We are cognizant of the fact that in some respect there may be a mutual interdependency between the fairness and equal time rules. In *Red Lion*, the Supreme Court stated that "the objectives of § 315 themselves could be readily circumvented but for the complementary Fairness Doctrine ratified by Congress." 395 U.S. at 382. The equal time requirements apply only to appearances (uses) by candidates themselves. But "quasi-equal time" type rights have been applied to other political programs through the fairness rules under the so-called "Zapple" doctrine.[87] Thus, it is possible that even if we find that these requirements are no longer needed to serve the public interest, Congressional intent and purpose in adopting Section 315, and, in particular, in making the equal time provisions applicable to cable operators, might be frustrated or defeated absent retention of at least parts of the Fairness Doctrine.

D. Scope of Newspaper Exemption

46. We have previously indicated our intention not to regulate the distribution of newspapers in facsimile on cable systems in our *Memorandum Opinion and Order in Docket 18397, supra*, at 829–830. One commentator, while lauding this exemption from the rules, has stated:

> This exception is surely sound. If a newspaper is delivered via facsimile reproduction over a cable system, rather than by a newsboy, the difference in delivery mechanism hardly seems an appropriate basis for a fundamental change in legal status * * * Where does the electronic dissemination of printed matter, which is not subject to the Fairness Doctrine, end, and where do the normal types of television programming, which are covered by the Fairness Doctrine, begin? * * * The distinction between print media and cable television is hard to identify once it is conceded that, in disseminating newspapers or books in facsimile or teletype form, cable television is to be treated as a print medium not subject to the traditional regime of broadcast regulation.[88]

We agree that the differences between the print media and electronic video media are becoming more difficult, if not impossible, to discern,[89] particularly wih the development of technologies such as teletext and videotex.[90] Indeed, in another action adopted this day, we declined to apply fairness and equal time rules to teletext services provided by television broadcast stations. *Report and Order in BC Docket 81–741, supra.* We have no desire nor, in our estimation, do we have constitutional or statutory authority to regulate printed material when it is transmitted to video screens and, for this reason, we believe that the present exemption limited to facsimile reproduction of newspapers, should be extended. We believe that the exemption should include the transmission of textual information transmitted on cable systems whether the information constitutes a reproduction of a newspaper's content or is textual matter originated, edited, or rearranged by a cable operator or cablecaster and we question whether such information ought to lose its exemption status when combined with

---

[84] *See* note 31 *supra*. We have expressed the view, however, that Congress merely ratified this agency's promulgation of the Fairness Doctrine. *See Report and Order in BC Docket 81–741*, FCC 83– , FCC 2d——— (adopted March 31, 1983).

[85] *See Great Lakes Broadcasting Co.*, 3 F.R.C. Annual Rep. 32 (1929), *rev'd on other grounds* 37 F. 2d 993 (D.C. Cir. 1930), *cert. denied* 281 U.S. 706 (1930).

[86] *See Act of September 14, supra.*

[87] *See Nicholas Zapple*, FCC 70–508, 23 FCC 2d 707 (1970). The Commission held in "Zapple" that when a licensee provides time with or without charge during an election campaign to a candidate's supporters or spokespersons who urge the candidate's election, discuss campaign issues, or criticize an opponent, then the licensee must afford comparable time to the supporters or spokespersons of opponents. The Commission considers such broadcasts to be in "the political area" and, by applying to them the Fairness Doctrine in a way that approximates the same result as the equal opportunities requirements for appearances by candidates themselves, the Commission essentially treats them as "quasi-equal opportunities" situations.

[88] Schmidt, Benno C., Jr., *Freedom of the Press vs. Public Access* at 214–216.

[89] Scholars have many times expressed difficulty in finding rational differences between the treatment of some electronic media as per *Red Lion* and that of the print media as most recently reconfirmed in *Miami Herald*. The present difference in treatment between these two media appears to be based on a continued perception of the marketplace that existed at a certain time when the differences in the media might have reasonably justified the legal differences between them. An examination of the present marketplace, of the changes in the media, and of their present characteristics would appear, however, to undercut the historical basis for disparate treatment. As technological advances proceed, continued justification based primarily on previous historical treatment will in the long run prove to be self-defeating since conceivably it could lead to program content regulation of all media subject to distribution by electronic means.

[90] Teletext and videotex are services that have the technical capability to distribute alphanumeric and/or graphic information for display on a television receiver or computer terminal. The term "teletext" is generally used to describe broadcast-type systems that superimpose alphanumeric and/or graphic information on a broadcast signal, usually on its vertical blanking interval, for reception by individuals having a special receiver decoder. In addition to approximately a dozen current or planned broadcast station teletext experiments, there are a number of other teletext publishing experiments in various developmental stages including the proposed utilization of a full satellite transponder by Time, Inc. for a national news and information service, and local experiments undertaken by Dow Jones (The News-Times-Danbury, Connecticut) and The Courier Journal (Louisville, Kentucky). *See generally*, Arlen Communications, Inc., *International Videotex Teletext News*, (Washington, D.C.).

Videotex is a related service that can provide interactive (two-way) capability and is thus able to offer more extended capabilities than teletext. Several videotex experiments presently being conducted exhibit these greater flexibilities—two-way interactive service, a large data base, and the capability of transmitting via a switched public telephone network, cable television system, satellite, or a combination of these delivery modes. Such experiments include "Telemax" (Times Mirror Videotext Services and Informart of Canada), "Prestel" (British Telecom and Logica, Inc.), and "Viewtron" (Knight-Ridder Newspapers' Viewdata Corp. and AT&T). *See generally*, Alan Cole-Ford, ed., *Electronic Publisher*, Paul Kaga Associates, Inc. (Carmel, California).

other forms of visual or aurual information that traditionally has not been exempt. In sum, we believe that attempts to draw distinctions between the various new forms of news media[71] will lead to quixotic results. We therefore seek comment on whether extension of the present exemption can be achieved without undermining the present validity of the fairness or equal time requirements. In proposing to extend the exemption beyond its present boundaries, we ask interested persons to provide us with information concerning how we can fulfill our statutory obligations in this area without at the same time infringing on the rights which is enjoyed by the print media under the First Amendment.

VIII. General Conclusion

47. We have attempted to set forth some of the difficulties from a constitutional standpoint and from an administrative standpoint if the fairness and equal time requirements are maintained in their present form. We have proposed modification of the existing rules and policies that will hopefully lead to the formulation of policies and rules that appropriately balance the rights and interests of cable operators with those of the general public, without violating either the spirit or the letter of the existing Congressional mandate. In our estimation, this can best be done both: (1) By maximizing the number of communications outlets to the public through increased competition in the marketplace and (2) by minimizing to the extent possible government involvement over the content of the speech in its various forms on such outlets.

[71] We also note that in the midst of the newly developing electronic techniques and the challenges they present to traditional publishers is the increasing participation of newspaper interests in all forms of electronic communication. For example, on the cable side, most of the "electronic publishers" are newspaper publishers who, through joint venture or lease, are engaged in programming one or more cable television channels to provide local news and advertisements. In addition, there are approximately 80 newspapers now providing "cablenews" channels on systems serving more than one million subscribers. *See Electronic Publisher, supra.* Aslo, according to one survey, at least 21 of the newspapers, as well as half of the 15 or more newspapers programming cablenews channels on a part-time basis, deliver some video programming in combination with news and advertising text. *See* American Newspaper Publishers Association, "Newpaper-Cable TV Services—Current Activities in Channel Leasing and Other Local Service Ventures," March 1982. The video programming offered is primarily local material, including advertising, newscasts, public affairs shows, and local sports and features. In addition, some newspapers are using outside programming sources such as CNN.

IX. Statutory basis

48. Authority for the rule making proposed herein is contained in Sections 1, 2, 3, 4(i) and (j), 301, 303, 307, 308, 309, 315 and 403 of the Communications Act of 1934, as amended.

X. Rule Making Procedures

49. All interested persons are invited to file written comments on or before July 25, 1983, and reply comments on or before August 25, 1983.

50. Regulatory Flexibility Act of 1980 Initial Analysis.

I. Reason for Action: This proceeding has been initiated to examine whether alternative methods of compliance by cable operators with the fairness and equal time doctrines can be implemented by the Commission as well as whether any aspects of these or related doctrines can be eliminated from a public interest standpoint. Case law developments and change in the cable television industry and communications sector in general suggest that certain of the program content policies, rules and regulations applicable to cable television may no longer be necessary and should be either modified or eliminated.

II. Objectives: The Commission seeks comments on alternative approaches to satisfying the fairness and equal time doctrines as well as whether any aspects of these or related policies should be modified or eliminated.

III. Legal Basis: Action proposed is in furtherance of 4(i) and (j), and 303(r) of the Communications Act of 1934, as amended, which authorizes the Commission to make such rules and regulations, not inconsistent with law, as may be necessary in the execution of its functions, with the additional view of the public welfare.

IV. Description, Potential Impact and Number of Small Entities Affected: The approximately 5,200 cable television systems now in existence would be affected by actions taken in this rule making proceeding. Cable operators' obligations in terms of review of program content on their system's channels could prove to be less burdensome if the proposal to satisfy fairness and equal time responsibilities by making available a public access channel is adopted. To the extent that some of these obligations are not statutorily imposed and can be eliminated, the rule making could provide relief to all cable systems. To the extent that some of the obligations are statutorily imposed on all cable systems, the rule making could not be used as a vehicle to provide special relief to smaller cable systems.

V. Recording, Record Keeping and Other Compliance: The proposed rule making might lessen present record keeping requirements imposed on cable operators under these policies.

VI. Federal Rules which Overlap, Duplicate, or Conflict with this Rules: None.

VII. Any Significant Alternatives Minimizing Impact on Small Entities and Consistent with Stated Objectives: None.

VIII. Conclusions: The Commission seeks to eliminate unnecessary rules and regulations applicable to those it regulates and, in the course of its review of its cable television rules and regulations, believes that fairness, equal time and associated policies, rules and regulations should be either modified or eliminated on the basis that case law developments and change in the cable industry and communications sector in general suggest less of a need for the application of these program content regulations to cable television and, accordingly, it seeks comments on alternative approaches to the present rules and regulations as well as whether any of the existing requirements can be eliminated.

51. In accordance with the provisions of § 1.419 of the Commission's Rules and Regulations, an original and five copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission. Participants filing the required copies who also wish each Commissioner to have a personal copy of the comments may file an additional six copies. Members of the general public who wish to express their interest by participating informally in the rulemaking proceeding may do so by submitting one copy of the comments specifying the docket number MM Docket 83-331 of the proceeding.

52. All filings made in this proceeding will be made available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

53. Further information concerning this proceeding may be obtained from Stephen A. Bailey, Mass Media Bureau, (202) 632-7793. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, *ex parte* contacts presented to the Commission in proceedings such as this one will be disclosed in the public docket file.

54. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other

than comments officially filed at the Commission or oral presentations requested by the Commission. If a member of the public does wish to comment on the merits of this proceeding in this manner, he or she should follow the Commission's procedures governing *ex parte* contacts in informal rule making. A summary of these procedures is available from the Consumer Assistance Office, (202) 632–7000, Federal Communications Commission, Washington, D.C. 20554.

55. In view of the foregoing the petition for rule making filed by the National Telecommunications and Information Administration (RM–3676) is granted.

(Secs. 4, 303,, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

William J. Tricarico,
Secretary.

Separate Statement of Commissioner Stephen A. Sharp

Re: Fairness Doctrine and Political Cablecasting Obligations of Cable System Operators

I concur in the issuance of this NPRM to the extent that its proposals arguably are within the Commission's statutory authority.

I disagree with the majority's view, however, that the so-called Fairness Doctrine might not apply to cable systems. After more than a dozen years of experience with Section 315 of the Communications Act, I cannot subscribe to the analysis in paragraph 12 and the suggestions which flow from it.

In 1959 Congress recognized in Section 315 of the Act "the obligation * * * under this Act * * * to afford reasonable opportunity for the discussion of conflicting views on issues of public importance." This language gave specific recognition to an obligation now known as the Fairness Doctrine, which previously had been derived from the more general "public interest" standard of the Act. In 1971, Congress again amended Section 315 to impose all of its obligations, as written and interpreted at the time, on cablecasting.

Thus the only means to remove these obligations on cable systems are to repeal Section 315 and to specify that no such obligations inhere in the public interest standards of the Act, or to challenge its constitutionality.

In view of these constraints, I see no purpose in asking whether *the Commission* should eliminate these obligations.

In this context, my oath as Commissioner and my express commitments to enforce the so-called Fairness Doctrine fully pending congressional action must override my unequivocal and well-known opposition to this form of government censorship. I look forward to the day when the Doctrine and Sections 312(a)(7) and 315 are repealed.

[FR Doc. 83–15213 Filed 6–7–83; 8:45 am]
BILLING CODE 6712–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1186

[Ex Parte No. 55; Sub-No. 57]

Exemption of Transactions Under 49 U.S.C. 11343

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption and rulemaking.

SUMMARY: The Commission is proposing to exempt, under 49 U.S.C. 11343(e), motor finance transactions subject to regulation under 49 U.S.C. 11343(a)(1)–(5), between motor carriers of property and between motor carriers and noncarriers. The Commission is also proposing procedural requirements for processing transactions proposed for the class exemption and for processing complaints filed by employees alleging they are or will be adversely affected by a transaction. Our recent experience in processing individual motor finance exemption petitions clearly demonstrates that the existing regulatory scheme has been a significant impediment to the realization of public benefits which can derive from motor carrier finance transactions. A further reduction in regulation, through adoption of this class exemption, would appear to make possible further benefits to the industry and the public and relieve the Commission of the need to scrutinize such transactions on an individual basis.

DATES: Comments must be submitted by July 8, 1983. The Commission does not intend to grant extensions of the filing deadline. It intends to serve its final decision within 60 days of receipt of comments.

ADDRESS: Send comments (an original and 10 copies) to: Ex Parte No. 55 (Sub-No. 57), Room 2203, Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977, or Howell I. Sporn, (202) 275–7691.

SUPPLEMENTARY INFORMATION:

Background

The exemption authority. Section 21(b) of the Bus Regulatory Reform Act of 1982 (Bus Act), Pub. L. 97–261, enacted September 20, 1982, amended 49 U.S.C. 11343 by adding a new subsection (e). This new subsection authorizes the Commission to exempt various motor transactions arising under Section 11343 from certain provisions of the Act. Section 11343(e) provides:

(1) Notwithstanding any provisions of this title, the Interstate Commerce Commission, in a matter related to a motor carrier of property providing transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title, may exempt a *person, class of persons, transaction, or class of transactions from the merger, consolidation and acquisition of control provisions of this subchapter* if the Commission finds that—(A) the application of such provisions is not necessary to carry out the transportation policy of section 10101 of this title; and (B) either (i) the transaction is of limited scope, or (ii) the application of the provisions of this subchapter is not needed to protect shippers from the abuse of market power.

(2) At least 60 days before any transaction exempt under this subsection from the merger, consolidation, and acquisition of control provisions of this subchapter may take effect, each carrier intending to participate in such transaction shall file with the Commission a notice of its intention to participate in such transaction and shall give public notice of such intention. The Commission shall prescribe the information to be contained in such notice, including the nature and scope of the transaction.

(3) The Commission, on its own initiative or on complaint, may revoke an exemption granted under this subsection to the extent it specifies, when it finds that application of the provisions of this section to the person, class of persons, or transportation is necessary to carry out the transportation policy of section 10101 of this title.

(4) If the Commission, on its own initiative, finds that employees of any carrier intending to participate in a transaction exempt under this subsection from the merger, consolidation, and acquisition of control provisions of this subchapter are or will be adversely affected by such transaction or if employees of such carrier adversely affected by such transaction file a complaint concerning such transaction with the Commission, the Commission shall revoke such exemption to the extent the Commission deems necessary to review and address the adverse effects on such employees. (Italic added.)

Present exemption procedures. In Ex Parte No. 400, (Sub-No. 1), *Procedures—Handling Exemptions Filed by Motor Carriers*, 367 I.C.C. 113 (1982), we adopted procedures to exempt from the requirement of prior review and approval individual transactions which would ordinarily be subject to the

procedural and substantive filing requirements of 49 U.S.C. 11343, 11344, and 11345a. In processing individual petitions we have permitted parties to seek exemption from those transactions described in section 11343(a)(1)–(5), *i.e.*, mergers, consolidations, acquisitions of contorl or continuance in control, leases, and purchases. In addition, parties have been permitted to seek temporary authority to merge under 49 U.S.C. 11349, and directly related applications, such as finance gateway applications and applications to convert a certificate of registration to a certificate of public convenience and necessity, have also been considered.

The individual exemption procedures have met with wide public acceptance. Since adoption of the procedures on November 19, 1982, approximately 200 petitions for exemption have been filed.[1] Opposition to the granting of these petitions has been negligible and, accordingly, the Commission is examining whether the public interest warrants scrutiny of motor finance transactions on an individual basis. Our experience in proceeding individual petitions, weighed in light of the statutory criteria of section 11343(e), has led us to conclude that we should next consider a class exemption for transactions among motor carriers of property and between motor carriers of property and noncarriers. The proposal here would implement such an exemption.

Discussion and Conclusions

Statutory criteria

a. *The national transportation policy.* In order to grant an exemption from regulation of the class of transactions described above, we must first determine whether continued regulation is necessary to carry out the national transportation policy (NTP). The NTP, set forth at 49 U.S.C. 10101, embraces a number of objectives which Congress intended for us to consider in carrying out our regulatory mandate. A central theme of the NTP is that we regulate with the goal of promoting competitive and efficient transportation in order to meet diverse shipping needs and to allow carriers to use equipment, energy, and other resources productively and profitably.

Motor finance transactions permit carriers to realize greater operating and financial economies and to compete more effectively for traffic in the less restrictive regulatory environment initiated by the Motor Carrier Act of 1980, P.L. 96–296, 94 Stat. 793 (1980) (MCA). For instance, motor carrier consolidations help to reduce carrier costs by permitting better load distribution and balancing of operations, improving data processing functions, reducing insurance costs, and providing carriers with better access to capital markets. Operating efficiencies can then be translated into lower costs to shippers and better service. Further, tax advantages, such as reporting on a consolidated basis, frequently may be realized as a result of motor finance transactions. Acquisition transactions often provide a lower risk method of entry into new geographic or commodity markets than does licensing. Motor finance transactions typically produce significant public benefits, such as single-line hauls, faster transit time, and lower damage claims. Finally, consolidation and acquisition transactions may enable carriers to offer the shipping public previously unavailable price and service options.

Our recent experience in processing individual motor finance exemption petitions clearly demonstrate that the existing regulatory scheme has been a significant impediment to the realization of public benefits which can derive from motor carrier finance transactions. In additon to a $700 filing fee, the compilation of an extensive application (including comprehensive traffic abstracts) was required prior to the Bus Act. The dramatic increase in motor finance filings since adoption of the Ex Parte No. 400 (Sub-No. 1) procedures is clear evidence that a significant regulatory barrier previously existed. A further reduction in regulation, through adoption of this class exemption, would appear to make possible further benefits to the industry and the public and relieve the Commission of the need to scrutinize such transactions on an individual basis.

B. *Limited scope of the class exemption.* We must also find the matter to be either limited in scope or regulation of it unnecessary to protect shippers from an abuse of market power. While we tentatively intend to rely on the second criterion, a limited scope analysis may also be possible. While there are potentially a large number of exempt transactions, the class of transactions could be viewed as limited in scope based on an analysis of their impact vis-a-vis the much larger and diverse structure of the national transportation market. The revenues of individual carriers of whatever size are relatively small, and the amount of traffic each transports is likewise quite limited. The industry is sufficiently fragmented that even the totality of transactions within this exempted class is unlikely to have appreciable national transportation effects. We thus welcome comments on the "limited scope" criteria as well as the "abuse of market power" alternative.

C. *Abuse of market power.* We conclude on a preliminary basis that application of the detailed regulatory scrutiny which would be required in the absence of the proposed class exemption is not necessary to protect shippers from an abuse of market power. The competitive atmosphere which has existed since the enactment of the MCA ensures that numerous carriers are able to compete for all traffic. Even where large carriers and noncarriers participate in motor finance transactions, it is highly unlikley that competition will be reduced to a degree harmful to shippers.

At present, many carriers hold or may easily obtain nationwide authority and vigorously compete for traffic in national or regional markets. A carrier (or noncarrier) which acquires control of another carrier may capture all or a significant share of the acquired carrier's traffic base, but that incremental share is typically quite small. In any case, there is no reason to assume that this market can be retained absent competitive pricing and service. Unless the acquiring party continues to provide the desired mix of price and service options, the public will turn to available competitive alternatives in short order. Because of the relative ease in obtaining operating authority since enactment of the MCA, carriers have obvious incentives to meet the needs of the marketplace.

It has been our experience that motor finance transactions are more likely to benefit shippers than to harm them. For instance, many of the recent exemptions processed individually involved the purchase of authority of bankrupt carriers which might otherwise have become dormant. Sale of the authority to an operating carrier has provided shippers in such instances with the continuation of a competitive alternative. In numerous other individual exemption proceedings, petitioners have demonstrated other benefits to the public, including improved efficiency, greater service capability, and heightened responsiveness to shipper concerns. Almost all of these cases have been unopposed. *No proposal has been*

[1] A number of petitions have been filed under the Ex Parte No. 400 (Sub-No. 1) procedures in conjunction with transactions that are beyond the scope of that decision. For instance, a number of petitions have been filed requesting exemption for the transfer of authority to a noncarrier. This proposal should eliminate much of the regulatory confusion

objected to by affected shippers. The granting of a class exemption will thus have an overall beneficial impact on shippers by reducing regulaory costs and facilitating transactions which will enable carriers to provide shippers with better service.

There are very good reasons why shippers are unconcerned about motor carrier merger and consolidation. The motor carrier industry is naturally competitive. It is not a capital intensive industry, and start-up costs are quite low. Perhaps equally important, there do not appear to be significant economies of scale in trucking. Thus the small compete quite effectively with the large.

Events of the last three years demonstrate that reduction in trucking regulation does not produce market concentration. There are considerably more carriers today than there were before passage of the MCA. Furthermore, some of the largest firms are having the greatest difficulty surviving in the new competitive environment, while many newly-founded, small firms are thriving. We see little reason to continue this agency's individual examination of merger related motor transactions.

We invite comments on our analysis of the competitive nature of the industry and on our proposal to include all motor carriers of property rather than attempting some artificial division of carriers.

The withdrawal of our oversight of motor carrier mergers may be of some concern to the other agencies of government with responsibilities in this area. We therefore particularly invite comment on these issues from the Federal Trade Commission and the Departments of Justice and Transportation.

Procedures for use of the exemption

To implement the class exemption, we propose that the parties to a transaction file a Notice of Exemption containing the information described in the attached appendix. In addition, revised certificates or permits would be submitted.[2]

Section 11343(e)(2) states that at least 60 days before any exempted transaction may take effect, carriers intending to participate in the transaction shall file a notice with the Commission and shall give "public notice of such intention." We propose to satisfy this notice requirement by publishing a summary of the Notice of Exemption in the **Federal Register.**[3] The notice would be prepared by the parties and reviewed by us for accuracy.

If the exempted transaction involves issuance of revised operating authorities, the parties will be expected to inform the Commission when they have consummated. Compliance with 49 U.S.C. 10927 (insurance), 10761–62 (tariffs), and 10330 (process agents), and the corresponding regulations at 49 CFR 1043, 1308–1310, and 1044, respectively, would continue to be required for exempt transactions.

Section 11343(e)(4) provides that employees of carriers participating in exempt transactions who are adversely affected by the transaction may file a complaint, and that the Commission shall revoke an exemption to the extent necessary to review and address the adverse effects on employees. The statute sets no time limit on filing complaints. Therefore, we propose to accept complaints filed any time on or after the date that a corresponding Notice of Exemption is filed.

Severance pay is the most common form of motor employee protection, and since eligibility for severance pay is generally based on an employee's status upon consummation of a transaction, revoking an exemption will not appear to be necessary. However, complainants may specifically request revocation or suspension of an exemption, demonstrating why this relief is necessary. In cases involving complaints of employees where we do not suspend or revoke the exemption, carriers that decide to consummate a transaction before the complaints are resolved would do so at their own risk. We propose that complaints by employees be served by them on the applicants, be filed with the Commission, and contain the docket number of the corresponding exemption proceeding. Following receipt of any replies, we would issue a decision on the record. If necessary, we would request additional evidence to fashion a remedy.

We propose to amend our rules by adding a new section to the Code of Federal Regulations, 49 CFR Part 1186, as set forth in the appendix.

Regulatory Flexibility Analysis. The proposal will exempt a class of finance transactions. The impact on small carriers, which are estimated to exceed 20,000, can only be beneficial. They will be relieved of the need to file either a lengthy application form or an individual exemption petition under the procedures established in Ex Parte No. 400 (Sub-No. 1).

There is no filing fee for a class exemption, and the information required by the proposed rules has been reduced to the minimal level consistent with our regulatory responsibilities. This should reduce small carrier needs for expert assistance, speed the regulatory process, and promote operational changes that enhance competition among carriers.

We are of the opinion that this proposal will indirectly benefit shippers and small communities because it will free carriers from regulatory burdens that hamper implementation of business decisions. Accordingly, we do not expect that the proposed rules, if adopted, will have a significant adverse economic impact upon a substantial number of small entities. We welcome comments on this issue.

Energy and Environmental Considerations. We conclude preliminarily that this action will not significantly affect either the quality of the human environment or consumption of energy resources. Comments are also welcome on these issues.

List of Subjects in 49 CFR Part 1186

Administrative practice and procedure, Employee complaints.

Authority: 49 U.S.C. 10321 and 11343(e) and 5 U.S.C. 553.

Decided: June 1, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Chairman Taylor concurred in part and dissented in part with a separate expression.

Agatha L. Mergenovich,

Secretary.

Chairman Taylor, concurring in part, dissenting in part:

I agree with the majority to the extent that I believe some action implementing a class exemption of motor carrier finance transactions is warranted. However, the proposed class exemption should not be extended to transactions involving solely Class I motor carriers. Based on current filings, imposing such a limitation would still leave included within the exemption over 94 percent of all motor carrier finance transactions.

In 1982, while Congress was considering the Bus Regulatory Reform Act, I suggested and the Commission proposed the elimination of our jurisdiction over motor carrier finance transactions. More specifically, in a letter to Congress dated June 8, 1982, the

[2] Because directly related applications (e.g., see 49 U.S.C. 10922 and 10923) are not covered by the § 11343(e) exemption, we must continue to handle them separately. Parties who would use this class exemption are advised to coordinate these activities.

[3] The notices will ultimately be placed in the proposed *ICC Register* if it is adopted by the Commission in Ex Parte No. 103, *Procedures for Providing Notice of Applications Filed Pursuant to 49 U.S.C. 10922, 10923, 10924, 10926, 10928, and 10929 in Lieu of* **Federal Register** Notice, 47 FR 42916 (September 29, 1982).

Commission endorsed this elimination by stating:

> In our view, other governmental bodies have sufficient jurisdiction to protect the public interest. Additionally, in view of liberalized motor carrier entry, the number of merger proposals has substantially declined and continued regulation by the Commission of merger, control and acquisition transactions does not appear necessary.

Subsequently, in lieu of eliminating the Commission's jurisdiction, Congress enacted an exemption procedure for motor carrier finance transactions. In so doing, Congress retained antitrust immunity for all such transactions found deserving of an exemption. With this in mind, the Commission, in its above-mentioned June 8th letter, set forth its intentions regarding the exemption alternative by declaring:

> We do not anticipate the exemption would be used in major transactions involving possible anticompetitive effects.

The majority now circumvents the foregoing pledge by reasoning that no motor carrier finance transaction can have anticompetitive effects because of eased entry and the fragmented structure of the motor carrier industry. While this may well be true for the vast majority of motor carrier finance transactions, I would not make such an *a priori* assumption for transactions involving solely Class I motor carriers.

The Commission has had only six months' experience under the present exemption procedures in Ex Parte No. 400 (Sub–No. 1), but on an annualized basis, the number of finance transactions has already increased by over 200 percent. Hereafter, as a result of the unlimited Rule proposed by the majority, none of these transactions will be subject to the antitrust laws. This antitrust consideration, when viewed in light of the strengthing economic recovery, the apparent increasing popularity of acquisitions to secure market entry, and the still substantial economic power of certain class I motor carriers, has led me to conclude that for the time being, financial transactions involving only Class I motor carriers should be handled on an individual basis rather than by the class exemption procedure. However, the exception I now support should definitely be reassessed in due course when more experience has been gained from handling Class I finance transactions on an individual basis.

Appendix

In order to implement the class exemption, we propose to add the following new Part 1186 to Title 49 of the Code of Federal Regulations to read as follows:

PART 1186—EXEMPTION OF CERTAIN TRANSACTIONS UNDER 49 U.S.C 11343

Sec.
1186.1 Scope of exemption.
1186.2 Notice of exemption.
1186.3 Attachments.
1186.4 Temporary authority.
1186.5 Filing fees.
1186.6 Publication of summary notice.
1186.7 Effective date of exemption.
1186.8 Employee complaints.

Authority: 49 U.S.C 10321 and 11343(e) and 5 U.S.C. 553.

§ 1186.1 Scope of exemption.

Any transaction under 49 U.S.C. 11343(a)(1)–(5) among motor carriers of property or between them and noncarriers is exempt from the requirements of 49 U.S.C 11343, 11344, and 11345a.

§ 1186.2 Notice of exemption.

To qualify for an exemption under § 1186.1, the participants in the transaction must file a joint Notice of Exemption with the Commission. The Notice of Exemption shall contain the following information:

(a) Names and addresses of the carriers involved;

(b) A brief, but specific description of the nature of the transaction; and

(c) Certification of the accuracy of the contents of the notice by, and signatures of, the persons who control the carriers involved in the transaction.

§ 1186.3 Attachments.

Attachments to the Notice of Exemption filed with the Commission should include:

(a) A short summary of the transaction to be published as a notice to the public; and

(b) If appropriate, draft certificates and permits reflecting the operating rights authorized to be acquired, retained, or issued.

§ 1186.4 Temporary authority.

Parties may simultaneously request temporary authority during the pendency of the exemption proceeding by submitting Form OP–F–46 in accordance with the regulations prescribed at 49 CFR 1183.4. The fee will be the same as that contained at 49 CFR 1002.2.

§ 1186.5 Filing fees.

No filing fee is required to file a Notice of Exemption.

§ 1186.6 Publication of summary notice.

The Commission will publish the summary of the Notice of Exemption describing the nature and scope of the transaction.

§ 1186.7 Effective date of exemption.

When a Notice of Exemption is filed, exemption shall be effective 60 days after a summary of the Notice of Exemption is published in the **Federal Register** except that, where relevant, consummation is contingent upon Commission approval of directly related applications involving conversion of certificates of registration

§ 1186.8 Employee complaints.

(a) Employees that have been or may be adversely affected by an exempt transaction or transaction proposed for exemption may file a complaint with the Commission any time after the Notice of Exemption is filed. (b) Complaints shall contain the following information:

(1) The docket number of the corresponding Notice of Exemption (if available at the time) and the names of the participants in the transaction;

(2) Names of the employees alleged to be affected by the transaction and the nature and scope of harm;

(3) A request for specific relief (requests for relief in the alternative are acceptable);

(4) An explanation as to why the particular relief sought is the appropriate remedy for the particular harm suffered; and

(5) (Optional) A request for suspension or revocation of the exemption, accompanied by information showing why suspension or revocation of exemption is necessary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Notice of Public Hearing and Reopening of Comment Period on the Proposed Endangered Status and Critical Habitat for the Kentucky Cave Shrimp

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of public hearing and reopening of comment period on proposed rule.

SUMMARY: Notice is given that a public hearing will be held and the comment

period reopened on a proposal of Endangered status and Critical Habitat for the Kentucky cave shrimp. This public hearing and comment period are to allow comment from government officials and the public.

DATES: The public hearing will be held at the Community Building, Mammoth Cave National Park, Kentucky, at 7:00 p.m. on June 28, 1983. The comment period is reopened effective with the publication of this notice and closes on July 7, 1983.

ADDRESSES: The Community Building is in the vicinity of the Visitor's Center, Mammoth Cave National Park, Kentucky. Comments should be addressed to the Regional Director, U.S. Fish and Wildlife Service, The Richard B. Russell Federal Buiding, 75 Spring Street, S.W., Atlanta, Georgia 30303.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Biggins, U.S. Fish and Wildlife Service, Plateau Building, Room A–5, 50 South French Broad Avenue, Asheville, North Carolina 28801 (704/258–2850), or Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–2771).

SUPPLEMENTARY INFORMATION: A proposal of Endangered status and Critical Habitat for the Kentucky cave shrimp (*Palaemonias ganteri*) was published in the **Federal Register** (45 FR 68975–68977) on October 17, 1980. A public meeting on that proposal was held in Bowling Green, Kentucky, on December 10, 1980. Since that time, the National Park Service has been carrying out studies of the distribution, status, and life history of the Kentucky cave shrimp.

The U.S. Fish and Wildlife Service will hold a public hearing on the proposed Endangered status and Critical Habitat for the Kentucky cave shrimp at 7:00 p.m. on June 28, 1983, in the Community Building, which is in the vicinity of the Visitor's Center, at Mammoth Cave National Park, Edmonson County, Kentucky. The Service is also reopening the comment period, effective with the publication of this notice, on the proposal. The reopened comment period will close on July 7, 1983. This hearing and reopoening of the comment period are intended to allow additional comment on the proposal.

The primary author of this notice is Steven M. Chambers, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1975).

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

June 3, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Department Clearance Officer, USDA, OIRM, Room 108–W Admin. Bldg., Washington, D.C. 20250, (202) 447–6201

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 19–83]

Proposed Foreign-Trade Zone—St. Louis County; Missouri Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the St. Louis County Port Authority, a political subdivision of the State of Missouri, requesting authority to establish a general-purpose foreign-trade zone in St. Louis County, Missouri, adjacent to the St. Louis Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 25, 1983. The applicant is authorized to make this proposal under Section 351.388 of the Revised Statutes of Missouri, 1978.

The propose zone covers 180,000 square feet within an underground warehouse facility, located on the west bank of the Mississippi River, 5000 Bussen Road, St. Louis County, some 8 miles south of downtown St. Louis. This facility, with some 1 million square feet of space, can accommodate a variety of warehousing and manipulation activities. It is owned and operated by Bussen Underground Warehouse Corporation, which will also operate the zone project.

The application contains evidence of the need for zone procedures in St. Louis County. Several firms have expressed an interest in using the zone for the warehouse/distribution of products such as electronic parts and products, instruments, uniforms and footwear.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; William L. Duncan, District Director, U.S. Customs Service, 120 S. Central Avenue, St. Louis, MO 63105; and Colonel Gary D. Beech, District Engineer, U.S. Army Engineer District St. Louis, 210 Tucker Blvd. North, St. Louis, MO 63101.

As part of its investigation, the examiners committee will hold a public hearing on June 29, 1983 beginning at 9:00 A.M., in the County Council Chambers of the St. Louis County Government Center, 41 Central, Clayton, Missouri.

Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377–2862) by June 23. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through July 29, 1983.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

U.S. Dept. of Commerce District Office, Suite 400, 120 South Central Avenue, St. Louis, MO 63105

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, NW., Washington, D.C. 20230

Dated: May 31, 1983.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510–25–M

[Docket No. 17–83]

Proposed Foreign-Trade Zone—Dayton, Ohio; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Greater Dayton Foreign-Trade Zone, Inc., a non-profit Ohio corporation affiliated with the City of Dayton, Montgomery County and the Dayton Area Chamber of Commerce, requesting authority to establish a general-purpose foreign-trade zone in Dayton, Ohio, within the Dayton Customs port of entry. The application

was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 24, 1983. The applicant is authorized to make this proposal under Section 1743.11 of the Ohio Revised Code.

The proposed zone will cover 452 acres at the Dayton International Airport, a city-owned commercial, industrial and transportation complex totalling some 3200 acres. A 52,000 square foot general-purpose building, currently under construction at 10300 Freight Drive, will be used for initial zone activity. Steve Ellis Realty has been designated as zone developer and operator.

The application contains evidence of the need for zone procedures in the Dayton area. A number of firms have indicated an interest in using the zone for warehousing/distribution, inspection and repair of products, such as machinery and tooling, welding system components, vehicle components, appliances, heaters, gaskets, rope, laboratory equipment, instruments, electronic components and equipment, switches, medical products and sugar.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; John F. Nelson, District Director, U.S. Customs Service, (6th Floor), 55 Erieview Plaza, Cleveland, Ohio 44114; and Colonel Charles E. Eastburn, District Engineer, U.S. Army Engineer District Louisville, P.O. Box 59, Louisville, KY 40201.

As part of its investigation, the examiners committee will hold a public hearing on June 28, 1983, beginning at 8:30 A.M., in Conference Room A of the Dayton Marriott Hotel, 1414 South Patterson Blvd., Dayton, Ohio.

Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377–2862) by June 22. Instead of an oral presentation, written statements may be submitted, in accordance with the Board's regulations, to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through July 29, 1983.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, Dayton International Airport, International Arrivals Building, Vandalia, OH 45377

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, NW., Washington, D.C. 20230

Dated: May 31, 1983.

BILLING CODE 3510-25-M

[Docket No. 18–83]

Proposed Foreign-Trade Zone—Clinton County, Ohio, Adjacent to the Dayton Customs Port of Entry; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Airborne FTZ, Inc., a private Ohio corporation and a subsidiary of Airborne Freight Corporation, requesting authority to establish a general-purpose foreign-trade zone in Clinton County, Ohio, adjacent to the Dayton Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 24, 1983. The applicant's authority to make this proposal under Section 1743.11 of the Ohio Revised Code is being reviewed as part of the overall review of the proposal, and the FTZ Act, Section 1(f) (19 U.S.C. 81a(f).

The proposed zone will cover 1.1 acres within the Airborne Air Park, a 490-acre industrial park and airport complex at the former Clinton County Air Force Base near Wilmington, Ohio, some 30 miles southeast of Dayton. An existing hanger/warehouse is available for initial zone activity. The complex is owned and operated by Airborne Freight Corporation.

The application contains evidence of the need for zone services in Wilmington, Ohio area; but, will be reviewed with the proposed zone at Dayton International Airport in mind. Several firms have expressed an interest in using the proposed zone for air freight related warehousing/distribution activity, involving a variety of products including steel, manufacturing equipment, and lift truck parts.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr., (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; John F. Nelson, District Director, U.S. Customs Service, (6th Floor) 55 Erieview Plaza, Cleveland, Ohio 44114; and Colonel Charles E. Eastburn, District Engineer, U.S. Army Engineer District Louisville, P.O. Box 59, Louisville, KY 40201.

As part of its investigation, the examiners committee will hold a public hearing on June 28, 1983, beginning at 10:00 A.M. (immediately following the hearing on Docket No. 17–83 concerning a proposed zone at the Dayton International Airport) in Conference Room A of the Dayton Marriott Hotel, 1414 South Patterson Blvd., Dayton, Ohio.

Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377–2862) by June 22. Instead of an oral presentation, written statements may be submitted, in accordance with the Board's regulations, to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through July 29, 1983.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, Dayton International Airport, International Arrivals Building, Vandalia, OH 45377

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, NW., Washington, D.C. 20230

BILLING CODE 3510-25-M

International Trade Administration

[A-580-073]

Bicycle Tires and Tubes From Korea; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review of Antidumping Finding.

SUMMARY: On July 9, 1982, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on bicycle tires and tubes from Korea. The review covers the six known exporters of this merchandise to the United States and generally the period from April 1, 1980 through March 31, 1981.

Interested parties were given an opportunity to submit oral or written comments on the preliminary results. The petitioner requested a hearing which was held on September 28, 1982. After analysis of the comments received, we have made no changes in the final results from those contained in our preliminary results of review.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Jonathan Seiger or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377–3003/5496.

SUPPLEMENTARY INFORMATION:

Background

On April 13, 1979, the Treasury Department published in the **Federal Register** (44 FR 22051–2) a dumping finding with respect to bicycle tires and tubes from Korea. On July 9, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 29866–7) the preliminary results of its last administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

The imports covered by the review are shipments of bicycle tires and tubes from Korea. The term "bicycle tires and tubes" means pneumatic bicycle tires and tubes, of rubber or plastics, whether such tires and tubes are sold together as units or separately. Bicycle tires and tubes are currently classifiable under items 772.4800 and 772.5700 of the Tariff Schedules of the United States Annotated.

The review covers the six known exporters of Korean bicycle tires and tubes to the United States. For five of the firms the review covers the period April 1, 1980 thorugh March 31, 1981. For Dae Woo Industrial Co., Ltd., the review covers the period April 1, 1978 through March 31, 1981.

Analysis of Comments Received

Interested parites were given an opportunity to submit oral or written comments on our preliminary results. The petitioner, Carlisle Tire and Rubber Co., requested a hearing which was conducted by the Department on September 28, 1982.

Comment 1: Carlisle argues that the Department improperly allowed adjustments to home market prices in computing foreign market value. The statutory definition of foreign market value authorizes the making of adjustments for differences in circumstances of sale of the articles being compared if the Department establishes a causal connection between the amount of the claimed differences in circumstances of sale and the amount of the differences between U.S. and home market prices. In light of the express showing called for in section 773(a)(4) of the Tariff Act of 1930 ("the Tariff Act"), the Department cannot simply assume that price differentials are the cumulative result of an assorted collection of differences in costs.

Department's Position: All adjustments were made in accordance with § 353.15(d) of the Commerce Regulations, which states that reasonable allowances will be made for the costs to the seller of any differences in circumstances of sale. This regulation is consistent with section 773(a)(4) of the Tariff Act, which states that an allowance will be made for any price difference "wholly or partly" due to differences in circumstances of sale. The Department concludes that the differences in cost constitute a reasonable indication of the differences in price.

Comment 2: In computing the home market prices for five of the firms, the Department allowed adjustments for inland freight charges. For Dae Woo, the Department further adjusted the home market price for differences in the costs of packing for home market transactions and export transactions. Carlisle argues that the statute does not permit such costs to be excluded from home market prices.

Department's Position: In making a fair and equitable comparison the Department believes it is necessary to reduce the United States price and foreign market value being compared to comparable terms.

In its simplest form, the calculation will ordinarily be made by taking the ex-factory price for both the sale to the U.S. and for home consumption. In adjusting foreign market value, pursuant to section 773(a)(4) of the Tariff Act, for differences in circumstances of sale to permit a fair comparison on comparable terms, the Department followed a long-standing administrative practice with regard to inland freight costs and packing cost differences, and relied on verified amounts contained in the administrative record.

Comment 3: For several Korean manufacturers the Department made adjustments to the foreign market value equal to the amount of certain after-sale rebates. The Department further allowed an adjustment for bonuses claimed by Hung-A Industrial Co., Ltd. For certain firms the rebate was detemined on a quarterly basis, and for others on a monthly basis. Hung-A made bonus payments at the end of the calendar year based on the volume of purchases made by the buyer in the course of that year.

Carlisle contends that the buyer in the home market would not know on the transaction dates whether or not there was any entitlement to a rebate or a bonus. There was no material evidence of any contractual right on that date to enforce the payment of any particular amount as a rebate or a bonus. Therefore, the petitioner argues that the rebates and bonuses, since they were approximated, were improperly allocated to individual sales and, moreover, are not allowable adjustments since they are not directly related to the sales under consideration. The mere fact that the merchandise was eligible for possible rebates at some future date, and that buyers subsequently received rebates, is not relevant.

Department's Position: The allowed adjustments for rebates and bonuses are quantifiable and directly related to the sales under consideration. Rebate and bonus liabilities were incurred by virtue of sales of bicycle tires and tubes during the periods covered. Thus, the payment of end-of-period rebates and bonuses, and the amounts of those payments, were directly dependent on the sale or non-sale of such tires and tubes. Additionally, the actual total rebate and bonus amounts used to arrive at per-unit rebate figures were verified by the Department. The per-unit figures do not represent approximations or estimates, but reasonable allocations of actual costs.

Comment 4: The petitioner argues that the Department improperly used the rebate rate developed for calendar year 1980 to make an allowance for the first quarter of 1981.

Department's Position: As explained at the hearing, the Department did not allow an adjustment for home market rebates in the first quarter of 1981.

Comment 5: The Department allowed adjustments for certain advertising expenses in calculating home market prices. Carlisle contends that the adjustments for advertising were too large because the advertising materials submitted in support of the claims

included institutional advertising and advertising that was directed toward more than one product.

Multiple-product and institutional advertising expenses are indirect selling expenses, and not assumptions of a buyer's expenses in reselling the merchandise. Therefore, they are not permissible adjustments for differences in circumstances of sale.

Under the law and the regulations the burden is on a respondent to prove entitlement to any adjustment claimed. Carlisle submits that where, as here, a respondent overstates its claim, that firm fails to prove entitlement and there is no duty on the Department to do the work of estimating the amount of the allowance. The verification report for three of the companies noted the failure of respondents to submit adequately disaggregated information on advertising. The Department nonetheless "estimated" the allowable percentage of the total claimed advertising expense.

Department's Position: Section 353.15 of the Commerce Regulations provides that "reasonable allowances will be made" for circumstances of sale which cause the seller to incur direct costs in connection with the sales of the product in question. In this case the Department verified all advertising costs and disallowed those associated with institutional advertising. The Department allocated multiple-product advertising on the basis of space and accepted in its entirety the cost of advertising exclusively for bicycle tires and tubes. The Department believes that product advertising by the manufacturer in newspapers and general public magazines (as opposed to trade journals) is directly related to the sale of that product to the ultimate customer. The Department does not consider it necessary for a firm to mention individual distributor's names in product advertising to the general public for such advertising to be directly related to the sales in question. The Department can accept claimed expenses, in full or in part, allow a reasonable allocation of the claimed expenses, or disallow them in their entirety.

Comment 6: The Department concluded that promissory notes in Korea are only available for a maximum of ninety days. Certain respondents claimed credit costs for up to five months.

Carlisle claims that, since these respondents considerably overstated the amount of credit costs attributable to their sales in the home market, the claims should be disallowed in their entirety. It is improper for the Department to calculate the appropriate partial amounts for adjustment.

Department's Position: The Department maintains that its allowance of differences in credit costs is in accordance with § 353.15(d) of the Commerce Regulations. The Department can allow claimed adjustments in whole or in part, or reject them completely. Therefore, the Department acted within its authority in allowing the claimed adjustments in part.

Comment 7: The petitioner asserts that, in determining the United States price for Dae Yung, Hung-A, Shin Hung Rubber Co., Ltd., and Kukje (ICC) Corp., the Department made improper additions for customs duties, defense taxes, and value-added taxes incurred on raw materials and rebated by reason of exportation of the merchandise. The petitioner argues that, in the absence of any verified evidence that these taxes were in fact included in the home market prices, the Department cannot add rebates of such taxes to U.S. price.

Department's Position: The Department verified the actual total amount of rebated taxes used to arrive at per unit figures, and the taxes paid on raw materials used to produce bicycle tires and tubes for sale in the home market and the U.S. market.

The Department has discretion whether or not to verify specific data during the course of a verification. There is sufficient evidence in the responses that such taxes were included in the home market prices.

Comment 8: Korea Inoue Kasei, Co., Ltd. did not sell such or similar merchandise in the home market. Carlisle claims that the Department should not have limited its inquiry to examination of third-country sales and should have considered the use of constructed value. Further, because of the close geographic proximity of Canada to the U.S. market, the fact that prices in Canada are at or below those in the United States may merely confirm that the foreign producer is dumping in both markets.

Department's Position: The legislative history of the Trade Agreements Act states that "third country prices will normally still be preferred over constructed value if presented in a timely manner and if adequate to establish foreign market value" (S. Rep. No. 249, 96th Cong. 1st Sess. 95–96 (1979)). The Department also acted in accordance with section 353.4 of the Commerce Regulations, which states that "foreign market value based on sales to third countries will be preferred to foreign market value based on constructed value if adequate information is available * * * within the time required". In this case, sufficient third-country sales information was provided by the respondent, was verified by the Department, and was adequate to establish foreign market value.

Final Results of the Review

After analysis of the comments received, the final results of our review are the same as those presented in our preliminary results of review, and we determine that the following weighted-average margins exist:

Exporter	Time period	Margin (percent)
Dae Yung Commercial Co., Ltd.	04/01/80 to 03/31/81.	0
Hung-A Industrial Co., Ltd	04/01/80 to 03/31/81.	0
Korea Inoue Kasei Co., Ltd	04/01/80 to 03/31/81.	0.15
Shin Hung Rubber Co., Ltd	04/01/80 to 03/31/81.	0.37
Dae Woo Industrial Co., Ltd	04/01/78 to 03/31/80.	[illegible]
	04/01/80 to 03/31/81.	[1] 2.32
Kukje (ICC) (Corp.	04/01/80 to 03/31/81.	0

[1] No shipments during the period.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all entries made with purchase dates during the periods of review. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the most recent of the above margins for each firm shall be required on all shipments of Korean bicycle tires and tubes from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. Becasue the weighted-average margins for Korea Inoue Kasei Co., Ltd. and Shin Hung Rubber Co., Ltd. are less than 0.5 percent and, therefore, *de minimis* for deposit purposes, the Department waives the deposit requirement for these firms. For any shipment from a new exporter not covered in this or the prior review, whose first shipment occurred after March 31, 1981 and who is unrelated to any covered firm, a cash deposit shall be required at the highest rate for responding firms with shipments during the current review period, that is, 2.32 percent. These deposit requirements, and the waivers for Korea Inoue Kasei Co., Ltd. and Shin Hung Rubber Co., Ltd., shall remain in effect

until publication of the final results of the next administrative review. The Department intends to begin immediately the next administrative review. The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Calcium Pantothenate From Japan; Preliminary Results of Administrative Review on Antidumping Finding and Tentative Determination To Revoke in Part

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Antidumping Finding and Tentative Determination to Revoke in Part.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on calcium pantothenate from Japan. The review covers the 22 known manufacturers and/or exporters and 17 of the 19 known third-country resellers of this merchandise to the United States currently covered by the finding, generally for the period January 1, 1981 through December 31, 1981. The review indicates the existence of dumping margins in particular periods for certain firms.

As as result of this review, the Department has preliminarily determined to assess dumping duties equal to the calculated differences between United States price and foreign market value on each of the sales during the individual periods of review.

Where company-supplied information was inadequate or firms failed to respond to our questionnaire, we used the best information available for assessment and estimated antidumping duty cash deposit rates.

The Department has also tentatively determined to revoke the finding with respect to Alps Pharmaceutical Ind. Co., Ltd. and Helm Japan, Ltd.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Sheila E. Forbes or David R. Chapman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On May 28, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 23506-7) the final results of its last administrative review of the antidumping finding on calcium pantothenate from Japan (39 FR 2066, January 17, 1974) and announced its intent to conduct its next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of calcium pantothenate, a member of the B-complex vitamin family, which is produced in two grades: D-Cal Pan (USP Grade, which is used for human nutrition in the form of multi-vitamin tablets) and DL-Cal Pan (Feed Grade, which is used as food supplement for swine and poultry). Both grades of calcium pantothenate are currently classifiable under item number 437.8225 of the Tariff Schedules of the United States Annotated.

The review covers the 22 known Japanese manufacturers and/or exporters and 17 of the 19 known third-country resellers of Japanese calcium pantothenate to the United States currently covered by the finding. The review generally covers the period January 1, 1981 through December 31, 1981.

Two third-country resellers, Karl O. Helm AG (W. Germany) and Kompanie Ultramar Sievers & Co. GmbH (W. Germany), will be covered in a subsequent review.

Twenty-eight exporters or resellers did not export Japanese calcium pantothenate to the U.S. during the review period. The estimated antidumping duty cash deposit rates for these firms will be based on the most recent information for each firm. Three exporters, Amik Italia SRL (Italy), Chemeta BV (Netherlands), and Vitafor S.A. (Belgium), failed to respond to our questionnaire. For these non-responsive firms we used the best information available to determine the assessment and estimated antidumping duty cash deposit rates. The best information available is the fair value rate.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772 of the Tariff Act. Purchase price was based either on the packed price to unrelated purchasers in the United States or to unrelated Japanese trading companies for export to the United States, as appropriate. Where applicable, deductions were made for ocean freight, insurance, United States and foreign inland freight, brokerage, duty handling charges, postage, and shipping charges in accordance with § 353.10 of the Commerce Regulations. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 773 of the Tariff Act, where sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. For comparison with sales to the United States by third-country resellers we used the resellers' price to purchasers in their domestic markets, or for export to countries other than the United States when there were insufficient quantities of such or similar merchandise sold in their domestic markets. Adjustments were made, where applicable, for foreign inland freight, ocean freight, insurance, duty, interest, handling, brokerage, credit costs, commissions to unrelated parties, and differences in packing costs. No other adjustmens were claimed or allowed.

Preliminary Results of the Review and Tentative Determination To Revoke in Part

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

	Time period	Margin (percent)
MANUFACTURER/EXPORTER		
Agropol Limited	1/1/81 to 12/31/81	[illegible]
Alps Pharmaceutical Ind. Co.	do	[illegible]
Byron Chemical Co	do	[illegible]
Eisai Co., Ltd.	do	[illegible]
First Enterprise Inc	do	[illegible]
Helm Japan, Ltd	do	[illegible]
Ichi Maru Co., Ltd	do	[illegible]
Isho Incorporation	do	[illegible]
Iwaki & Co	do	[illegible]
Kamisagi Chemical Co, Ltd	do	[illegible]
Kamiyama Corp	do	[illegible]
Kanematsu-Gosho, Ltd	do	[illegible]

	Time period	Margin (percent)
Marubeni Corp	do	[illegible]
Manzen Chemicals Co	do	[illegible]9.57
Mitsui & Co	do	[illegible]16.87
Nagase & Co	do	[illegible]0
Nippon Roche, K.K	do	[illegible]0
Sankei Pharmaceutical Co	do	[illegible]16.87
Sankyo Company	do	[illegible]3.98
Toho Bussan Co	do	[illegible]16.87
Toyo Menka Kaisha	do	[illegible]1.87
Yamanouchi Pharmaceutical Co., Ltd	do	[illegible]0
THIRD-COUNTRY RESELLER (COUNTRY)		
Amik Italia SRL (Italy)	1/1/81 to 12/31/81.	[illegible].06
Agripharm, Ltd. (W. Germany)	do	[illegible]0
Blembel Gebruder (W. Germany)	do	[illegible]0
[illegible] Medicines & Pharmaceutical GmbH (W. Germany).	4/1/81 to 12/31/81.	0
Chemeta BV (Netherlands)	1/1/81 to 12/31/81.	3.98
Chemical & Feeds, Ltd. U.K.	do	[illegible]16.87
Deutsche-Norwegische Vitamin Gesellschaft GmbH (W. Germany).	do	0
H.G. u C. Blau (W. Germany)	do	0.16
J.H.C. Schmidt (W. Germany)	1/1/81 to 12/31/81.	0
Lenk Chemicals Corp. (Nether[illegible])	do	[illegible]16.87
M. Gurvey & Berry Co., Inc., [Canada]	do	[illegible].00
Marsing & Co., Ltd. (Denmark)	do	[illegible]16.87
Peak Int'l Products BV (Holland)	7/1/81 to 12/31/81	[illegible]0
Siemagluss A.G. (Switzerland)	1/1/81 to 12/31/81.	[illegible]16.87
Siemagluss & Sohn (W. Germany)	do	[illegible]16.87
R.W. Unwin & Co., Ltd. (U.K.)	1/1/82 to 6/30/82	0
Vitafor S.A. (Belgium)	1/1/81 to 12/31/81.	3.98

[illegible] No shipments during the period.

The Department has also concluded that all sales by Alps Pharmaceutical Ind. Co., Ltd. and Helm Japan Ltd. to the United States were made at not less than fair value or had *de minimis* margins for at least a two-year period. As provided for in § 353.54(e) of the Commerce Regulations, both firms have agreed in writing to an immediate suspension of liquidation and reinstatement of the finding as an order if circumstances develop which indicate that Japanese calcium pantothenate manufactured and exported to the United States by Alps and Helm is being sold by them at less than fair value.

Therefore, we tentatively determine to revoke the finding on calcium pantothenate from Japan with regard to Alps Pharmaceutical Ind. Co., Ltd. and Helm Japan Ltd. If this partial revocation is made final, it will apply to all unliquidated entries of this merchandise manufactured and exported by Alps and Helm, Japan, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

Interested parties may submit written comments on these preliminary results and tentative determination to revoke in part within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries made with purchase dates during the periods involved. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department shall issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the margins calculated above shall be required on all shipments of Japanese calcium pantothenate from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. The Department waives the deposit requirements for Alps Pharmaceutical Ind. Co., Isho Incorporation, and H.G.u C Blau since the margins for these firms are *de minimis* for deposit purposes. For any shipment from a new exporter not covered in this or prior reviews, whose first shipments occurred after the most recent period reviewed and who is unrelated to any reviewed firm, a cash deposit shall be required for future entries at the rate of 3.98 percent. These deposit requirements and waivers shall remain in effect until publication of the final results of the next administrative review.

This administrative review, tentative determination to revoke in part, and notice are in accordance with sections 751(a)(1) and (c) of the Tariff Act (19 U.S.C. 1675(a)(1), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

June 1, 1983.

Certain Steel Pipes and Tubes From Japan; Early Determination of Antidumping Duty

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Early Determination of Antidumping Duty.

SUMMARY: The Department of Commerce has conducted an early determination of the antidumping duty to be assessed upon imports of certain steel pipes and tubes from Japan entered, or withdrawn from warehouse, for consumption from August 18, 1982 through February 24, 1983. The determination will also be the basis for the deposit of estimated antidumping duties on future entries of such merchandise.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Jonathan Seiger or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-3003/5498.

SUPPLEMENTARY INFORMATION:

Background

On March 1, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 8522) an antidumping duty order on certain steel pipes and tubes from Japan. In accordance with the order, Customs officers were directed to require a cash deposit of estimated antidumping duties on the merchandise pending liquidation.

On March 2, 1983, Sumitomo Metal Industries, Ltd., one of the four known exporters of Japanese pipes and tubes, requested that the Department waive the cash deposit requirement and make an early determination of antidumping duty. On April 20, 1983, we announced in the **Federal Register** (48 FR 16928) that, in accordance with section 736(c) of the Tariff Act of 1930 ("the Tariff Act"), we were satisfied that we would be able to determine foreign market value and United States price, for all entries by Sumitomo from the date of our preliminary affirmative determination to the date of the International Trade Commission's final determination, within 90 days after the date of publication of the order. We waived the cash deposit of estimated antidumping duties pending the early determination of duty.

Scope of the Determination

Imports covered by the determination are shipments of seamless heat-resisting

pipes and tubes, and seamless stainless pipes and tubes, currently classifiable under items 610.5205, 610.5209, 610.5229, 610.5230, and 610.5234 of the Tariff Schedules of the United States Annotated.

We investigated all imports of those Japanese steel pipes and tubes, manufactured by Sumitomo Metal Industries, Ltd., and entered, or withdrawn from warehouse, for consumption during the period August 18, 1982 through February 24, 1983.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772 of the Tariff Act. Purchase price was base on the f.o.b. packed price to an unrelated Japanese trading company. We deducted foreign inland freight and a commission to the unrelated Japanese trading company. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 773 of the Tariff Act, since sufficient quantities of such of similar merchandise were sold in the home market to provide a basis for comparison. Home market price was based on the packed, delivered price with adjustments for differences in credit costs, inland freight, a commission to an unrelated party, and differences in packing costs. We made a further adjustment for differences in the physical characteristics of the merchandise, in accordance with section 353.16 of the Commerce Regulations. Certain claimed adjustments for differences in packing costs were disallowed because Sumitomo could not quantify the claimed differences. No other adjustments were claimed or allowed.

Analysis of Comment Received

We gave interested parties an opportunity to submit written and oral comments. The petitioner, Babcock and Wilcox, and Sumitomo submitted written comments.

Comments 1: Babcock and Wilcox argued that the non-confidential summary of Sumitomo's submission was inadequate because 1) the wall thicknesses and diameters for each comparison between U.S. sales and home market sales did not correspond exactly, 2) within manufacturing runs U.S. specifications varied unduly from those common in the trade, and 3) exchange rates were omitted. Babcock and Wilcox contended that it was impossible to determine if the proper home market sales had been chosen for comparison because of the inadequate non-confidential summary.

Department's Position: We determined that Sumitomo's non-confidential summary was inadequate. At our request, Sumitomo submitted a revised, timely, and adequate non-confidential summary.

Comment 2: Babcock and Wilcox questioned the small size of individual entries, multiplicity of "work order numbers" relating to contracts and individual shipments, and whether each work order represented a separate manufacturing run.

Department's Position: We verified that a "work order number" is simply an internal administrative "flag" used by Sumitomo to indicate a discrete customer specification. These "work order numbers" are not used for manufacturing run control.

Comment 3: Babcock and Wilcox alleged that Sumitomo sold substantial quantities of pipes and tubes in the home market at below the cost of production. Babcock and Wilcox expressed its concern that, because of the compressed nature of our proceeding, the Department would be unable to re-investigate that allegation, nor to determine whether Sumitomo's U.S. subsidiary sold to unrelated U.S. purchasers below its acquisition cost.

Department's Position: During the fair value investigation the Department found that insufficient quantities of pipes and tubes were sold below the cost of production to warrant further investigation of that allegation. Babcock and Wilcox failed to provide new or additional evidence to support that allegation. Accordingly, we did not further investigate it.

Comment 4: Babcock and Wilcox contended that, since Sumitomo Metal Industries is related to Sumitomo Corporation, the trading company handling its U.S. export sales, arms-length pricing would not occur, and the price between Sumitomo Metal Industries and Sumitomo Corporation should not be used to establish United States price.

Department's Position: During the fair value investigation the Department determined that a relationship, as defined for antidumping purposes, did not exist. We have no new or different evidence indicating that the respective ownership interests have changed.

Comment 5: Babcock and Wilcox questioned certain data submitted by Sumitomo concerning sales prices for large diameter cold-finished pipe. Moreover, Babcock and Wilcox contended that hot-finished pipe may have been sold for export as cold-finished pipe, thereby overstating its true value.

Department's Position: During our verification of Sumitomo's submission we selected various sales, including a sale of large diameter cold-finished pipe. We verified the type of finish, traced the payments, and found no discrepancies.

Comment 6: Babcock and Wilcox noted that the total quantity of sales reported by Sumitomo was substantially less than the volumes reflected in Commerce/Census statistics.

Department's Position: Census data do not disaggregate importations by exporter. Our records indicate that Sumitomo reported all its shipments during the period.

Comment 7: Babcock and Wilcox noted that, during the verification of data submitted by Sumitomo, the Department questioned Sumitomo's claim for adjustments for differences in packing costs, that actual packing costs could not be calculated, and that the type of packing used in any specific sale could not be determined. Given these difficulties, Babcock and Wilcox argued that Commerce should review such claims, particularly in instances where Sumitomo claimed that home market packing costs exceed those for the U.S. market.

Conversely, Sumitomo questioned statements made by the verifying officer concerning packing costs, protesting that the Department had previously accepted its methodology of calculating average packing costs. In addition, Sumitomo clarified the fact that, although most merchandise would have a similar type of packing, this does not necessarily imply similar packing costs.

Department's Position: Sumitomo was unable to demonstrate, either in its submission or at the verification, that packing costs differed between the U.S. and the home market. It could provide no information on the type of packing used for a specific item or sale. Before we will consider an adjustment for differences in packing costs a firm must show different packing costs for each market by tracing the calculations to an actual sale in each market. Where Sumitomo claimed that home market packing costs exceeded U.S. packing costs, we disallowed the adjustment. Where U.S. packing costs were greater, and any adjustment would result in an upward adjustment to foreign market value, we made the adjustment.

Comment 8: Babcock and Wilcox referred to a portion of our verification report that states "the submitted data on credit costs (exhibited) some minor inaccuracies." Babcock and Wilcox urged the Department to further examine

Sumitomo's claimed financing cost differential.

Department's Position: In our verification we found that Sumitomo used an incorrect commercial exchange rate in calculating the benefit of financing export sales, and also imputed an overly high interest rate to such financing. In addition, Sumitomo claimed only a 90-day credit period for home market sales, whereas accounts were usually held for longer periods. All three errors worked to Sumitomo's disadvantage; that is, Sumitomo did not claim as much of an adjustment as its records show it could have claimed. We allowed only the claimed amounts.

Comment 9: Babcock and Wilcox argued that, because our verification noted rounding errors in the calculation of manufacturing cost differentials, the requested downward adjustments to the foreign market value should be rejected.

Department's Position: In our verification report we noted the existence of such errors; however, those errors did not form a pattern advantageous to Sumitomo. We verified the claimed adjustments and are satisfied that they are warranted.

Results of Early Determination

As a result of our comparison of United States price to foreign market value, we determine that the weighted-average margin for all merchandise manufactured by Sumitomo and entered during the period August 18, 1982 through February 24, 1983, is 0.14 percent.

The Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all shipments manufactured by Sumitomo entered, or withdrawn from warehouse, for consumption from August 18, 1982 through February 24, 1983. Individual differences between United States price and foreign market value may vary from the percentage stated above. The Department will issue appraisement instructions directly to the Customs Service.

Since the weighted-average margin for Sumitomo Metal Industries, Ltd. is less than 0.5 percent and, therefore, *de minimis* for cash deposit purposes, the Department shall waive the requirement for cash deposit of estimated antidumping duties provided for by § 353.48(b) of the Commerce Regulations.

No cash deposit of estimated antidumping duties shall be required on future entries of this merchandise for any shipment from a new exporter not covered by this determination or during the fair value investigation, whose first shipments occurred after February 24, 1983. This requirement and waiver shall remain in effect until publication of the final results of the first administrative review. The Department intends to conduct its first administrative review by the end of March 1985.

This notice is published pursuant to section 736(c)(3) of the Tariff Act (19 U.S.C. 1673(e)) and § 353.49 of the Commerce Regulations (19 CFR 353.49).

May 31, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

[A-588-032]

Large Power Transformers From Japan; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review of Antidumping Finding.

SUMMARY: On December 8, 1981, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on large power transformers from Japan. The review covers the three known exporters of the merchandise to the United States, Fuji Electric Co., Ltd., Hitachi Ltd., and Tokyo Shibaura Electric Co., Ltd., and certain unappraised entries during varying time periods through June 30, 1980.

Interested parties were given an opportunity to submit written comments or request a hearing on the preliminary results. At the request of the petitioner and the three respondents, the Department held a hearing on February 1 and 2, 1982.

After our consideration of comments received, we have changed the margins for two of the exporters from those presented in the preliminary results of review.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Harry A. Patrick or John Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5253.

SUPPLEMENTARY INFORMATION:

Background

On June 14, 1972, a dumping finding with respect to large power transformers from Japan was published in the **Federal Register** as Treasury Decision 72-162 (37 FR 11773). On December 8, 1981, the Department of Commerce ("the Department") published in the **Federal Register** (46 FR 60046) the preliminary results of its first administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of large power transformers ("transformers") that is, all types of transformers rated 10,000 KVA (kilovolt-amperes) or above, by whatever name designated, used in the generation, transmission, distribution, and utilization of electric power.

The term "transformers" includes, but is not limited to, shunt reactors, autotransformers, rectifier transformers, and power rectifier transformers. Not included are combination rectifier-transformer units, commonly known as rectiformers, if the entire integrated assembly is imported in the same shipment and entered on the same entry, and the assembly has been ordered and invoiced as a unit, without a separate price for the transformer portion of the assembly. Transformers covered by this finding are currently classifiable under items 682.0765 and 682.0775 of the Tariff Schedules of the United States Annotated.

The Department knows of three exporters of Japanese large power transformers to the United States: Fuji Electric Co., Ltd. ("Fuji"), Hitachi, Ltd., and Tokyo Shibaura Electric Co., Ltd. ("Toshiba").

The review covers the three exporters and certain sales not covered by prior appraisement instructions ("master lists"), during varying time periods through June 30, 1980. There is one unit reported for which we have not completed our analysis and we know of six unreported units sold during these periods which we will cover in a subsequent administrative review. The Treasury Department reviewed all entries made prior to September 26, 1975.

Analysis of Comments Received

Interested parties were invited to comment on the preliminary results. The petitioner, Westinghouse Electric Corp. ("Westinghouse"), and the respondents, Fuji, Hitachi, and Toshiba, requested a hearing which was held on February 1 and 2, 1982. Comments 1 through 13 are general comments on issues that are applicable to two or more of the firms. The remaining comments are on technical issues pertaining to particular sales covered in this review.

(1) *Comment:* Westinghouse argues that Hitachi did not report its U.S. sales

of shunt reactors, one category of transformers covered by the finding. Westinghouse argues that the Department previously ruled that shunt reactors are within the scope of the finding and that we should not allow the respondents to argue further that such units should not be included. Hitachi's failure to provide appropriate data in a timely manner should result in assessment using the best information available.

Department's Position: We consider this finding to include all transformers rated at 10,000 KVA or above. Shunt reactors, autotransformers, rectifier transformers, and power rectifier transformers are examples of equipment included in the scope of the finding.

The Department did not cover Hitachi's shunt reactors in the current review because, with the Department's permission, Hitachi provided data on equivalent home market units late in the review. Hitachi's shunt reactors will be considered in a subsequent review.

(2) *Comment:* Westinghouse argues that Fuji did not report its U.S. sales of rectifier transformers, another category of transformers covered by the finding. It contends that the previous Treasury Department ruling that rectifier-transformer units are not within the scope of the finding does not apply to the type of rectifier transformer manufactured by Fuji, known as a close coupled S-Former. Westinghouse claims that the Treasury ruling is limited to excluding a transformer which is truly integrated with the rectifier component in such a manner that it becomes a single, direct coupled, integrated product, while the close coupled S-Former consists of a rectifier and transformer manufactured separately, not physically integrated as a single component, and only joined together by a short cable.

Fuji contends that the Treasury decision to exclude rectifier-transformer units does not distinguish between the close coupled S-Former and the direct coupled units. Further, Fuji points out that, based on the Treasury decision, its close coupled S-Former have been previously imported and liquidated as not within the scope of the finding.

Department's Position: Merchandise referred to as "rectiformers", such as the direct coupled S-Former, is not within the scope of the finding. These units, which contain both rectifier and transformer functions, have such a degree of manufactured integration that the Department considers them one inseparable amalgam. We maintain that the 1978 Treasury decision only pertains to rectiformers that have achieved that degree of manufactured integration.

We believe that Customs field offices may have misinterpreted the 1978 Treasury decision and liquidated entries of close coupled S-Former units without regard to the antidumping finding.

Units such as the close coupled S-Former do not meet the Department's benchmark of manufactured integration.

We consider individual elements in the 1978 decision, such as the absence of separate pricing, to be persuasive but not dispositive factors in determining whether or not certain merchandise is covered by this finding. All of the elements of the 1978 decision, including the benchmark of manufactured integration, must be met.

As a general rule we will not base a scope decision for a finding solely on the presence or absence of separate pricing. To do so could result in merchandise being excluded from the scope based merely on a self-serving unitary pricing practice by a respondent.

The Department will provide respondents with an opportunity to furnish separate pricing data. If respondents fail to provide data which the Department considers acceptable, the Department will use the best information otherwise available to determine the appropriate U.S. price and/or foreign market value.

(3) *Comment:* Westinghouse proposed the following method for the Department's selection in future reviews of the most similar home market transformer for comparison to each U.S. unit:

1. A respondent would furnish to the Department a list of all home market sales during a period of review, with the following non-confidential technical information on each unit:

a. KVA rating
b. Voltages/Basic impulse level
c. Frequency
d. Phase
e. Type of cooling
f. Type/Number of windings
g. Type of tap changer
h. Impedance
i. Losses

2. The Department would furnish the complete home market sales listing to other interested parties for comment.

3. After review of comments from any interested party, the Department would select the three home market sales which it deems most similar, in terms of physical and technical characteristics, to the U.S. unit in question.

4. The respondent would then submit to the Department detailed specifications for each of the three selected sales, along with any unusual circumstance-of-sale information. The resondent would furnish non-confidential versions to other interested parties.

5. All interested parties would then be permitted to propose the most suitable sale for comparison with each U.S. sale.

6. The Department would then select from the three units the home market sale it deems most similar to the U.S. sale and verify the data for that sale.

Department's Position: The Department has already adopted this proposal for the next review, with two exceptions. The Department will consider possible adjustments to the foreign market value for differences in circumstances of sale only after selection of the most similar home market unit and will verify when necessary.

(4) *Comment:* Westinghouse argues that, since contractual practices in Japanese transformer sales may differ substantially from those in U.S. sales, the Department should define the date of sale in the home market as the date upon which both parties agree in writing to supply a transformer. Westinghouse asserts that this home market letter of intent date is equivalent to the U.S. formal contract date, and that use of the date of agreement to manufacture a home market unit will permit price-to-price comparisons of contemporaneously produced transformers. On the other hand, Hitachi contends we should use the home market formal contract date as the date of sale, since the letter of intent contains only an estimate of cost that does not set a specific price.

Department's Position: The Department agrees with Westinghouse that in this case the date of such a letter of intent is the date of sale in the home market since the manufacturer begins production on the basis of such a letter. While normally we use for date of sale the date when the final price is set, our emphasis upon parallel production periods for price comparison purposes is justified here because of the uniqueness of the product.

(5) *Comment:* Hitachi argues that for comparison purposes the Department should never use home market sales which post-date the U.S. sale. Only those which are contemporaneous with or pre-date the U.S. sale date should be considered. Westinghouse argues that the Department must select the most comparable home market unit sold within a reasonable period of time, regardless of whether the home market sale date occurs before or after the U.S. sale date.

Department's Position: The Department disagrees with Hitachi's argument because, as a general principle

of contemporaniety, the Department does use later home market sales, and because of the uniqueness of the product. Here we are unusually concerned with selecting a model for comparison that is technically most similar to the U.S. model. Where there was a time gap between production of the home market unit and the U.S. unit that resulted in a significant escalation in costs for the later unit produced, we have made adjustments based on the Bank of Japan Wholesale Price Index (see Comment 30).

(6) *Comment:* Alsthom-Atlantique, S.A. ("Alsthom"), a French producer of large power transformers, contests the Department's use of the Westinghouse Price List ("Westinghouse List"). Alsthom argues that price lists, such as the Westinghouse List, have no lawful function in the appraisement of this merchandise. It contends that, where wide physical differences exist between home market and U.S. transformers, the statute provides for the use of constructed value, and that no basis exists for the Department to stray from the statute and its regulations.

Department's Position: We have determined that the merchandise being compared is "such or similar" merchandise within the meaning of the Act. However, due to the complexity of large transformer design, and the fact that each transformer is individually designed to the specifications of individual customers, it is necesary for the Department to establish a reasonable, uniform methodology by which differences in physical characteristics of the transformers being compared can quantified. To the extent possible, the Department has quantified differences in physical characteristics of the compared models pricing the components of the models using the Westinghouse List, routinely used as standard manual in the industry for determination and analysis of transformer pricing. The Department uses the Westinghouse List, where appropriate, to derive a theoretical price for each of the compared models. While the Westinghouse List does not account for every possible difference in merchandise and other adjustments are computed as appropriate, the parties to this proceeding agree that this methodology is reasonable to arrive at a foreign market value adjusted for differences in merchandise. It is the Department's position that we are acting in accord with the statute and regulations in this proceeding. However, we recognize that the methodology applied here is, as necessitated by circumstances, peculiar to these proceedings and will not necessarily be applied in other proceedings.

(7) *Comment:* In the preliminary results we proposed to change the basis of calculation for quantification of physical differences in merchandise from the 1968 to the 1975 Westinghouse List. Hitachi Ltd. had no objections, provided that the 1975 List be used prospectively and with sufficient notice to permit use of the newer list in preparing its bids.

Department's Position: The Department is deferring a decision on whether to shift to the 1975 Westinghouse List.

(8) *Comment:* The three respondents argue that the Department should allow an adjustment to the foreign market value for the expense of lifetime warranties. They contend that, though the Westinghouse List has no provisions for comparable extended warranties, such warranties are a common business practice in Japan. The respondents argue that their claims for 5 percent adjustments are reasonable, considering the petitioner's practice, described in the Westinghouse List, of charging 1 percent for extending its normal one-year warranty for an additional year. Westinghouse argues that the home market lifetime warranty is not a contractual obligation, and that Westinghouse and other manufacturers incur post-warranty expenses voluntarily to maintain good customer relations.

Department's Position: There is a difference in warranty coverage between the two markets; this is not a difference in physical characteristics that can be adjusted for under the Westinghouse List. The respondents adequately demonstrated that they furnished extended warranty coverage for a number of home market sales and that they did not furnish such coverage on their U.S. sales. The Department usually bases such an adjustment on actual quantifiable cost differences between warranty expenses incurred in each market. In the instant case, although the amount of the warranty adjustment cannot be quantified precisely, there is overwhelming qualitative evidence that warranty coverage is greater in the home market and that this difference in coverage has an effect on the home market price. Therefore, we maintain that the claimed adjustment of 5 percent for a lifetime home market warranty is reasonable in light of Westinghouse's own policy and the respondents' experiences.

(9) *Comment:* Hitachi and Toshiba argue that the Department improperly denied their claimed adjustments for one of two series of technical tests. Hitachi contends the first series (factory tests) is performed for the engineering staff of the producer, and the second series (witness tests) is performed several weeks later for the customer. Hitachi and Toshiba argue that performing both sets of test involve an elaborate and costly procedure. Both sets represent expenses necessarily incurred in home market sales and adjustment is warranted for this difference in selling expenses. Westinghouse argues that the initial testing is undertaken for the manufacturer's own benefit prior to the acceptance test. The double set of tests is at the manufacturer's option and not contractually required.

Department's Position: While we acknowledge a difference in testing procedures, we see no basis for an adjustment for the first series of test since that series is analogous to normal quality control. We are allowing adjustment for one series of tests.

(10) *Comment:* Westinghouse argues that the 5 percent adjustment to foreign market value for an earthquake (seismic) reinforcement expense claimed by Hitachi and Fuji is unwarranted. Westinghouse believes that Toshiba's approach of adjusting for limited actual cost of additional seismic reinforcement, an addition to the price amounting to less than 1 percent, is warranted.

Hatachi and Fuji contend that this adjustment is justified because of the stringent level for seismic shock resistance during actual operation specified for a home market transformer. Further, the respondents argue that the amount of this adjustment should be computed based on the ex-factory price of the home market transformer, not on the basis of the Westinghouse List "base price."

Department's Position: Although there is a difference of opinion between U.S. and Japanese engineers as to what special features are needed for earthquake resistance, the special features actually furnished have been documented, and an adjustment of 5 percent for the additional costs of the provisions furnished is appropriate. Since the Westinghouse List is used to quantify differences in the merchandise sold in both markets, it is appropriate to calculate this adjustment as a percentage of the Westinghouse List price, rather than as percentage of the ex-factory price.

(11) *Comment:* Westinghouse argues that two changes to the Department's calculation concerning the sound level of the customer B transformer sold by Toshiba are required. The second of the

changes also pertains to Hitachi's home market customer A unit. First, following Westinghouse List Rule 25, the standard sound level for the customer B transformer is 89 decibels, not 91 decibels as used by the Department. Accordingly, a 21 percent addition, rather that the 23 percent used by the Department, is warranted. Second, to the extent that part of the sound reduction was accomplished as part of the installation work at the site, the cost of that portion of the sound reduction would be included in the already-deducted installation costs. Westinghouse suggests that only the amount of sound level reduction achieved through work done at the factory should be used in applying Rule 25.

Toshiba claims that Westinghouse's first assertion is based on an incorrect use of Rule 25 in calculating the decibel level of the two-winding KVA equivalent to the three winding customer B unit and that, in accord with footnote 2 of Rule 25, the standard sound level for the two-winding KVA equivalent is 91 decibels. Toshiba concurs with Westinghouse's suggestion concerning its second argument, since the Department verified that the full specified sound reduction was achieved at the factory. Hitachi also states that all of its claimed audio suppression was accomplished at the factory.

Department's Position: We agree with Westinghouse that a proper reading of Westinghouse List Rule 25 calls for a standard sound level of 89 decibels. Accordingly, we have made a 21 percent adjustment. The Department used the audio level achieved at the plant as the basis for the adjustment for both Toshiba and Hitachi home market sales.

(12) *Comment:* In the preliminary results, the Department made no adjustment for credit differences for Fuji or Hitachi. Westinghouse argues that the Department should make an upward adjustment of home market prices for differing credit terms for Fuji and Hitachi units based on data verified by the Department. Westinghouse alleges that the verification materials, in conflict with the responses, suggest that some pre-shipping payment arrangement was involved in the home market sales. Fuji and Hitachi contend that there was no partial or complete payment prior to shipment and that their claimed downward adjustments already reflected offsets for credit costs on the U.S. sales.

Department's Position: The Department has checked actual payment dates for both markets for all sales and has found that for Fuji and Hitachi there was in no instance any prepayment. We also examined the claimed downward adjustments and are satisfied that the adjustments are warranted.

(13) *Comment:* The three respondents argue that the Department erred in applying the 5 percent sea packing rule in the Westinghouse List, since the Department had already made the normal packing adjustment.

Department's Position: The Department agrees and has recalculated its results to adjust only for the normal packing cost differences.

Toshiba Sale to Bonneville Power Authority ("BPA")

Westinghouse's Comments

(14) *Comment:* The Toshiba home market sales to Chubu EPA and Kansai EPC are technically more similar units for comparison than the customer B transformer selected by the Department for comparison with the two BPA units. However, Westinghouse accepts the Department's selection if we make the following changes: (1) the customer B unit must be priced using a 1550 BIL (basic impulse level) rather than a 1675 BIL, and (2) the unusually large circumstance-of-sale adjustment for the inland transportation and installation costs of the customer B transformer must be properly accounted for by deducting from the home market price *only the cost* to Toshiba subsidiaries of performing the transportation and installation.

Department's Position: We do not agree that the two home market transformers claimed by Westinghouse are more similar to the BPA units, since the units cited by Westinghouse are equipped with load voltage regulators rather than the load tap changers used in the BPA and customer B units. The unusual nature and amount of the inland transportation and installation expenses incurred in the customer B sale does not affect the nature or extent of physical and technical similarity between the customer B and BPA transformers.

We have modified our deduction for inland freight and installation costs to reflect only the actual cost incurred by Toshiba subsidiaries (see Comment 17). Further, we have used 1550 BIL for the customer B unit (see Comment 15).

(15) *Comment:* In calculating the transformer "base price," the Department should use the nominal BIL of the high voltage winding ordered and tested; that is, 1300 KV for the BPA units and 1550 KV for the customer B unit. Westinghouse argues that the Department's use of a 1675 KV BIL for the home market unit, based on Toshiba's claim that this transformer was required to meet a special 750 KV low-frequency test to ground (LFTG), which is standard for a 1675 KV BIL unit, is unjustified. Westinghouse asserts that the BIL level is internationally recognized as a fundamental criterion for pricing large power transformers, and that designing a transformer for a higher than standard LFTG level is not nearly as costly as designing for a higher BIL. If the Department persists in recognizing the higher BIL on the home market transformer, Westinghouse claims we must also use a higher BIL on the U.S. units, since a higher LFTG was also specified for them.

Conversely, Toshiba argues that the BIL and LFTG tests are closely interrelated and both must be considered in pricing a transformer. Toshiba argues that the LFTG for the customer B transformer was the critical test, and, therefore, that unit must be rated under the Westinghouse List at the higher BIL of 1675 KV, even though the specification did not require the transformer to be tested at the higher BIL. Toshiba argues that the LFTG test required a design with increased insulation thickness and increased distance between the windings and the surrounding components, enlarging the entire transformer, and resulting in a major expense. Toshiba further argues that the special LFTG specified for the U.S. sale was less stringent than the LFTG test on the customer B transformer. As a result, the U.S. units should not receive the higher BIL rating suggested by Westinghouse.

Department Position: The Department has reduced the BIL for the Toshiba home market transformer to 1550 KV and recalculated the price. Customer B required a BIL 1550 KV and the Westinghouse List clearly requires pricing to be based on the BIL of the high voltage winding when the BIL is specified. Accordingly, the Department will not modify the fundamental comparison procedure of the Westinghouse List to account for higher than normal low-frequency test to ground specifications.

(16) *Comment:* The tertiary winding BIL for the home market unit, which was specified and tested at 350 KV, warrants a 7 percent adjustment rather than the 16 percent adjustment (for 650 KV) selected by the Department. Toshiba claims that the 16 percent adjustment is warranted, since the tertiary winding in this core type transformer is located very close to the core, and, therefore, the higher voltage in the winding must be moved farther from the core. This in turn requires the entire transformer to be enlarged to meet a 650 KV tertiary

winding test. Conversely, Westinghouse argues that the higher voltage can be handled easily and routinely. The manufacturer can design the transformer to avoid the higher voltage and the 7 percent allowance from the Westinghouse List is clearly appropriate.

Department's Position: The determination of the appropriate BIL should be based on the insulation thickness and clearances actually provided. Absent documentation from Toshiba that the tertiary winding was actually insulated for a BIL of 650 KV, there is no basis for increasing the BIL above the specified value of 350 KV.

(17) *Comment:* The transportation and installation adjustments for Toshiba's customer B unit must be based upon the actual cost incurred by Toshiba's subsidiaries, and not upon the price paid by Toshiba to the subsidiaries. Toshiba argues that, because the functions performed by the subsidiaries would have been more costly if performed completely by unrelated firms, the claimed adjustment is reasonable.

Department's Position: We agree with Westinghouse. Even if the subsidiaries perform the functions themselves, we do not find it appropriate to adjust for a subsidiary's overhead expenses or profit.

(18) *Comment:* It is inappropriate to allow the 5 percent adjustment for the Schnabel tank configuration on the customer B transformer, since the cost of a standard-design tank is already encompassed in the Westinghouse List. While Toshiba agrees that the 5 percent adjustment should not be made, it argues that we should allow some adjustment for the added expense of the special construction of the Schnabel tank.

Department's Position: The Department agrees with Westinghouse and Toshiba that the 5 percent adjustment is not appropriate. However, the Schnabel tank design costs a great deal more to make than the standard-design tank designated in the Westinghouse List. Toshiba furnished satisfactory evidence of the differences in the costs of production for the home market unit incurred through the special steel used and the additional fabrication expenses. Accordingly, we made an adjustment for these additional expenses.

(19) *Comment:* The commission paid by Toshiba to Mitsui, which is an expense that must be deducted from the U.S. price calculation, is not a selling commission. Therefore, indirect selling expenses in the home market cannot be used to offset this U.S. expense. Even if the Mitsui payment were a selling commission, as was the payment to the Electric Transmission Company, neither should be offset, because Toshiba did not provide a sufficiently disaggregated explanation of the expenses included in the proposed offset.

Department's Position: Toshiba sold this transformer to BPA through Mitsui, because Mitsui possessed the licenses necessary to consummate this sale. Therefore, this was a necessary selling expense for Toshiba if the sale was to be completed. We disagree with Westinghouse with regard to disaggregation. We consider it appropriate to base our offset on the indirect selling expenses of Toshiba's Heavy Apparatus Group. We believe that, if the selling expenses of Toshiba are not broken down to a lower accounting unit than the Heavy Apparatus Group and if this is in accordance with the generally accepted accounting principles in Japan, this accounting unit can form the initial basis for allocation of indirect selling expenses. We verified these expenses.

Toshiba's Comments

(20) *Comment:* The Department erred in deducting the engineering service installation expense from the price of the U.S. transformer, since the cost of that additional service was not included in the basic contract amount.

Department's Position: We agree and have adjusted our calculations accordingly.

(21) *Comment:* The Department's adjustment for an efficiency factor is unfair, since none of the parties to the proceeding had prior knowledge of the possibility of such an adjustment. Toshiba argues that, since the Westinghouse List does not include an adjustment for efficiency, Toshiba had no opportunity to consider the factor when pricing the transformers for sale in either market. Toshiba claims a 1971 Westinghouse letter on the subject indicated that the efficiency factor should not be applied in this proceeding, that it was never contemplated, and that it would not be necessary or appropriate. If the Department does determine that an efficiency adjustment is appropriate, Toshiba maintains it was incorrectly applied, in that the installation adjustment (see Comment 17) should be deducted from the efficiency adjustment.

Department's Position: The Department maintains that the efficiency factor is a common measure within the industry for evaluating transformers, and that appropriate adjustments for that factor should be made. A U.S. Customs Service letter to the three Japanese respondents in February 1971 first raised the prospect of efficiency adjustments. The Department agrees with Toshiba that the installation costs should not be considered in calculating the efficiency adjustment.

(22) *Comment:* The Department failed to make appropriate adjustments for differences in painting, accessories, and bushing components included in the home market transformer.

Department's Position: We agree and we have made appropriate recalculations.

(23) *Comment:* The Department should use Toshiba's actual verified cost of marine insurance rather than the amount shown on Customs entry documents.

Department's Position: We agree and have made the adjustment based on the actual marine insurance premium charged.

Certain other issues concerning the BPA sale by Toshiba were raised after publication of the preliminary results, concerning load tap changers, long bushings, tertiary current transformers, the BIL of winding, and certain mathematical errors. With the agreement on the issues by both parties, the Department has adjusted its calculations accordingly.

Fuji Sales to Dow Chemical Corporation

Westinghouse's Comments

(24) *Comment:* Two units sold in the home market by Fuji, the Hokoriku and one Kawasaki transformer, are more similar for comparison with the two Dow Chemical transformers than the customer A unit selected by the Department.

Department's Position: The Department resolved the confusion among the parties about the Kawasaki Steel transformers after receiving the posthearing briefs. The customer A unit is in fact the Kawasaki Steel transformer sold in July 1976 and recommended by Westinghouse for comparison purposes.

(25) *Comment:* Rule 3 of the Westinghouse List requires a multiplier (to the basic pricing KVA) of 1.18 for the 32 degrees centigrade maximum cooling water specified by Dow Chemical rather than the 1.08 factor used by the Department. Westinghouse contends that Fuji's argument for a 1.08 multiplier, based on an average water temperature derived from an American National Standards Institute (ANSI) standard, is incorrect since this ANSI standard is not a rule and, further, average cooling water temperature cannot be deduced from the maximum temperature.

Fuji claims that Westinghouse incorrectly uses a maximum temperature specification in a chart in the Westinghouse List which references average temperatures.

Department's Position: The Westinghouse List assigns a heating multiplier corresponding to the specific temperature rise or ambient temperature listed. The Dow specification calls for a 32 degrees maximum temperature. Without further clarification, a transformer manufacturer would have to design for 32 degrees centigrade as the average temperature. Inasmuch as the Westinghouse List shows a multiplier of 1.18 for an average water temperature of 31 degrees to 35 degrees centigrade, the Department has used the 1.18 multiplier.

(26) *Comment:* The transformers sold to Dow Chemcial require copper-nickel tubing for the heat exchangers and this extra cost should be taken into account. Based on an estimate obtained from an outside supplier in the U.S. at the time Westinghouse bid on this sale, Westinghouse argues that a $5000 cost premium over the standard tubing is appropriate. Fuji argues that, if an adjustment is appropriate, the Westinghouse quotation is not reasonable. Fuji claims the actual difference was $450.

Department's Position: The Department recognizes that the extra tubing constitutes a difference in the merchandise not accountable for under the Westinghouse List. We recalculated the results using the actual cost difference realized by Fuji.

Hitachi Sale to City of Seattle

Westinghouse's Comments

(27) *Comment:* The Department's calculations overstate the comparative price for the Hitachi home market unit by basing the unit price on a self-cooled (OA) design, rated at 150 MVA, which does not require oil pumps or fans. While the customer A unit does not have a fan it uses oil pumps which increase the equivalent rating by 33 percent. Accordingly, Westinghouse argues that, based on the Westinghouse List, the customer A list price should be computed as a transformer rated at 112.5 MVA with OA cooling, plus 5 percent for supplemental cooling.

On the other hand, Hitachi points out that the transformer does not use any cooling fans. Hitachi designed this transformer with the radiator mounted above the transformer tank because of space constraints, and the higher elevation inhibits the natural oil circulation necessary for OA cooling. Hitachi argues that there is only a *de minimis* difference in efficiency between OA type cooling and the customer A unit cooling.

Department's Position: Because of the physical arrangement of the cooling system, the apparent lack of self-cooling, and the inefficient heat exchange without the use of radiator fans, the Department has priced this transformer as a 150 MVA rated OA transformer. We believe the cost of the oil pumps and the remote location of the radiator will approximately compensate for the small reduction in the size of the core and coils for the forced oil cooling.

(28) *Comment:* The Department should not allow an adjustment for Hitachi's claimed shorter manufacturing and delivery period for the sale to customer A. Further, the 35 percent labor rate used as an adjustment factor by Hitachi is unrealistically high.

Department's Position: The Department does not consider this type of adjustment appropriate without corroborating information in the contract provisions and detailed analysis demonstrating the cost difference between the actual manufacturing time for this sale and the "normal" manufacturing period. Since contracts and supporting documents provided at the verification do not indicate that Hitachi incurred any additional costs for the shorter manufacturing period associated with this sale, the Department has disallowed the claimed adjustment.

(29) *Comment:* The invoice amount of the Hitachi transformers sold to the City of Seattle was $5,000 lower than the amount used by the Department as the starting point for the U.S. price calculation.

Department's Position: The Department agrees that the verified costs from the original contract did not reflect a subsequent change that deleted a $5,000 freight charge. We have adjusted our calculations using the invoice amount.

Hitachi's Comments

(30) *Comment:* The Department should use the Bank of Japan Wholesale Price Index ("price index") for transformers rather than the Japanese Statistical Yearbook as the basis for adjusting home market prices for inflation. Further, the adjustment should be applied only when the contract dates are more than one year apart. Westinghouse contends the inflation adjustment should be based on the increase in raw materials' costs to the Japanese manufacturers rather than the finished product prices. If the price index is used, the Department should determine whether export prices are included in the price index, and determine the physical characteristics of the transformers in the index.

Department's Position: Because of the unique nature of the merchandise (i.e., large unit values for individual transformers and the paucity of sales), the Department chose to expand its period for determining contemporaneous sales. In order to compensate for this expansion, we consider an adjustment for inflation to be appropriate. Our adjustment for inflation is based on price factors, not cost.

Whereas the Japanese Statistical Yearbook index is more general, being for all electrical machinery, the price index is more specific, being only for transformers and is, therefore, a better gauge of how inflation affected transformer prices. Therefore, the Department has adopted the price index and we have adjusted our calculations accordingly. The price index does exclude export prices and identifies transformers by their MVA.

(31) *Comment:* The Department incorrectly applied the Westinghouse List Rule 21 on the tertiary winding percent adjustment for the City of Seattle transformers. Hitachi argues that we should have selected the 0 percent adjustment from the primary table in the rule, rather than the 12 percent adjustment from the supplementary table. The Rule 21 footnote correlates 110 KV BIL with 11–15.75 KV voltage listed in the primary table and, since the 110 KV BIL is clearly referenced, the primary table adjustment is the appropriate one to use.

Department's Position: The Westinghouse List Rule 21 footnote indicates that the 11 KV winding voltage range is normally used with the 110 KV BIL listed in the primary table, and that the supplementary table is applicable only when a lower than normal voltage range is used. The City of Seattle transformers' tertiary winding of 2.5 KV has a lower than normal voltage and is so identified in the supplementary table. Accordingly, we maintain that the selected 12 percent adjustment is correct.

(32) *Comment:* The Department's use of the Westinghouse List rule 2C–A for the tertiary winding price for the City of Seattle transformers was incorrect. Hitachi argues that we should have used Rule 2C–B since the transformers have a continuous rating of only 0.05 percent of the primary winding, not 35 percent, as Rule 2C–A requires.

Department's Position: The 75,000 KVA name plate specifies the tertiary capacity for stabilization rating as 26,250 KVA (35 percent of the largest winding) and an auxiliary power

continuous rating of 35 KVA (0.047 percent of the largest winding). The tertiary stabilization winding requires more expensive conductors in order to protect the system under fault conditions. The Westinghouse List Rule 2C–A does not apply only when the winding (for pricing purposes) is less than 35 percent of the KVA of the largest winding. Accordingly, we maintain that the pricing from the Westinghouse List Rule 2C–A is appropriate.

Hitachi Sale to New Jersey Department of Transportation

Westinghouse's Comments

(33) *Comment:* The Department's comparison of the home market customer B unit to the unit sold to the New Jersey Department of Transportation ("NJ DOT") is appropriate only if proper calculations of the impedance on the U.S. sale are made and if the Department receives full information on the contract terms on the NJ DOT sale.

Department's Position: We agree and have recalculated the impedance on the NJ DOT units (See Comment 34). Further, we received full information on the contract terms.

(34) *Comment:* The adjustment of 23 percent derived from the Westinghouse List Rule 12 table B for a special impedance on the NJ DOT unit is too low and requires further extrapolation from the Westinghouse List table. The correct adjustment is 29 percent.

Hitachi objects to the extrapolation methodology urged by Westinghouse because such a huge adjustment based on extrapolation beyond the relevant chart would permit limitless arbitrary action

Department's Position: The Department agrees with Westinghouse that further extrapolation beyond the range of the chart is required since the special impedance specified involved a substantial cost. We have made the extrapolation and used 29 percent.

(35) *Comment:* Westinghouse requests that the Department confirm the deduction of a $12,000 penalty for the late delivery of the unit sold to the NJ DOT. Westinghouse agrees with such an adjustment.

Department's Position: We deducted the $12,000 penalty for late delivery.

Final Results of the Review

Based on our analysis of the comments received, we have made corrections for certain errors and adjusted the margins for two of the three firms:

Manufacturer	Period	Margin (percent)
Fuji Electric Co., Ltd	September 26, 1975–June 1980.	0
Hitachi, Ltd.	October 1979–June 1980.	10.63
Tokyo Shibaura Electric Co., Ltd.	September 12, 1977–June 1980.	8.66

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries made with purchases dates during the time periods involved.

Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each firm directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margins shall be required on all shipments of Japanese large power transformers from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. For any shipment from a new exporter not covered in this review, whose first shipments occurred after the most recent period reviewed and who is unrelated to any reviewed firm, a cash deposit of 10.63 percent shall be required for future entries. These deposit requirements shall remain in effect until publication of the final results of the next administrative review. The Department intends to conduct the next administrative review immediately after publication of this notice.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

David K. Diebold,

Acting Deputy (for Policy) to the Deputy Assistant Secretary for Import Administration.

June 2, 1983.

Printed Vinyl Film From Argentina; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Antidumping Finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on printed vinyl film from Argentina. The review covers the only known manufacturer and/or exporter of this merchandise to the United States, Plavinil Argentina S.A.I.C., and the period August 1, 1981 through July 31, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

As a result of the review, the Department has preliminarily determined not to require a cash deposit of estimated antidumping duties on future entries. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Michael R. Cox or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–3003/5496.

SUPPLEMENTARY INFORMATION:

Background

On January 15, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 2390) the final results of its last administrative review of the antidumping finding on printed vinyl film from Argentina (38 FR 22794, August 24, 1973) and announced its intent to conduct the next administrative review by the end of August 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of printed vinyl film, also known as printed polyvinyl chloride sheeting, currently classifiable under item 771.4312 of the Tariff Schedules of the United States Annotated.

The review covers the one known manufacturer and/or exporter of Argentinean printed vinyl film to the United States, Plavinil Argentina S.A.I.C., and the period August 1, 1981 through July 31, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

Preliminary Results of the Review

Since there have been no shipments of Argentinean printed vinyl film to the United States for over nine years, we preliminarily determine not to require a cash deposit of estimated antidumping duties, as provided for in § 353.48(b) of the Commerce Regulations, on any shipments of Argentinean printed vinyl film entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This deposit requirement shall remain in effect until publication of the fina results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Printed Vinyl Film From Brazil; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Antidumping Finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on printed vinyl film from Brazil. The review covers the two known manufacturers and/or exporters of this merchandise to the United States and the period August 1, 1981 through July 31, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

As a result of the review, the Department has preliminarily determined to require cash deposits of estimated antidumping duties on future entries equal to the margins calculated on the last known shipments. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Michael R. Cox or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 377-3003/5496.

SUPPLEMENTARY INFORMATION:

Background

On January 15, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 2391) the final results of its last administrative review of the antidumping finding on printed vinyl film from Brazil (38 FR 22794, August 24, 1973) and announced its intent to conduct the next administrative review by the end of August 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has not conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of printed vinyl film, also known as printed polyvinyl chloride sheeting, currently classifiable under item 771.4312 of the Tariff Schedules of the United States Annotated.

The review covers the two known manufacturers and/or exporters of Brazilian printed vinyl film to the United States and the period August 1, 1981 through July 31, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties of 52 percent and zero percent of the entered value shall be required on all shipments of Brazilian printed vinyl from Plasticos Plavinil, S.A. and Vulcan Material Plastico, S.A., respectively, entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. For any shipment from a new exporter not covered in this or prior reviews, whose first shipments occurred after July 31, 1982, and who is unrelated to any covered firm, a cash deposit of 52 percent shall be required on future entries. These deposits requirements shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Synthetic Methionine From Japan; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Antidumping Finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on synthetic methionine from Japan. The review covers the 30 known manufacturers, exporters, and third-country resellers of this merchandise to the United States and the period July 1, 1981 through June 30, 1982. The review indicates the existence of dumping margins for one firm during the period.

As a result of the review, the Department has preliminarily determined to assess dumping duties equal to the calculated differences between United States price and foreign market value on each shipment during the period of review. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Patricia McClenahan or Robert Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On May 6, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 20465–66) the final results of its last administrative review of the antidumping finding on synthetic methionine from Japan (38 FR 18392, July 10, 1973) and announced its intent to begin immediately the next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of synthetic methionine, other than synthetic L methionine. Synthetic methionine is an amino acid produced in two grades, DL methionine national formula grade (used for research and pharmaceutical purposes), and DL methionine feed grade (used as a feed addititive). Both grades of synthetic methionine are currently classifiable under item 425.0420 of the Tariff Schedules of the United States Annotated.

The review covers the 30 known manufacturers, exporters, and third-country resellers of Japanese synthetic DL methionine to the United States and the period July 1, 1981 through June 30, 1982.

Twenty-nine firms did not export synthetic methionine to the United States during the period of review. The estimated antidumping duty cash deposit rate for those firms shall be the most recent rate for each firm. One firm, Ajinomoto Co., Ltd., failed to respond to our questionnaire. For this non-responsive firm we will use the best information available for assessment and estimated antidumping duty cash deposit purposes. The best information available is the fair value rate.

Preliminary Results of Review

As a result of our review, we preliminarily determine that the following margins exist for the period July 1, 1981 through June 30, 1982:

Manufacturer/exporter	Margin (percent)
Ajinomoto Co. Ltd	[illegible]
Alps Pharmaceutical Co	[1] 22.54
Amano Pharmaceutical Co	[illegible]
Chugai Boyeki Co	[1] 0
Daito Bussan Co	[1] 0
Heim Japan, Ltd	[2] 11.14
Inuiu Yakuhin Kogyo	[1] 0
Isho Corporation	[illegible]
Iwaki & Co	[1] 1.69
Koyo Mercantile Co., Ltd	[1] 0
Kyowa Hakko Kogyo Co	[1] 29.10
Maruberni Corp	[1] 48
Nippon Kayaku	[1] 48
Nippon Soda Co., Ltd./Mitsui & Co	[1] 8.83
K. Sakai & Co., Ltd	[1] 0
Sumitomo Chemical	[1] 0
Third-Country Resellers (Country)	
Atlantic Trading Co. (Canada)	[1] 0
H. J. Baker & Brothers (W. Germany)	[1] 0
Chemical & Feeds Ltd. (United Kingdom)	[1] 48
Chemo Dondorff (W. Germany)	[illegible]
Deutsch-Norwegische GmbH (W. Germany)	[1] 22.53
Fortamix Chemicals (Canada)	[1] 21.66
Karl O. Helm (W. Germany)	[1] 2.86
Hoffman LaRoche (Canada)	[1] 0
Instal Corp. (France)	[1] 6.25
Mitsui & Co. (Belgium)	[1] 0
Mitsui & Co. (United Kingdom)	[1] 0
Nutrikem Limited (United Kingdom)	[1] 0
Seimagluss & Sohn (W. Germany)	[illegible]
R. W. Unwin & Co. (United Kingdom)	[1] 0

[1] No shipments during the period.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries with purchase dates during the time period. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margins shall be required on all shipments of Japanese synthetic methionine from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. For any shipment from a new exporter not covered in this or prior reviews, whose first shipments occurred after June 30, 1982, and who is unrelated to any reviewed firm, a cash deposit of 29.10 percent shall be required for future entries. This is the highest rate for a responding firm with shipments during the most recent period in which shipment occurred. These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This administrative and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

May 24, 1983.

BILLING CODE 3510-25-M

Antidumping; Postponement of Final Determination and Hearing; Carbon Steel Wire Rod From Trinidad and Tobago

AGENCY: International Trade Administration; Department of Commerce.

ACTION: Notice of Postponement of Final Antidumping Determination and Postponement of Hearing: Carbon Steel Wire Rod from Trinidad and Tobago.

SUMMARY: This notice informs the public that the Department of Commerce (the Department) has received a request from the Iron and Steel Company of Trinidad and Tobago (ISCOTT) that the final determination be postponed until not later than 135 days after the date of the preliminary determination, as provided for in section 735(a)(2)(A) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)(2)(A)); and, that the Department has determined to postpone its final determination as to whether sales of carbon steel wire rod from Trinidad and Tobago have occurred at less than fair value, until not later than August 2, 1983.

The hearing originally scheduled for May 20, 1983, at 2:00 p.m., in Conference Room D has been postponed. The new hearing date is June 23, 1983, at 2:00 p.m., in Conference Room 3092. The prehearing briefs will be due on June 15, 1983.

ISCOTT is qualified to make this request since it is the exporter who accounts for one hundered percent of the merchandise which is the subject of the investigation. We have determined that additional time is necessary to afford ISCOTT the opportunity to assemble factual information to substantiate claimed adjustments which the Department rejected in its preliminary determination.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: John Brinkmann, Jr. or Mary Jenkins, Office of Investigations, Import

Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, Telephone (202) 377–4929 or 4136.

SUPPLEMENTARY INFORMATION: On October 20, 1982, the Department of Commerce published a notice in the **Federal Register** (47 FR 47453) that it was initiating under section 732(b) of the the Act (19 U.S.C. 1673a(b)), an antidumping investigation to determine whether carbon steel wire rod from Trinidad and Tobago is being, or is likely to be, sold at less than fair value. the Department published an affirmative preliminary determination on May 4, 1983 (48 FR 20109). The notice stated that if this investigation proceeded normally we would make a final determination by July 12, 1983. Section 735(a)(2) of the Act provides that the Department of Commerce may postpone its final determination concerning sales at less than fair value if an exporter who accounts for a significant proportion of the merchandise which is the subject of the investigation requests an extension after an affirmative preliminary determination.

Accordingly, the Department will issue a final determination in this case not later than August 2, 1983.

This notice is published pursuant to section 735(d) of the Act.

Dated: June 6, 1983.

David K. Diebold,

Acting Deputy (for Policy) to the Deputy Assistant Secretary for Import Administration.

[FR Doc. 83–15359 Filed 6–7–83; 8:45 am]

BILLING CODE 3510–25–M

Antidumping; Postponement of Final Determination; Portland Hydraulic Cement From Japan

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of Postponement of Final Antidumping Determination: Portland Hydraulic Cement from Japan.

SUMMARY: This notice informs the public that the Department of Commerce has received a request from Nihon Cement Company, Ltd. (Nihon) that the final determination in the antidumping investigation of portland hydraulic cement from Japan be postponed until not later than 135 days after the date of the preliminary determination, as provided for in section 735(a)(2)(A) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)(2)(A)) and in § 353.44(b) of the Department of Commerce Regulations (19 CFR 353.44(b)), and that the Department will postpone its final determination as to whether sales of portland hydraulic cement from Japan have occurred at less than fair value until not later than September 6, 1983.

The request for a hearing originally scheduled for May 25, 1983, was withdrawn. If requested by July 5, 1983, the Department will hold a hearing on July 28, 1983, at 10 a.m. in Room B841. The prehearing briefs will be due on July 21, 1983. All written views should be filed in accordance with 19 CFR 353.46, within 7 days of this hearing date to the Deputy Assistant Secretary for Import Administration in at least 10 copies.

Nihon is qualified to make this request since it is an exporter which accounts for thirty-eight percent of the merchandise subject to this investigation. The additional time is necessary to enable Nihon to prepare a response to additional questions from the Department and for Nihon's recently retained counsel to review the data and information submitted by Nihon to date.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Terry Link, Office of Investigations, Import Administration, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone (202) 377–0189.

SUPPLEMENTARY INFORMATION: On October 19, 1982, the Department of Commerce published a notice in the **Federal Register** (47 FR 46558) that it was initiating under section 732(b) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673a(b)), an antidumping investigation to determine whether portland hydraulic cement from Japan is being, or is likely to be, sold at less than fair value. The Department published an affirmative preliminary determination on April 29, 1983 (48 FR 19447). The notice stated that if this investigation proceeded normally we would make a final determination by July 5, 1983. Section 735(a)(2) of the Act provides that the Department of Commerce may postpone its final determination concerning sales at less than fair value if an exporter who accounts for a significant proportion of the merchandise which is the subject of the investigation requests an extension after an affirmative preliminary determination.

Accordingly, the Department will issue a final determination in this case not later than September 6, 1983.

This notice is published pursuant to sections 735(d) of the Act.

Dated: June 1, 1983.

David K. Diebold,

Acting Deputy (for Policy) to the Deputy Assistant Secretary for Import Administration.

[FR Doc. 83–15360 Filed 6–7–83; 8:45 am]

BILLING CODE 3510–25–M

Antidumping; Postponement of Final Determination; Portland Hydraulic Cement From Australia

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of Postponement of Final Antidumping Determination; Portland Hydraulic Cement from Australia.

SUMMARY: This notice informs the public that the Department of Commerce (the Department) has received a request from Adelaide Brighton Cement, Ltd. (ABC) that the final determination in the antidumping investigation of portland hydraulic cement from Australia be postponed until not later than 135 days after the date of the preliminary determination, as provided for in section 735(a)(2)(A) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)(2)(A)) and in § 353.44(b) of the Department of Commerce Regulations (19 CFR 353.44(b)), and that the Department will postpone its final determination as to whether sales of portland hydraulic cement from Australia have occurred at less than fair value until not later than September 6, 1983.

No request for a hearing was received for the hearing originally scheduled for May 26, 1983. If requested by July 5, 1983, the Department will hold a hearing on July 26, 1983, at 10 a.m. in Room B841. The prehearing briefs will be due on July 19, 1983. All written views should be filed in accordance with 19 CFR 353.46, within 7 days of this hearing date to the Deputy Assistant Secretary for Import Administration in at least 10 copies.

ABC is qualified to make this request since it is an exporter which accounts for one hundred percent of the exports to the United States of the merchandise subject to this investigation. The additional time is necessary to enable ABC to gather additional data in support of level of trade issues raised in this investigation.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: Terry Link, Office of Investigations, Import Administration, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue NW.,

Washington, D.C. 20230; telephone (202) 377–0189.

SUPPLEMENTARY INFORMATION: On October 19, 1982, the Department of Commerce published a notice in the **Federal Register** (47 FR 46557) that it was initiating under section 732(b) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673a(b)), an antidumping investigation to determine whether portland hydraulic cement from Australia is being, or is likely to be, sold at less than fair value. The Department published an affirmative preliminary determination on April 29, 1983 (48 FR 19449). The notice stated that if this investigation proceeded normally we would make a final determination by July 5, 1983. Section 735(a)(2) of the Act provides that the Department of Commerce may postpone its final determination concerning sales at less than fair value if an exporter who accounts for a significant proportion of the merchandise which is the subject of the investigation requests an extension after an affirmative preliminary determination.

Accordingly, the Department will issue a final determination in this case not later than September 6, 1983.

This notice is published pursuant to section 735(d) of the Act.

Dated: June 1, 1983.

David N. Dieborp,

Acting Deputy (for Policy) to the Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–22–M

COMMODITY FUTURES TRADING COMMISSION

Establishment of the Commodity Futures Trading Commission Agricultural Options Advisory Committee

AGENCY: Commodity Futures Trading Commission.

ACTION: Noitice of establishment of advisory committee.

SUMMARY: The Commodity Futures Trading Commission has determined to establish a "Commodity Futures Trading Commission Agricultural Options Advisory Committee." As required by Section 9(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. 1, 9(a)(2) and 41 CFR 101–6.1007, the Commission has consulted with the Committee Management Secretariat of the General Services Administration and the Commission certifies that creation of this advisory committee is necessary and in the public interest in connection with the performance of duties imposed on the Commission by the Commodity Exchange Act ("Act"), 7 U.S.C. 1 et seq., as amended. This notice is published pursuant to Section 9(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I, 9(a)(2) and 41 CFR 101–6.1015.

FOR FURTHER INFORMATION CONTACT: Charles O. Conrad, Commodity Futures Trading Commission, 2033 K street, N.W. Washington, D.C. 20581; (202) 254–7446.

SUPPLEMENTARY INFORMATION: The Trading of options on domestic agricultural commodities has been unlawful since 1936.[1] Recent amendments to the Commodity Exchange Act, however, have modified that prohibition to authorize the Commission to establish a pilot program for such trading.[2]

As a first step in carrying out Congress' intent and determining whether, and, if so, under what conditions, to establish such a pilot program, the Commission published an advance notice of proposed rulemaking in the **Federal Register** to solicit public comments on trading of agricultural options and the structure of a potential agricultural options pilot program. 48 FR 6129 (Feb. 10, 1983). In addition, the Commission solicited the views of producers and other agri-businessmen through a series of informal meetings chaired by Commissioner Kalo A. Hineman held throughout the country during the month of March 1983. The Commission received valuable information from these meetings and in response to its advance notice of proposed rulemaking. As a result of these preliminary communications, the Commission has recognized a continuing and serious need to receive practical advice and policy suggestions from representatives of interested and affected persons during all phases of the development and implementation of any agricultural options programs which the Commission might adopt.

In response to this need, the Commission has determined to establish a "Commodity Futures Trading Commission Agricultural Options Advisory Committee." The objectives and scope of activities of this Committee shall be to conduct public meetings and submit reports and recommendations on policy alternatives and practical considerations involved in the development of an agricultural options pilot program pursuant to Section 4c(c) of the Commodity Exchange Act, 7 U.S.C. 6c(c) as amended, including the following:

(1) The commercial uses of agricultural options,

(2) The merits of options on physicals and options on futures,

(3) The merits of limiting exchange participation to boards of trade currently designated as contract markets for futures contracts which draw on the same deliverable supply as the proposed option,

(4) Methods for limiting the number of options contracts which may be traded,

[1] Commodity Exchage Act of 1936, ch. 545, Section 4c(B), 49 Stat. 1491 (1936) (codified at 7 U.S.C. 6c(B) (Supp. V. 1981)).

[2] Futures Trading Act of 1982, Pub. L. No. 97–444, Section 208(3), 96 Stat. 2294 (1983) (to be codified at 7 U.S.C. 6c(c)).

(5) The merits of prohibiting options trading on any particular domestic agricultural commodities,

(6) Minimum standards for granting options,

(7) Customer protection standards,

(8) The experience under the Commodity Futures Trading Commission's existing options program and its application to agricultural options.

Commissioner Kalo A. Hineman will serve as Chairman and Designated Federal Official of this Advisory Committee. The advisory committee will have as members persons from the following interest groups: representatives of general farm organizations, national commodity organizations, agricultural lenders, farm cooperatives, grain marketing groups and agricultural economists. The Commission believes that there is a special need for the advice and expertise of representatives of these interest groups since the Commission has had no prior experience with agricultural options. The Commission believes that the background and experience which the representatives of these interest groups will provide the Commission is an important prerequisite to developing a beneficial marketing tool for farmers and the agricultural industry and will be of significant importance in considering appropriate regulatory measures to implement the requirements of the Commodity Exchange Act, as amended.

Issued in Washington, D.C. on June 2, 1983, by the Commission.

Jane K. Stuckey,

Secretary to the Commission.

BILLING CODE 6351-01-M

Contract Market Rules; Proposed Disapproval; Chicago Board of Trade; Notice of Hearing and Extensions of Comment Period

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of hearing and extension of comment period.

SUMMARY: On January 25, 1983, the Commodity Futures Trading Commission ("Commission") published in the **Federal Register** a Notice of Proposed Disapproval of Contract Market Rules setting forth proposed grounds for Commission disapproval of proposed Chicago Board of Trade ("CBT") Rules 353 and 354. 48 FR 3395. Proposed Rule 353 would require that any person who executes trades for others on the Exchange be compensated on a per contract basis, and would prohibit compensation on a salaried basis. Proposed Rule 354 would restrict those individuals who do not have a substantial equity interest in a membership to executing trades for their personal accounts only. The comment period, which was to expire March 28, 1983, was extended through April 11, 1983. 48 FR 13477. The Commission has determined to allow the CBT to orally present arguments in favor of Commission approval of CBT Rules 353 and 354 in an open Commission meeting scheduled for June 14, 1983, and to reopen the comment period at that time for a period of two weeks.

DATES: The open Commission meeting will be held June 14, 1983 at 10:00 a.m. The comment period will be reopened on June 15 and will close June 30, 1983.

ADDRESS: The public meeting will be held at the Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581 in the Commission meeting room on the 5th floor. Comments should be submitted to the Secretariat of the Commission at the above address.

FOR FURTHER INFORMATION CONTACT: Karen Matteson, Attorney Advisor, Division of Trading and Markets, at the above address. Telephone: (202) 254-8955.

Issued in Washington, D.C. on June 3, 1983 by the Commission.

Jane K. Stuckey,

Secretary of the Commission.

[FR Doc. 83-15330 Filed 6-7-83; 8:45 am]

BILLING CODE 6351-01-M

Agricultural Options Advisory Committee; Meeting

This is to give notice, pursuant to Section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. I, 10(a) and 41 CFR 101-6.1015(b), that the Commodity Futures Trading Commission's Agricultural Options Advisory Committee will conduct a public meeting in the Fifth Floor Hearing Room at the Commission's Washington, D.C., headquarters located at Room 532, 2033 K Street, NW., Washington, D.C. 20581, on June 23, 1983, beginning at 9:00 a.m. and lasting until 5:00 p.m. The agenda will consist of:

1. Welcoming Remarks by Susan M. Phillips, Acting Chairman, CFTC;
2. Introduction of Committee Members and Discussion of Goals of Committee by Kalo Hineman, Chairman of the Advisory Committee and Commissioner, CFTC;
3. Discussion of Timetable for Implementation of Agricultural Options Pilot Program Regulations;
4. Review of Regulatory Experience with Current (Non-Agricultural) Options Pilot Program;
5. Review and Discussion of Comments in Response to Commission's Initial Request for Public Comment on Agricultural Options Issues. *See* 48 FR 6129 (Feb. 10, 1983).

The purpose of this meeting is to solicit the views of the Committee on the above-listed agenda matters. The Advisory Committee was created by the Commodity Futures Trading Commission for the purpose of receiving advice and recommendations on agricultural options issues. The purposes and objectives of the Advisory Committee are more fully set forth in a notice published elsewhere in today's issue.

The meeting is open to the public. The Chairman of the Advisory Committee, Commissioner Kalo A. Hineman, is empowered to conduct the meeting in a fashion that will, in his judgment, faciliate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Advisory Committee should mail a copy of the statement to the attention of: The Commodity Futures Trading Commission Agricultural Options Advisory Committee c/o Charles O. Conrad, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, before the meeting. Members of the public who wish to make oral statements should also inform Mr. Conrad in writing at the latter address at least three business days before the meeting. Reasonable provision will be made, if time permits for an oral presentation of no more than five minutes each in duration.

Issued by the Commission in Washington, D.C., on June 3, 1983.

Jane K. Stuckey,

Secretary to the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Preparation of Detailed Project Report and DEIS (Draft Environmental Impact Statement) for a Small Boat Harbor in Shotgun Cove near Whittier, Alaska; Notice of Intent.

Agency: U.S. Army Engineer District, Alaska, DOD.

Action: Notice of Intent to Prepare a Detailed Project Report and DEIS.

Summary: 1. Additional facilities are needed to alleviate overcrowded conditions in the Whittier Small Boat Harbor. Expansion of the harbor is not practical as wave heights

and excessive depths seaward of the existing breakwater would make a breakwater cost prohibitive. Sites for a small boat harbor in Shotgun Cove near Whittier, Alaska, will be evaluated to fill this need.

2. Two alternative sites in Shotgun Cove will be considered in detail. Each site would provide approximately 20 acres of protected mooring and maneuvering space. Floating breakwaters constructed of concrete and expanded polystyrene foam units would be used at either site. Site A on the northwestern shore near the mouth of Shotgun Cove would require dredging and disposal of approximately 49,000 cubic yards of material. Site B on the southwestern side of Shotgun Cove near the head of the cove would require dredging and disposal of approximately 55,000 cubic yards of material. A no action alternative also will be considered.

3.a. A Reconnaissance Report was completed in 1979 and agency coordination initiated. Scoping of the DEIS will include continued coordination with interested local, State and Federal agencies and other interested parties. Scoping meetings are not planned at this time. Interested parties are urged to participate actively in the scoping process by submitting their concerns to the Alaska District as soon as possible.

b. Anticipated subjects to be addressed include, but are not limited to: Alternatives, socio-economic impacts, cultural resources, land use, water quality, marine flora and fauna, endangered species, aesthetics, and measures to minimize adverse impacts.

4. The DEIS is expected to be available for public and agency review in September 1984.

Address: Questions about the proposed action and the DEIS can be answered by: William D. Lloyd, Chief, Environmental Resources Section, U.S. Army Engineer District, Alaska, Pouch 898, Anchorage, Alaska 99506.

Dated: May 31, 1983.

Neil E. Seling,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-HL-M

DEPARTMENT OF EDUCATION

College Housing Program; Applications Are Invited for New Projects Under the College Housing Program for Fiscal Year 1983

Authority for this program is contained under Title IV of the Housing Act of 1950, 64 Stat. 48,77; Pub. L. 81–475; 12 U.S.C. 1749–1749d, and under Section 306 of the Department of Education Organization Act (Pub. L. 96–88).

Under this program, the Secretary is authorized to award low-interest loans to assist eligible institutions: (1) In providing housing and other educational facilities for student and faculty members, and (2) in conserving energy, and reducing related operating costs.

Closing Date For Transmittal of Applications: Applications for awards must be mailed (post-marked) or hand delivered by July 20, 1983.

Application Delivered by Mail: An application sent by mail must be addressed to the U.S. Department of Education, Attention: 84.142, College Facilities Branch, 400 Maryland Avenue, S.W. (ROB–3, Room 3717), Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a date postmark. Before relying on this method, an applicant should check with its local post office.

Applications Delivered By Hand: An application that is hand-delivered must be taken to the U.S. Department of Education, College Facilities Branch, Room 3717, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C. between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily except Saturday, Sunday, or Federal holidays. Applications that are hand-delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information: The College Housing Program provides low-interest 3 percent long-term loans to postsecondary educational institutions for the construction, rehabilitation or acquisition of student and faculty housing and related facilities and for conserving energy and reducing related operating costs. The maximum loan amount under this program is $3,500,000 and the minimum loan amount is $100,000.

Regulations for this program were published in the **Federal Register** on May 20, 1982, 47 FR 22020–22027. The regulations specify selection criteria for the two types of loans available under this program. All applications are ranked according to the criteria contained in § 614.31 and § 614.32 of the program regulations.

Available funds: There is authorized $40,000,000 or the amount of income less expenses, whichever is less, to be made available for new College Housing Loan commitments in fiscal year 1983. Twenty-five percent of the available funds will be apportioned for energy conservation loans and seventy-five percent of the available funds will be apportioned for housing loans. However, the President has proposed to the Congress supplemental appropriations language that would remove the authority to make new loans under this program for Fiscal Year 1983.

Application Forms: Application forms and program information packages are available.

Application packages will not automatically be mailed to all institutions of higher education. Copies may be obtained by writing to the College Facilities Branch, U.S. Department of Education, 400 Maryland Avenue, S.W., (ROB–3, Room 3717), Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those imposed under the statute and regulations.

Applicable Regulations: The regulations applicable to this program are—

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR 75.170–75.173 (Clearinghouse Procedures); 75.600–75.615 (Construction); 34 CFR 77.1 (Definitions); and 34 CFR Part 74 Subpart P; and

(b) The final regulations governing the College Housing Program, (34 CFR Part 614) published in the **Federal Register** on May 20, 1982, 47 FR 22020–22027.

Special Procedures: On or before the deadline for submitting its application to the Secretary, the applicant shall submit a copy of its application, with a letter asking for comment, to the State and areawide clearinghouses established in compliance with the Office of Management and Budget Circular A–95. The applicant shall also submit a copy of its application to the appropriate State agency for postsecondary education. Comments, if any, are to be addressed to the College Facilities Branch, U.S. Department of Education, 400 Maryland Avenue, S.W., (ROB–3, Room 3717), Washington, D.C. 20202. Comments must be received within 20 days after the deadline date if they are

to be considered. The applicant shall attach to its application to the Secretary a copy of its letter requesting the State and areawide clearinghouses to comment on the application.

Further Information: For further information contact Charles I. Griffith, Chief, College Facilities Branch, Department of Education, 400 Maryland Avenue, S.W. (ROB–3, Room 3717), Washington, D.C. 20202. Telephone: (202) 245–3253.

(12 U.S.C. 1749–1749d)

(Catalog of Federal Domestic Assistance No. 84–142, College Housing Program)

Dated: June 3, 1983.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000–01–M

Intent To Repay to the North Dakota State Department of Public Instruction Funds Recovered as a Result of Final Audit Determinations

AGENCY: Education Department.

ACTION: Notice of intent to award grantback funds.

SUMMARY: Notice is given that, under Section 456 of the General Education Provisions Act (GEPA), the U.S. Secretary of Education intends to repay under a grantback arrangement to the North Dakota State Department of Public Instruction (SEA) an amount equal to 75 percent of the funds the U.S. Department of Education (Department) has recovered as a result of a Repayment Agreement discharging the outstanding claim arising from separate final audit determinations issued by the Deputy Commissioner for Elementary and Secondary Education (now Assistant Secretary for Elementary and Secondary Education). This notice describes the SEA's plan, submitted on behalf of six local educational agencies (LEAs), for the use of the repaid funds and the terms and conditions under which the Secretary intends to make these funds available.

DATE: All written comments must be received on or before July 8, 1983.

EFFECTIVE DATE: All written comments should be submitted to Dr. Thomas W. Fagan, Director, Division of Grants, Policy, and Administration, Compensatory Education Programs, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3616, ROB–3), Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Dr. Thomas W. Fagan. Telephone: (202) 245–9877

SUPPLEMENTARY INFORMATION:

A. Background

On June 30, 1978 and September 20, 1978, the Deputy Commissioner for Elementary and Secondary Education issued separate final audit determinations against the North Dakota State Department of Public Instruction finding that the SEA had improperly spent $117,030 in funds provided under Title I of the Elementary and Secondary Education Act of 1965 (Title I) during fiscal year 1974. The final audit determinations were based upon a Department of Health, Education, and Welfare Audit Agency audit of the administration of programs funded under Title I in North Dakota for the period of July 1, 1969 through August 15, 1973. These determinations resulted from the auditors' findings that seven school districts in North Dakota had violated applicable provisions of the Title I statute and regulations by: supplanting State and local funds with Title I funds; using Title I funds for general services to the entire school population; and failing to provide comparable services.

The SEA challenged the Deputy Commissioner's (now Assistant Secretary) determinations in applications for review filed with the Title I Audit Hearing Board (now Education Appeal Board (EAB)) on September 26, 1978 and October 12, 1978, under the authority in Section 452(b) of GEPA (20 U.S.C. 1234a(b)). A prehearing conference was conducted before a panel of the EAB on October 15, 1980, at which time counsel for the Assistant Secretary and counsel for the SEA agreed to a briefing schedule. Subsequent to the submission of both parties' briefs, the Assistant Secretary dismissed minor claims against two school districts in the amount of $1,635. The Assistant Secretary later agreed, based on additional evidence presented by the SEA, to dismiss a comparability claim against one school district in the amount of $27,975. These adjustments reduced the amount in controversy to $87,420.

By letter dated September 21, 1981, the parties notified the EAB Panel that the SEA intended to discharge the entire amount of the outstanding claim in its Title I audit appeal through a Repayment Agreement. Although the Repayment Agreement provided that the SEA would discharge its debt through a schedule of three installment payments during a period ending September 30, 1983, the SEA, by transmittal dated March 11, 1982, made one lump sum payment to the Department of Education on behalf of six school districts in the amount of $87,420—the entire amount owed under the Repayment Agreement.

In June 1982, the parties filed with the EAB a joint motion to dismiss the SEA's Title I audit appeal. By memorandum dated June 10, 1982, the EAB Panel issued a dismissal of the appeal.

B. Authority for Awarding a Grantback

Section 456(a) of GEPA (20 U.S.C. 1234(a)) provides that whenever the Secretary has recovered funds following a final audit determination with respect to an applicable program, the Secretary may consider those funds to be additional funds available for that program and may arrange to repay to the LEA affected by that determination, an amount not to exceed 75 percent of the recovered funds. The Secretary may enter into this "grantback" arrangement if the Secretary determines that—

(1) The practices and procedures of the LEA that resulted in the audit determination have been corrected, and the LEA is in all other respects in compliance with the requirements of the applicable program;

(2) The SEA has submitted to the Secretary a plan for the use of the funds to be awarded under the grantback arrangement which meets the requirements of the applicable program, and, to the extent possible, benefits the population that was affected by the misexpenditures that resulted in the audit exception; and

(3) The funds to be awarded under the grantback arrangement, if used in accordance with the SEA's plan, would serve to achieve the purposes of the program under which the funds were originally granted.

C. Request for Repayment of Funds Awarded Under a Grantback Arrangement

By letter dated May 12, 1982 (revised March 1983), the SEA formally requested repayment of $85,565 under a grantback arrangement. The SEA proposes to use the funds to be repaid under the grantback arrangement to meet the special educational needs of educationally deprived children in programs administered by LEAs under Chapter 1 of the Education Consolidation and Improvement Act of 1981 (Chapter 1), even though the final audit determinations against the SEA resulted from improper expenditures of Title I funds. Chapter 1 supersedes Title I. Therefore, the SEA's proposal reflects the requirements in Chapter 1—a program that is designed to serve educationally deprived children in low-income areas. The SEA proposes that the funds will be returned to the six

LEAs that were found to have violated the applicable Title I requirements. In the same document, the SEA provides assurances that the practices and procedures of the LEAs that resulted in the audit determinations have been corrected. In applications filed by the LEAs for use of Chapter 1 funds in the 1983–84 school year, each LEA provided a detailed budget for the expenditure of the funds to be awarded under the grantback arrangement. By these applications each LEA provides an assurance that the LEA is in all other respects in compliance with the requirements of the Chapter 1 program.

D. Plan for Use of Funds Awarded Under a Grantback Arrangement

In accordance with Section 456(a)(2) of GEPA, the SEA submitted a plan for its proposed use of the funds that would be repaid to it under the grantback arrangement. The SEA's plan demonstrates that each LEA consulted with parents and teachers in designing the programs for which funds are sought under the grantback arrangement. According to its plan, the SEA intends to use the grantback funds in fiscal year 1984 to operate Chapter 1 programs in six LEAs.

IN the Bismarck Public Schools, the LEA proposes to use the $5,985 grantback award to supplement the salary of a reading specialist in the reading program which serves 240 Chapter 1 students in grades one through six.

In the Dunseith School District No. 1, the LEA proposes to use the grantback award of $3,095 to pay the salary of a teacher's aide who will provide reading and mathematics instruction to 24 Chapter 1 students in grades seven through twelve.

In the Fargo Independent School District No. 1, the LEA proposes to use the grantback award of $18,774 to fund the salary and related expenses of a teacher who will provide reading and mathematics instruction to 65 Chapter 1 students in grades nine through twelve.

In the Grand Forks Public School District No. 1, the LEA proposes to use the grantback award of $1,765 to purchase instructional supplies and materials for the language arts and mathematics program for 314 Chapter 1 students in grades one through twelve.

In the Mandan Public School District No. 1, the LEA plans to use the grantback award of $4,226 to fund a portion of the salary of a basic skills teacher employed in a reading program which would serve 207 Chapter 1 students in grades one through eight.

In the Minot Public School District No. 1, the LEA proposes to use the grantback award of $31,720 to fund the salary and related expenses of a reading teacher employed in a reading program that will serve 20 Chapter 1 students in grades one through four.

E. The Secretary's Determinations

Based upon a thorough review of the SEA's request for the repayment of funds under Section 456 of GEPA, the SEA's discharge of its payment obligation to the Department on March 11, 1982, the SEA's assurances described in part C of this notice, and the SEA's plan and budget, the Secretary makes the following determinations.

(1) The LEAs have corrected the practices and procedures that resulted in the final audit determinations, and the LEAs are in all other respects in compliance with the requirements of the Chapter 1 program;

(2) The SEA has submitted a plan for the use of the funds to be awarded under the grantback arrangement that meets the requirements of the Chapter 1 program and, to the extent possible, benefits the Chapter 1 children who were affected by the misexpenditures that resulted in the audit exceptions; and

(3) The funds to be awarded under the grantback arrangement, if used in accordance with the SEA's plan, would serve to achieve the purposes of the Chapter 1 program.

These determinations are based upon the best information available to the Secretary at the present time. If this information is not accurate or complete, the Secretary is not precluded from taking appropriate administrative action.

F. Notice of the Secretary's Intent To Enter Into a Grantback Arrangement

Section 456(d) of GEPA requires, at least thirty days prior to entering into an arrangement to award funds under a grantback, that the Secretary publish in the **Federal Register** a notice of his intent to do so, and the terms and conditions under which the payment will be made.

In accordance with this requirement, notice is given that the Secretary intends to make available under a grantback arrangement to the SEA an amount equal to 75 percent of the funds the Department recovered as a result of the Deputy Commissioner's final audit determinations. The Secretary bases his intention to enter into a grantback arrangement under Section 456 of GEPA on the following factors: His determinations outlined in part E of this notice, the timely payment by the SEA of all funds owned to the Department as a result of the Repayment Agreement, and the cooperative efforts of the SEA and the LEAs to resolve this matter.

G. Terms and Conditions Under Which Payment Under the Grantback Arrangement Will Be Made

Section 456(b) of GEPA provides that any payments made under a grantback arrangement shall be subject to the terms and conditions that the Secretary deems necessary to accomplish the purpose of the affected program. The SEA agrees to comply with the following terms and conditions under which payment under the grantback arrangement will be made:

(1) The SEA will spend the funds awarded under the grantback in accordance with—

(a) All applicable statutory and regulatory requirements;

(b) The plan that the SEA submitted and any amendments to that plan that are approved by the Secretary; and

(c) The budget that was submitted with the plan and any amendments to the budget that are approved by the Secretary.

(2) In accordance with the SEA's plan, all funds received under the grantback arrangement will be obligated no later, than August 31, 1984.

(3) The SEA, on behalf of the LEAs, must, not later then January 1, 1985, submit a report to the Secretary which indicates that the funds awarded under the grantback have been spent in accordance with the SEA's proposed plan and budget.

(4) Separate accounting records must be maintained documenting the expenditures of funds awarded under the grantback arrangement.

Invitation To Comment

The Secretary invites public comments on this notice of intent to award funds under a grantback arrangement to the North Dakota State Department of Public Instruction on behalf of the Bismarck Public Schools, Dunseith School District No. 1, Fargo Independent School District No. 1, Grand Forks Public School District No. 1, Mandan Public School District No. 1, and Minot Public School District No. 1. Interested persons may send written comments to Dr. Thomas W. Fagan at the address at the beginning of this notice. All comments must be received on or before July 8, 1983.

Dated: June 1, 1983.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000-01-M

Discretionary Grant Programs Under the Rehabilitation of 1973, as Amended; Application Notice Establishing Closing Dates for Transmittal of Fiscal Year 1983 Applications

ACTION: Application notice establishing closing dates for transmittal of fiscal year 1983 applications.

SUMMARY: The purpose of this application notice is to inform potential applicants of fiscal and programmatic information and closing dates for transmittal of applications for new projects under certain grant programs awarded by the Department of Education under Titles I, III, and VI of the Rehabilitation Act of 1973, as amended.

Organization of Notice

This notice covers certain discretionary grant programs administered by the Rehabilitation Services Administration within the Department of Education in which there is expected to be competition for new projects in Fiscal Year 1983.

This notice contains two parts. Part I includes, in chronological order, the list of all closing dates covered by this notice. Part II consists of the individual application announcements for each program. These announcements are in the same order as the closing dates listed in Part I.

The budget estimates in the individual application notices are based on the Fiscal Year 1983 Second Continuing Resolution (Pub. L. 97–377).

Instructions for Transmittal of Applications

Applicants should note specifically the instructions for the transmittal of applications included below:

Transmittal of Applications: Applications for all projects must be mailed or hand delivered on or before the closing date given in the individual program announcements included in this document.

Applications Delivered by Mail: Applications for new projects must be addressed to the Department of Education Application Control Center, Attention: (Appropriate CFDA No.), Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following: (1) a legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other evidence of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

Each late applicant for a new award will be notified that its application will not be considered.

Application Delivered by Hand: Applications for new projects must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

An application for a new project that is hand-delivered will not be accepted by the Application Control Center after 4:30 p.m. on the closing date.

Special Procedure Affecting the Projects With Industry and Centers for Independent Living Programs

The Fiscal Year 1983 Second Continuing Resolution provides that projects which were funded under the Projects with Industry program (84.128B) and the Centers for Independent Living program (84.132) in Fiscal Year 1981 will be funded in Fiscal Year 1983. There will be no competition for Fiscal Year 1983 funds under the terms of the Continuing Resolution. Application forms and program information packages have been mailed to those previous grantees who are eligible to apply.

The Jobs Bill which was enacted as Pub. L. 98–8 on March 24, 1983, includes a supplemental appropriation of $5,000,000 for the Projects with Industry program. This amount is in addition to those funds previously made available under the Continuing Resolution. This notice includes an announcement of the availability of funds for which a national competition for new projects will be conducted. Any eligible applicant may submit an application for Fiscal Year 1983 Jobs Bill funds.

PART I.—PROGRAMS LISTED IN CHRONOLOGICAL ORDER

CFDA No.	Program	Closing date
84.128F	Client Assistance Projects (New Projects).	July 25, 1983.

PART I.—PROGRAMS LISTED IN CHRONOLOGICAL ORDER—Continued

CFDA No.	Program	Closing date
84.128J	Projects for Initiating Special Recreation Programs for Handicapped Individuals (New Projects).	Do.
84.128L	Projects with Industry (Jobs Bill) (New Projects).	Do.
84.129A	Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals (New Projects).	July 29, 1983.
84.129G	Handicapped Migratory Agricultural and Seasonal Farmworker Vocational Rehabilitation Service Projects (New Projects).	Do.

Part II—Application Announcements for Each Program

84.128F—Client Assistance Projects

Closing Date: July 25, 1983—New Projects.

Authority for this program is contained in Section 112 of the Rehabilitation Act of 1973, as amended.

(29 U.S.C. 732)

Awards are made under this program to State vocational rehabilitation agencies.

The purpose of this program is to provide counselors to inform and advise all clients and client applicants in a project area of all available benefits and their rights in seeking these benefits under the Rehabilitation Act of 1973, as amended.

Special Procedures: Every applicant for new awards is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires an applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95, but did not receive any clearinghouse comments.

Available Funds: The total amount of funds awarded under this grant program for Fiscal Year 1982 was $942,000. The total amount of funds available for Client Assistance Projects in Fiscal Year 1983 is $1,734,000. These funds will be available only for new projects. An

estimated 29 projects will be awarded with the average grant totalling approximately $60,000. These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

It is expected that new projects funded under this program in Fiscal Year 1983 will be limited to one year of support.

Application Forms: Application forms and program information packages are available and may be obtained by writing to the Division of Special Projects, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The program information is intended to aid applicants in applying for assistance under this competition. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those specifically imposed under the statute and regulations governing the competitions.

The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

Applicable Regulations: Regulations applicable to this program include the following:

(a) Regulations governing the Client Assistance Projects program (34 CFR Parts 369 and 370); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

Further Information: Fred C. Windbeck, Jr., Associate Commissioner for Developmental Programs, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, S.W., Room 3038, Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245–0537.

84.128J—Projects for Initiating Special Recreation Programs for Handicapped Individuals

Closing Date: July 25, 1983—New Projects.

Authority for this program is contained in Section 316 of the Rehabilitation Act of 1983, as amended.

(29 U.S.C. 777(f))

Awards are made under this program to States and public and other nonprofit agencies and organizations.

The purpose of this program is to support projects which initiate programs of recreational services for handicapped individuals.

Special Procedures: Every applicant for new awards is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires an applicant to give the clearinghouse sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95 but did not receive any clearinghouse comments.

Available Funds: The total amount of funds awarded under this grant program for Fiscal Year 1982 was $1,884,000. The total amount of funds available for Projects for Initiating Special Recreation Programs for Handicapped Individuals in Fiscal Year 1983 is $1,000,000. These funds will be available only for new projects. An estimated 13 grants will be awards with an average grant totalling about $75,000. These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

It is expected that new projects funded under this program in Fiscal Year 1983 will be limited to one year of support.

Application Forms: Application forms and program information packages are available and may be obtained by writing to the Division of Special Projects, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The program information is intended to aid applicants in applying for assistance under this competition. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those specifically imposed under the statute and regulations governing the competitions.

The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

Applicable Regulations: Regulations applicable to this program include the following:

(a) Regulations governing Projects for Initiating Special Recreation Programs for Handicapped Individuals (34 CFR Parts 369 and 378); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

Further Information: Fred C. Windbeck, Jr., Associate Commissioner for Developmental Programs, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, S.W., Room 3038, Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245–0537.

84.128L—Projects With Industry (Jobs Bill)

Closing Date: July 25, 1983—New Projects.

Authority for this progrqm is contained in Section 621 of the Rehabilitation Act of 1973, as amended.

(29 U.S.C. 795g)

Cooperative agreements are made under this program with employers and profit-making and nonprofit organizations, including any industrial, business or commercial enterprise; labor organization; community trade associations; rehabilitation facility; or any other agency or organization with the capacity to arrange, coordinate or conduct training and other employment programs and provide supportive services and assistance to handicapped individuals in a realistic work setting. State vocational rehabilitation agencies are not eligible to apply for funds under this program.

The purpose of this program is to provide handicaped individuals with training, employment, and supportive services and assistance within business, industry or other realistic work settings in order to prepare them for competitive employment and permit them to maintain their employment.

Special Procedures: Every applicant for new awards is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires the applicant to

give the clearinghouse(s) sufficient time for review, consultation, and comments on the application

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95 but did not receive any clearinghouse comments.

Available Funds: The total amount of funds available under this program in Fiscal Year 1982 was $7,510,000. The total amount available for Fiscal Year 1983 is $13,000,000 including $5,000,000 appropriated under the Jobs Bill for the support of new projects. An estimated 20 new projects will be awarded with an average project totalling $250,000. These estimates do not bind the Department Education to a specific number of cooperative agreements or to the amount of any cooperative agreement unless that amount is otherwise specified by statute or regulations.

Subject to the conditions set forth in EDGAR regarding continuation of multi-year projects, it is expected that new projects funded under this program in Fiscal Year 1983 will receive continuation support for up to two additional budget periods.

In accordance with Section 101(c) of the Jobs Bill (Pub. L. 98–8), all applicants for project support under this Notice must provide an assurance that they will, to the extent practicable, utilize these funds in a manner which maximizes immediate creation of new employment opportunities for disabled individuals who were unemployed at least fifteen of the twenty-six weeks immediately preceding the date of enactment of the Job Bills, March 24, 1983.

The Secretary encourages applications for trade associations, industrial foundations and labor unions or consortia of such organizations for the support of projects of national scope which cover a wide area of service and demonstrate linkages with major industries.

The Secretary also encourages applications for the support of projects which demonstrate home-based employment opportunities for severely disabled individuals as well as applications for training and employment in the electronic data processing industry.

Application Forms: Application forms and program information packages are available and may be obtained by writing to the Director, Division of Special Projects, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions and forms included in the program information package. The program information is intended to aid the applicants in applying for assistance under this competition. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those specifically imposed under the statute and regulations governing the competitions.

The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

Applicable Regulations: Regulations applicable to this program include the following:

(a) Regulations governing the Projects with Industry program (34 CFR Parts 369 and 379); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

Further Information: Fred C. Windbeck, Jr., Associate Commissioner for Developmental Programs, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, S.W., Room 3038, Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245–0537.

84.128A—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals

Closing Date: July 29, 1983—New Projects.

Authority for this program is contained in section 311(a)(1) of The Rehabilitation Act of 1973, as amended.

(29 U.S.C. 777a(a)(1)

Awards are made under this program to States and public and other nonprofit agencies and organizations.

The purpose of this program is to support projects designed to expand or otherwise improve vocational rehabilitation services for severely handicapped individuals.

Special Procedures: Every applicant for new awards is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the Clearinghouse(s) in its State. OMB Circular A–95 requires the Applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of part I of OMB Circular A–95 but did not receive any clearinghouse comments.

Available Funds: The total amount of funds awarded under this grant program in Fiscal Year 1982 (excluding spinal cord injury projects) was $4,014,455. The total amount of funds available for Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals in Fiscal Year 1983 is $3,159,000 including $1,659,000 for new projects. An estimated 15 new projects will be awarded at an average project cost of $124,000. These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

Subject to the conditions set forth in EDGAR regarding continuation of multi-year projects, it is expected that new projects funded under this program in Fiscal Year 1983 will receive continuation support for up to two additional budget periods.

In Fiscal Year 1983 applicants for new awards are encouraged to submit applications with a single disability focus which demonstrate effective ways to use computers or other technological aids in the rehabilitation of persons severely disabled by any of the following disabilities:

(a) Arthritis;
(b) Blindness;
(c) Cerebral Palsy;
(d) Deafness;
(e) Epilepsy;
(f) Heart Disease;
(g) Mental Illness;
(h) Mental Retardation;
(i) Multiple Sclerosis;
(j) Learning Disability.

The Secretary also encourages the submittal of applications for the support of projects that demonstrate specialized rehabilitation service programs for homebased severely handicapped individuals.

Application Forms: Application forms and program information packages are available and may be obtained by writing to the Division of Special Projects, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The program information is intended to aid applicants in applying for assistance under this competition. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those specifically imposed under the statute and regulations governing the competitions.

The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

Applicable Regulations: The following regulations are applicable to this program:

(a) Regulations governing Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals (34 CFR parts 369 and 373); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77 and 78).

Further Information: Fred C. Windbeck, Jr., Associate Commissioner for Developmental Programs, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue, S.W., Room 3038, Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245–0537.

84.128C—Handicapped Migratory Agricultural and Seasonal Farmworker Vocational Rehabilitation Service Projects

Closing Date: July 29, 1983—New Projects.

Authority for this program is contained in Section 312 of the Rehabilitation Act of 1973, as amended.

(29 U.S.C. 777(b))

Awards are made under this program to State vocational rehabilitation agencies or local agencies administering a vocational rehabilitation program under written agreements with State agencies.

The purpose of this program is to support projects for providing vocational rehabilitation services to handicapped migratory agricultural workers or handicapped seasonal farmworkers.

Special Procedures: Every applicant for new awards is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires an applicant to give the clearinghouse(s) sufficient time for review, consultation, and comment on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95, but did not receive clearinghouse comments.

Available Funds: The total amount of funds awarded under this program for Fiscal Year 1982 was $951,000. The total amount of funds available for Handicapped Migratory Agricultural and Seasonal Farmworkers Vocational Rehabilitation Service Projects in Fiscal Year 1983 is $951,000 including $741,000 for new projects. An estimated 7 projects will be awarded with the average grant totalling $106,000. These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

It is expected that new projects funded under this program in Fiscal Year 1983 will be limited to one year of support.

Application Forms: Application forms and program information packages are available and may be obtained by writing to the Division of Special Projects, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Application must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The program information is intended to aid applicants applying for assistance under this competition. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those specifically imposed under the statute and regulations governing the competitions.

The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

Applicable Regulations: Regulations applicable to this program include the following:

(a) Regulations governing the Handicapped Migratory Agricultural and Seasonal Farmworkers Vocational Rehabilitation Service Projects program (34 CFR Parts 369 and 375); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

Further Information: Fred C. Windbeck, Jr., Associate Commissioner for Development Programs, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue, S.W., Room 3038, Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245–0537.

(Catalog of Federal Domestic Assistance No. 84.128 Rehabilitation Service Projects)

Dated: June 2, 1983.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000–01–M

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Deputy Under Secretary for Management invites comments on the proposed information collection requests as required by the Paperwork Reduction Act.

DATE: Interested persons are invited to submit comments on or before July 8, 1983

ADDRESSEES: Written comments or requests should be addressed to Richard Sheppard, Office of Management and Budget, 726 Jackson Place, N.W., Room 3208 New Executive Office Building, Washington, D.C. 20503 and/or Margaret Webster, Department of Education, 400 Maryland Avenue, S.W., Room 4047, Switzer Building, Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: William Wooten, (202) 426–7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The requirements for public consultation may be amended or waived by OMB to the extent that the public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform the statutory obligations. The Deputy Under Secretary for Management publishes this notice containing proposed information requests prior to the submission of these requests to the

Office of Management and Budget. Public comment is invited and copies of the requests may be obtained from the addressees named above.

Dated: June 2, 1983.

Charles L. Heatherly,

Deputy Under Secretary for Management.

Office of Bilingual Education and Minority Languages Affairs

Reinstatement

Application for Grants under Bilingual Education
ED 4561
Annual
State or local governments/non-profit institutions
Responses: 750; Burden hours: 30,000
One form submitted for approval

Abstract: Form is used by applicants for new awards under Title VII of the Elementary and Secondary Education Act, as amended. The Act authorizes the award of grants to State and local educational agencies, institutions of higher education, and non-profit private organizations that meet the conditions of the Act and governing regulations.

Public Hearings and Request for Public Comment on the Reauthorization of the Higher Education Act of 1965

AGENCY: Department of Education.

ACTION: Notice of public hearings and request for public comment on the reauthorization of the Higher Education Act of 1965.

SUMMARY: The Secretary of Education announces public hearings and invites written comments from the public regarding the reauthorization of the Higher Education Act of 1965.

DATES: Written comments must be submitted on or before July 15, 1983. Public hearings are scheduled for the following dates:

June 27 and 28, 1983—Tampa, Florida
June 29 and 30, 1983—Charlotte, North Carolina
June 30 and July 1, 1983—Amherst, Massachusetts
July 7 and 8, 1983—Kansas City, Missouri
July 7 and 8, 1983—Indianapolis, Indiana
July 14 and 15, 1983—Mission Viejo, California

ADDRESSES: Written comments should be addressed to: Dr. Edward Elmendorf, Assistant Secretary for Postsecondary Education, c/o the Office of Legislation and Public Affairs, U.S. Department of Education, 400 Maryland Avenue, S.W., Room 3153, Washington, D.C. 20202.

Public hearings will be held in the following cities on the dates shown:

Tampa—June 27 and 28, 1983; Florida Mental Health Institute Auditorium, University of South Florida, 13301 North 30th Street, Tampa, Florida;
Charlotte—June 29 and 30, 1983; McKnight Auditorium, Cone Center, University of North Carolina at Charlotte, Highway 49 North, Charlotte, North Carolina;
Amherst—June 30 and July 1; Converse Hall, Amherst College, Route 9 and College Street, Amherst, Massachusetts;
Kansas City—July 7 and 8, 1983; Ball Room, Hilton Inn-Airport, 8801 Northwest 112th Street, Kansas City, Missouri;
Indianapolis—July 7 and 8, 1983; Lecture Hall, Room 102, Indiana University-Purdue University at Indianapolis, 325 Agnes Street, Indianapolis, Indiana;
Mission Viejo—July 14 and 15, 1983; Performing Arts Theatre, Saddleback Community College, 28000 Marguerite Parkway, Mission Viejo, California.

FOR FURTHER INFORMATION CONTACT: Dr. Edward Elmendorf at 202/245-9274, or Mr. Louie Mathis or Mr. Duncan Helmrich at 202/245-8564.

SUPPLEMENTARY INFORMATION: The Secretary is requesting public comment on the reauthorization of the Higher Education Act of 1965 as amended, specifically on Titles III, IV, VI, VII, VIII, IX, X, XI, XII, and XIII.

Need for Reauthorization

The authorization for most programs of the Higher Education Act of 1965, as amended, expires September 30, 1985. In order to contribute in a timely manner to the congressional reauthorization discussions, the Secretary is beginning a review of higher education programs at this time.

The Secretary intends to submit the Department's proposal to reauthorize the Higher Education Act in conjunction with the President's fiscal Year 1985 Budget, in January 1984. To ensure an opportunity for public participation, the Secretary invites public comments on this reauthorization effort.

Objectives of the Reauthorization

The objectives of the Department's reauthorization effort include:

- Achieving excellence and quality in education.
- Promoting federalism.
- Reemphasizing family/student choice and responsibility.
- Continuing broad access to postsecondary education.
- Strengthening education for work.
- Improving the efficiency and cost effectiveness of the use of resources.
- Serving special student populations.

The Secretary has formed a Reauthorization Task Force whose goals are to review the current authorities and delivery systems under the Higher Education Act, evaluate suggested modifications in and alternatives to these programs and systems, and recommend reauthorization options to the Secretary. The Task Force includes representatives from the following units of the Department of Education: the Office of Planning, Budget, and Evaluation; the Office of Postsecondary Education; the Office of Legislation and Public Affairs; the Office of Management; the Office of General Counsel; and the Office of Inspection General.

How the Information Will Be Used

Before making its recommendations to the Secretary, the Reauthorization Task Force will examine proposed modifications and alternatives to assess their effects on current programs and systems, and the students who receive the benefits and services. The proposals will then be evaluated in relation to the goals of the Higher Education Act and the above noted objectives of the reauthorization efforts.

Issues for Public Comment

The Secretary solicits comments and suggestions regarding reauthorization of the Higher Education Act in three major program areas: student loans; student grants/work-study; and institutional and/higher education and on the other Higher Education Act programs. Comments are especially invited on such issues as the following:

Student Loan Issues

- What is the appropriate role of students and their families and governments at the local, State, and Federal levels in the financing of higher education?
- Are the current student loan programs adequately serving the appropriate population most effectively, most equitably, and most cost-effectively?
- Should the student loan programs be consolidated by returning all National Direct Student Loan (NDSL) institutional revolving funds to the Treasury and relying entirely on the Guaranteed Student Loan program (GSL)?
- Should a major new student loan program, such as one using an income-contingent or IRS based repayment

system, be established as either a supplement to or a replacement of the current Guaranteed Student Loan (GSL) and National Direct Student Loan (NDSL) programs.

• Should the commercial and State/nonprofit agency marketplace be relied on to provide needed student loan capital and the current federally-funded sutdent loan programs be eliminated?

• Assuming the current Guaranteed Student Loan and National Direct Student Loan programs are continued—

(1) How might the availability of loan capital be expanded—by raising limits (what levels?), using Federal borrowing in support of new NDSL capital ("alternative financing"), raising lender incentives, instituting administrative improvements, or by other means?

(2) How might student's opportunities to consolidate their loan debts and reduce their repayment burden be improved and/or expanded while at the same time minimizing Federal cost exposure?

(3) How might we reduce the level of Federal interest subsidization—increased origination fees, increased borrower interest obligation during repayment and/or in-school periods, or other means?

Student Grants/Work-Study Issues

• What is the appropriate "mix" of aid (grants, loans, and work) for students from different income strata, for students attending different cost institutions, for graduate and professional students?.

• Are current family contribution expecttaions reasonable, would educational savings plans, more effective parent-loan programs and/or tuition tax-credits be of material assistance to parents in meeting expected family contribution?

• Should the Pell Grant program be modified to take into account a presumed minimum self-help amount? If so, how?

• How might the Pell Grant eligibility criteria be simplified and impoved to avoid misreporting and award errors?

• How might the Work-Study program be modified to stimulate private sector employment opportunities?

• Should funding for the campus-based programs be consolidated or the transferability of funds otherwise broadened?

• Should the campus-based and Pell Grant programs be combined into one campus-based delivery program?

• How might the campus-based programs' state allotment formulas and hold harmless rules be simplified and their equity be improved?

• Should a single need analysis system and a single cost of attendance policy for all title IV aid programs, as provided in the 1980 amendments, be implemented? In what ways should the components of current need analysis systems be revised?

• Should academic "merit" (past achievement) and/or academic performance (current achievement) become criteria for the award of some or all types of Federal student aid? If so, how?

Institutional Aid/Higher Education Program Issues

• How should the goal of excellence in education be reinforced through Federal higher education programs?

• What is the Federal role in promoting academic excellence in postsecondary institutions? Is this a regulatory role? A leadership role—leadership through competitive incentive programs? A research role?

• What role should the Federal government play, if any, in fulfilling the recommendations of the National Commission on Excellence in Education for higher standards of teacher education?

• What is the appropriate Federal role for supporting math and science education in postsecondary institutions? How should the current Minority Institutions Science Imporvement program, Fund for the Improvement of Postsecondary Education program, and Graduate programs be modified to meet areas of critical national need such as mathematics and science?

• What is the appropriate role of the Federal Government in fostering excellence in international education and foreign language studies?

• Should a national program for exceptional high school students be established to help prepare them for higher education in areas of critical national need?

• Should the National Graduate Fellowship program be limited, or modified, to include fields of study determined to be of critical national need?

• What is the appropriate Federal role for serving the non-financial needs of students from disadvantaged backgrounds? Should the current Special Programs for Students from Disadvantaged Backgounds be consolidated or modified? If so, how?

• Should the Federal Government provide assistance through institutional aid programs, or should limited Federal resources be concentrated on student aid only?

• Should the institutional aid/higher education programs be consolidated into a block grant? If so, which authorities should be included? Should the block grant be made to States or to institutions? What allocation formula should be used?

• Should the Title III institutional aid programs be restructured, e.g., by simplifying/tightening the eligibility criteria and/or by including an endowment program? If so, how?

• Should the College Housing Loan Program and the Higher Education Facilities Loans and Insurance program be consolidated? Should authority be provided under a consolidated program or the current Higher Education Facilities Loan and Insurance program to assist institutions to construct/improve their science and mathematics facilities?

The Secretary encourages interested parties to submit written comments on these program areas and issues to the Department's Reauthorization Task Force at the Washington address provided in this notice, or to appear at one of the public hearings. The Secretary encourages that those attending the hearings provide a written copy of their comments and be prepared to answer specific questions on their proposals. Written comments should be submitted no later than July 15, 1983 to the contact person named in this notice.

Format for Comments

The hearings and request for comments are designed to elicit the views of interested parties on how the current higher education programs can be improved to meet: (1) The goals of the Act and (2) the objectives of the reauthorization effort as stated in this notice.

The Secretary requests that each respondent identify his or her role in higher education and the perspective from which he or she views the postsecondary education system—either as a representative of an association, agency, school (private or public, two-year, four-year, etc.), financial institution, or as a lender, parent, student, or private citizen. In proposing modifications or alternatives, respondents may want to address the main elements of each program or group of programs. These elements include, but are not limited to:

- Program goals and activities.
- Students and-or institutions served.
- Eligibility criteria.
- Delivery system mechanisms.
- Budgetary impact and cost analysis.

The Secretary urges each commenter to be specific regarding his or her proposals and include, if possible, the data requirements, timing, procedures,

technology, delegation of responsibility, and actual legislative language that the commenter proposes for the improved or redesigned program.

Dated: June 2, 1983.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000-01-M

Supplemental Funds Program for Cooperative Education; Application Notice for New Awards for Fiscal Year 1983

Applications are invited for the award of certain unused College Work-Study Program funds for the support of programs of Cooperative Education.

Authority for this program is contained in section 442(d) of the Higher Education Act of 1965, as amended by section 433 of Pub. L. 96-374.

(42 U.S.C. 2752(d))

Closing Date for Transmittal of Applications—Applications for supplemental funds for the support of programs of Cooperative Education must be mailed or hand-delivered by August 15, 1983.

Applications Delivered by Mail—An application sent by mail must be addressed to the U.S. Department of Education, Office of Postsecondary Education, Division of Institutional and State Incentive Programs, Cooperative Education Branch, Attention: 84.055E, Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

(1) A private metered postmark, or

(2) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly proved a dated postmark. Before relying on ths method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first-class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered By Hand— An application that is hand-delivered must be taken to the Cooperative Education Branch, U.S. Department of Education (Room 3053, ROB-3), 7th and D Streets, S.W., Washington, D.C.

The Cooperative Education Branch will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand-delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information—Eligible applicants must provide the application information required in 34 CFR 636.20 of the regulations for the Supplemental Funds Program for Cooperative Education.

Before calculating the number of students, applicants should review the definitions found in 34 CFR 636.4, for the terms "assisted" and "full-time equivalent students" and in 34 CFR 631.3, for the definition of Cooperative Education.

Available Funds—Section 442(d) of Title IV-C of the Higher Education act of 1965, as amended, requires the Secretary to give preference in reallotting the first 50 percent of unused College Work-Study Program funds as supplemental funds to eligible institutions of higher education for use in initiating, improving, and expanding programs of Cooperative Education administered in accordance with the regulations implementing Title VIII of the Act.

The Secretary, however, will not have the report of the unused College work-Study Program funds available for reallotment until mid-August.

Except as noted below, each eligible institution of higher education submitting an application will receive a proportinate share of the available funds based on the ratio of the number of full-time and full-time-equivalent students assisted under its program of cooperative education between the period July 1, 1982, through June 30, 1983, to the number of those types of students assisted in programs of cooperative education in all eligible institutions applying for the available funds.

Using the above-mentioned formula, the Secretary will not issue a grant to an eligible institution if the institution will receive a grant of less than $500.

These funds must be reallotted on or before September 30, 1983.

Application Forms—Application forms and program information packages are expected to be mailed to institutions of higher education by July 1, 1983. They may also be obtained after that date from the Cooperative Education Branch, U.S. Department of Education (Room 3053, Regional Office Building 3), 7th and D Streets, S.W., Washington, D.C. 20202. Telephone: (202) 245-2140.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those imposed under the statute and regulations.

The Secretary suggests that the narrative statements of the application not exceed one page in length. The Secretary further suggests that only the information required by the application form be submitted.

Applicable Regulations—The following regulations apply to projects supported with supplemental funds:

(a) Regulations governing the Supplemental Funds Program for Cooperative Education (34 CFR Part 636);

(b) Regulations governing the Cooperative Education Program (34 CFR Parts 631 and 632);

(c) Regulations governing the College Work-Study Program (34 CFR Part 675); and

(d) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77 and 78). (These parts were previously codified as 45 CFR Parts 74, 100a, 100c and 100d respectively.)

Further Information—For further information contact the Cooperative Education Branch, Division of Institutional and State Incentive Programs, Office of Institutional Support Programs, U.S. Department of Education, 400 Maryland Avenue, S.W., (Room 3053, ROB-3), Washington, D.C. 20202. Telephone: (202) 245-2146.

(20 U.S.C. 1133, 42 U.S.C. 2752(d))

(Catalog of Federal Domestic Assistance Number 84.055E, Supplemental Funds Program for Cooperative Education)

Dated: June 2, 1983.

Edward M. Elmendorf,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Determination To Establish Department of Energy Advisory Panel on Alternative Means of Financing and Managing Radioactive Waste Facilities

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), I hereby certify that the establishment of the Advisory Panel on Alternative Means of Financing and Managing Radioactive Waste Facilities is in the public interest in connection with the performance of duties imposed on the Department of Energy by law.

This determination follows consultation with the Committee Management Secretariat of the General Services Administration pursuant to Section 101–6.1007 of the Interim Rule on Advisory Committee Management.

The purpose of this panel is to advise the Secretary of Energy on the advantages and disadvantages of alternative means of financing, constructing, operating, and managing all civilian radioactive waste management facilities, including the feasibility of establishing a private corporation for such purpose.

Further information concerning this panel can be obtained from Gloria Decker on (202) 252–8990.

Dated: June 2, 1983.

K. Dean Helms,

Advisory Committee Management Officer.

BILLING CODE 6450–01–M

Economic Regulatory Administration

Tyson Producing Company, Inc.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Tyson Producing Company, Inc., at P.O. Box 16448, Jackson, Mississippi 39206. This Proposed Remedial Order charges Tyson with pricing violations in the amount of $91,108.69 connected with the sale of crude oil at prices in excess of those permitted by 10 CFR 212, Subpart D during the period September 1973 through July 1979.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from James A. Martin, Manager, Litigation Support Group, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, or by calling (214) 767–7407. Within fifteen (15) days of publication of this Notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, Federal Building, Room 3304, 12th & Pennsylvania Avenue, NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas on the 20th day of May, 1983.

Ben L. Limos,

Director, Dallas Field Office, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[ERA Docket No. 83–CERT–062]

Appleton Papers, Inc.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On May 2, 1983, Appleton Papers, Inc. (APPLETON), filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 482,000 Mcf of natural gas which is expected to displace the use of approximately 3,400,000 gallons of No. 6 fuel oil (0.3 percent sulfur) per year at its manufacturing facility in Camp Hill, Pennsylvania.

The eligible seller of the natural gas in Exxon-USA, P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25214, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 22190, May 17, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewd APPLETON's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that APPLETON's application satisfies the criteria enumerated in 10 CFR Part 595. We are, therefore, granting the certification and transmitting that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 100 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 31, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[ERA Docket No. 83–CERT–025]

Bethlehem Steel Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On April 15, 1983, Bethlehem Steel Corporation (BETHLEHEM), 8th & Eaton Avenue, Bethlehem, Pennsylvania 18106, filed with the Administrator of the Economic Regulatory Administration (ERA) pursuant to 10 CFR Part 595 an application for certification of an eligible use of approximately 30,000 Mcf of natural gas per day which is expected to displace the use of approximately 206.760 gallons of No. 6 fuel oil (1.0 percent sulfur) per day at its Sparrows Point Plant in Sparrows Point, Maryland.

The eligible sellers of the natural gas are the Enhanced Recovery Equipment Company, 25660 Saunders Road, Lake Forest, Illinois 60045; Mewborne Oil Company, P.O. Box 7698, Tyler, Texas 75711; and Exxon Company, U.S.A., P.O. Box 2180, Houston, Texas 77001. The gas will be transported by the Columbia Gas Transportation Corportation, 1700 MacCorkle Ave., S. E., Charleston, West Virginia 25314; Columbia Gulf Transmission Company, 3805 W. Alabama Avenue, Houston Texas 77027; Panhandle Eastern Pipeline Company, P.O. Box 1348, Kansas City, Missouri 64141; and Baltimore Gas & Electric Company, P.O. Box 1475, Baltimore, Maryland 21203.

Notice of that application was published in the **Federal Register** (48 FR 22352, May 18, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of application. No comments were received.

The ERA has carefully reviewed Bethlehem's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that Bethlehem's application

satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C. May 31, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-010]

Central Hudson Gas & Electric Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On April 4, 1983, Central Hudson Gas & Electric Corporation (CHGE), 284 South Avenue, Poughkeepsie, New York 12601, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 2,000,000 Mcf per year of natural gas which is expected to displace the use of approximately 302,000 barrels of No. 6 fuel oil (1.0 percent sulfur) per year at its Danskammer Point Steam Electric Generation Station (Units 1 and 2) in Newburgh, New York.

The eligible seller of the natural gas is New York State Electric & Gas Corporation, 4500 Vestal Parkway East, Binghampton, New York 13902. The gas will be transported by Tennessee Gas Pipeline Company, P.O. Box 2511, Houston, Texas 77001; CHGE will serve as its own local distributor.

Notice of that application was published in the **Federal Register** (48 FR 22353, May 18, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed CHGE's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that CHGE's application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 31, 1983.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-101]

The City of Erie, Pennsylvania; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

The City of Erie, Pennsylvania (ERIE), 80 Wayne St, Erie, Pa. 16507, filed an application on May 17, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Erie Wastewater Treatment Plant, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, ERIE indicates that the volume of natural gas for which it requests certification is approximately 1,000 Mcf per day. This volume is estimated to displace the use of approximately 7,300 gallons of No. 6 fuel oil (1.0 percent sulfur) per day.

The eligible seller is J & L Oil & Gas Corporation, Newell Road, Dunkirk, N.Y. 14048. The gas will be transported interstate by National Fuel Gas Supply Corporation, 308 Seneca St., Oil City, Pennsylvania 16301; and by National Fuel Gas Distribution Corporation, 10 Lafayette Square, Buffalo, N.Y. 14203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10 calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to ERIE and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on May 27, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-049]

Crompton & Knowles Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On May 2, 1983, Crompton & Knowles Corporation, Dyes and Chemicals Division (C & K), filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 146,000 Mcf of natural gas which is expected to displace the use of approxmately 979,450 gallons of No. 6 fuel oil (2.0–2.8 percent sulfur) per year at its manufacturing facilities in Reading and Gibraltar, Pennsylvania.

The eligible seller of the natural gas is Exxon-USA, P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 22190, May 17, 1983) and an opportunity

for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed C & K's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that C & K's application satisfies the criteria enumerated in 10 CFR Part 595. We are, therefore, granting the certification and transmitting that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 100 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Harrisburg Hospital; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On May 2, 1983, Harrisburg Hospital (H. HOSP), filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 54,750 Mcf of natural gas which is expected to displace the use of approximately 405,150 gallons of No. 2 fuel oil (0.5 percent sulfur) per year at its hospital facility in Harrisburg, Pennsylvania.

The eligible seller of the natural gas is Exxon-USA, P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 22190, May 17, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed H. HOSP's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that H. HOSP's application satisfies the criteria enumbered in 10 CFR Part 595. We are, therefore, granting the certification and transmitting that certification to the Federal Energy Regulatory Commission. More detailed information, inlcuding a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 31 1983.

James W. Workman,

Director, Office of Fuels Programs Economic Regulatory Administration.

Interstate Intercorr Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On May 2, 1983, Interstate Intercorr Corporation (INTERCORR), filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 277,785 Mcf of natural gas which is expected to displace the use of approximately 2,000,000 gallons of No. 4 fuel oil (0.2 percent sulfur) per year at its manufacturing facility in Reading, Pennsylvania.

The eligible seller of the natural gas is Exxon-USA, P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 22190, May 17, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed INTERCORR's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that INTERCORR's application satisfies the criterias enumerated in 10 CFR Part 595. We are, therefore, granting the certification and transmitting that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 31, 1983.

James W. Workman,

ITT Grinnell Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On May 2, 1983, ITT Grinnell Corporation (ITT), filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 255,500 Mcf of natural gas which is expected to displace the use of approximately 2,000,000 gallons of No. 2 fuel oil (0.1 percent sulfur) per year at its manufacturing facility in Columbia, Pennsylvania.

The eligible seller of the natural gas is Exxon-USA, P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 22190, May 17, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed ITT's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that ITT's application satisfies the criteria enumerated in 10 CFR Part 595. We are, therefore, granting the certification and transmitting that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 31, 1983.

[ERA Docket No. 83–CERT–110]

ITT Grinnell Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

ITT Grinnel Corporation (GRINNELL), 1411 Lancaster Avenue, Columbia, Pennsylvania 17512 files an application on May 23, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Columbia, Pennsylvania, plant pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, GRINNELL indicated that the volume of natural gas for which it requests certification is approximately 255,500 Mcf per year. This volume is estimated to displace the use of approximately 2,000,000 gallons of No. 2 fuel oil (1.0 percent sulfur) per year.

The eligible seller is Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, W. Virginia 25314, and UGI Corporation (Gas Utility Division), 255 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washigton, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Grinnell and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 1, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 83–CERT–055]

North American Refractories Co.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On May 2, 1983, North American Refractories Company (NARC), filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 182,500 Mcf of natural gas which is expected to displace the use of approximately 1,300,000 gallons of No. 2 fuel oil (0.2 percent sulfur) per year at its manufacturing facility in Womelsdorf, Pennsylvania.

The eligible seller of the natural gas is Exxon-USA, P.O. Box 2180, Houston,

Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 22190, May 17, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed NARC's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that NARC's application satisfies the criteria enumerated in 10 CFR Part 595. We are, therefore, granting the certification and transmitting that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 31, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 82–97–NG]

Texas Eastern Transmission Corp.; Amended Application To Import Natural Gas From Canada

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Amended Application to Import Natural Gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of the receipt on May 17, 1983, of an amendment to the application previously filed by the Texas Eastern Transmission Corporation (Texas Eastern) for authorization to import up to 100,000 Mcf per day of natural gas from Canada beginning November 1, 1985, or as soon thereafter as possible, for fourteen (14) years from date of first delivery. The amendment reduces the term of the authorization requested to twelve (12) years and the volumes sought to 50,000 Mcf of natural gas per day for nine (9) years with declining volumes over the remaining three (3) years of the authorization applied for.

The application is filed with ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–54. Protests or petitions to intervene are invited.

DATE: Protests or petitions to intervene are to be filed no later than 4:30 p.m. on July 8, 1983.

FOR FURTHER INFORMATION CONTACT:

Stanley C. Vass (Natural Gas Division, Office of Fuels Programs), Economic Regulatory Administration, Department of Energy, Forrestal Building, Room GA–007, RG–43, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252–9482

Michael T. Skinker (Officer of General Counsel, Natural Gas and Mineral Leasing, U.S. Department of Energy, Forrestal Building, Room 6E–042, Washington, D.C. 20585, (202) 252–6667

SUPPLEMENTARY INFORMATION: On July 16, 1982, Texas Eastern filed an application with ERA for authorization to import up to 100,000 Mcf per day of Canadian natural gas, and additional daily volumes on a best efforts basis not to exceed ten (10) percent to the maximum daily volumes. As more fully described in the notice issued by ERA on Texas Eastern's original application (47 FR 39715, September 9, 1982), the imported volumes are to be purchased from TransCanada PipeLines Limited (TransCanada) beginning on November 1, 1985, or as soon thereafter as possible, for fourteen (14) years from date of first delivery pursuant to a Gas Purchase Contract to be executed between Texas Eastern and TransCanada.

The amendment to Texas Eastern's application requests authorization to import natural gas from Canada for a twelve (12) year perid plus a one year make-up period from November 1, 1997, to October 31, 1998. Under the make-up provision, quantities of gas paid for but not taken can be made up at a daily rate of 50,000 Mcf, subject to the availability of capacity and deliverability. Make-up quantities are limited to the actual quantities of gas paid for but not taken under the terms of the sales contract or 18,300 MMcf, whichever is less.

The primary term of the authorization commences November 1, 1985, or date of first delivery, in accordance with the following schedule (corresponds to the volumes which the Canadian National Energy Board authorized TransCanada to export to Texas Eastern by a decision issued January 27, 1983):

	Daily (Mcf) [1]	Annual (MMcf) [1]
Nov. 1, 1985 to Oct. 31, 1994	50,000	18,300
Nov. 1, 1994 to Oct. 31, 1995	37,500	13,725
Nov. 1, 1995 to Oct. 31, 1996	25,000	9,150
Nov. 1, 1996 to Oct. 31, 1997	12,500	4,575

[1] Approximate equivalent volumes. The actual volumes which TransCanada is authorized to export are stated in metric standards.

A daily tolerance of two percent is allowed to accommodate temporary operating conditions. The total quantity requested to be imported during the term of the authorization is 192,150 MMcf.

Texas Eastern asserts that the Gas Purchase Contract to be executed with TransCanada will be amended to change the date for obtaining required regulatory authorizations from May 1, 1983, to November 1, 1983. Texas Eastern further asserts that the reduced volumes of imported gas will be transported from the import point near Niagara Falls, Ontario, to its pipeline facilities near Tamarack, Pennsylvania, via the Niagara Interstate Pipeline System (NIPS) rather than through the proposed Trans-Niagara Pipeline as stated in its original application. Texas Eastern notes that it has filed an amended application with the Federal Energy Regulatory Commission, in Docket No. CP83–170–001, with respect to modification of NIPS to accommodate the natural gas to be imported from TransCanada.

The price for the imported natural gas will be the reduced border price of U.S. $4.40 per MMBtu.

Other Information: Any person wishing to become a party to the proceeding, and thus to participate as a party in any conference or hearing which might be convened must file a petition to intervene. Any person may file a protest with respect to this application. The filing of a protest will not serve to make the protestant a party to the proceeding. Protests will be considered in determining the appropriate action to be taken on the application.

All protests and petitions to intervene must meet the requirements specified by the regulations that were in effect on October 1, 1977, in 18 CFR 1.8 and 1.10. They should be filed with the Natural Gas Division. Economic Regulatory Administration, Room GA–007, RG–43, Forrestal Building, 1000 Independence Avenue, S. W., Washington, D.C. 20585. All protests and petitions to intervene

must be filed not later than 4:30 p.m., July 8, 1983.

A hearing will not be held unless a motion is made by a party or person seeking intervention and granted by the ERA, or if the ERA on its own motion believes that a hearing is necessary or required. A person filing a motion must demonstrate how a hearing will advance the proceedings. If a hearing is scheduled, the ERA will provide notice to all parties and persons whose petitions to intervene are pending.

A copy of the amendment to Texas Eastern's application is available for inspection and copying in the Natural Gas Division Docket Room, located in Room GA–007, Forrestal Building, 1000 Independence Avenue, S. W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., June 2, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

Sure Fit Products Co. Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On May 2, 1983, Sure Fit Products Company (SFP), filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 23,725 Mcf of natural gas which is expected to displace the use of approximately 156,000 gallons of No. 6 fuel oil (2.0 percent sulfur) per year at its manufacturing facility in Bethlehem, Pennsylvania.

The eligible seller of the natural gas is Exxon-USA, P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 22190, May 17, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The EPA has carefully reviewed SFP's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that SFP's application satisfies the criteria enumerated in 10 CFR Part 595. We are, therefore, granting the certification and transmitting that certification to the Federal Energy Regulatory commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal Holidays.

Issued in Washington, D.C., May 31, 1983.

United States Steel Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On May 10, 1983, United States Steel Corporation (USS), 600 Grant Street, Pittsburgh, Pennsylvania 15230, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR 595, an application for certification of an eligible use of approximately 37,200 Mcf per day of natural gas as its Fairless Works Steel manufacturing facility in Fairless Hills, Pennsylvania. This volume of gas is expected to displace the use of approximately 5,907 barrels per day of No. 6 fuel oil (1.0 percent sulfur) at the above facility.

The eligible sellers of the natural gas are Texaco, U.S.A., P.O. Box 52332, Houston, Texas 77002; Exxon Company, U.S.A., P.O. Box 2180, Houston, Texas 77001; Oil & Gas Corporation, 2700 Fidelity Union Tower, Dallas, Texas 75201; and Delhi Gas Pipeline Corporation, Fidelity Union Tower, Dallas, Texas 75201. The gas will be transported by Transcontinental Gas Pipe Line Corporation, P.O. Box 1396, Houston, Texas 77251; Ozark Gas Pipeline Corporation, P.O. Box 566, Route 5, Fort Smith, Arkansas 72901; and Natural Gas Pipeline Company of America, 122 South Michigan Avenue, Chicago, Illinois 60603. The local distributor will be Philadelphia Electric

Company, P.O. Box 8699, 2301 Market Street, Philadelphia, Pennsylvania 19101.

Notice of that application was published in the **Federal Register** (48 FR 22785, May 20, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed USS's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that USS's application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Office of Conservation and Renewable Energy

[Case No. F–009]

Energy Conservation Program for Consumer Products; Petition for Waiver of Furnace Test Procedures From Hydrotherm, Inc.

AGENCY: Department of Energy.

SUMMARY: Today's notice publishes a "Petition for Waiver" from Hydrotherm, Inc. (Hydrotherm), requesting a waiver from the existing Department of Energy (DOE) test procedures for furnaces.

The petition requests DOE to grant relief from the furnace test procedure requirements relating to determination of annual fuel utilization efficiency (AFUE). Specifically, the petitioner requests the use of an alternate test procdeure developed by the National Bureau of Standards in lieu of DOE's currently prescribed procedures. DOE is soliciting comments, date, and information respecting the petition.

DATE: DOE will accept comments, data, and information not later than July 8, 1983.

ADDRESSES: Written comments and statements shall be sent to: Department of Energy, Office of Conservation and Renewable Energy, Case No. F–009, Mail Stop CE–113.1, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT:

Michael J. McCabe, U.S. Department of Energy, Office of Conservation and Renewable Energy Mail Station CE–113.1, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–33, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–9513.

SUPPLEMENTARY INFORMATION:

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Pub. L. 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Pub. L. 95–619, 92 Stat. 3266, which requires DOE to prescribed standardized test procedures to measure the energy consumption of certain consumer products including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR Part 430, Subpart B.

DOE has amended the prescribed test procedures by adding 10 CFR § 430.27, Petitions for Waiver to allow the Assistant Secretary for Conservation and Renewable Energy temporarily to waive test procedures for a particular basic model. 45 FR 64108 (September 26, 1980). Waivers may be granted when one or more design characteristics of a basic model either prevent testing of the basic model according to the prescribed test procedures or lead to results so unrepresentative of the model's true energy consumption as to provide materially inaccurate comparative data.

Hydrotherm submitted a petition which contends that when the existing DOE test procedures are applied to its boiler with stepmodulating (variable firing rate) controls the result is materially inaccurate comparative data. The Hydortherm petition seks a waiver from DOE test method basing efficiency determinations on a single firing rate. Additionally, Hydrotherm requests the

use of test method prepared by the National Bureau of Standards (NBS) in lieu of the existing DOE test procedures, specifically the test method outlined in NBSIR–82–2497 entitled *A Test Method and Calculation Procedure for Determining Annual Efficiency for Vented Household Heaters and Furnace Equipped with Modulating—Type Controls*, dated May 1982. This report is available through the National Technical Information Service, Springfield, VA 22161.

Briefly, the NBS method requires that efficiency tests be conducted at reduced and maximum firing rates. The results of these tests along with typical derived values from a bin analysis of weather data allow for the determination of the hours of operation in each mode and consequently a weighted annual efficiency is obtained. These test methods and calculation procedures are based on and are an extension to the current DOE test procedures for the simple-stage type of thermostat control of central furnaces.

Pursuant to paragraph (b) of 10 CFR 430.27, DOE is hereby publishing the "Petition for Waiver" in its entirety. The petition contains no confidential information. DOE solicits comments, data, and information respecting the petition.

Issued in Washington, D.C., June 1, 1983.

Howard S. Coleman,

Principal Deputy Assistant Secretary, Conservation and Renewable Energy.

March 8, 1983.

Joseph J. Tribble, Assistant Secretary, Conservation and Renewable Energy, Department of Energy, Forrestal Building, 1000 Independence Avenue SW., Washington, DC

Re: Petition for Waiver

Dear Sir: This is a petition by Hydrotherm, Inc. for waiver from the test procedure specified in Appendix N to Subpart B contained in 10 CFR Part 43, for determining the relative energy efficiency of furnaces.

Petitioner is a manufacturer of hydronic heating equipment, and is preparing to introduce a cast iron boiler product with step modulating controls which will operate at dual firing rates. However, as presently formulated, the test procedure specified in Appendix N contemplates the use of only a single firing rate in the test calculations. Applying this test to Petitioner's prototype boiler gives results which differ by as much as two or three percentage points depending on which firing rate is used in the calculations. In either case, the results are unrepresentative of the true energy consumption characteristics of Petitioner's boiler and, therefore, provide materially inaccurate comparative data. Faced with this dilemma, Petitioner requests that, until such time as a test procedure appropriate to furnaces which operate at multiple firing rates is issued by the Department of Energy, it be permitted to use as an alternate test procedure the test procedure prepared for the Department of Energy by the National Bureau of Standards entitled, "A Test Method and Calculation Procedure for Determining Annual Efficiency for Vented Household Heaters and Furnaces Equipped with Modulating-Type Controls", a copy of which is attached hereto as Exhibit A.[1] To Petitioner's knowledge, there are no other manufacturers of a boiler incorporating a similar design.

Sincerely,

Hydrotherm, Inc.

John J. Cleary,

Ass't. Secretary and Corporate Counsel.

BILLING CODE 6450–01–M

Office of Energy Research

Energy Research Advisory Board, Light Water Reactor Safety R&D Panel; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770), notice is hereby given of the following meeting.

Name: Light Water Reactor R&D Panel of the Energy Research Advisory Board (ERAB).

Date and time: June 29–30, 1983 from 9 am to 5 pm.

Place: Institute of Nuclear Power Operations, Room, 1336, 1100 Circle 75 Parkway, Atlanta, Georgia 30339.

Contact: Charles E. Cathey, U.S. Department of Energy, Office of Energy Research (ER–6), 1000 Independence Avenue SW., Washington, DC 20585, Telephone: 202/252–8933.

Purpose of the parent board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative Agenda:

- Discussion of draft final report
- Public comment (10 minute rule)

Public participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Charles Cathey at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on June 2, 1983.

J. Ronald Young,

Director of Management.

BILLING CODE 6450–01–M

Energy Research Advisory Board, Materials R&D Panel; Open Meeting

Pursuant to the provisions of the Federal Advisory Commitee Act (Public Law 92–463), 86 Stat. 770), notice is hereby given of the following meeting:

Name: Materials R&D Panel of the Energy Research Advisory Board (ERAB).

Date and Time: June 27–28, 1983 from 8 am to 4 pm.

Place: U.S. Department of Energy, 100 Independence Avenue SW., Room 4A–110, Washington, DC. 20585.

Contact: William Woodward, U.S. Department of Energy, Office of Energy Research (ER–6), 100 Independence Avenue SW., Washington, DC 20585, Telephone: 202/252–8933.

Purpose of the parent board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative agenda:

- Discussion of Initial Working Outline for Draft Report on DOE's Materials R&D Programs
- Reports on laboratory visits
- Public comment (10 minute rule)

Public participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact William Woodward at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–

Energy Research Advisory Board, University Programs Panel; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: University Programs Panel of the Energy Research Advisory Board (ERAB).

Date and Time: June 23, 1983 from 9 am to 5 pm.

Place: U.S. Department of Energy, 1000 Independence Avenue SW., Room 4A-110, Washington, DC 20585.

Contact: Joan Snodderly, U.S. Department of Energy, Office of Energy Research (ER-6), 1000 Independence Avenue SW., Washington, DC 20585, Telephone: 202/252-8933.

Purpose of the Parent Board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative Agenda:

- Discussion of draft final report on DOE's University Support Programs
- Public comment (10 minute rule)

Public participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Joan Snodderly at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on June 2, 1983.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Objection to Proposed Remedial Orders Filed; Period of March 21 Through April 1, 1983

During the period of March 21 through April 1, 1983, the notices of objection to proposed remedial orders listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial orders described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in these proceedings should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Dated: June 1, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

AD Energy, Inc., Oklahoma City, Oklahoma, HRO-0142, crude oil

On April 1, 1983, AD Energy, Inc. and Allen L. Dwight, 12700 St. Andrews, Oklahoma City, Oklahoma 73120 filed a Notice of Objection to a Proposed Remedial Order which the DOE Dallas Office of the Economic Regulatory Administration issued to the firm on February 18, 1983. In the PRO, the Dallas Office found that during the period May 1979 to December 1980, AD Energy resold crude oil at prices in excess of those permitted by 10 CFR Parts 210 and 212, Subparts F and L. According to the PRO, the AD Energy violation resulted in $1,804,574.81 of overcharges.

Allegheny Petroleum Corporation and Gerome R. Smith, Houston, Texas; HRO-0138, crude oil

On March 29, 1983, Allegheny Petroleum Corporation (Allegheny) and Gerome R. Smith (Smith), 14760 Memorial Drive, Suite 307, Houston, Texas 77069 filed a Notice of Objection to a Proposed Remedial Order which the DOE Houston Office of the Economic Regulatory Administration issued to them on February 11, 1983. In the PRO, the Houston Office found that during the period August to December, 1980, Allegheny and Smith violated the crude oil pricing regulations at 10 CFR §§ 212.186 and 210.62(c). According to the PRO, the Allegheny and Smith violation resulted in $344,199.23 of overcharges.

Echo Drilling, Inc., Zanesville, Ohio; HRO-0140, crude oil

On March 31, 1983, Echo Drilling, Inc., 526 Shinnick Street, Zanesville, Ohio 43701 filed a Notice of Objection to a Proposed Remedial Order which the DOE Tulsa Office of the Economic Regulatory Administration issued to the firm on November 5, 1982. In the PRO, the Tulsa Office found that during the period November 1973 to January 1981, Echo Drilling violated crude oil pricing regulations at 10 CFR §§ 212.10, 212.93, and 212.183. According to the PRO, the Echo Drilling violation resulted in $354,450.18 of overcharges.

Hudson Oil Co., Kansas City, Missouri; HRO-0141, crude oil

On April 1, 1983, Hudson Oil Co., Box 907, Kansas City, Missouri 76102 filed a Notice of Objection to a Proposed Remedial Order which the DOE Office of Special Counsel of the Ecomomic Regulatory Administration issued to the firm on February 28, 1983. In the PRO, the Office of Special Counsel found that during the period August 1980 to December 1980, the company improperly reported the purchase of upper tier and lower tier crude oil as uncontrolled oil, improperly certified oil as upper tier, and failed to file Refiners Monthly reports. According to the PRO, the Hudson Oil Co. violation resulted in $1,189,983.78 of overcharges.

The Parade Company, Shreveport Louisiana; HRO-0137, NGL'S, propane

On March 28, 1983, The Parade Company, 1307 Petroleum Tower, Shreveport, Louisiana, filed a Notice of Objection to a Proposed Remedial Order which the DOE Office of Special Counsel of the Economy Regulatory Administration, issued to the firm on February 11, 1983. In the PRO, the Office of Special Counsel found that during the period February 1975 through December 1980 The Parade Company charged prices for natural gas liquids and propane which exceeded the prices permitted by the applicable regulations. According to the PRO, The Parade Company violation resulted in $1,716,465.25 of overcharges.

Strasburger Enterprises, Temple, Texas; HRO-0139, motor gasoline

On March 31, 1983, Straburger Enterprises, Inc., 4 North Third Street, Temple, Texas 76501 filed a Notice of Objection to a Proposed Remedial Order which the DOE Southeast District Office of Enforcement issued to the firm on September 21, 1982. In the PRO the Southeast District found that during the period January 1, 1979 through September 30, 1979, Strasburger sold motor gasoline at prices in excess of its maximum lawful selling prices computed in accordance with the price regulations set forth at 10 CFR § 212.93. According to the PRO, the

Strasburger violation resulted in $1,469,954.34 of overcharges.

[FR Doc. 83-15327 Filed 6-7-83; 8:45 am]

BILLING CODE 6450-01-M

Objection to Proposed Remedial Order Filed; Week of May 2 Through May 6, 1983

During the week of May 2 through May 6, 1983, the notice of objection to the proposed remedial order listed in the Appendix to this Notice was filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial order described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in this proceeding should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Dated: June 1, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Hideca Petroleum Corporation, Houston, Texas; HRO-0150, crude oil

On May 5, 1983, Hideca Petroleum Corporation, One Riverway, Suite 2480, Houston, Texas 77056, filed a Notice of Objection to an Amended Proposed Remedial Order which the Houston Office of the DOE Economic Regulatory Administration issued to the firm on April 8, 1983. The Amended PRO finds that during the period October 1978 through November 1979, Hideca charged prices in excess of its actual purchase prices without performing any service or other function traditionally associated with the resale of crude oil, in violation of 10 CFR Sections 205.202, 210.62(c), and 212.186, resulting in overcharges of $7,847,940.48. In addition, the PRO alleges that during the months of March, April, May, September, and October of 1979, Hideca resold crude oil at a monthly average markup in excess of the applicable permissable average markup in violation of 10 CFR Section 212.183, resulting in overcharges of $1,138,627.00. Finally, the PRO finds that during the months of January, March, June, and December of 1980, Hideca resold crude oil at a monthly average markup in excess of the applicable permissable average markup in violation of 10 CFR Section 212.183, resulting in overcharges of $6,510,712.00. The PRO therefore concludes that Hideca should refund overcharges of $14,358,652.48, plus interest.

[FR Doc. 83-15328 Filed 6-7-83; 8:45 am]

BILLING CODE 6450-01-M

Southeastern Power Administration

Order Confirming and Approving Power Rates on an Interim Basis

AGENCY: Department of Energy, Southeastern Power Administration (SEPA).

ACTION: Notice of Approval on an Interim Basis of Cumberland Basin Projects' Rates.

SUMMARY: On May 31, 1983, the Assistant Secretary for Conservation and Renewable Energy confirmed and approved, on an interim basis, two replacement rate schedules, CR-1-E and CR-2-E, for Cumberland Basin Projects' power. The rates were approved on an interim basis through June 30, 1984, and are subject to confirmation and approval by the Federal Energy Regulatory Commission on a final basis.

DATES: Approval of rates on an interim basis is effective on July 1, 1983.

FOR FURTHER INFORMATION CONTACT:

Leon Jourolmon, Jr., Chief, Division of Fiscal Operations, Southeastern Power Administration, Department of Energy, Samuel Elbert Building, Elberton, Georgia 30635

John J. DiNucci, Office of Power Marketing Coordination, Department of Energy, 12th Street and Pennsylvania Avenue, NW., Washington, D.C. 20461

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission by order issued February 27, 1981, in Docket No. EF79-3021 confirmed and approved Wholesale Power Rate Schedules CR-1-D and CR-2-D through June 30, 1983. Rate Sechedule CR-1-E replaces CR-1-D and Rate Schedule CR-2-E replaces CR-2-D.

Issued in Washington, D.C., on May 31, 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

Assistant Secretary for Conservation and Renewable Energy

May 31, 1983.

In the Matter of: Southeastern Power Administration—Cumberland Basin Projects's Power Rates; Order Confirming and Approving Power Rates on an Interim Basis; Rate Order No. SEPA-16.

Pursuant to Sections 302(a) and 301(b) of the Department of Energy Organization Act, Pub. L. 95-91, the functions of the Secretary of the Interior and the Federal Power Commission under Section 5 of the Flood Control Act of 1944, 16 U.S.C. 825s, relating to the Southeastern Power Administration (SEPA) were transferred to and vested in the Secretary of Energy. By Delegation No. 0204-33, effective January 1, 1979, 43 FR 60636 (December 28, 1978), the Secretary of Energy delegated to the Assistant Secretary for Resource Applications the authority to develop power and transmission rates, acting by and through the Administrator, and to confirm, approve, and place in effect such rates on an interim basis and delegated to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. Due to a Department of Energy organizational realignment, Delegation Order No. 0204-33 was amended, effective March 19, 1981, to transfer the authority of the Assistant Secretary for Resource Applications to the Assistant Secretary for Conservation and Renewable Energy. This rate order is issued pursuant to the delegation to the Assistant Secretary for Conservation and Renewable Energy.

Background

Power from the Cumberland Basin Projects is presently sold under Wholesale Power Rate Schedules CR-1-D and CR-2-D confirmed and approved through June 30, 1983. These rate schedules were approved by the Federal Energy Regulatory Commission on February 27, 1981, for a period beginning July 1, 1978, and ending June 30, 1983.

Public Notice and Comment

Opportunities for public review and comment on revised Rate Schedules CR-1-E and CR-2-E, proposed for use during the period July 1, 1983, through June 30, 1984, were announced by Notice published in the **Federal Register** on March 24, 1983, and all customers were notified by mail. A Public Information and Comment Forum was held in Nashville, Tennessee, on April 26, 1983, and written comments were invited by the Notice through May 13, 1983. No oral or written comments were reviewed.

Discussion

System Repayment

An examination of SEPA's system power repayment study, prepared in March 1983, for the Cumberland Basin Projects, reveals that with an annual revenue increase of $2,415,00 over the

current revenues shown in a previous March 1983 SEPA repayment study, all system power costs are paid within their repayment life. Additionally, it appears that Rate Schedules CR–1–E and CR–2–E are designed so as to produce revenue adequate to recover on a timely basis all system power costs.

Rate Design

Because the rates are expected to be in effect for only a one-year period and since the existing rate forms were designed specifically to dovetail into the continuing sales pattern, it was decided that the current rate forms would be maintained. The proposed rate schedules were drawn on the basis of increasing all rates by an identical 13 percent.

Environmental Impact

SEPA has reviewed the possible environmental impacts of the rate adjustment under consideration and has concluded with Departmental concurrence that, because the increased rates would not significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, the proposed action is not a major Federal action for which preparation of an Environmental Impact Statement is required.

Availability of Information

Information regarding these rates including studies, and other supporting materials is available for public review in the offices of Southeastern Power Administration, Samuel Elbert Building, Elberton, Georgia 30635, and in the Office of the Director of Power Marketing Coordination, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Submission to the Federal Energy Regulatory Commission

The rates hereinafter confirmed and approved on an interim basis, together with supporting documents, will be submitted promptly to the Federal Energy Regulatory Commission for confirmation and approval on a final basis for a period beginning July 1, 1983, and ending no later than June 30, 1984.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby confirm and approve on an interim basis, effective July 1, 1983, attached Wholesale Power Rate Schedules CR–1–E and CR–2–E. The rate schedules shall remain in effect on an interim basis through June 30, 1984, unless such period is extended or until the FERC confirms and approves them or substitute rate schedules on a final basis.

Issued in Washington, D.C., this 31st day of May 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

Southeastern Power Administration—Wholesale Power Rate Schedule CR-1-E

Availability

This rate schedule shall be available to the Tennessee, Valley Authority (hereinafter called TVA).

Applicability

This rate schedule shall be applicable to electric power and energy generated at the Dale Hollow, Center Hill, Wolf Creek, Old Hickory, Cheatham, Barkley, J. Percy Priest, and Cordell Hull Projects (all of such projects being hereafter called collectively the "Cumberland Projects") and sold under contract between the Department of Energy and TVA.

Character of Service

The electric power and accompanying energy sold hereunder will be three-phase alternating current at a frequency of approximately 60 Hertz at the outgoing terminals of the Cumberland Projects' switchyards.

Rates

The payments to the Department of Energy by TVA hereunder for availability of capacity and deliveries of energy from the Cumberland Projects are estimated to produce over a period of years an average annual payment of $20,840,000 which amount is hereinafter referred to as the "Basic Annual Charge."

The Basic Annual Charge shall be the applicable annual charge for each year (ending June 30) in which the average unregulated flow of water into Wolf Creek Reservoir as determined hereinafter is between 8,500 and 9,250 c.f.s. To determine the applicable annual charge in other years, the basic Annual Charge shall be adjusted in accordance with variations in said flow of water as follows: For each 750 c.f.s. or fraction thereof by which said flow of water for the year is greater than 9,250 c.f.s., the applicable annual charge shall be greater by $680,000; for each 500 c.f.s. or fraction thereof by which said flow of water for the year is less than 8,500 c.f.s., the applicable annual charge shall be less by $750,000; provide, that the applicable annual charge for any year shall be not less than $17,840,000 nor more than $23,560,000.

Wholesale Power Rate Schedule CR-1-E

Unless otherwise mutually agreed, the annual unregulated flow of water into the Wolf Creek Reservoir will be established from a consideration of the unadjusted discharge registered at Rowena Gauging Station as determined by the U.S. Geological Survey, adjusted for changes in storage at all reservoirs upstream from said station, in accordance with capacity ratings by the owners thereof, and for other possible factors which may be mutually agreed upon by the parties.

TVA shall pay the applicable annual charge to Energy in monthly installments as follows:

A. For each of the months July through December, the monthly installment payment shall be $1,573,000.

B. For the month of January and for each succeeding month through June, the installment payment for each month shall be the amount computed for that month as follows:

1. The estimated applicable annual charge will first be computed using an estimated average flow for the year determined by combining the inflow from the beginning of the fiscal year through the month for which the installment is being computed with the minimum probable inflow for the remainder of the fiscal year as listed in Table I below opposite the month for which said payment is being computed.

2. The installment payment will then be determined by taking the difference between the estimated applicable annual charge for the fiscal year as determined under I. and the total of the installment payments for the preceding months in that fiscal year and multiplying said difference by the percentage listed in Table II opposite the month for which the installment payment is being computed.

Month	Table I (Second-foot days)	Table II (Percentage)
January	800,000	20
February	700,000	35
March	2,461,000	55
April	50,000	40
May	7,800	50
June	0	100

Wholesale Power Rate Schedule CR-1-E

C. In the event that the total of the monthly installment payments for any fiscal year exceeds the applicable annual charge for that fiscal year, the

excess shall be credited against the monthly installment payments for the succeeding fiscal year.

Credits for Retained Power

The applicable annual charge shall be adjusted as follows to compensate for the retention of Peaking Power, Stanby Power, and "special" emergency Standby Power and the transfer of retained power and energy for sale by the Administrator of Southeastern Power Administration to Other Customers. For each Supply Year, beginning November 1, the applicable charges shall be reduced by:

a. $20.20 per kw of Peaking Power Base Amount retained by Administrator.

b. $5.49 per kw of the Contract Standby Demand of the Administrator's first Other Customer, plus $3.66 per kw of the sum of the Contract Standby Demands of the second and third Other Customers. For purposes hereof, such "first" Other Customer shall be the one with the largest Contract Standby Demand.

c. 7.2 cents per calendar day (or fraction thereof) per kw of emergency Standby Power used in November, April, May, June, September, and October of each Supply Year, and 11.2 per calendar day (or fraction thereof) per kw of the emergency Standby Power used during any other period of the year.

d. 3.68 mills per kwh of energy associated with the Peaking Power Base Amount and of the energy scheduled with the use of maintenance Standby Power.

e. 6.01 mills per kwh of energy scheduled with the use of emergency Standby Power.

f. $28.80 per kilowatt of the maximum amount, if any, by which the capacity used by the Other Customers exceeds the amount of the Cumberland Capacity to which the Administrator is entitled. For purposes of this subsection, the Administrator shall be entitled at any time to the sum of the following:

(1) The total of Peaking Power retained by the Administrator for use at that time by all of the Other Customers, and

(2) If the Administrator at that time is delivering Standby Power to any Other Customers, the Contract Standby Demand of that Customer and any amount that is being retained as "special" emergency Standby Power at that time.

Notwithstanding the foregoing, insofar as such excess consists of excess emergency Standby Power takings, the reduction provided for in this subsection f. shall not apply to the first 100 mw for the first 24 hours of the first four occasions of the emergency excess takings in any Supply Year caused by outages of generating units of the Aministrator's Other Customers occuring simultaneously with scheduled outages or other emergency outages.

g. 6.01 mills per kwh of the energy taken in any hour in excess of the amount of energy to which the Administrator is entitled.

During each month of a Supply Year, the monthly installments due shall be reduced by one-twelfth of the sum of the amounts of the annual reductions computed under a. and b. above, and by the sum of the amounts of the reductions computed under c, d, e, f, and g above for the month.

Service Interruption

When delivery of power to TVA is interrupted or reduced due to failure of facilities at any of the Cumberland Projects and whenever such interruption of reduction results in a loss for a continuous period of more than 31 days of installed capacity (name plate) in excess of 50 megawatts or loss of an entire project, the payments to be made by TVA for the months in which such interruption affects the delivery of power shall be adjusted; provided, however, that no monthly bill will be adjusted until there is a net cumulative monetary credit due TVA. Monthly adjustments will be determined as follows:

a. Adjustments for changes in energy deliveries will be determined by multiplying the change in energy determined by the Administrator to have resulted from the interruption or reduction by 3.57 mills per kilowatt-hour.

b. Adjustments for installed capacity losses for each month in which the interruption or reduction occurs for more than half the hours in the month will be determined by multiplying the name plate capacity determined by the Administrator to have been lost as a result of the interruption or the reduction by $1.02 per kilowatt.

July 1, 1983

Wholesale Power Rate Schedule CR-2-E

Availability

This rate schedule shall be available to the Big Rivers Electric Corporation; Indiana Statewide Rural Electric Cooperative, Incorporated, Hoosier Energy Division; Southern Illinois Power Cooperative; and East Kentucky Power Cooperative (hereinafter individually called Customer; collectively, Customers).

Applicability

This rate schedule shall be applicable to Peaking Power, Standby Power, and "special" emergency Standby Power, together with accompanying energy generated at the Dale Hollow, Center Hill, Wolf Creek, Cheatham, Old Hickory, Barkley, J. Percy Priest, and Cordell Hull Projects (all of such projects being hereinafter called collectively the "Cumberland Projects") and sold in wholesale quantities.

Character of Service

The electric capacity and energy supplied hereunder will be three-phased alternating current at a frequency of 60 cycles per second and shall be delivered at nominal voltages of 13,800 volts and 161,000 volts to the transmission systems of the Big Rivers Electric Corporation and the East Kentucky Power Cooperative. The points of delivery to the Big Rivers EC transmission system will be one at 13,800 volts and two at 161,000 volts in the vicinity of the Barkley Dam Power Plant and another point of delivery at 161,000 volts from the TVA transmission system in the vicinity of Paradise, Kentucky. The point of delivery for East Kentucky PC will be at the 161,000 volt bus of the Wolf Creek Power Plant. Other points of delivery may be as agreed upon.

Monthly Rate

The monthly rate for capacity and energy sold under this rate schedule shall be:

Demand Charge

$18.96 per Supply Year for each kilowatt of the Contract Peaking Demand, payable $1.58 per billing month.

$4.61 per Supply Year for each kilowatt of the Contract Standby Demand, payable in equal monthly installment payments of one-twelfth of the annual charge.

$0.072 per calendar day (or fraction thereof) per kw of Standby Power delivered for emergency purposes in November, April, May, June, September, and October of each Supply Year, and $0.112 per calendar day (or fraction thereof) per kilowatt of the Standby Power delivered for emergency purposes during any other period of the year.

Whenever a Customer's use of standby capacity for emergency outage is reduced during a day because of emergency outage of another or other Customers, the Customer first using emergency standby capacity shall pay the daily use charge to the extent of his maximum usage. Other Customers shall pay a daily use charge that day only to the extent that they cause a higher maximum to be established.

A Supply Year is a year beginning November 1.

Energy Charge

4.75 mills per kilowatt-hour for all Peaking Energy.

3.68 mills per kilowatt-hour for all maintenance Standby Energy.

6.01 mills per kilowatt-hour for all emergency Standby Energy.

"Special" Emergency Standby Power

"Special" emergency Standby Power from the Cumberland capacity can be made available by the Government to any particular Customer for periods of not less than one week. Any such amounts of power so made available and bought by said Customer shall be at rates as agreed upon by the operating representatives of the parties prior to commencing delivery.

Billing Month

The billing month of power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Conditions of Service

The Standby Capacity and Peaking Capacity and the associated Standby Energy and Peaking Energy sold to Customers under this rate schedule shall come exclusively from capacity and energy available from the Cumberland Projects and retained by the Administrator. Standby Capacity shall be used by Customers only to replace loss of generation on their systems because of maintenance and/or emergency outages of their generating equipment. Maintenance outages shall be a matter of coordination between the Government and the Customers.

The rates and charges for Standby Capacity purchased are predicated upon the purchase of such capacity by three customers.

Each Customer is prohibited from using in any Supply Year and Standby Capacity and Peaking Capacity in excess of the capacity to which it is entitled. Should the power used by any individual Customer exceed the capacity to which it is entitled in any sixty (60) consecutive minute period in any Supply Year, such Customer shall pay the Government $28.80 per kilowatt of the largest such excess occuring during that year through the current billing period. Notwithstanding the foregoing, insofar as such excess consists of emergency Standby Power takings by a Customer caused by outages of generating units of any of the three Customers occurring simultaneously with scheduled outages or other emergency outages, the payment provided herein shall not apply to the first 100 mw for the first 24 hours of the first four occasions of the emergency takings in any Supply Year; provided, that the first four occasions provided herein are a total for the three Customers and will be applied to the first four excess emergency takings by the Customers in the order of their occurrence. Each Customer shall also pay the Government 6.01 mills per kilowatt-hour for Standby Energy taken in any hour in excess of the amount of energy to which such Customer is entitled.

The terminal equipment required for delivery of power at the Barkley switchyard will be furnished by the Government, and the terminal equipment required at any other point of delivery agreed upon with Big Rivers will be furnished by Big Rivers. The costs of the terminal equipment required for delivery of power at the Wolf Creek Power Plant to East Kentucky shall be borne by the Government.

Unless otherwise agreed, the interconnected electric systems of the Customers and the system of TVA shall be operated in parallel and such Customers shall not interconnect their respective systems with other power systems that are normally operated in parallel with TVA's system.

Service Interruption

When capacity made available and sold under this rate schedule is reduced or interrupted for sixty (60) minutes or longer and such reduction or interruption is not due to conditions on the individual Customer's system, (a) the monthly demand charge for Standby Capacity for the billing month shall be reduced for billing purposes for each hour (the nearest number of whole hours) that such capacity is reduced or interrupted, by an amount equal to one-twelfth of the annual charge divided by the number of hours in the billing month times the reduction, in kilowatts, of such capacity, (b) the monthly charge for Peaking Capacity for the billing month shall be reduced for billing purposes, for each hour (the nearest number of whole hours) that such capacity is reduced or interrupted, by an amount equal to $1.58 divided by the number of hours in the billing month times the reduction, in kilowatts, of such capacity, and (c) the amount of Peaking Energy which such Customer had scheduled but did not receive on the day or days of interruption may be rescheduled and taken by such Customer not later than the close of the then current Supply Year.

Dated: July 1, 1983.

BILLING CODE 6450-01-M

Order Confirming and Approving Power Rates on an Interim Basis

AGENCY: Department of Energy, Southeastern Power Administration (SEPA).

ACTION: Notice of Approval on an Interim Basis of Laurel Project's Rates.

SUMMARY: On May 31, 1983, the Assistant Secretary for Conservation and Renewable Energy confirmed and approved, on an interim basis, replacement rate schedule, LP-1-A for Laurel Project's power. The rates were approved on an interim basis through June 30, 1984, and are subject to confirmation and approval by the Federal Energy Regulatory Commission on a final basis.

DATE: Approval of rates on an interim basis is effective on July 1, 1983.

FOR FURTHER INFORMATION CONTACT:

Leon Jourolmon, Jr., Chief, Division of Fiscal Operations, Southeastern Power Administration, Department of Energy, Samuel Elbert Building, Elberton, Georgia 30635

John J. DiNucci, Office of Power Marketing Coordination, Department of Energy, 12th Street and Pennsylvania Avenue, NW., Washington, D.C. 20461

SUPPLEMENTARY INFORMATION: The Federal Power Commission by Order issued October 25, 1979, in Docket No. EF79-3052 confirmed and approved Wholesale Power Rate Schedule LP-1 through June 30, 1983. Rate Schedule LP-1-A replaces LP-1.

Issued in Washington, D.C., May 31, 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

May 31, 1983.

Assistant Secretary for Conservation and Renewable Energy

In the Matter of: Southeastern Power Administration Laurel Project's Power Rates, Rate Order No. SEPA-17; Order confirming and Approving Power Rates on an Interim Basis.

Pursuant to Sections 302(a) and 301(b) of the Department of Energy Organization Act, Pub. L. 95-91, the function of the Secretary of the Interior and the Federal Power Commission under Section 5 of the Flood Control Act of 1944, 16 U.S.C. 825s, relating to the Southeastern Power Administration (SEPA) were transferred to and vested in the Secretary of Energy. By Delegation Order No. 0204-33, effective January 1, 1979, 43 FR 60636 (December 28, 1978), the Secretary of Energy delegated to the Assistant Secretary for

Resource Applications the authority to develop power and transmission rates, acting by and through the Administrator, and to confirm, approve, and place in effect such rates on an interim basis and delegated to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. Due to a Department of Energy organizational realignment, Delegation Order No. 0204–33 was amended, effective March 19, 1981, to transfer the authority of the Assistant Secretary for Resource Applications to the Assistant Secretary for Conservation and Renewable Energy. This rate order is issued pursuant to the delegation to the Assistant Secretary for Conservation and Renewable Energy.

Background

Power from the Laurel Project is presently sold under Wholesale Power Rate Schedule LP–1 confirmed and approved through June 30, 1983.

Public Notice and Comment

Opportunities for public review and comment on revised Rate Schedule LP–1–A, proposed for use during the period July 1, 1983, through June 30, 1984, were announced by Notice published in the **Federal Register** on March 24, 1983, and all customers were notified by mail. A Public Information and Comment Forum was held in Nashville, Tennessee, on April 26, 1983, and written comments were invited by the Notice through May 13, 1983. No oral or written comments were received.

Discussion

System Repayment

An examination of SEPA's system power repayment study, prepared in March 1983, for the Laurel Project, reveals that with an annual revenue increase of $223,000 over the revenues shown in its previously referenced current repayment study dated March 1983, all system power costs are paid within their repayment life. Additionally, it appears that Rate Schedule LP–1–A is designed so as to produce revenue adequate to recover on a timely basis all system power costs.

Rate Design

In Rate Schedule LP–1–A charges are divided between capacity and energy. The capacity charge has been increased by $0.21 per kilowatt of monthly demand to a rate of $1.58 per kilowatt per month which amounts to a 15 percent increase. The energy rate has been increased by .69 mills per kilowatt-hour to a rate of 4.89 mills per kilowatt-hour which amounts to a 16 percent increase.

Environmental Impact

SEPA has reviewed the possible environmental impact of the rate adjustment under consideration and has concluded with Departmental concurrence that, because the increased rates would not significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, the proposed action is not a major Federal action for which preparation of an Environmental Impact Statement is required.

Availability of Information

Information regarding these rates including studies, and other supporting materials is available for public review in the offices of Southeastern Power Administration, Samuel Elbert Building, Elberton, Georgia 30635, and in the Office of the Director of Power Marketing Coordination, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Submission to the Federal Energy Regulatory Commission

The rates hereinafter confirmed and approved on an interim basis, together with supporting documents, will be submitted promptly to the Federal Energy Regulatory Commission for confirmation and approval on a final basis for a period beginning July 1, 1983, and ending no later than June 30, 1984.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby confirm and approve on an interim basis, effective July 1, 1983, attached Wholesale Power Rate Schedule LP–1–A. The rate schedule shall remain in effect on an interim basis through June 30, 1984, and unless such period is extended or until the FERC confirms and approves it or a substitute rate schedule on a final basis.

Issued in Washington, D.C., this 31st day of May 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

Southeastern Power Administration—Wholesale Power Rate Schedule LP–1–A

Availability

This rate schedule shall be available to East Kentucky Power Cooperative, Incorporated (hereinafter called Customer).

Applicability

This rate schedule shall be applicable to power generated at the Laurel Project, in excess of requirements for operation of the Project, and sold under contract between the Department of Energy and the Customer.

Character of Service

The electric capacity and energy supplied hereunder will be three-phase alternating current at a frequency of 60 cycles per second and shall be delivered at the interconnection of the Customer's 161,000 volt transmission line and the 161,000 volt bus at the Project's power plant.

Monthly Rate

The monthly rate for capacity and energy sold under this rate schedule shall be:

Demand Charge

$1.58 per kilowatt for all dependable capacity made available.

Energy Charge

4.89 mills per kilowatt-hour for all energy.

Billing Month

Bills for power sold under this schedule shall be rendered on a calendar month basis.

Late Payment Charge

If the Customer fails to pay any bill when due, an interest charge of two percent (2%) of the amount unpaid shall be added thereto as liquidated damages; and thereafter, as further liquidated damages, an interest charge of one percent (1%) of the principal sum unpaid shall be added for each thirty (30) day period occurring after the original due date that said bill remains unpaid.

Service Interruption

The charge for capacity made available to the Customer shall, in case of interruption or reduction due to conditions on the Government system not arranged for and agreed to in advance, be reduced in accordance with the following formula:

$$\text{Number of kilowatts unavailable for at least 12 hours in any calendar day} \times \frac{\$1.58}{\text{Number of days in billing month}}$$

Effective: July 1, 1983.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[PF-327; PH-FRL #2374-8]

Certain Companies; Pesticide Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each petition at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number (PF-327) and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues where required, is given in each petition.

Initial Petitions

1. *PP 3F2868.* Medical Products Division/3M, 3M Center, St. Paul, MN 55144. Proposes amending 40 CFR Part 180 by establishing an exemption from the requirement of a tolerance for the residues of the chemicals polymethylene, polyphenyl, isocynate and tetranethylanepentamine in shellwall encapsulating material. The proposed analytical method for determining residues is gas chromatography. (PM-21, Henry Jacoby, 703-557-1900).

2. *PP 3F2865.* BASF Wyandotte Corp., 100 Cherry Hill Rd., P.O. Box 181, Parsippany, NJ 07054. Proposes amending 40 CFR 180.355 by establishing tolerances for the combined residues of the herbicide bentazon (3-isopropyl-1-*H*-2,1,3-benzothiadazin-4-(3*H*)-one-2,2-dioxide) and its 6- and 8-hydroxy metabolites in or on the commodities sorghum; fodder and grain at 0.05 ppm, and forage at 0.20 ppm. The proposed analytical method for determining residues is gas chromatography using a flame photometric detector in the sulfur specific mode (394 nm). (PM-25, Robert Taylor, 703-557-1800).

3. *PP 3F2873.* Mobay Chemical Corp., P.O. Box 4913, Hawthorn Rd., Kansas City, MO 64120. Proposes amending 40 CFR 180.332 by increasing the established tolerance for the combined residues of the herbicide 4-amino-6-(1,1-dimethylethyl)-3-(methylthio)-1,2,4-triazin-5(4*H*)-one and its triazinone metabolites in or on the commodities corn; fodder and forage +03.0 ppm. The proposed analytical method for determining residues is gas chromatography using an electron capture detector. (PM-25, Robert Taylor, 703-557-1800).

4. *PP 3F2874.* Elanco Products Co., 740 South Alabama St., Indianapolis, IN 46285. Proposes amending 40 CFR 180.304 by establishing tolerances for residues of the herbicide oryzalin (3,5-dinitro-N^4,N^4-dipropylsulfanilamide) in or on the raw agricultural commodities barley and wheat grain at 0.05 ppm. The proposed analytical method for determining residues is gas chromatography using an electron capture detector. (PM-25, Robert Taylor, 703-557-1800).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 346))

Dated: May 23, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPTS-00042; TBH-FRL 2378-5]

Administrator's Toxic Substances Advisory Committee; Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: The Administrator's Toxic Substances Advisory Committee (ATSAC) will convene to discuss activities of the Office of Toxic Substances including a brief program update, rulemaking for inadvertent generation of PCBs, asbestos in public buildings, and a conclusion of biotechnology discussions. The meeting will be open to the public.

DATE: The meeting will take place on Tuesday, June 28, 1983, at 9:00 a.m. and adjourn by 3:00 p.m.

ADDRESS: The meeting will be held in: Rm. M-3908, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT:

Marylouise Uhlig, Designated Federal Official, Administrator's Toxic Substances Advisory Committee (TS-788), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-637, 401 M St. SW., Washington, D.C. 20460, (202-382-2906), or

Laura W. Cross, Executive Secretary, Administrator's Toxic Substances Advisory Committee (TS-788), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-637, 401 M St. SW., Washington, D.C. 20460, (202-382-2922).

SUPPLEMENTARY INFORMATION: The ATSAC agenda will begin with opening remarks by Don Clay, Acting Assistant Administrator for Pesticides and Toxic Substances. At 9:30 a.m., an update on program activities of the last three months will be provided by staff from the Office of Toxic Substances (OTS). During the morning session, representatives from OTS will report on the offices' activities and viewpoints regarding the inadvertent generation of PCBs. The Agency has requested that the ATSAC review a proposal submitted jointly by the Environmental Defense Fund, the National Resource Defense Council, and the Chemical Manufacturers Association for regulating the inadvertent generation of PCBs. The OTS staff will also discuss its asbestos in public buildings survey and seek ATSAC comments on approaches to reducing any risks.

In the afternoon session, representatives from OTS and ATSAC will discuss biotechnology issues and ATSAC will conclude its discussion of biotechnolgy at that time. The ATSAC committee will also discuss the possible establishment of subcommittees to cover areas of concern under TSCA.

The meeting will be open to the public, and time will be set aside for public comments in each area of discussion. Any member of the public wishing to present an oral or written statement relating to the Committee's work should contact the ATSAC staff at the address or phone numbers listed above.

Dated: June 2, 1983.

Don R. Clay,

Acting Assistant Administrator for Pesticides and Toxic Substances.

[FR Doc. 83-15283 Filed 6-7-83; 8:45 am]

BILLING CODE 6560-50-M

[PF-331; PH-FRL 2377-6]

Mobay Chemical Co.; Feed Additive Petition; Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Mobay Chemical Corp. submitted feed additive petition 6H5149 proposing the establishment of tolerances for the combined residues of the nematocide ethyl 3-methyl-4-(methylthio)phenyl) (1-methylethyl)phosphoramidate and its cholinesterase-inhibiting metabolites in or on certain raw agricultural commodities. Mobay has amended the petition.

ADDRESS: Written comments to: Henry Jacoby, Product Manager (PM) 21, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 229, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Henry Jacoby, (703-557-1900).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of October 19, 1976 (41 FR 46020) which announced that Mobay Chemical Corp., PO Box 4913, Hawthorn Rd., Kansas City, MO 64120, had submitted feed additive petition 6H5149 to the Agency proposing to amend 21 CFR 561.232 by establishing a regulation permitting the use of the nematocide ethyl 3-methyl-4-(methylthio)phenyl) (1-methylethyl)phosphoramidate with a tolerance limitation of 1.0 part per million (ppm) for residues of the pesticide and its cholinesterase-inhibiting metabolites in pineapple bran and cannery waste resulting from the pesticide's application to the growing crop. Mobay Chemical Corp. subsequently amended the petition (48 FR 11162, March 16, 1983) by:

(1) Adding the metabolites ethyl 3-methyl-4-(methylsulfinyl)-phenyl (1-methylethyl)phosphoramidate and ethyl 3-methyl-4-(methylsulfonyl)phenyl (1-methylethyl)phosphoramidate.

(2) Deleting pineapple bran and cannery waste at 1.0 ppm and establishing a regulation for pineapple bran at 3.0 ppm.

Mobay Chemical Corp. has amended the petition for the second time proposing the tolerance limitation for pineapple bran be revised from 3.0 ppm to 10.0 ppm.

(Sec. 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348)).

Dated: May 27, 1983.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

On May 26, 1983, the Federal Communications Commission submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511.

Copies of this submission are available from Richard D. Goodfriend, Agency Clearance Officer, (202) 632-7513. Persons wishing to comment on this information collection should contact David Reed, Office of Management and Budget, Room 3235 NEOB, Washington, D.C. 20503; (202) 395-7231.

Title: Renewal Notice and Certification in the Private Operational Fixed Microwave Radio Service.

Form No.: FCC 402-R.

Action: New.

Respondents: Businesses, non-profit institutions, State or local governments eligible to hold a radio station authorization in the Private Operational Fixed Microwave Radio Service.

Estimated Annual Burden: 2,250 Responses; 2,250 Hours.

This proposed new form is a computer-generated renewal notice which will be sent to licensees 90 days prior to expiration. If no changes or additions to the technical data are necessary, the licensee need only sign and return the form to FCC in lieu of completing FCC Form 402 in its entirety.

William J. Tricarico,

Secretary, Federal Communications Commission.

Radio Advisory Committee Meets

June 29, 1983.

The next meeting of the Advisory Committee on Radio Broadcasting has been scheduled at 9:30 a.m., Wednesday June 29, 1983, in Room 330, 1200 19th Street, NW., Washington, D.C.

The Committee will consider recommendations to the FCC concerning:

—The development of a new bilateral agreement between the United States and Canada on AM broadcasting which will implement the Final Acts of the 1981 Rio de Janeiro Conference on AM broadcasting in Region 2 and supersede the North American Regional Broadcasting Agreement (NARBA).

—The development of similar revisions to the U.S. Mexican AM Radio Broadcasting Agreement; and

—Other Business.

The meetings of the Committee are public, and are open for participation by all interested persons. The meeting scheduled for June 29, 1983 may, if the participants so decide, be recessed for resumption at such other time and place as they may designate.

For further information please contact the Committee Chairman, Louis C. Stephens or in his absence Jonathan David at FCC Headquarters, (202) 632-7792.

William J. Tricarico,

Secretary, Federal Communications Commission.

Telecommunications Industry Advisory Group, Plant Accounts Subcommittee; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group (TIAG) Plant Accounts Subcommittee scheduled to meet on Wednesday and Thursday, June 22 and 23, 1983. The meeting will begin on June 22 at 9:30 a.m. in the offices of AT&T, Conference Room D located at 1120 20th Street, N.W., Washington, D.C., and will be open to the public. The agenda is as follows:

I. General Administrative Matters
II. Review of Minutes of Previous Meeting
III. Report by Subcommittee Members
IV. Discussion of Definitions of Plant Accounts
V. Further Assignments
VI. Other Business
VII. Presentation of Oral Statements
VIII. Adjournment

With prior approval of Subcommittee Chairman Gyles Norwood, oral statements, while not favored or encouraged, may be allowed at the meeting if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Norwood (202/887-3266) at least five days prior to the meeting date.

Telecommunications Industry Advisory Group, Separations and Costing Subcommittee; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group (TIAG) Separations and Costing Subcommittee scheduled for Monday, June 20 and Tuesday, June 21, 1983. The meeting will begin at 10:00 a.m. in the offices of ITT WorldCom, 67 Broad Street, 27th Floor,

New York, New York and will be open to the public. The agenda is as follows:

I. Review of Minutes of Previous Meeting
II. General Administrative Matters
III. Consideration of Data Item List—(To be circulated/mailed to other subcommittee members no later than June 10, 1983)
IV. Other Business
V. Presentation of Oral Statements
VI. Adjournment

With prior approval of Subcommittee Chairman Eric Leighton, oral statements, while not favored or encouraged, may be allowed if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Leighton (518/462–2030) at least five days prior to the meeting date.

BILLING CODE 4140–01–M

Public Health Service

National Toxicology Program; Availability of Carcinogenesis Report on Ziram

The HHS's National Toxicology Program today announces the availability of the technical report on ziram, a contact fungicide and a rubber vulcanization accelerator.

Ziram was fed in the diets to F344/N rats at 0, 300, and 600 ppm and to $B6C3F_1$ mice at 0, 600, and 1,200 ppm for 103 weeks. Under the conditions of these carcinogenesis studies, ziram was carcinogenic for male F344/N rats, causing increased incidences of C-cell carcinomas of the thyroid gland. Ziram was not carcinogenic for either female F344/N rats or for male $B6C3F_1$ mice. Increased incidences of alveolar/bronchiolar adenomas or carcinomas occurred in female $B6C3F_1$ mice. However, the interpretation of this increase in lung tumors is complicated by an intercurrent Sendai virus infection.

Copies of this report—*Carcinogenesis Bioassay of Ziram in F344/N Rats and $B6C3F_1$ Mice (Feed Study)* (T.R. 238)—are available without charge by writing to: NTP Public Information Office, M.D. B2–04, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541–3991. FTS: 629–3991.

Dated: May 26, 1983.

David P. Rall,

Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[I–20087]

Realty Action; Competitive Sale of Public Lands; Cassia County, Idaho; Correction

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, I–20087, Competitive Sale of Public Lands In Cassia County, Idaho; Correction.

SUMMARY: This document corrects the patent reservations that were published May 12, 1983 (48 FR 21380).

FOR FURTHER INFORMATION CONTACT: Nick James Cozakos, District Manager, (208) 678–5514.

The May 12, 1983 (48 FR 21380) publication notice incorrectly listed the patent reservations as:

1. Ditches and Canals.
2. Oil and Gas and Geothermal rights.
3. Oil and Gas Lease I–18032.

These reservations are corrected to read:

1. A right-of-way for ditches or canals constructed by the authority of the United States under the Act of August 30, 1890, 26 Stat 391; 43 U.S.C. 945.
2. All minerals will be reserved to the United States as required by Sec. 209(a) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719.
3. All valid existing rights and reservations of record.

Dated: May 27, 1983.

Nick James Cozakos,

District Manager.

District Advisory Council; Susanville, California; Meeting

Notice is hereby given in accordance with Pub. L. 94–579 (FLPMA) that a meeting of the Susanville District Advisory Council will be held on June 23 and 24, 1983.

The meeting will begin at 1:00 p.m. on June 23, in the Conference Room of the Bureau of Land Management, Susanville District Office, 705 Hall Street, Susanville, California.

The Agenda for the meeting will include:

1. Asset Management
2. Cooperative Management Agreements
3. Alturas Resource Management Plan

The meeting is open to the public and time will be provided for public comment.

Summary minutes of the Council meeting will be maintained in the District Office and will be available for public inspection and reproduction within 30 days following the meeting.

C. Rex Cleary,

District Manager.

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Exxon Company, U.S.A. has submitted a Development and Protection Plan describing the activities it proposes to conduct on Lease OCS 016, Block 31, West Delta Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: June 1, 1983.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

IINTERNATIONAL TRADE COMMISSION

Agency Form Submitted for OMB Review

AGENCY: United States International Trade Commission.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Commission has submitted a proposal for the collection of information to the Office of Management and Budget for review.

PURPOSE OF INFORMATION COLLECTION: The proposed information collection is for use by the Commission in connection with investigation No. 332–158, The Effects of Foreign Product Counterfeiting on U.S. Industry, instituted under the authority of section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)).

SUMMARY OF PROPOSALS:

(1) Number of forms submitted: One.

(2) Title of form: The Effects of Foreign Product Counterfeiting on U.S. Industry—Questionnaire for U.S. Producers.

(3) Type of request: New.

(4) Frequency of use: Nonrecurring.

(5) Description of respondents: Firms manufacturing products in the United States that have been subject to foreign counterfeiting.

(6) Estimated number of respondents: 250.

(7) Estimated total number of hours to complete the forms: 5500.

(8) Information obtained from the form that qualifies as confidential business information will be so treated by the Commission and not disclosed in a manner that would reveal the individual operations of a firm.

(9) Section 3504(h) of Pub. L. 96–511 does not apply.

ADDITIONAL INFORMATION OR COMMENT: Copies of the proposed form and supporting documents may be obtained from Charles Ervin, the USITC agency clearance officer (tel. no. 202–523–4463). Comments about the proposals should be directed to the Office of Information and Regulatory Affairs of OMB. Attention: Desk Officer for U.S. International Trade Commission. If you anticipate commenting on a form but find that time to prepare comments will prevent your from submitting them promptly you should advise OMB of your intent as soon as possible. Copies of any comments should be provided to Charles Ervin (United States International Trade Commission, 701, E Street, NW., Washington, D.C. 20436).

By order of the Commission.

Issued: June 3, 1983.

Kenneth R. Mason,

Secretary.

[Investigation No. 337–TA–141]

Copper-Clad Stainless Steel Cookware; Joinder of Respondent

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination (Order No. 5) to amend the complaint and the notice of investigation by joining Hanover House Industries, Inc., as a party in the above-captioned investigation. Notice is further given that the Commission has ordered that the complaint be served on Hanover House Industries, Inc., and that Hanover House Industries, Inc., respond thereto within twenty (20) days.

Authority: Sections 335 and 337 of the Tariff Act of 1930 (19 U.S.C. 1335 and 1337) and §§ 210.53(c) and 210.53(h) of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982, and 48 FR 20225, May 5, 1983; to be codified at 19 CFR 210.53(c) and (h).

SUPPLEMENTARY INFORMATION: On April 22, 1983, complainant Revere Copper and Brass Inc. filed a motion (Motion No. 141–3) to amend the complaint and notice of investigation by joining Hanover House Industires, Inc., as a party respondent. Hanover had been

named in the original complaint jointly with Horn & Hardart Co., Inc., and it has been found during discovery that they are distinct corporate entities. The motion was unopposed. On May 6, 1983, the presiding officer issued an initial determination granting Motion No. 141–3. Under § 210.54(a) of the Commission's rules, the deadline for filing petitions for review of the initial determination expired on May 16, 1983. No petitions for review were filed. No comments were received from other Government agencies.

Copies of the presiding officer's initial determination and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Jack Simmons, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0250.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–123]

CT Scanner and Gamma Camera Medical Diagnostic Imaging Apparatus; Termination of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Termination of investigation with prejudice.

SUPPLEMENTARY INFORMATION: This investigation was instituted to determine whether there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation or sale of certain CT scanners alleged to infringe U.S. Letters Patent 4,220,860 and certain gamma cameras alleged to infringe U.S. Letters Patent 4,151,416. (*See* 47 FR 24232, June 3, 1982). On March 4, 1983, the presiding office recommended that the Commission issue a final determination that there is no violation in this case by reason of the invalidity of the '860 patent and noninfringement of the '416 patent, and because the respondents' acts have neither the effect of substantially injuring nor the tendency to substantially injure the relevant domestic industries.

On April 8, 1983, complainant Technicare Corp. moved to withdraw its complaint and terminate the investigation in favor of resolving the patent disputes between the parties in pending civil litigation (Motion No. 123–21C). On April 15, 1983, the respondents, Elscint Ltd. and Elscint, Inc., filed an alternate motion to terminate (Motion No. 123–23C). The respondents opposed the Technicare's motion, but argued that, if the investigation would be terminated on the basis of that motion, the Commission should approve the presiding officer's recommended determination and issue a final determination of no violation. Respondents' alternate motion to terminate also requested that the Commission terminate the investigation with prejudice against subsequent complaints filed by Technicare against the respondents or third parties based on infringement of the patents at issue in this investigation.

On June 1, 1983, the Commission voted to grant complainant's Motion No. 123–21C, to grant respondents, Motion No. 123–23C in part, and to deny Motion No. 123–23C in part. The Commission accordingly has terminated the investigation with prejudice, but did not adopt the presiding officer's recommended determination or issue a final Commission determination as to whether the respondents have violated section 337. Moreover, Technicare has been barred from filing a second section 337 complaint against Elscint Ltd. and Elscint, Inc. on the basis of either of the patents at issue in this investigation. In terminating the investigation with prejudice, however, the Commission could entertain complaints to institute section 337 proceedings against third parties based on a sufficient demonstration of changed circumstances by the complainant.

Copies of the motions, the responses, the Commission's Action and Order, and any other documents on the public record of the investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., room 56, Washington, D.C. 20436, telephone 202–523–0471.

FOR FURTHER INFORMATION CONTACT: P. N. Smithey, Esq., Office of the General Counsel (telephone 202–523–0350).

By order of the Commission.

Issued: June 3, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–132]

Hand-Operated, Gas Operated Welding, Cutting, and Heating Equipment and Component Parts Thereof; Commission Decision Not To Review Initial Determination Terminating the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination to terminate the above-captioned investigation as to the two remaining respondents, I Ling Co., Ltd. and Van Dreser & Hawkins, Inc. Accordingly, as of May 31, 1983, the initial determination will become the Commission's determination with respect to this matter.

Authority: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 337) and in §§ 210.53(c) and 210.53(h) of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982; to be codified at 19 CFR 210.53(c) and (h)).

SUPPLEMENTARY INFORMATION: This investigation was instituted on September 29, 1982, pursuant to section 337 of the Tariff Act of 1930. *See* 47 FR 44172 (October 6, 1982).

On April 28, 1983, complainant Victor Equipment Co. moved to terminate the investigation as to the two remaining respondents, I Ling Co., Ltd. (Motion No. 132–38) and Van Dreser & Hawkins, Inc. (Motion No. 132–39).

The presiding officer issued an initial determination granting Motions Nos. 132–38 and 132–39 on April 28, 1983 (Order No. 32). No party petitioned for review of the initial determination, and no comments were filed by Government agencies or interested members of the public.

Having examined the record in this investigation, including Motion Nos. 132–38 and 132–39, the papers filed in connection therewith, and the initial determination of the presiding officer, the Commission finds no grounds for review of the initial determination.

The Commission has been reviewing an initial determination of the presiding officer denying complainant's request for temporary relief. (47 FR 11189 (Mar. 16, 1983)). In view of the termination of

the investigation, the initial determination of the presiding officer denying complainant's request for temporary relief is vacated as moot.

Copies of the presiding officer's initial determination and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Warren H. Maruyama, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0359.

By order of the Commission.

Issued: May 31, 1983.

Kenneth R. Mason,

Secretary.

Quarterly and Annual Reports Providing Certain Information on Heavyweight Motorcycles

AGENCY: United States International Trade Commission.

ACTION: Institution of an investigation under the authority of section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)) to establish a permanent docket for the quarterly and annual reports concerning heavyweight motorcycles required by Presidental Proclamation 5050 of April 15, 1983.

EFFECTIVE DATE: June 2, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Jim McElroy or Ms. Deborah Ladomirak, Machinery and Equipment Division, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436 (telephone: 202–523–0258, 202–523–0131, respectively).

SUPPLEMENTARY INFORMATION: Presidental Proclamation 5050, issued April 15, 1983 (48 FR 16639), following receipt by the President of an affirmative determination and recommendation of import relief by the Commission under section 201 of the Trade Act of 1974 (19 U.S.C. 2251), provides import relief in the form of a tariff-rate quota system with respect to motorcycles having engines with total piston displacement over 700 cubic centimeters, provided for in item 692.50 of the Tariff Schedules of the United States.

Annex I (a)(1) of Proclamation 5050 modified subpart A, part 2 of the Appendix to the Tariff Schedules of the United States in pertinent part as follows:

(b) The USITC shall conduct surveys with repect to the motorcycles subject to temporary duty increases as follows:

(1) *Quarterly.*—Surveys by calendar quarter to obtain monthly data on U.S. production, U.S. producers' sales, shipments and inventories, U.S. importer's sales and inventories, imports for consumption, dealer's inventories, U.S. exports, employment, employee-hours, wages, prices, and apparent U.S. consumption. The initial survey shall cover the last quarter of 1982 and the first and second quarters of 1983; the last such survey shall cover the quarter which ends not less than 60 days prior to the termination of the import relief. The results of these surveys shall be published within 60 days of the end of the quarter.

(2) *Annually.*—Annual surveys to obtain from domestic producers data by calendar quarter on profits, unfilled orders, and inventories, annual data on capital expenditures and capacity, and a summary on an annual basis of action taken to adjust to imports and of progress in the adjustment program; and to obtain from importers data by calendar quarter on prices, unfilled orders, and inventories. The initial survey shall cover calendar year 1983, and subsequent surveys shall cover calendar years beginning with 1984. The results of each survey shall be published by the end of the first quarter of each year thereafter so long as the import relief is in effect.

By the order of the Commission.

Issued: June 2, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 751–TA–7]

Salmon Gill Fish Netting of Manmade Fibers From Japan

Determination

On the basis of the record [1] developed in this investigation, the Commission determines [2] that an industry in the United States would be materially injured, by reason of imports of salmon gill fish netting of manmade fibers from Japan covered by antidumping order T.D. 72–158, if the order were to be modified or revoked.

Background

On April 18, 1972, the Commission determined that an industry in the United States was injured within the meaning of the Antidumping Act, 1921, by reason of imports of fish netting of manmade fibers from Japan determined by the Secretary of Treasury to be sold or likely to be sold at less than fair value (investigation No. AA1921–85). On June 1, 1972, the Department of Treasury issued a finding of dumping, T.D. 72–158, and published notice thereof in the **Federal Register**, 37 FR 11560.

On July 28, 1981, the Commission received a request to review its determination in *Fish Nets and Netting of Manmade Fibers from Japan,* Inv. No. AA1921–85, T.C. Pub. No. 477 (1972). On October 14, 1981, the Commission determined that there were sufficient changed circumstances to warrant review of that determination and it instituted investigation No. 751–TA–5, *Salmon Gill Fish Netting of Manmade Fibers from Japan,* USITC Pub. 1234 (1982).[3]

On March 31, 1982, the Commission determined in investigation No. 751–TA–5 that the establishment of an industry in the United States would be materially retarded by reason of imports of salmon gill fish netting of manmade fibers from Japan covered by antidumping order T.D. 72–158, if the order were to be modified or revoked. The Commission's determination was supported by the

[1] The "record" is defined in sec. 207.2(i) of the Commission's Rules of Practice and Procedure (47 FR 6190, February 10, 1982).

[2] Commissioner Stern dissenting.

[3] Commissioner Haggart did not participate.

finding that although domestic production of salmon gill fish netting was so insignificant that there was no established industry in the United States, Nylon Net Co. of Memphis, Tenn., one of the largest domestic producers of fish netting, had made substantial investments in the development of a marketable salmon gill fish netting. An important part of Nylon Net's plans was the projected development of a nylon yarn by Firestone Fibers & Textile Co., at its Hopewell, Va. plant, which would permit Nylon Net to produce netting that would be competitive with imported Japanese netting. Nylon Net's ability to enter the salmon gill fish netting market apparently depended on the successful development of this nylon yarn.

On November 24, 1982, following receipt of information that Firestone Fibers & Textile Co. expected to cease production of nylon at its Hopewell, Va. plant, the Commission requested comments regarding the institution of a new section 751(b) review investigation. On the basis of the comments filed, the Commission, on January 25, 1983, determined that sufficient changed circumstances existed to warrant the review of its determination in *Fish Nets and Netting of Manmade Fibers from Japan*. Therefore, the Commission instituted investigation No. 751–TA–7 to determine whether an industry in the United States would be materially injured, or would be threatened with material injury, or the establishment of an industry in the United States would be materially retarded if the antidumping order (T.D. 72–158) regarding fish netting of manmade fibers from Japan were to be modified or revoked to exclude salmon gill fish netting of manmade fibers.

Notice of the institution of the investigation and of the public hearing to be held in connection therewith was published in the **Federal Register** on February 2, 1983. A public hearing was held on Wednesday, April 27, 1983, in Washington, D.C. All interested persons were afforded an opportunity to appear in person or by counsel.

The Commission transmitted its report on the investigation to the Secretary of Commerce on June 1, 1983. A public version of the Commission's report, *Salmon Gill Fish Netting of Manmade Fibers from Japan* (investigation No. 751–TA–7, USITC Publication 1387, 1983), contains the views of the Commission and information developed during the investigation.

By order of the Commission.

Issued: June 1, 1983.

Kenneth R. Mason,

Secretary.

[Investigation No. 337–TA–150]

Self-Stripping Electrical Tap Connectors; Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on May 6, 1983, under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of Minnesota Mining and Manufacturing Company, 3M Center, St. Paul, Minnesota 55133. An amendment to the complaint was filed on May 19, 1983. The complaint, as amended, alleges unfair methods of competition and unfair acts in the importation of certain self-stripping electrical tap connectors into the United States, or in their sale, by reason of alleged infringement of claims 1, 3, 4, 5, 6, and 7 of the U.S. Letters Patent 3,388,370. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that the Commission institute an investigation and, after a full investigation, issue a permanent exclusion order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on June 2, 1983, *ordered that:*

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930 an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain self-stripping electrical tap connectors into the United States, or in their sale, by reason of infringement of U.S. Letters Patent 3,388,370, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purposed of the investigation so instituted the following are hereby named as parties upn which this notice of investigation shall be served:

(a) The complainant is: Minnesota Mining and Manufacturing Company, 3M Center, St. Paul, Minnesota 55133.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Chieftain-Uniworld Corporation, 30 Sagamore Hill Drive, Port Washington, New York 11050

Allen Group, Inc., 534 Broad Hollow Road, Melville, New York 11747

Allison Corporation 630 West Mount Pleasant Avenue, Livingston, New Jersey 07039

Blazer International Corporation, 3800 North Acorn, Chicago, Illinois 60606

L & S (Taiwan) Allied Co. Ltd., P.O. Box 36–621, Taipei, Taiwan

Burda Enterprises, Inc., P.O. Box 3557, Taipei, 3rd Floor, 226, Section 3, Jen-Al Road, Taipei, Taiwan 106

Lumiaction Co. Ltd, P.O. Box 59479, Taipei (100), 9th Floor, No. 219, Chang Chun Road, Taipei, Taiwan

(c) Ralph Elsas-Patrick, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 125, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection

during official business hours (8:45 a.m to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0471.

FOR FURTHER INFORMATION CONTACT: Ralph Elsas-Patrick, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202–523–0440.

By order of the Commission.

Issued: June 3, 1983.

BILLING CODE 7020–02–M

[332–163]

Trends in International Trade in Nonpowered Handtools

AGENCY: United States international Trade Commission.

ACTION: At the request of the Committee on Ways and Means, U.S. House of Representatives, the Commission has instituted investigation No. 332–163 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) for the purpose of assessing trends in international trade in nonpowered handtools and conditions of competition between domestic and foreign handtool producers.

EFFECTIVE DATE: June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James Brandon, Minerals and Metals Division, U.S. International Trade Commission, Washington, D.C. 20436, telephone 202–532–5437.

Background

The Committee's request was dated May 12, 1983. In accordance with the Committee's request, the Commission's study will cover all nonpowered handtools, including wrenches, pliers, screwdrivers, striking and struck tools (e.g., hammers, sledges, punches, and chisels), C-clamps, vises, hand-held automotive tools (e.g., body and fender tools, wheel and gear pullers, and valve tools), and metal cutting snips and shears (including bolt cutters). The investigation will not cover interchangeable tools (e.g., dies and drilling bits) or powered handtools.

The Commission will collect and compile data on production, imports, exports, marketing and pricing practices, and other factors affecting the U.S. industry and conditions of competition between U.S. and foreign handtools. The study will develop this information for the handtool industry as a whole and for selected product groupings.

The Commission expects to complete its study by February 3, 1984.

Public Hearing

A public hearing in connection with this investigation will be held in the Commission Hearing Room, 701 E Street, NW., Washington, D.C., 20436, beginning at 10:00 a.m. on November 9, 1983. All persons shall have the right to appear by counsel or in person, to present information, and to be heard. Requests to appear at the public hearing should be filed with the Secretary, U.S. International Trade Commission, 701 E Street, NW, Washington, D.C. 20436, no later than noon, November 2, 1983.

Written Submissions

In lieu of, or in addition to, appearances at the public hearing, interested parties are invited to submit written statements concerning the investigation by November 2, 1983. Commercial or financial information which a party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of section 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: June 1, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–133]

Vertical Milling Machines and Parts, Attachments, and Accessories Thereto; Commission Decision Not To Review Initial Determinations and Issuance of Consent Orders Terminating the Investigation With Respect to Two Respondents

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determinations (Order Nos. 18 and 19) granting joint motions by complainant, respondents, and the Commission investigative attorney to terminate the above-captioned investigation with respect to respondents Kanematsu-Gosho (U.S.A.) Inc. and Deka Machine Sales Corp. based on a consent order agreements. Furthermore, after considering the effect of these consent order agreements upon the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States and U.S. consumers, the Commission has determined to issue the consent orders terminating the above-referenced investigation with respect to Kanematsu-Gosho (U.S.A.) Inc., and Deka Machine Sales Corp.

Authority: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in § 210.53(c), 210.53(h), 211.20, and 211.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.53 (c) and (h) and 211.20 and 211.21).

SUPPLEMENTARY INFORMATION: On May 3, 1983, the presiding officer issued two initial determinations granting the joint motions of complainant Textron, Inc., respondents, Kanematsu-Gosho (U.S.A.), Inc. and Deka Machine Sales Corp., and the Commission investigative attorney to terminate the investigation with respect to these two respondents on the basis of consent order agreements. Under § 210.54(b) of the Commission's rules, the deadline for filing petitions for review expired on May 13, and May 16, 1983 respectively. No petitions were filed.

The Commission has determined not to review these initial determinations and issue the consent orders which provide the basis for termination of the investigation with respect to Kanematsu-Gosho (U.S.A.), Inc., and Deka Machine Sales Corp.

Both consent orders allow the respective respondents to continue importing and selling vertical milling machines that do not infringe Textron's alleged common law trademark rights. The proposed consent orders identify machines that do not violate the order. Thus, available alternatives to the Textron machine do exist. Furthermore, the provisions regarding other alleged unfair acts will not adversely affect the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles or the U.S. consumer. Deka Machine Sales Corp. and Kanematsu-Gosho (U.S.A.) Inc. can sell and advertise their products through other permissible means.

Copies of the Commission's action and order, and all other non-confidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Catherine R. Field, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0375.

By order of the Commission.

Issued: June 2, 1983.

Kenneth R. Mason,

Secretary.

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Review Boards, Carleton, Parker, Joyce.

Agatha L. Mergenovich,

Secretary.

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: May 26, 1983.

The following restriction removal applications, are governed by 49 CFR Part 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

Agatha L. Mergenovich,
Secretary.

Please direct status inquiries to Team 5, at (202) 275-7289.

MC 150999 (Sub-6X), filed May 13, 1983. Applicant: GENE F. LACAEYSE, d.b.a., G.F. LACAEYSE TRANSPORT, R.R. #2, Box 110, Montezuma, IA 50171. Representative: Larry D. Knoxa 600 Hubbell Bldg., Des Moines, IA 50309, 515-244-2329. Applicant seeks to remove restrictions in Wenger Truck Line, Inc.'s MC-109818 (Sub-Nos. 25F, 44F, 50F, 95X(1) and 95X(3) [acquisition approved in MC-F-15077] certificates to (1) eliminate commodity restrictions "except in bulk, in tank vehicles", "except in bulk," "except chemicals and commodities in bulk" in Sub-Nos. 25F and 44F; (2) authorize radial authority to replace existing one-way authority in Sub-Nos. 25F, 44F, and 50F; (3) broaden the commodity description from malt beverages and scrap materials for recycling (Sub-25F) and bananas (Sub-50F) to "food and related products and waste or scrap materials" and "food and related products"; and (4) replace authority to serve named points to county-wide authority, Clinton County, IA and Whiteside County, IL, for Clinton, IA; Scott and Muscatine Counties, IA and Rock Island County, IL, for Davenport, IA (Sub-44F); Hillsborough and Pinellas Counties, FL, for Tampa, FL (Sub-50); and Marion, Hancock, Hamilton, Boone, Hendricks, Morgan, Johnson, and Shelby Counties, IN for Indianapolis, IN.

BILLING CODE 7035-01-M

Motor Carriers; Proposed Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of Proposed Exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275-7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: June 1, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,
Secretary.

Hoosier Express, Inc.—Purchase Exemption—Sam Young, Inc.

Hoosier Express, Inc. (Hoosier Express), a newly formed Delaware Corporation and Sam Young, Inc. (Sam Young) (Certificate No. MC-146753 and Permit No. MC-143917) seek an exemption from the requirement of prior regulatory approval for the purchase by Hoosier Express of a portion of Sam

Young authority in Certificate No. MC–146753 Sub-Nos. 1F, 2F, 4F, 5F, 7F, 8F, 9F, 10F, 11F, 12F, 13, 14, 15F, 16F, 17, 18X, 19, 20, 21X, 22, 23, 24, and 25. These certificates collectively authorize the transportation of general commodities in the Midwest and of specific commodities throughout the country. Mr. Sam Young also seeks approval of common control of the two carriers through the transaction.

Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423 and (2) Petitioner's representative: E. Stephen Heisley, 1919 Pennsylvania Avenue, N.W., Suite 500, Washington, D.C. 20006, (202) 828–5015.

Comments should refer to No. MC–F–15275.

BILLING CODE 7035–01–M

Motor Carrier; Temporary Authority Applications

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

The following applications were filed in Region 2. Send protests to: ICC Fed. Res. Bank Bldg., 101 North 7th St., Rm. 620, Philadelphia, PA 19106.

MC 168158 (Sub-2–1TA), filed May 23, 1983. Applicant: BAY TRUCKING, INC., P.O. Box 438, Millersville, MD 21108. Representative: Dixie C. Newhouse, 1329 Pennsylvania Ave., P.O. Box 1417, Hagerstown, MD 21740. Contract: Irregular: *Cement, in bags and in bulk,* between points in MD, PA, NJ, DE, WV, VA, and DC, for 270 days, under continuing contract(s) with Atlantic Cement Co., Inc. An underlying ETA seeks 120 days authority. Supporting shipper: Atlantic Cement Co., Inc., P.O. Box 30, Stamford, CT 06904.

BILLING CODE 7035-01-M

[MC-F-15296][1]

Canadian Pacific Limited and Canadian Pacific Express & Transport, Ltd.—Control Exemption—River Transport, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Canadian Pacific Limited (CP) and Canadian Pacific Express & Transport, Ltd. (CPET) seek an exemption from the prior approval requirements of 49 U.S.C. 11343 *et seq.* for their acquisition of common control of River Transport, Inc. (River). CPET, a motor carrier domiciled in Canada, holds authority from this Commission to conduct operations in the United States. It controls Smith Transport (U.S.) Limited and Smith Transport (International) Limited, which also are Canadian domiciled motor carriers holding authority from this Commission to operate in the United States. CPET, in turn, is controlled by CP, a Canadian holding company and railroad, which also controls the Soo Line Railroad Company.

CPET has agreed to purchase the capital stock of Tighnabruaich Holdings Limited, which controls Moffatt Bros. Limited and which owns Bowness Transport Limited, which, in turn, controls River. All are engaged in various transportation activities in Canada. In addition, River conducts operations as a motor carrier in the United States under Certificates Nos. MC–117087 and MC–117087 (Sub-No. 2). These authorize the transportation of certain foods between Boston and Worcester, MA, on the one hand, and, on the other, the port of entry on the United States-Canadian boundary at or near Calais, ME.

DATE: Comments must be received by June 23, 1983.

ADDRESSES: Send comments referring to MC–F–15296 to: (1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423; (2) Petitioner's representative: Harry J. Jordan, Suite 200, 1090 Vermont Avenue, NW., Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Louis E. Gaitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: CP and CPET seek the exemption pursuant to 49 U.S.C. 11343(e) and the Commission's regulations set forth in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

A copy of the petition for exemption may be obtained from petitioner's representative or it may be inspected at the Washington, DC offices of the Interstate Commerce Commission during normal business hours.

Decided: June 1, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[1] This proceeding was orginially asigned Finance Docket No. 30115.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The Following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 40 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.000.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the sevice proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make and additional peliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be

construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 5 at (202) 275-7289.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

[Finance Docket No. 30179]

Angelina and Neches River Railroad Co.; Exemption From 49 U.S.C. 11343

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemption

SUMMARY: The Interstate Commerce Commission exempts from the requirements of 49 U.S.C. 11343 the purchase by Angelina and Neches River Railroad Company of 1.21 miles of railroad extending from milepost 634.43 to milepost 635.64 near Lufkin, TX from St. Louis Southwestern Railway Company of Texas.

DATES: This exemption will be effective on June 8, 1983.

Petitions to reopen must be filed by June 28, 1983.

ADDRESSES: Send pleadings referring to Finance Docket No. 30179 to: (1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423; (2) Petitioner's representative: Peter A. Greene, 1920 N Street, NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

Decided: May 31, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Commissioner Andre would impose no deadline for consummation of the exempted transaction.

Agatha L. Mergenovich,

Secretary.

DEPARTMENT OF JUSTICE

Proposed Consent Decree In Action To Enjoin Discharge of Water Pollutants

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on May 17, 1983, a proposed Consent Decree in *United States of America* v. *Energy Cooperative, Inc.,* Civil No. H–80–119, was lodged with the United States District Court for the Northern District of Indiana.

The Consent Decree represents settlement of the claims of the United States by imposing upon defendant certain operating and personnel training requirements to insure proper operation of defendant's wastewater treatment plant. The Consent Decree also provides for stipulated penalties for failure to comply with its requirements.

The Consent Decree has also been submitted to the United States Bankruptcy Court for the Northern District of Illinois in Case No. 81 B 05811, in which defendant has filed for Chapter XI reorganization. Approval of

the Bankruptcy Court will be sought before the Consent Decree is entered by the District Court.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice written comments related to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States of America* v. *Energy Cooperative, Inc.*, D. J. Ref. No. 90–5–11–1227.

The proposed consent decree may be examined at the Office of the United States Attorney, 312 Federal Building, 507 State Street, Hammond, Indiana 46320, at the Region V Office of Regional Counsel of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, and at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1521, Tenth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 7537-01-M

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Two Proposals for Implementation of President Reagan's February 18, 1983 Memorandum on Government Patent Policy

AGENCY: Office of Management and Budget.

ACTION: Notice for comment.

SUMMARY: The purpose of this notice is to solicit the views of Federal agencies and the private sector on two different approaches to the implementation of President Reagan's February 18, 1983 Memorandum on Government Patent Policy. The first approach is contained in the Federal Procurement Regulation, Temporary Regulation 69 published in the **Federal Register** by the General Services Administration on April 15, 1983 and reprinted in this notice. The second approach is an amendment to OMB Circular A-124 Patents—Small Business Firms and Non-profit Organizations, proposed by the Department of Commerce, also printed in this notice. The Office of Federal Procurement Policy requests the views of all interested parties on these two approaches prior to a decision on the need for further policy direction as a result of the President's memorandum.

DATES: Comments are due on or before August 8, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Maraist, Office of Federal Procurement Policy, OMB, (202-395-3300).

SUPPLEMENTARY INFORMATION:

a. On February 18, 1983 President Reagan issued a patent policy memorandum stating:

> To the extent permitted by law, agency policy with respect to the disposition of any invention made in the performance of a federally-funded research and development contract, grant or cooperative agreement award shall be the same or substantially the same as applied to small business firms and nonprofit organizations under Chapter 38 of Title 35 of the United States Code.
>
> In awards not subject to Chapter 38 of Title 35 of the United States Code, any of the rights of the Government or obligations of the performer described in 35 U.S.C. 202-204 may be waived or omitted if the agency determines (1) that the interests of the United States and the general public will be better served thereby as, for example, where this is necessary to obtain a uniquely or highly qualified performer; or (2) that the award involves co-sponsored, cost sharing, or joint venture research and development, and the performer, co-sponsor or joint venturer is making substantial contribution of funds, facilities or equipment to the work performed under the award.
>
> In addition, agencies should protect the confidentiality of invention disclosure, patent applications and utilization reports required in performance or in consequence of awards to the extent permitted by 35 U.S.C. 205 or other applicable laws.

b. OMB Circular A-124 was issued February 10, 1982 and published in the **Federal Register** of February 19, 1982 at 47 FR 7556 to implement the patent policy set forth in Chapter 38 of Title 35 of the U.S. Code (Pub. L. 96-517), for small business firms and non-profit organizations. At issue is whether the procedures and the clause in A-124 are appropriate for all other organizations.

c. The FPR Temporary Regulation 69, which follows, was developed on the assumption that the current A-124 procedures and clause are not appropriate for all Federal R&D contract performers:

Note.—GSA Federal Procurement Regulations Temporary Regulation 69 was orginally published in the **Federal Register** of April 15, 1983 at 48 FR 16254.

BILLING CODE 3110-01-M

Federal Procurement Regulations
Temporary Regulation 69

Federal Procurement Regulations

Temporary Regulation 69

April 5, 1983

To: Heads of Federal Agencies

Subject: Patents

1. Purpose. This temporary regulation implements President Reagan's February 18, 1983, Memorandum on Government Patent Policy.

2. Effective date. This regulation is effective April 5, 1983, but may be observed earlier.

3. Expiration date. This regulation expires April 5, 1985.

4. Background.

a. On February 18, 1983, President Reagan issued a Memorandum to the Heads of Executive Departments and Agencies that established a new Government Patent Policy. The new policy replaces the 1971 Presidential Patent Policy Statement that formed the basis for the patent rights clauses of the Federal Procurement Regulations (FPR) in section 1-9.107. Accordingly, interim instructions are necessary pending a full modification of FPR sections 1-9.107-1 through 1-9.107-6.

b. The primary thrust of President Reagan's Memorandum is that, to the extent permitted by law, agency patent policy concerning the disposition of rights to inventions made under federally funded research and development contracts, grants, and cooperative agreements shall be the same or substantially the same as applied to small business firms and nonprofit organizations under Chapter 38 of Title 35 of the U.S. Code (P.L. 96-517). As a result, the new Patent Policy Memorandum provides recipients of Government contracts, grants, and cooperative agreements for the performance of research and development activities with a first option to retain title to inventions made under such arrangments, except in those situations provided for in 35 U.S.C. 202(a).

c. The Presidential Memorandum also provides that where an agency makes certain determinations, the rights of the Government or obligations of the recipient of the research and development contract, grant, or cooperative agreement, set forth in 35 U.S.C. 202-204, may be waived or omitted. These interim instructions do not specifically implement this provision of the Presidential Memorandum inasmuch as implementation should be undertaken through the normal FPR deviation procedures.

5. Explanation of changes. The policies and procedures in Subpart 1-9.1 are modified by the instructions in this temporary regulation.

a. The patent rights clause in contracts with small business firms and nonprofit organizations shall be in accordance with OMB Circular A-124.

b. Each contract with other than a small business firm or nonprofit organization that has as a purpose the performance of experimental, developmental, or research work, and is to be performed in the United States, its possessions, or Puerto Rico, shall contain the patent rights clause at FPR section 1-9.107-5(b) unless it is determined in accordance with paragraph c.(1) of this regulation that the patent rights clause of section 1-9.107-5(a) is appropriate, with both clauses modified in accordance with paragraph 5.(e) of this regulation.

c. (1) A contract, with other than a small business firm or nonprofit organization, may contain the patent rights clause at FPR section 1-9.107-5(a):

(a) when the contract is for the operation of a Government-owned reseach or production facility; or

(b) in exceptional circumstances when it is determined by the Agency that restriction or elimination of the contractor's right to retain title will better promote the policy and objectives of the Presidential Memorandum of Government Patent Policy of February 18, 1983; or

(c) when it is determined by a Government authority which is authorized by statute or Executive order to conduct foreign intelligence or counter-intelligence activities that the restriction or elimination of the contractor's right to retain title is necessary to protect the security of such activities.

(2) When it is determined in accordance with paragraph 7(a) of OMB Circular A-124 that alternative provisions are appropriate in a contract with a small business firm or nonprofit organization, the patent rights clause at FPR section 1-9.107-5(a) may be used in the contract,

d. For arrangements other than contracts, such as grants and cooperative agreements, with other than small business firms or nonprofit organizations, it is recommended that the patent rights clause of OMB Circular A-124 or FPR section 1-9.107-5(b), as appropriate, be used in cooperative agreements.

e. In using the clause at either FPR section 1-9.107-5(b) or section 1-9.107-5(a), the following modifications are to be made:

(1) To ensure proper flow-down of the applicable patent rights clause, subparagraph (j)(2) should be rewritten as follows:

"(2) Unless otherwise authorized or directed by the Government Contracting Officer in any subcontract hereunder where a purpose of the subcontract is the conduct of experimental, developmental, or research work,

the Contractor shall include this patent rights clause modified to identify the

subcontract is the conduct of experimental, developmental, or research work,

the Contractor shall include this patent rights clause modified to identify the parties in a subcontract with other than a small business firm or nonprofit organization; or the patent rights clause of OMB Circular A-124 modified to identify the parties in any subcontract with a small business form or nonprofit organization. In event of refusal by a subcontractor to accept the proffered clause, the Contractor:"

(2) The following should be substituted for subparagraph (c)(i):

"(i) Hereby grants to the Government a nonexclusive, nontransferrable, paid-up license to make, use, and sell each subject invention throughout the world by or on behalf of the Government of the United States."

(END OF FPR TEMP. REG. 69)

BILLING CODE 3110-01-C

d. The second approach is represented by the following Department of Commerce proposed amendment to OMB Circular A–124 which would extend it to all recipients of Federal R&D grants, contracts and cooperative agreements:

OMB Circular No. A–124 Transmittal Memorandum 1

TO THE HEADS OF EXECUTIVE DEPARTMENTS AND ESTABLISHMENTS

SUBJECT: Extension of Circular No. A–124 Provisions to All Recipients of Federal Research and Development Funding

1. Purpose

This Transmittal Memorandum provides policies, procedures and guidelines for the extension of the Circular provisions to all recipients of Federal research and development grants, contracts, and cooperative agreements.

2. Background

Circular No. A–124 implements Chapter 38 of Title 35 of the U.S. Code (Pub. L. 96–517), an Act that gives small businesses and non-profit organizations the right to own inventions they produce while performing under Federal research and development funding. Early experience with the Act, particularly by universities, indicates that the goal of greater private sector development and use of these inventions is being achieved.

On February 18, 1983, the President issued a memorandum to the heads of agencies of Government Patent Policy. A copy of the memorandum and its accompanying Fact Sheet is attached. The memorandum requires agencies to apply the policies of 35 U.S.C. 38 to all other Federal R&D recipients, in addition to small business and non-profit organizations.

3. Policy and Scope

The Presidential Memorandum indicates:

"To the extent permitted by law, agency policy with respect to the disposition of any invention made in the performance of a federally funded research and development contract, grant, or cooperative agreement shall be the same or substantially the same as applied to small busines firms and nonprofit organizations under Chapter 38 of Title 35 of the United States Code".

Except as noted below, agencies shall apply the provisions of this Circular, including the standard patent clause (Attachment A) to all research and development contracts, grants and cooperative agreements awarded, extended, or renewed after————. In addition, agencies are encouraged to extend the Circular provisions to current R&D performers.

Agencies are specifically advised that Chapter 38 and this Circular should be considered as consistent with statutes whose criteria for disposition of federally funded inventions is limited to a provision of the kind that requires inventions or patents to be made available to the public.

4. Exceptions

All provisions of the Circular which apply to both small business firms and nonprofit organizations shall apply to all other recipients of research and development contracts, grants, and cooperative agreement with the following exceptions:

a. The Circular specifies effective dates of July 1, 1981 and March 1, 1982 for application to small business firms and nonprofit organizations. This extension to all other classes of R&D recipients takes effect on————and no earlier dates are relevant.

b. Any rights of the Government or obligations of the performer described in 35 U.S.C. 202–204 may be waived or omitted in awards to other than small business firms or nonprofit organizations if the agency determines (i) that the interests of the United States and the general public will be better served thereby as, for example, where this is necessary to obtain a uniquely or highly qualified performer, or (ii) that the award involves cosponsored, cost shared, or joint venture research and development and the performer, cosponsor or joint venturer is making a substantial contribution of funds, facilities or equipment to the work performed under the award.

c. The following exception, which shall apply to recipients other than small business firms and nonprofit organizations is added to Part 7a of the Circular:

(4) When a statute does not permit the terms and conditions of the standard clause, agencies shall make the minimum changes necessary to comply with the statutes, using whatever latitude or discretion is allow by the statute to achieve maximum possible consistency with the standard clause.

d. Part 7b(1) of the Circular requires a copy of a justification for exceptional circumstance determinations to be sent to the Comptroller General and the Chief Counsel for Advocacy of the Small Business Administration. For awards to other than small business firms or nonprofit organizations, the determination is required, but copies need not be sent to the Comptroller General, or the Small Business Administration.

e. For organizations other than small business firms and nonprofit organizations the right of the Government described in 35 U.S.C. 202–204 will be supplemented by an appropriate safeguard to be developed by the Department of Justice against anti-competitive retentions of title. The safefuard to be developed is incorporated into this Transmittal Memorandum by reference and will be exercised in accordance with the procedures established in Part 13 of the Circular.

f. Notwithstanding Part 17 of the Circular and Part b. of the standard patent clause (Attachment A), this Transmittal Memorandum does not take precedence over existing regulations, but agencies shall implement it by the effective date through appropriate administrative or regulatory actions.

g. Part i of the standard patent rights clause dealing with preference for United States industry does not apply to recipients other than small business firms and nonprofit organizations.

h. In applying the exceptional circumstances provision of Part 7a(2) of the Circular, agencies should interpret the statutory objective at 35 U.S.C. 200 relating to the promotion of free competition as encompassing inventions of all recipients of Federal R&D funding.

5. In extending the provisions of the Circular for small business firms and nonprofit organizations to all other recipients of R&D funding, agencies shall obtain approval from the Administrator, Office of Federal Procurement Policy, before making additional exceptions. Requests for exception approvals should include the reason why an exception is requested, the language the agency proposes to substitute for language in the Circular or standard patent clause, and an explanation of what will happen if the exception is not made.

6. Lead Agency Designation

The designation of the Department of Commerce as lead agency to assist the Office of Federal Procurement Policy is extended to include this Transmittal Memorandum.

7. Inquiries

All questions or inquiries should be submitted to . . .

(END OF PROPOSED A–124 AMENDMENT)

e. Some of the more significant differences between the patent rights clauses used under each approach are the following:

1. The Patent Rights Clause of OMB Circular A–124 requires a contractor, after a subject invention has been disclosed in writing by the inventor(s) to contractor personnel responsible for the administration of patent matters, to: (i) disclose the invention to the contracting officer within 2 months, (ii) elect whether or not to retain title to any such invention by notifying the contracting officer within 12 months of disclosure to the contractor, and (iii) file its initial patent application on the elected invention within 2 years after the election.

2. The Retention by the Contractor Clause of the FPR for use in contracts with other than small business firms and nonprofit organizations imposes a different time period for disclosure and election to retain title. This time period (6 months) starts to run from the time an invention is either conceived or first actually reduced to practice rather than when an invention is disclosed to contractor personnel responsible for patent matters. The contractor has an additional 6 months from the date of disclosure and election to file a U.S. patent application.

3. The FRP clause requires that a contractor establish and maintain active and effective procedures to assure that subject inventions are promptly identified and timely disclosed. The A–124 clause does not include such a requirement.

4. The FPR clause includes coverage authorizing the examination of a contractor's records and the withholding of payment of assure compliance with the requirements of the clause. The A–124 clause does not include such coverage.

f. Agencies and interested parties are invited to comment on these two alternatives. Comments should be forwarded to William Maraist, Office of Federal Procurement Policy, OMB, 726 Jackson Place, Washington, DC 20503 on or before July 29, 1983. Mr. Maraist may be contacted by phone on 202–395–3300.

LeRoy J. Haugh,

Associate Administrator for Policy Development.

BILLING CODE 3110–01–M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Fish Propagation Panel; Meeting Notice

AGENCY: Fish Propagation Panel of the Pacific Northwest Electric Power and Conservation Planning Council (Northwest and Conservation Planning Council).

ACTION: Notice of meeting to be held pursuant to the Federal Advisory Committee Act, 5 U.S.C. Appendix I, 1–4. Activities will include:

- Approval of minutes
- Progress report on prioritization of Section 704 program measures
- Status report on reprogramming
- Status report on proposals for anadromous fish goals
- Status report on projects funded for FY 1983 and requests for proposals
- Status report on activities of the Salmon and Steelhead Advisory Commission
- Joint session with Fish and Wildlife Committee
- Other business
- Public comments

Status: Open.

SUMMARY: Northwest Power Planning Council hereby announces a forthcoming meeting of its Fish Propagation Panel.

DATE: June 15, 1983. 9:30 a.m.

ADDRESS: The meeting will be held at the Council's Central Office located at 700 S.W. Taylor Street, Suite 200, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: Curt Marshall, (503) 222–5161.

Edward Sheets,

Executive Director.

BILLING CODE 0000–00–M

POSTAL RATE COMMISSION

[Docket No. A83–22; Order No. 501]

Baxter, California 95704, Mr. John C. Mullaney II, et al. Petitioners; Notice and Order of Filing of Appeal

Issued: June 2, 1983.

On May 25, 1983, the Commission received a petition from Mr. John L. Mullaney II of Baxter, California, and eighteen others (hereinafter "Petitioners") concerning the alleged United States Postal Service (hereinafter "Postal Service" or "Service") intent to consolidate the Baxter, California post office. The petitioners contend that the Postal Service failed to consider the effect on the community and the level of service to be provided, in its proposal to consolidate this post office.

The Act requires that the Service provide the affected community with at least 60 days notice prior to issuance of its Final Decision in order to "* * * ensure that such persons will have an opportunity to express their views."[1] The petitioner does not mention whether this notice was provided. The Petitioner did, however, provide a copy of the Final Determination, which he used to reference the various specific points of his complaint. As such, his complaint will be considered as a petition for review pursuant to 404(b) of the Postal Reorganization Act (hereinafter Act).

Applicable Law in This Proceeding—The Postal Reorganization Act states:

> The Postal Service shall provides a maximum degree of effective and regular postal services to rural areas, communities, and small towns where post offices are not self-sustaining. No small post office shall be closed solely for operating at a deficit, it being the specific intent of the Congress that effective postal services be insured to residents of both urban and rural communities.[2]

Section 404(b)(2)(C) of the Act specifically includes consideration of this goal in determinations by the Postal Service to close or consolidate post offices. The effect on the community is also a mandatory consideration under Section 404(b)(2)(A) of the Act.

Upon preliminary inspection, the petitioners appear to raise the following issues of law:

1. Is the Postal Service's proposed closing of this post office consistent with the "maximum degree of effective and regular postal services" standard of Section 404(c)(2)(C)?

2. Has the Postal Service adequately considered the effect of this proposed consolidation on the Baxter, California community, as is required by 404(c)(2)(A)?

3. Has the Postal Service incorrectly calculated the economic savings from this consolidation under Section 404(c)(2)(D)?

Other issues of law may become apparent when the Commission has had an opportunity to examine the determination made by the Postal Service. Such additional issues may emerge during Commission review of the Service's determination. Conversely, the determination may be found to resolve adequately upon the issues described above.

[1] 39 U.S.C. 404(b)(1).
[2] 39 U.S.C. 101(b).

Commission Procedure in This Docket

In view of the statutory requirements, and in the interest of expedition of this proceeding under the 120-day decisional deadline imposed by Section 404(c)(5), the Postal Service is advised that the Commission reserves the right to request a legal memorandum from the Service on one or more of the issues described above, and/or any further issues of law disclosed by the determination made in this case. In the event that the Commission finds such memorandum necessary to explain or clarify the Service's legal position or interpretation on any such issue, it will, within 20 days of receiving the Determination and record pursuant to Section 113 of the rules of practice [3] make the request by order specifying the issues to be addressed. When such a request is issued, the memorandum shall be due within 20 days of the issuance, and a copy of the memorandum shall be served on Petitioner by the Service.

In addition, the Commission's rules of practice require the Postal Service to file the administration record of the case within 15 days after the date on which the petition for review is filed with the Commission.[4]

In briefing the case, or in filing any motion to dismiss for want to prosecution, in appropriate circumstances, the Service may incorporate by reference all or any portion of a legal memorandum pursuant to such an order.

The Act does not contemplate appointment of an Officer of the Commission Section 404(b) cases, and none is being appointed.[5]

The Commmission orders:

(A) The petition from John L. Mullaney II, *et al.*, shall be construed as a petition for review pursuant to Section 404(b) of the Act (39 U.S.C. 404(b)).

(B) The Acting Secretary of the Commission shall publish this Notice and Order in the **Federal Register**.

(C) The Postal Service shall file the administrative record in this case on or before June 9, 1983, pursuant to the Commission's rules of practice (39 CFR 3001.112(a)).

By the Commission.

Cyril J. Pittack,

Acting Secretary.

[3] 39 CFR 3001.113.

[4] CFR 3001.113(a). The Postal Rate Commission informs the Postal Service of its receipt of such an appeal by issuing PRC Form No. 56 to the Postal Service upon receipt of each appeal.

BILLING CODE 7715-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13293; 812-5420]

Acacia Fund Corp.; Filing of an Application

June 1, 1983.

Notice is hereby given that Acacia Fund Corporation ("Applicant"), 51 Louisiana Avenue, NW., Washington, D.C. 20001, an open-end, diversified, management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on January 3, 1983, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit Applicant to value its assets using the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder as to the provisions to which the exemption applies.

Organized as a Maryland corporation, Applicant declares that it will operate as a "series fund" as defined by Rule 18f-2 under the Act. Applicant states that, initially, it will have two investment portfolios ("Funds"), but it may create additional portfolios in the future. Applicant designed each existing Fund as an investment vehicle for investors desiring a diversified portfolio of money market instruments. Applicant seeks, as its investment objective, preservation of capital, liquidity, and the maximum current income available from high quality, money market instruments. While both Funds have the same investment objective, they have different investment policies, as described below.

The Acacia Cash Management Fund ("Cash Fund"), Applicant states, invests solely in: (1) Certificates of deposit and other obligations of major banks and savings and loan associations, including U.S. dollar-denominated certificates of foreign branches of U.S banks and U.S. branches of foreign banks; (2) prime commercial paper and high grade, short-term, corporate obligations; and (3) obligations issued or guaranteed by the U.S. Treasury or by agencies and instrumentalities of the U.S. Government. The Cash Fund may purchase such securities subject to repurchase agreeements with recognized dealers and banks determined to present minimal credit risks by Applicant's investment adviser. Applicant will fully collateralize such repurchase agreements at all times. Applicant may also purchase documented discount notes, variable amount master demand notes, variable amount floating rate notes, when-issued securities, and securities subject to reverse repurchase agreements.

The Acacia Government Securities Fund, Applicant states, will invest exclusively in obligations issued or guaranteed by the U.S. Treasury; obligations issued or guaranteed by an agency or instrumentality of the U.S. Government; and any of the above instruments purchased subject to repurchase agreeements with recognized dealers and banks.

Section 6(c) of the Act permits the Commission, among other things, to grant an exemption by order upon application from any provision or provisions of the Act, or from any rule or regulation thereunder, provided such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the relief requested, Applicant states it must price its portfolio securities at amortized cost to meet the needs and expectations of potential investors and to offer its shareholders relative stability of principal and a steady flow of income at competitive rates. Applicant's directors have concluded that it would be in their

shareholders' best interests to use amortized cost valuation to maintain a constant $1.00 share value. Applicant contends that amortized cost valuation, absent unusual circumstances, represents the fair value of the Funds' portfolio securities. Applicant submits that the requested exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant expressly agrees that the following conditions may be imposed in any order of the Commission granting the exemptive relief requested:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, the board of directors undertakes—as a particular responsibility within its overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objective, to stabilize each Fund's net asset value per share, as computed for the purposes of distribution, redemption, and repurchase, at $1.00 per share.

2. Included among the procedures to be adopted by the board of directors shall be the following:

(a) Review by the board of directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the current net asset value per share for each Fund as determined by using available market quotations from each Fund's $1.00 amortized cost price per share, and the maintenance of records of such review. To fulfill this condition, Applicant states that it intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the board of directors in the exercise of its discretion to be appropriate indicators of value. Such quotations or estimates may include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of instruments published by reputable sources.

(b) In the event such deviation from the $1.00 amortized cost price per share of either of Applicant's Funds exceeds ½ of 1%, a requirement that the board of directors will promptly consider what action, if any, should be initiated.

(c) Where the board of directors believes the extent of any deviation from the amortized cost price per share of either of Applicant's Funds may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity for each Fund appropriate to its objective of maintaining a stable net asset value per share; provided, however, that it will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and Applicant will record, maintain, and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act as though such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those U.S. dollar-denominated instruments which the board of directors determines present minimal credit risks and which are of "high quality" as determined by any major rating service, or, in the case of any instrument that is not rated, of comparable quality as determined by the board of directors.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement indicating whether any action pursuant to condition 2(c) was taken during the preceding fiscal quarter, and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 83–15386 Filed 6–7–83; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 13289; 812–5467]

Aggressive Growth Shares, Inc. et al.

June 1, 1983.

Notice is hereby given that Aggressive Growth Shares, Inc., Bullock Fund, Ltd., Bullock Tax-Free Shares, Inc., Canadian Fund, Inc., Dividend Shares, Inc., High Income Shares Inc., Monthly Income Shares, Inc. and Nation-Wide Securities Company, Inc. ("Funds"), each of which is registered as an open-end investment company under the Investment Company Act of 1940 ("Act") and Calvin Bullock, Ltd. ("Bullock") (collectively, "Applicants") One Wall Street, New York, NY 10005, filed an application on March 3, 1983, and amendments thereto on April 15 and April 20, 1983, for an order pursuant to Section 6(c) of the Act, exempting Applicants from the provisions of Section 22(d) of the Act in connection with Applicants' proposed program of marketing shares of the Funds to American Indians through their tribal councils or affiliated organizations, and applying the reduced sales charges currently in effect for the Funds for quantity purchases of

aggregated orders for such shares. All interested persons are referred to the application on file with the Commission for a statement of the representations therein, which are summarized below, and to the Act and the rules thereunder for the text of the applicable sections and rules.

According to the application, Bullock is the principal underwriter for each of the Funds and for Money Shares, Inc., a registered open-end investment company, and maintains a continuous public offering of the shares of each of the Funds at their respective net asset values, plus a sales charge, and of Money Shares at net asset value, without a sales charge. As stated in the prospectuses of each of the Funds, purchasers of shares of that Fund may obtain reduced sales charges by aggregating purchases of such shares within a 13 month period (provided such purchases total at least $10,000) and shares owned, if any, valued at the current offering price, of other investment companies within the Calvin Bullock Group of purposes of determining the size of the purchase and applicable reduced sales charge. Applicants represent that Bullock was recently approached by financial representatives of an Indian Tribal Council in connection with its program of savings and investments with respect to income earned by the Tribal Council, its employees and Indian members of the related Indian Colony. Applicants further state that important considerations in the view of such financial representatives for recommendation to their Tribal Council of the Funds as appropriate investment vehicles were the diversification of risk, availability of systematic investment plans and ease of investment. In addition, Applicants represent that these financial representatives believed that the availability of quantity discounts on large single purchases, on accumulated purchases and on letters of intent were attractive benefits of investing in the funds of a single mutual fund sponsor, such as Bullock.

Applicant represents that in order to encourage action among the United States Indian population, Congress enacted the Indian Reorganization Act of 1934 ("Reorganization Act") which, in effect, provided that the United States Government would grant Indian Tribal Councils corporate status if they adopted a constitution with an elective form of government. Applicants further state that under the Reorganization Act, although Indian ancestries (even if only one fourth) had to be traced back to tribal census rolls taken in 1934, membership in an Indian Colony was not limited to Indians of a specific ethnic tribe, and may also include Indians living both on and off the reservation. Applicants further represent that once Indian Colonies reached Tribal Council status, they were able to engage in various economic activities and programs to achieve the objective of the Reorganization Act, mainly to foster social and economic growth to establish economic and financial self-sufficiency within the United States Indian population. In addition to income-producing ventures, Applicants assert that such programs usually include a program of savings and investment whereby an Indian Tribal Council, through a designated individual, studies and recommends to their Indian Colony various products that will fulfill the savings and investment needs of that Indian Colony. Applicants further state that the designated individual may also arrange classroom presentations by various sales representatives, and secure sales literature and sales materials to be made available to the other members. Moreover, the designated individual will also determine eligibility to participate in, and to collect payments for, investments in the savings and investment programs and, in the case of the Funds, to transmit such payments on a monthly basis.

According to the application, there are 23 Indian Tribal Councils in the State of Nevada and over 200 Councils in the United States. Applicants propose to apply the reduced sales charges currently in effect for the Funds to quantity purchases representing the aggregation of orders of each such Indian Tribal Council, employees of each Council whose investments would otherwise qualify for reduced sales charges pursuant to Rule 22d-1(f) under the Act, and Indian members of related Indian Colonies provided: (i) Each member is eligible to be covered by programs of his Tribal Council pursuant to its constitution; (ii) remittances from the member are made to the Tribal Council, which in turn aggregates all such remittances, its own and those of its employees for transmission to the Fund's transfer agent; and (iii) investments made by each member are made pursuant to an investment or savings program adopted and administered by the Tribal Council and in which the Tribal Council participates in its individual capacity.

Applicants concede that the aggregation of orders by an Indian Tribal Council, its employees and the Indian members of the related Indian Colony (notwithstanding the very considerable economies of scale involved in the sales marketing effort) for purposes of obtaining reduced sales charges is not permitted under Rule 22d-1, adopted by the commission under Section 22(d) of the Act. Thus, Applicants request an order, exempting them from Section 22(d) of the Act pursuant to Section 6(c) of the Act which provides, in pertinent part, that the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provision of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants believe that Indian Tribal Councils, their employees and Indian member of the related Indian Colony present attractive sales opportunities because the investment decisions made by Tribal Councils individually and on behalf of their employees and the Indian members of the related Indian Colonies are made by financial representatives or advisers to the Councils, and consequently that the relative amount of sales efforts and processing costs are substantially less per account than would be the case if Bullock were to solicit individual Indian members of an Indian Colony. For example, in the case of the one Indian Tribal Council which has determined to invest in shares of the Funds, Applicants assert that the savings and investment needs of that Indian Colony were assessed by its financial consultant and upon the recommendation of a registered securities broker, appropriate presentations were made by Bullock to that Tribal Council, its employees and members of the Indian Colony covered by that Tribal Council. Applicants represent that this presentation was made to the Indian Colony as a group and represents a minimum of sales effort on the part of Bullock compared to the effort that would otherwise have been required to make separate presentations to each of the individuals in the Indian Colony.

In addition, Applicants state that all investments by each individual Tribal Council will be submitted at one time with one payment supported by a list stating the investor's name, account number and amount to be invested. According to the application submissions by a Tribal Council will represent remittances from that Tribal Council, its eligible employees and individual Indians eligible to be covered

by the Tribal Council pursuant to its constitution. Thus, Applicants argue that minimum effort is required by Bullock to process such investments, which are then remitted directly to the Fund's transfer agent for investment in already established systematic voluntary payment plans. Applicants submit that these economies of scale are similar in nature and amount to those on which the exemptions in Rule 22d–1 are premised: multiple accounts may in effect be established for the selling and processing costs associated with a single large account.

Moreover, Applicants believe that generic relief is appropriate, as opposed to an exemption relating solely to the single Indian Tribal Council which has to date indicated its interest in making investments in shares of the Funds, because Bullock and the Funds believe that the pattern established in that case will be similar to most other similar sales efforts: a financial adviser or consultant will on behalf of a Tribal Council select and interview several sponsors of "families of funds" and recommend to the Council a single such sponsor because of the convenience of sales charge reductions and diversification within the family of investment alternatives; group presentations will be made; and purchases of shares will be made by single Tribal Council checks, the solicitation and collection of individual remittances being outside the scope of the distributor's responsibility.

Applicants represent that any Indian Tribal Council wishing to introduce the Funds as part of its savings and investment program will periodically notify its employees and Tribal Council members of the availability of shares of the Fund and offer to make available to such employees and Tribal Colonial members, prospectuses of each of the Funds being offered, and that it will do so (a) by notices placed in employees' paycheck envelopes (as to employees only), (b) by notices placed on bulletin boards at the Tribal Council offices or other central locations where they will be seen by the Tribal Colony members or (c) by other similar means. Applicants further assert that any expenses incurred in connection with the notices would ordinarily be incurred by the Tribal Council.

According to the application, the notices will generally describe the investment program being offered, which in the case of a Fund would include a general description of the Fund and its investment objectives, and will set forth in detail the procedures for making an investment in the investment program, including the names and addresses of the persons designated to provide additional information and to administer any particular investment program on behalf of the Tribal Council. Applicants further represent that Bullock will make prospectuses of each of the Funds included in any investment progam available to the designated persons for distribution to persons who make inquiries. In addition, Bullock will comply with the prospectus delivery requirements of the Securities Act of 1933 and the rules thereunder with respect to actual sales of Fund shares. Applicants state that Bullock would ordinarily expect to satisfy such prospectus delivery requirements by including a prospectus with a confirmation of the initial sale shares to a separate account.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 22, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 13287; (812-5510)]

Bayerische Landesbank Girozentrale; Filing of Application

May 31, 1983.

Notice is hereby given that Bayerische Landesbank Girozentrale ("Applicant") 111 East 50th Street, New York, New York 10022, filed an application on March 28, 1983, and an amendment thereto on May 16, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting the Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is the 41st largest bank in the free world and the 7th largest in the Federal Republic of Germany. At December 31, 1982, Applicant had total assets of $39,805,000,000 (assuming an exchange rate of US $1.00=DM 2.3765) and total deposits and bonds of $33,408,000,000. Applicant states that it was created in 1972 by merger of the Bavarian state financial institution (Landesbodenkreditanstalt) and the central bank (Bayerische Gemeindebank) for the local full-service banks (Sparkassen) in Bavaria. Applicant has a single branch in Germany, in Nuremberg, a subsidiary in Luxembourg, and branches in London, Singapore and New York City. The main office of Applicant is located at Brienner Strasse 20, 8000 Munich 2, Federal Republic of Germany. Applicant states that all its liabilities are fully guaranteed by the State of Bavaria.

According to the application, Applicant provides all services normal for commercial banks, and also acts as bank for the State of Bavaria and the Sparkassen. As the bank of the State of Bavaria Applicant states it is responsible for public sector financing, management of state bond issues, treasury functions and state development functions, and as central bank for the Sparkassen, it acts as a clearing house. The Applicant accepts deposits both in Deutsche Marks and foreign currency, buys and sells foreign currency, effects funds transfers and in general provides those banking and financial services which German banks are permitted by law to provide. The terms of Applicant's loans range from short-term to long-term, and many are made to finance housing, municipal development and capital investment and construction projects.

Applicant states that, at December 31, 1982, Applicant's investment securities amounted to $1,486,000,000, which constituted 3.7% of Applicant's assets. As of such date, Applicant's total loans (including deposits with other banks) amounted to $32,691,000,000, representing 82% of assets. Interest income from such loans accounted for 85% of the total income of the Applicant for the period ended December 31, 1982.

Applicant represents that it is extensively regulated by German banking authorities, which regulation includes inspection by the Federal Banking Supervisory Office in Berlin (in cooperation with the Deutsche

Bundesbank) and the Ministries of Finance and Internal Affairs of the State of Bavaria. In addition, Applicant states that German banking legislation contains certain liquidity and capital requirements and lending limits. The State of Bavaria owns 50% of the stock of Applicant; the 115 Sparkassen in Bavaria own the remaining 50%.

According to the application, Applicant proposes to issue and sell prime quality commercial paper notes ("Notes") to commercial paper dealers in the United States which will then reoffer the Notes as principals in minimum denominations of $100,000 to institutional investors and other entities and individuals who normally purchase commercial paper or to sell Notes directly in private placements to institutional investors. Applicant states that its purpose for making this offering in the United States is to obtain an additional source of supply of United States dollars. Applicant represents that the Notes will rank *pari passu* among themselves and equally with all other unsecured and unsubordinated indebtedness of Applicant, including Applicant's deposit liabilities. The Notes will be sold without registration under the Securities Act of 1933 ("1933 Act"), in reliance upon a "no action" letter from the Commission and an opinion of Applicant's United States counsel that the offering will qualify for the exemption from the registration requirements of the 1933 Act pursuant to Section 3(a)(2) thereof. Applicant will not proceed with its proposed offering until it has received such "no action" and opinion letters.

Applicant further represents that the proposed issue of securities and all future public issues of securities of Applicant in the United States shall have received, prior to issuance, one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization; provided, however, that no such rating shall be required to be obtained if in the opinion of Applicant's United States counsel, such counsel having taken into account for the purpose thereof the doctrine of "integration" referred to in Rule 502 under the 1933 Act and various releases and relevant no-action letters made public by the Commission, an exemption from registration is available under Section 4(2) of the 1933 Act. Applicant undertakes to ensure that the dealers will provide each offeree who has indicated an interest in the Notes, and prior to any sale of the Notes to such offeree, with a memorandum which (i) describes the business of Applicant, (ii) contains the most recent publicly available fiscal year-end audited balance sheet and income statement of Applicant and (iii) describes the material differences, if any, between the accounting principles applied by Applicant in the preparation of such financial statements and generally accepted accounting principles applied by United States banks. Applicant represents that such memorandum will be at least as comprehensive as those customarily used in commercial paper offerings in the United States. Such memorandum will be updated periodically to reflect material changes in Applicant's financial status.

Applicant further represents that it may offer other debt securities but not shares of capital stock for sale in the United States and that any future offerings of its securities in the United States will be made only pursuant to a registration statement under the 1933 Act or pursuant to an applicable exemption from registration under such Act, and on the basis of disclosure documents appropriate for such registration or exemption, as the case may be. In no event will such disclosure documents be less comprehensive than is customary for United States offerings of similar debt securities. Applicant undertakes to ensure that any such disclosure documents will be provided to each offeree who has indicated an interest in the securities then being offered, prior to any sale of such securities to such offeree, except that in the case of an offering made pursuant to a registration statement under the 1933 Act, such disclosure documents will be provided to such persons and in such manner as may be required by such Act and the rules and regulations thereunder. Applicant consents to having any order granting the relief requested under Section 6(c) of the Act expressly conditioned upon its compliance with its undertakings regarding disclosure documents.

Applicant represents that, because it is licensed to conduct business through its federal branch in New York City, Applicant is subject to service of process in any action based on the Notes and instituted in any State or Federal court in the City and State of New York by the holder of any Notes. Applicant further represents that Applicant will expressly accept the jurisdiction of any State or Federal court in the City and State of New York in respect of any such action and that such consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the Notes have been paid. Applicant represents that it will similarly consent to jurisdiction and will, if it closes its branch in New York City, appoint an agent for service of process in suits arising from any future offerings of securities that it may make in the United States.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant requests an order pursuant to Section 6(c) of the Act exempting Applicant from all provisions of the Act. Applicant asserts that it is a major commercial bank subject to extensive regulation by German and United States banking authorities and as such it is significantly different from the type of institutions that Congress intended the Act to regulate. Accordingly, Applicant contends that granting an exemptive order pursuant to Section 6(c) of the Act would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13295; (812-5485)]

Capital Realty Investors—II Limited Partnership, et al; Filing of an Application

June 1, 1983.

Notice is hereby given that Capital Realty Investors—II Limited Partnership (the "Partnership"), a Maryland limited partnership, and its general partners, C.R.I., Inc. (the "Managing General Partner"), William B. Dockser, Martin C. Schwartzberg, and H. William Willoughby ("General Partners" and, together with the Partnership, collectively referred to hereinafter as "Applicants") One Central Plaza, 11300 Rockville Pike, Rockville, Maryland 20852, filed an application on March 9, 1983, and an amendment thereto on April 5, 1983, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") for an order of the Commission exempting them from all provisions of the Act and the rules and regulations thereunder. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that the Partnership was formed under the State of Maryland's Revised Uniform Limited Partnership Act on March 23, 1983, as a vehicle for equity investment in government-assisted rental housing in accordance with the policies and objectives of Title IX of the Housing and Urban development Act of 1968 ("Title IX"). Applicants further state that the Partnership will operate as a "two-tier" entity, i.e., the Partnership, as a limited partner, will invest in other limited partnerships ("Local Partnerships") which in turn, will own or lease and will operate apartment complexes which receive or will be receiving one or more forms of government assistance and which may or may not be classified as "low income housing" under the Internal Revenue Code of 1954 and which is in accordance with the purposes and criteria of Investment Company Act Release No. 8456 (August 9, 1974). Applicants also state that the Partnership may invest in certain Local Partnerships which will own or lease conventional (non-government-assisted) apartment complexes, but that such conventional apartment complexes will not represent a significant portion of the Partnership's investments.

Applicants represent that the Partnership is organized as a limited partnership because that form of organization is the only one that provides investors (the "Limited Partners") with both liability limited to their capital investments and the ability to claim on their individual tax return the deductions, losses, credits, and other tax items that originate from the Partnership's interests in the Local Partnerships. Applicants further represent that counsel is rendering its opinion that the Partnership will be treated as a partnership for Federal income tax purposes.

The application states that the Partnership's objectives are to preserve and protect the Partnership's capital; provide, during the early years of the Partnership's operations, current tax benefits to investors in the form of tax losses; provide capital appreciation through appreciation in value of the Partnership's investments and equity buildup through periodic payments on the indebtedness upon the apartment complexes; provide, on a current basis and to the extent available, limited cash distributions from rental operations; and provide cash distributions from sale or refinancing of the Partnership's investments.

Applicants state that on January 20, 1983, the Partnership filed a registration statement under the Securities Act of 1933, pursuant to which the Partnership intends to offer publicly 15,000 Units of limited partnership interest ("Units") at $1,000 per unit. It is asserted that Merrill Lynch, Pierce, Fenner & Smith, Incorporated ("Merrill Lynch"), Dean Witter Reynolds, Inc. ("Dean Witter"), and other selected broker-dealers will act as selling agents for the offering of Units. Applicants represent that the Partnership will have between a minimum of $2,175,000 and a maximum of $13,350,000 available for investment from the proceeds of this offering. It is asserted that, from the amount available for investment, the Partnership will pay certain acquisition expenses and fees to the Managing general Partner and its affiliates and establish a reserve for working capital, and that the remainder of the amount available for investment will be invested in Local Partnerships.

Applicants state that, because it is anticipated that the Partnership will register the Units pursuant to Section 12 of the Securities Exchange Act of 1934 ("Exchange Act"), the Partnership expects to file with the Commission, pursuant to Section 15(d) of the Exchange Act, all required current reports on Forms 10-K, 10-Q, and 8-K as well as any other reports required by such Act. Applicants further state that the Partnership will distribute to the Limited Partners certain reports concerning its business and operation.

According to the application, the Limited Partnership Agreement ("Partnership Agreement") will provide that the Partnership will be controlled by the General Partners and that the Limited Partners, consistent with their limited liability status, will not be entitled to participate in the control of the business of the Partnership or otherwise affect their limited liability. The application states, however, that Limited Partners may, by unanimous vote, elect to dissolve the Partnership and Limited Partners owning a majority of Partnership interests may, in addition, amend the Partnership Agreement, remove any General Partner, and elect a replacement for any General Partner who has been removed. The application further states that, under the Partnership Agreement, each Limited Partner is entitled to review all books and records of the Partnership at any and all reasonable times.

Applicants represent that none of the fees or other kinds of compensation to be paid to the General Partners and their affiliates during the various phases of the organization and operation of the Partnership were negotiated at arms-length. It is asserted, however, that all such compensation is fair and on terms no less favorable to the Partnership than would be the case if such arrangements had been made with independent third parties. It is also asserted that such compensation will meet all applicable guidelines necessary to permit the Units to be offered and sold in the various states which prescribe such guidelines, including without limitation, the statement of policy adopted by the North American Securities Administrators Association, Inc., with respect to real estate programs.

The application states that any of the net proceeds of the offering which the Partnership has not invested or committed to investment in Local Partnerships within 24 months from the date of the Prospectus, except for amounts utilized to pay operating expenses and amounts set aside for reserves, will be returned by the Partnership to the Limited Partners without a reduction for any fees. The application also states that the Partnership will invest any net proceeds not immediately utilized to acquire Local Partnership interests or for other Partnership purposes (such as the establishment of a reserve equal to 2% of the Gross Proceeds), in United States

government securities, including treasury bills, other United States government guaranteed obligations, certificates of deposit or bank time deposits, or tax-exempt notes or bonds with maturities not exceeding one year. The application further states that it is likely that the Partnership will hold temporary investments for more than one year. It is also asserted, however, that the Partnership will own and hold these securities on a temporary basis pending full investment in Local Partnership interests, and it is the Partnership's intention to be engaged primarily, as soon as is reasonably possible, in a business other than that of investing, reinvesting, owning, or holding any of these temporary investments. It is asserted that the Partnership does not intend to trade in temporary investments and will not speculate in any of the temporary securities.

Section 6(c) of the Act provides, as herein pertinent, that the Commission, by order upon application, may conditionally or unconditionally exempt any person from the provisions of the Act and the rules promulgated thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Without conceding that the Partnership is an investment company as defined in the Act, Applicants request that the Partnership be exempted from all the provisions of the Act pursuant to Section 6(c) of the Act. In support of this request, Applicants assert that such exemption is both necessary and appropriate in the public interest and would be consistent with the protection of investors and the purposes and policies underlying the Act. Applicants assert that investment in low and moderate income housing in accordance with the national policy expressed in Title IX is not economically suitable for private investors without the tax and organizational advantages of the limited partnership structure. Applicants further assert that the limited partnership form of organization is incompatible with the operational framework of the Act. Applicants state that a limited partnership would be unable to function in the manner contemplated by the Partnership if it is deemed to be an investment company under the Act. In addition, Applicants maintain that application of the Act would discourage two-tier limited partnership arrangements and thus eliminate the best available means of attracting private equity capital into government-assisted housing and frustrate national policy.

Applicants represent that the contemplated arrangement of the Partnership is not susceptible to abuses of the sort that the Act was designed to remedy. Applicants assert that the Units will be sold only to relatively sophisticated investors who have special qualifications. Applicants assert that any subscriptions for Units of limited partnersip interest must be approved by Merrill Lynch or Dean Witter, as the case may be, which approval shall be conditioned upon representations as to the suitability of the investment for each subscriber. According to the application, each subscriber will represent that he has either (a) a net worth (exclusive of home, furnishings, and automobiles) of at least $50,000 and estimates that he will have an annual gross income of at least $50,000, or (b) a net worth (exclusive of home, furnishings, and automobiles) of at least $150,000 or is purchasing in a fiduciary capacity for a person or entity having such net worth and annual gross income as set forth in clause (a) or such net worth as set forth in clause (b). In addition, Applicants represent that the Partnership Agreement and Prospectus contain numerous provisions designed to insure fair dealing by the General Partners with the Limited Partners. Applicants contend that the suitability standards, requirements for fair dealing provided by the Partnership's governing instruments, and pertinent governmental regulations imposed on each Local Partnership by various federal, state, and local agencies provide protection to investors comparable to and in some respects greater than that provided by the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13292 (812-5470)]

Carnegie Tax Free Income Trust; Filing of Application

June 1, 1983.

Notice is herby given that Carnegie Tax Free Income Trust ("Applicant"), 1331 Euclid Avenue, Cleveland, Ohio 44115, an open-end, diversified management investment company registered under the Investment Company Act of 1940 (the "Act"), filed an application on March 4, 1983, and amendments thereto on April 8 and April 20, 1983, requesting an order of the Commission amending in the manner described below an earlier order of the Commission dated August 10, 1983 (Investment Company Act Release No. 12591). The prior order, pursuant to Section 6(c) of the Act, exempted Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit, inter alia, Applicant to acquire variable rate demand obligations where the demand feature is provided for in the financing documents pursuant to which such obligations are issued and to consider the maturity of such obligations as the longer of the notice period required before Applicant would be entitled to prepayment on the obligation or the period remaining until the obligation's next interest rate adjustment. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the provisions from which as exemption is being sought.

Applicant states that its investment limitations permit it to purchase variable rate demand municipal obligations when the demand feature is provided for in the financing documents pursuant to which the obligations are issued. Applicant states further that, at a special meeting of its shareholders held May 4, 1983, it submitted to its shareholders a proposal to amend its investment limitations to expand the types of variable rate demand municipal obligations which Applicant may

purchase. According to the application, such additional variable rate demand municipal obligations are identical in all material respects to those variable rate demand municipal obligations which Applicant is currently permitted to purchase except that the demand is provided through contract with the seller ("Contract Demand") instead of by the issuer at the time of issuance.

Applicant proposes to acquire such obligations in negotiated transactions with financial institutions. Applicant states that the obligations would have the following features: (1) each obligation would have an interest rate determined by a prescribed formula and adjusted at periodic intervals not to exceed one year; (2) Applicant could at any time demand prepayment of the unpaid principal balance plus accrued interest thereon and would be entitled to prepayment within a prescribed notice period not to exceed seven calendar days, however, Applicant intends to exercise its right to demand prepayment of unpaid principal plus accrued interest only (a) upon the occurrence of material defaults under the financing documents, including failure to pay principal or interest when due, (b) as needed to provide liquidity, or (c) to maintain portfolio quality; (3) absent an earlier exercise by Applicant of its prepayment privileges, the principal under each obligation would be payable on a date exceeding one year from the date of purchase by Applicant; (4) each such obligation purchased by Applicant would be determined, under procedures prescribed by Applicant's Board of Directors (the "Board"), to present minimal credit risks and would be rated by a major rating service within its two highest rating categories or, if not rated, would be determined by the Board to be comparable to tax-exempt securities which are of "high quality" (i.e., within the two highest ratings assigned by any major rating service); and (5) the right of Applicant to receive payment of principal and interest on demand would always be supported by an irrevocable letter of credit or comparable guaranty provided by a financial institution having outstanding debt which meets certain credit criteria. Applicant indicates that it would have the right to draw on the letter of credit or otherwise receive payment pursuant to a guaranty for all or any part of Applicant's right to receive payment of principal or interest on the underlying obligation. Applicant undertakes to monitor the credit of the backing financial institutions and will dispose of any obligation when, due to an adverse change in the credit supporting the obligation, Applicant's Board or any rating service concludes that the obligation is no longer of "high quality".

Applicant proposes to acquire variable rate obligations secured by Contract Demands and to consider the maturity of such obligations as the longer of the notice period required before Applicant would be entitled to prepayment on the obligation or the period remaining until the obligation's next interest rate adjustment. Applicant represents that the acquisition and valuation of variable rate obligations subject to Contract Demands will be preformed in accordance with the provisions of proposed Rule 2a–7 under the Act.

Applicant believes that the expansion of the available supply of municipal obligations to it, together with the freedom of Applicant to negotiate, itself, with financial institutions for the purchase of variable rate obligations subject to Contract Demands, will permit Applicant to obtain more representative yields than are obtainable from fixed-rate, short-term, tax-exempt securities. In this regard, it has been Applicant's experience that variable rate demand obligations which Applicant is currently permitted to purchase frequently have favorable yields, but are often either unavailable or not purchasable in the principal amount desired by Applicant.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 13294 (812–5464)]

Colorado Investment Clubs, Inc.; Filing of Application

June 1, 1983.

Notice is hereby given that Colorado Investment Clubs, Inc. ("Applicant"), 1325 South Colorado Boulevard, Denver, Colorado 80222, a corporation organized under the laws of Colorado, filed an application on February 28, 1983, and an amendment thereto on April 18, 1983, pursuant to Section 6(d) of the Investment Company Act of 1940 (the "Act"), for an order of the Commission exempting Applicant from the provisions of Sections 7, 8(b), 14, 20(a), 23(c), 24(d), 30(a), 30(b), 30(f) and 32(a) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the provisions from which an exemption is being sought.

Applicant's shareholders, directors and officers consist exclusively of the principals of MONY Associates, Inc., Denver, Colorado, which is the Denver agency of the Mutual Life Insurance Company of New York. Applicant states that it proposes to establish as many as 36 investment clubs during the next 12 months and that, each month, three separate and distinct investment clubs will be established. Applicant states that it is the intention of its principals to introduce investors to the insurance products offered by their agencies. An investor, who may be any member of the general public residing in Colorado, may choose to join one or more of the three monthly clubs. Applicant states that the three clubs will require either a $25, $50, or $100 per month subscription charge for the first six months and that the securities purchased by the club requiring a $600 annual investment will be more speculative than those purchased by the other clubs. Each investor will receive a certificate upon completing his subscription obligation evidencing the extent of his investment and every certificate will be redeemed exactly one year from the date of investment. Applicant represents that (1) each club will be completely segregated from every other club, (2) funds received from investors in one club cannot be co-mingled with funds from other clubs, and (3) the profits of one club will not be used to offset losses generated by another club.

Applicant intends to invest in publicly traded equity securities, primarily in regional over-the-counter stocks, as well as equity securities listed on regional and national exchanges. Applicant

states that a high percentage of the investors' subscriptions will be placed in speculative issues, such as start-up oil and gas ventures. Applicant intends to provide an investor the opportunity to obtain a diversified investment in speculative securities without making a large outlay in capital. Applicant states that it does not intend to reap a profit from the investment made in the investment clubs. Applicant states further that it will posses the sole discretion with respect to the initial securities purchased by the club, as well as with subsequent trades. Applicant represents that securities will be placed only upon the recommendation and advice of an experienced nationally recognized NASD-licensed broker.

Applicant asserts that it will not offer or accept total subscriptions to all investment clubs in excess of $100,000. Applicant further asserts that every subscriber will be required to represent to Applicant that: (1) on the date of subscription he is a resident of the State of Colorado, and (2) the purchase is made solely as an individual investment with no intention to resell. Applicant states that each certificate will bear a restrictive legend placing all prospective transferees on notice that the certificate is unregistered. Applicant represents that it will furnish to each prospective investor, at no cost, a disclosure document, which will disclose to such investor at least all of the information required to be submitted by an investment company in Part I and Part II of Form N–2.

Applicant consents to any order granting the requested exemption being subject to the following conditions: (1) Applicant and other persons in their transactions and relations with Applicant shall be subject to all provisions of the Act from which Applicant is not specifically exempted as though Applicant were a registered investment company, and (2) Applicant shall at all times maintain its classification as a closed-end company as defined in Section 5(a)(2) of the Act. Applicant further represents that the requested exemption is not contrary to the public interest or inconsistent with the protection of investors.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who requests a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Release No. 29962 (70–6873)]

Connecticut Yankee Atomic Power Co.; Proposed Borrowing Under a Eurodollar Line of Credit; Order Granting Exception From Competitive Bidding

June 3, 1983.

Connecticut Yankee Atomic Power Company (the "Company"), P.O. Box 270, Hartford, Connecticut 06010, a subsidiary of Northeast Utilities ("NU") and New England Electric System ("NEES"), registered holding companies, has filed with this Commission an application-declaration pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(5) promulgated thereunder.

The Company is owner of a 600,000 KW nuclear electric generating plant which has been in commercial operation since 1968. Outstanding shares of the Company's common stock are owned by ten companies (the "Sponsors"), including NEES and NU.

The Company requests authority to borrow under a proposed $40 million Eurodollar Credit Facility (the "Facility"), the specific terms of which would be negotiated. The Company has requested an exception pursuant to subparagraph 50(a)(5) from the competitive bidding requirements of Rule 50(b) under the Act. The Company proposes to retain an experienced investment banking firm to act as agent to negotiate the terms of the borrowings. To acquire these services, the Company proposes to solicit agency proposals from two or more firms. It is stated that such services are necessary in this case in order to obtain a line of credit which would not require that Sponsors guarantee the obligations of the Company. In the past, the Company has not been successful in arranging financings without Sponsor guarantees, and it is therefore represented that the proposed Facility, if available at all, is one which can be arranged only with the assistance of an experienced investment banking firm which would then negotiate the specific terms of the Facility.

It is proposed that the Facility would be for a term of four years. Borrowings up to $40 million would be permitted, on a revolving basis, with varying maturities, none of which would exceed the expiration date of the Facility. The interest rate for the Facility would be set with reference to the London Inter-Bank Offered Rate ("LIBOR") for one, three or six-month periods. It is proposed that borrowings would bear interest at a rate no greater than ⅝ of 1% above LIBOR during the first two years of the Facility and ¾ of 1% above LIBOR in the last two years. The Company would be obligated to pay a commitment fee on the unused portion of the Facility at a rate not to exceed ⅜ of 1% during the first two years and ½ of 1% iin the last two years. It is expected that a cancellation fee no greater than ¼ of 1% of the Facility amount would be payable during the first year and that the Company would pay an agent bank's fee of approximately $6,000 per annum plus any out-of-pocket expenses. It is also anticipated that the Company would be required to pay its agent's out-of-pocket expenses and, in the event a Facility is successfully negotiated and signed, a management and participation fee equal to approximately ¾ of 1% of the Facility amount.

Borrowings under the proposed arrangement are expected to result in lower borrowing costs than could be achieved under the Company's present domestic borrowing arrangements or under any new alternative domestic borrowing arrangements. The Facility would also benefit the Company by providing an alternate and additional source of financing for its working capital needs and to meet its requirements for construction expenditures, fuel financing and debt repayment.

It appears that the application-declaration, insofar as it relates to the proposed exception from competitive bidding should be granted and permitted to become effective forthwith.

It is ordered, therefore, that the application-declaration, insofar as it relates to the proposed exception from competitive bidding be, and it hereby is, granted and permitted to become effective forthwith pursuant to Rule 50(a)(5).

The application-declaration and any amendments therto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 28, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed, or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13301 (811-1315)]

Memphis and Shelby County Medical Society Investment Retirement Trust; Filing of Application

June 3, 1983.

Notice is hereby given that Memphis & Shelby County Medical Society Investment Retirement Trust ("Applicant"), c/o Dunlap Cannon, Jr., 1905 Sterick Building, Memphis, TN 38103, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on May 20, 1983, for an order of the Commission, pursuant to Section 8(f) of the Act, declaring that Applicant has ceased to be an investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states that Applicant's Trust Committee voted unanimously at a special meeting held on October 13, 1982, to recommend to Applicant's shareholders that Applicant cease its operations and liquidate its assets as of November 29, 1982, or as soon thereafter as such could be accomplished. On November 29, 1982, the holders of 335,974 of the 397,055 of Applicant's shares then outstanding, voted in favor of the liquidation. Beginning November 29, 1982, distributions were made in cash to all of the then outstanding shareholders. The application further represents that there are no securityholders of Applicant at the present time as there has been a complete liquidation of all units. Finally, Applicant states that it is not now engaged in, nor does it propose to engage in, any business activities other than those necessary for the winding up of its affairs.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and, upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22961 (70-6874)]

New England Electric System and New England Power Co.; Proposed Issuance and Sale at Competitive Bidding of Preferred Stock and of General and Refunding Mortgage Bonds; Issuance and Pledge of First Mortgage Bonds; Capital Contributions to Subsidiary; Request for Exception From Competitive Bidding

June 2, 1983.

New England Electric System ("NEES"), a registered holding company, and one of its electric utility subsidiaries, New England Power Company ("NEP"), 25 Research Drive, Westborough, Massachusetts 01581, have filed an application-declaration and an amendment thereto with this Commission pursuant to Sections 6(a), 7, 9(a), 10, and 12 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42, 45, 50(a)(2), and 50(a)(5) promulgated thereunder.

NEP has requested authorization to implement a general financing plan during the period July 1, 1983, to December 31, 1984, including:

(i) Capital contributions from NEES to NEP in an aggregate amount not exceeding $100 million;

(ii) The issue and sale by NEP of one or more series of additional preferred stock in an aggregate par value not exceeding $75 million;

(iii) The issue and sale by NEP of one or more series of General and Refunding Mortgage Bonds in an aggregate principal amount not exceeding $100 million; and

(iv) The issue and pledge by NEP of several series of First Mortgage Bonds in the aggregate not exceeding $165 million.

It is stated that the financing plan has been developed to provide flexibility in terms of the types of securities to be issued and the timing of their issuance. It is intended that the plan provide NEP with the ability to respond rapidly to changing market conditions. The proposed capital contributions and issues of securities are separate transactions, not contingent one upon another, the authorization for which, if granted, would be effective until December 31, 1984.

The capital stock of NEP includes a Dividend Series Preferred ($100 par value) and a Preferred Stock—Cumulative ($25 par value). NEP proposes to issue and sell one or more issues of either class of preferred stock not to exceed an aggregate par value of $75 million (hereinafter, the "Additional Preferred Stock"). The Additional Preferred Stock may be sold at competitive bidding through the public invitation of sealed, written bids, or NEP may also employ alternative competitive bidding procedures in accordance with the Commission's statement of policy (HCAR No. 22623, September 2, 1982) authorizing the use of such procedures in lieu of the procedures prescribed by Rule 50(b). However, NEP indicates that if market conditions make competitive bidding impractical or undesirable, NEP may seek a supplemental order authorizing either private placement or negotiation with underwriters.

NEP proposes to issue the Additional Preferred Stock with either a fixed dividend rate (which shall be a multiple of .04 of 1%) or an adjustable dividend rate for any particular series. Dividend rates and price to NEP (which shall not be less than 98% nor more than 102.75% of par) will be determined by competitive bidding. If the option of an adjustable dividend rate is selected, the initial dividend rate will be determined by NEP with subsequent dividend rates computed at a fixed percentage rate, established by the competitive bidding process, above or below the Applicable Rate, subject to maximum and minimum rates of 14% and 5%, respectively. The difference between the maximum and munimum rates established for a series will be approximately 500 basis points. The Applicable Rate for any dividend period would be the highest of (i) the Three-month Treasury Bill Rate, (ii) the Ten Year Constant Maturity Rate on U.S. Treasury securities and (iii) the Twenty Year Constant Maturity Rate on U.S. Treasury securities, for such dividend period. If the dividend rate or maximum dividend rate specified exceeds 14% per annum, further orders of state commissions exercising jurisdiction may be necessary.

The Additional Preferred Stock will be subject to a five-year prohibition against redemption through the issuance of securities at a lesser effective interest or dividend cost to NEP. A particular series may include provisions for a mandatory sinking fund. Specific provisions have not as yet been determined although NEP has requested the flexibility to issue any series with the most advantageous terms and conditions available, including a mandatory sinking fund not to exceed 20% per year beginning in the sixth year after issuance.

NEP also proposes to issue and sell one or more new series of its General and Refunding Mortgage Bonds not to exceed $100 million principal amount ("Additional G&R Bonds"). The Additional G&R Bonds will mature in not more than 30 years after the date they are issued. The exact maturity date will be fixed prior to the date of the sale of each series.

The additional G&R Bonds will be issued under NEP's General and Refunding Mortgage Indenture as amended and supplemented (collectively, the "G&R Indenture"). All bonds heretofore and hereinafter issued under the G&R Indenture are secured by a mortgage lien on substantially all the properties then owned and, to the extent permitted by law, thereafter acquired by NEP, subject to the lien of its First Mortgage Indenture, liens permitted by the G&R Indenture, and property excepted in the G&R Indenture. All bonds issued under the G&R Indenture are further secured by First Mortgage Bonds which NEP is obligated to issue and pledge with the trustee under the G&R Indenture.

Except with respect to bonds issued in connection with financing pollution control facilities, as set forth below, the Additional G&R Bonds will be sold at competitive bidding in the same manner and subject to the same qualifications as previously specified for the Additional Preferred Stock. The terms and conditions of competitive bidding will provide that each bid shall specify the interest rate (a multiple of ⅛ of 1%) and the price (not less than 98% nor more than 101¾% of the principal amount), exclusive of accrued interest, if any, for each series of Additional G&R Bonds. If the interest rate specified exceeds 15% per annum, further orders of state commissions exercising jurisdiction may be necessary. During the first five years of their term, these Additional G&R Bonds may not be redeemed at general redemption prices through refunding operations at a lesser effective interest cost to NEP.

Approximately $25 million aggregate principal amount of the Additional G&R Bonds would be issued to finance NEP's share of pollution control facilities at Seabrook Generating Units I and II. The Industrial Development Authority of the State of New Hampshire (NHIDA) will issue tax-exempt pollution control revenue bonds and, pursuant to a loan agreement executed with NEP, transfer the proceeds from such issue to NEP. In connection therewith, NEP would contemporaneously issue a corresponding amount of Additional G&R Bonds to the NHIDA to secure payment of, the principal of, and premium, if any, and interest on, the pollution control revenue bonds issued on NEP's behalf. The pollution control revenue bonds would be sold by the NHIDA through arrangements negotiated with underwriters and will mature in not more than 30 years. NEP would not be a party to the negotiated underwriting agreement but those agreements will provide that the terms of the pollution control revenue bonds and their sale shall be acceptable to NEP. Once the terms of the pollution control revenue bonds are approved by the NHIDA, the price, interest rate, sinking fund, and redemption provisions of the Additional G&R Bonds would be fixed so as to conform with the pollution control revenue bonds. If the interest rate of Additional G&R Bonds issued to support pollution control revenue bonds exceeds 12½% per annum, further orders of state commissions may be necessary.

NEP has requested an exception from the competitive requirements of Rule 50 under the Act with respect to the issue of Additional G&R Bonds in connection with the execution of one or more loan agreements with the NHIDA. NEP states that competitive bidding is not appropriate or necessary in connection with these transactions because (1) governmental authorities issuing pollution control revenue bonds can adequately protect the public interest, (2) there are no competitors comparable to such governmental authority to submit alternative bids, and (3) the bonds will not be sold to the public and will serve only as a means to make payments to NHIDA in accordance with the proposed loan agreement.

The G&R Indenture requires that First Mortgage Bonds be issued by NEP and pledged with the trustee under the G&R Indenture as additional security for all G&R Bonds. The issue and pledge of bonds is to occur upon (1) the execution, delivery, and authentication of G&R Bonds; (2) the withdrawal of cash that had been deposited with the G&R Trustee to secure G&R bonds; and (3) the cancellation of First Mortgage Bonds that had been pledged to the G&R Trustee. The principal amount of additional First Mortgage Bonds to be issued to the G&R Trustee (hereinafter, the "Pledged Bonds") is the lesser of (a) the aggregate amount of all G&R bonds outstanding; or (b) the maximum amount of First Mortgage Bonds which can be issued, less a reserve for sinking and improvement fund requirements.

NEP further proposes, first, to issue several series of First Mortgage Bonds in aggregate principal amount not exceeding $100 million as additional security in connection with the issue and sale of the Additional G&R Bonds. Because of restrictive provisions in the First Mortgage Indenture concerning the types of property against which NEP may issue First Mortgage Bonds, there are currently more G&R Bonds outstanding from previously approved series than there are Pledged Bonds. NEP also proposed, therefore, to reduce or eliminate this shortfall, through issues of Series V and Series W First Mortgage Bonds as Pledged Bonds in aggregate principal amounts of $30 million and $35 million, respectively, during the eighteen-month period of the financing plan.

Only Pledged Bonds may now be issued under the First Mortgage Indenture and no new First Mortgage

Bonds will be issued to the public. The provisions of the First Mortgage Indenture remain in full force, however, and, as the First Mortgage Bonds now outstanding mature or are redeemed, publicly held First Mortgage Bonds will represent a decreasing share of the security afforded by the lien of the First Mortgage Indenture. Upon the retirement of all publicly held First Mortgage Bonds, the First Mortgage Indenture will be discharged and the G&R Bonds will become first mortgage bonds.

The relationship of the total principal amount of Pledged Bonds to G&R Bonds will continue to vary from time to time depending on the ability of NEP to issue Pledged Bonds. As additional property becomes available, NEP will need to be able to pledge additional bonds. There will be no proceeds from the issue and pledge of the Pledged Bonds. Accordingly, the issuance of the Pledged Bonds will not affect the capitalization of NEP. The additional Pledged Bonds will be registered in the name of the G&R Trustee. As long as NEP is not in default under its G&R Indenture, the principal, interest, and premium, if any, on any Pledged Bonds need not be paid to the G&R Trustee. To the extent payments are made on the Pledged Bonds, the amount due from NEP to the holders of the G&R Bonds will be reduced to preclude any double recovery.

NEP will apply the proceeds from the proposed financings for corporate purposes including the payment of short-term borrowings incurred for uncapitalized additions and improvements to plant and property, and other uncapitalized expenditures. The proceeds may also be applied to the cost of, or the reimbursement of the treasury for, such expenditures.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 27, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact of law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the Application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 81-680]

Norwest Mortgage, Inc. (Formerly Banco Mortgage Company) as Seller and Servicer; Application and Opportunity for Hearing

June 1, 1983.

Notice is hereby given that Norwest Mortgage, Inc. ("Applicant", formerly known as Banco Mortgage Company) has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act") for exemption from certain reporting requirements under Section 13 of the 1934 Act and from operation of Section 16 of the 1934 Act.

The application states in part:

In the absence of an exemption, Applicant would be required to file reports adhering to all the item requirements of Forms 10-K, 10-Q and 8-K under the 1934 Act.

Applicant believes that the exemptive order requested by it is appropriate in that Form 10-Q and certain items of Form 10-K under the 1934 Act are inapplicable to its pass-through mortgage pool arrangement, and the requirements of Section 16 of the 1934 Act are inapplicable to holders of its mortgage pass-through certificates.

For a more detailed statement of the information presented, all persons are referred to said application, which is on file at the Offices of the Commission in the Public Reference Room, 450 Fifth Street, NW., Washington, D.C. 20549.

Notice is further given that any interested persons not later than June 27, 1983 may submit to the Commission in writing his views or any substantial facts bearing on the application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert.

Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19838; (SR-PSE-83-8)]

Pacific Stock Exchange, Inc.; Order Approving Proposed Rule Change

June 2, 1983.

The Pacific Stock Exchange, Inc. ("PSE"), 618 South Spring Street, Los Angeles, California 90014, submitted on March 4, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to amend Article V, Section I of its constitution to provide that the number of authorized memberships in the Exchange be set at 516. The constitutional amendment repeals the authority given to the Board of Governors in the Options Funding Plan of 1975 to issue additional memberships.[1] In addition, the amendment requires a majority vote of both the PSE membership and the Board of Governors before the sale or lease of additional memberships can be authorized, rather than permitting the Board to issue additional memberships without membership approval.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19607, March 16, 1983) and by

[1] Until October 1975, the PSE constitution authorized the Exchange to issue only 220 memberships. At that time, PSE members approved the issuance of up to 522 additional memberships, primarily to make possible the funding of the initial costs of the commencement of options trading on the Exchange. In its filing with the Commission, the PSE has stated that as a result of the Options Funding Plan of 1975 and subsequent transactions, including rights offerings approved by the PSE Board of Governors in March 1981 and February 1983, 742 memberships were authorized of which 484 are presently outstanding. According to the PSE, an additional 32 memberships could be created pursuant to the most recent rights offering. *See* Securities Exchange Act Release No. 19630, March 24, 1983; 48 FR 15068, April 6, 1983 (File No. SR-PSE-83-7).

publication in the **Federal Register** (48 FR 17666, April 25, 1983). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder. The proposed rule change does not violate the limitations contained in Section 6(c)(4) of the Act [3] in that the PSE's authorization of 742 memberships was principally in connection with the Options Funding Plan of 1975, which was completed without the need to issue a substantial number of the authorized memberships. The primary effect of the proposal is to require membership approval of further increases in membership, rather than permitting the Board to issue additional memberships without membership approval.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13296; (812-5538)]

Penn Series Funds, Inc.; Filing of an Application

June 1, 1983.

Notice is hereby given that Penn Series Funds, Inc. ("Applicant"), Independence Square, Philadelphia, Pennsylvania 19172, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on May 3, 1983, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit Applicant to value the portfolio securities of the Penn Series Money Market Fund using the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder for further information as to the provisions to which the exemption applies.

Applicant, a Maryland corporation, will be the successor to Penn Mutual Equity Fund, Inc., a Delaware corporation, pursuant to a reorganization approved by shareholders of both corporations. Applicant initially plans to offer two classes of shares, the Penn Series Equity Fund and the Penn Series Money Market Fund (the ""Money Market Fund"). The Money Market Fund seeks to preserve shareholder capital, maintain liquidity, and achieve the highest possible level of current income consistent therewith by investment in high quality, money market instruments. Such money market instruments include obligations issued by the U.S. Government, its agencies or instrumentalities, bankers' acceptances, certificates of deposit (including variable rate certificates of deposit), variable amount master demand notes, commercial paper and other short-term, corporate debt instruments, reverse repurchase agreements, and repurchase agreements. Securities subject to repurchase agreements will be fully collateralized in accordance with Investment Company Act Release No. 10666. Applicant will sell its shares only to the Penn Mutual Life Insurance Company and its subsidiaries for their separate and general accounts.

Section 6(c) of the Act permits the Commission, among other things, to grant an exemption by order upon application from any provision or provisions of the Act, or from any rule or regulation thereunder, provided such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the relief requested, Applicant submits that the amortized cost method of valuation will enable it to maintain the stable net asset value and steady income which concern investors. By valuing its securities at amortized cost and declaring dividends daily, Applicant asserts that it can expect its net asset value to remain constant in the absence of unusal market conditions. Applicant contends that potential shareholders are not concerned with theoretical differences that might occur between the yield achieved through market pricing and the yield computed on the basis of amortized cost for instruments Applicant expects to hold until maturity. Prior to adopting the amortized cost method of valuation, Applicant's board of directors will determine in good faith that, absent unusual or extraordinary circumstances, the amortized cost method of valuing securities will reflect the fair value of such securities. Applicant believes that the requested exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant expressly agrees that the following conditions may be imposed in any order of the Commission granting the exemption requested:

1. In supervising the Money Market Fund's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, the board of directors of Applicant undertakes—as a particular responsibility within its overall duty of care owed to the Money Market Fund's shareholders—to establish procedures reasonably designed, taking into account current market conditions and the investment objectives of the Money Market Fund, to stabilize the net asset value per share of the Money Market Fund, as computed for the purpose of distribution, redemption, and repurchase, at $1.00 per share.

2. Included among the procedures to be adopted by the board of directors shall be the following:

(a) Review by the board of directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from the Money Market Fund's $1.00 amortized cost price per share, and the maintenance of records of such review.[4]

(b) In the event such deviation from the Money Market Fund's $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the

---

[3] Section 6(c)(4) of the Act provides, among other things, that a national securities exchange may limit the number of members of the exchange, provided, however, that no exchange shall have authority to decrease the number of memberships below such number in effect on May 1, 1975, or the date such exchange was registered with the Commission, whichever is later. By providing that the number of Exchange memberships be set at 516, the Exchange will not decrease the number of authorized memberships below the 220 memberships authorized as of May 1, 1975. The Commission notes that, after completion of the Exchange's most recent rights offerings (SR-PSE-83-7), the PSE should reach its limit of 516 authorized memberships.

[4] To fulfill this condition, Applicant states that it intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the board of directors in the exercise of its discretion to be appropriate indicators of value, which may include, among others, (i) quotations or estimates of market value for individual portfolio instruments, or (ii) values obtained from yield data relating to classes of instruments published by reputable sources.

board of directors will promptly consider what action, if any, should be initiated.

(c) Where the board of directors believes that the extent of any deviation from the Money Market Fund's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten the average portfolio maturity of the Money Market Fund; reducing or withholding dividends; utilizing a net asset value per share as determined by using available market quotations; or reducing the number of shares outstanding by requesting shareholders to contribute to capital shares of the Money Market Fund.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable price per share of the Money Market Fund; provided, however, that Applicant will neither (a) purchase any instrument with a remaining maturity greater than one year (although instruments subject to repurchase agreements may bear longer maturities),[2] nor (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days.[3]

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and Applicant will record, maintain, and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with section 31(b) of the Act as though such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which, as determined by the board of directors, present minimal credit risks, and which are of "high quality" as determined by any major rating service, or, in the case of any instruments that are not rated, of comparable quality, as determined by the board of directors.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement indicating whether any action pursuant to condition 2(c) was taken during the preceding fiscal quarter, and, if any such action was taken, Applicant will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-15374 Filed 6-7-83; 8:45 am]

BILLING CODE 8010-01-M

[2] Applicant may purchase, for the Money Market Fund, variable rate demand notes which have maturities of more than one year, provided the Money Market Fund is entitled to the payment of principal and accrued interest upon not more than seven days' notice. The rate of interest on such notes is to be adjusted automatically at intervals which normally do not exceed thirty-one days but may extend up to one year. Each variable rate demand note purchased by Applicant would be determined under procedures prescribed by Applicant's board of trustees to present minimal credit risks and will be rated "high quality" at the time of purchase (i.e., within the two highest ratings assigned by any major rating service) or, if unrated, will be determined by Applicant's investment adviser to be of comparable quality, and thereafter the quality of such notes will be monitored by Applicant. In computing its dollar-weighted average portfolio maturity, Applicant states that it will consider the maturity of such notes as the longer of the notice period required before Applicant is entitled to prepayment under the note, or the period remaining until the note's next interest rate adjustment. In connection with such variable rate demand notes purchased by the Money Market Fund, Applicant's board of directors (or Applicant's investment adviser to the extent permitted by Rule 2a–7 under the Act as proposed or as ultimately adopted) will: (i) determine that whenever a new interest rate on a variable rate demand note is established it will then cause the note to have a current market value which approximates its par value; (ii) determine no less frequently than quarterly that variable rate demand notes held by the Money Market Fund are of "high quality"; and (iii) cause the Money Market Fund, absent extenuating circumstances, to dispose of any variable rate note as soon as practicable should the quality of the note fall below "high quality." In addition, the issuer's obligation to pay the principal of a variable rate demand note purchased by the Applicant will be supported by an irrevocable, unconditional bank letter of credit where necessary to ensure that the note is of "high quality" (i.e., in all cases where the Applicant's board of directors and investment adviser cannot determine that a note is of "high quality" without a letter of credit).

[3] In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce such dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

[File No. 81-679]

United States Mutual Real Estate Investment Trust and Detroit Bond & Mortgage Investment Co.; Application

June 1, 1983.

Notice is hereby given that United States Mutual Real Estate Investment Trust, as sponsor and Detroit Bond & Mortgage Investment Co., as Servicer (the "Applicants"), under a Pooling and Servicing Agreement providing for the issuance of Land Contract Pass-Through Certificates have filed an application for an exemptive order pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), for exemption from certain reporting requirements under Section 13 and from the operation of Section 16 of that Act.

The Applicants state, in part:

In the absence of an exemption, the Applicants would be required to file reports adhering to all of the items and instructional requirements of Forms 10–K, 10–Q and 8–K, and may be required to file reports pursuant to Section 16 of the 1934 Act.

Applicants believe that the exemptive order is appropriate in view of the fact that Form 10–Q and certain items of Form 10–K and the instructions thereto, as well as Section 16, are inapplicable to the pass-through-type land contract pool arragement.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the office of the Commission at 450 Fifth Street, N.W., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than June 27, 1983 submit to the Commission

in writing his views or any substantial facts bearing on the application or the desirability of a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549 and should briefly state the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact or law raised by the application which he wishes to controvert. Any time after said date, an order granting the application may be issued by the Commission upon request or upon the Commission's own motion.

Persons who request a hearing or advice as to whether a hearing is ordered will receive a notice of further developments in this matter, including the date of the hearing (if ordered) and any postponement thereof.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19845; File No. SR-BSE-83-4]

Boston Stock Exchange, Inc.; Filing and Immediate Effectiveness of Proposed Rule Change

June 3, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 31, 1983, the Boston Stock Exchange, Inc. ("BSE") filed with the Securities and Exchange Commission the proposed rule change as described herein. the Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change amends Article XIII, Section 1 of the BSE Constitution to increase the fee of members admitted by transfer from $250 to $500. The BSE states in its filing that the purpose for the increase in the membership transfer fee is to raise additional revenue by charging a more realistic amount as it relates to the current cost of membership. The Exchange also noted that there has been no change in the transfer fee since December 29, 1975. According to the BSE, the statutory basis for the proposed rule change is Section 6(b)(4) of the Act which permits the rules of the Exchange to provide for equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its services.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 under the Act. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Reference should be made to File No. SR-BSE-83-4.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street, N.W., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19831; (SR-MSRB-83-3)]

Municipal Securities Rulemaking Board; Order Approving Proposed Rule Change

The Municipal Securities Rulemaking Board ("MSRB") 1150 Connecticut Avenue, N.W., Washington, D.C. 20036, submitted on March 29, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to exempt from the disclosure requirements contained in subsections (d), (g)(ii), and (h)(ii) of MSRB Rule G-11 any note syndicate formed to distribute municipal securities that mature in less than two years ("qualified note syndicate"). Under the proposed rule change, qualified note syndicates will no longer be require to disclose the identity of customers placing group orders or the allocation of securities to customers who placed group orders. In addition, such syndicates also would be exempted from the requirement that at or before final settlement, there be delivery of a summary statement showing the aggregate par values and prices of all securities sold. The MSRB has concluded that the aforementioned requirements are not necessary or beneficial in qualified note syndicates and are unduly burdensome.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 19699, April 25, 1983) and by publication in the **Federal Register** (48 FR 19967, May 3, 1983). No comments were received with respect to the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB and, in particular, the requirements of Section 15B and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19832; File No. SR-NASD-83-11]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Clarification of the NASD's Interpretation on Free-Riding and Withholding

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 25, 1983 the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change

as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the terms of Substance of the Proposed Rule Change

This rule change substitutes the phrase "secondary market whenever such secondary market begins" for the word "immediately" and the phrase "immediately after the distribution process is commenced" wherever they appear in the Board of Governors' Interpretation on Free-Riding and Withholding and its Introduction thereto.

II. Self-Regulatory Organization's Statements, Regarding the Proposed Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Board of Governors' Interpretation on Free-Riding and Withholding and its Introduction thereto address the obligation of the Association's members to make a bona fide public distribution at the public offering price of new issues which trade at a premium in the initial secondary market and establish guidelines with respect to such activity.

The proposed amendments are intended to clarify the application of the Interpretation with respect to new issues where there is a delay in the completion of the initial distribution but which rise to a premium in the aftermarket. The Association has always applied the Free-Riding Interpretation to such delayed distributions, but the Commission has suggested that the Association consider amending its language in order to clear up any doubt as to the Interpretation's application. The Association is thus acting upon the Commission's recommendation as contained in its Opinion *In the Matter of Lowell H. Listrom & Company, Inc.*, Sec. Exch. Act Rel. No. 19414 (January 10, 1983) and Order Denying Petitions for Rehearing, March 22, 1983. The Association is proposing this rule on a temporary basis to expire at the end of sixty days in order to allow the Commission to publish it for comment before approving it as a final rule.

Statutory Basis—The proposed rule change is consistent with the provisions of Section 15A (b)(6) and (b)(8) of the Act in that the amendments are intended to aid members in preventing allocations of new issues which may constitute violations of the Rules of Fair Practice.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe the amendments impose any burden on competition not necessary or appropriate.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No comments on the proposed change were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule changes have been approved on an accelerated basis pursuant to Section 19(b)(2)(B) of the Securities Exchanges Act of 1934 for 60 days.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C 552, will be available for inspection and copying in the Commission's public Reference Section, 450 5th Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication. For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 31, 1983.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19833; File No. SR-NASD-83-12]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Clarification of the NASD's Interpretation on Free-Riding and Withholding

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 26, 1983 the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the terms of Substance of the Proposed Rule Change

This rule change substitutes the phrase "secondary market whenever such secondary market begins" for the word "immediately" and the phrase "immediately after the distribution process is commenced" wherever they appear in the Board of Governors' Interpretation on Free-Riding and Withholding and its Introduction thereto.

II. Self-Regulatory Organization's Statements, Regarding the Proposed Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Board of Governors' Interpretation on Free-Riding and Witholding and its Introduction thereto address the obligation of the Association's members to make a bona fide public distribution at the public offering price of new issues which trade at a premium in the initial secondary market and establish guidelines with respect to such activity.

The proposed amendments are intended to clarify the application of the Interpretation with respect to new issues where there is a delay in the completion of the initial distribution but which rise to a premium in the aftermarket. The Association has always applied the Free-Riding Interpretation to such delayed distributions, but the Commission has suggested that the Association consider amending its language in order to clear up any doubt as to the Interpretation's application. The Association is thus acting upon the Commission's recommendation as contained in its Opinion *In the Matter of Lowell H. Listrom & Company, Inc.*, Sec. Exch. Act Rel. No. 19414 (January 10, 1983) and Order Denying Petitions for Rehearing, March 22, 1983.

Statutory Basis—The proposed rule change is consistent with the provisions of Section 15A (b)(6) and (b)(8) of the Act in that the amendments are intended to aid members in preventing allocations of new issues which may constitute violations of the Rules of Fair Practice.

B. Self-Regulatory Organization's Statement of Burden on Competition

The NASD does not believe the amendments impose any burden on competition not necessary or appropriate.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No comments on the proposed change were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's public Reference Section, 450 5th Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication. For the Commission by the Divison of Market Regulation, pursuant to delegated authority.

Dated: May 31, 1983.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 83-15306 Filed 6-7-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19843; (SR-NASD-80-29)]

National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change

June 2, 1983.

The National Association of Securities Dealers, Inc. ("NASD"), 1735 K Street, N.W., Washington, D.C. 20006, submitted on December 31, 1980, copies of a proposed rule change and an amendment thereto on March 15, 1983, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to amend the provisions of Schedule E of its By-Laws which prescribes restrictions on a member underwriting or participating in a public distribution of its own securities or those of an affiliate ("Schedule E Offering"). The amended proposed rule change deletes or modifies many of the restrictions on Schedule E Offerings currently in the rule. Among those provisions deleted from the rule are the various holding periods and transfer restrictions pertaining to an offering by a member of its own securities and the requirement that an offering by a member of its own securities be limited to three times the member's net worth. The amended rule also would end the prohibition against a member offering more then 25% of the equity interests of all its shareholders in an initial Schedule E Offering or in a Schedule E Offering with no active, bona fide independent market. A member which engages in a Schedule E Offering also will no longer be required to have been engaged in the investment banking or securities industry for the previous five years.

In addition, the amended proposed rule change would delete the requirement that an offering by a member of its own securities be completed within 60 days, but would require a member offering its own securities to disclose in the registration statement a date by which the offering is reasonably expected to be completed and the terms upon which the offering proceeds will be released from escrow. The NASD believes that investors should be informed about the factors which affect the escrow of offering proceeds. The proposed rule change also would require that only one independent underwriter, rather than two as currently required by Schedule E, recommend the offering price of securities in a Schedule E Offering, participate in the preparation of the offering materials and conduct the due diligence investigation. The NASD states that the requirement of two independent underwriters may result in an unnecessary duplication of efforts and poses a costly impediment to the capital raising efforts of broker-dealers.

The NASD states that many of the provisions contained in Schedule E no longer serve a valid regulatory purpose or unjustifiably impeded the capital raising efforts of broker-dealers. Schedule E originally was adopted in 1973 to permit self-underwriting by members subject to a number of restrictions designed to address concerns about both the inherent conflicts of interests in Schedule E Offerings and the fear that lack of investor and market experience with broker-dealer securities could lead to customer overreaching in these offerings. The NASD believes that these potential problems have not

materialized and that Schedule E unfairly places offering restrictions on members to which other issuers are not subject. Furthermore, the NASD believes that Schedule E restrictions have impeded access by members to the capital markets. The NASD believes that the proposed rule change will continue to protect public investors while facilitating the access of its members to new capital markets.

The NASD also decided that certain provisions of Schedule E initially deleted by the proposed rule change are necessary for the protection of investors and should be retained in Schedule E. These provisions include the ten percent threshold level of securities ownership or control for establishing an affiliate relationship; the requirement that the securities of a Schedule E Offering be rated Baa or better by Moody's rating service or Bbb or better by Standard & Poor's in order to be exempt from Schedule E; and the requirement that a member offering its own securities send to its investors or shareholders a quarterly statement of its operations and an annual independently audited financial statement.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 17488, January 26, 1981) and by publication in the **Federal Register** (46 FR 11077, February 5, 1981). Notice of the proposed amendment was given in Securities Exchange Act Release No. 19689 (April 19, 1983) and by publication in the **Federal Register** (48 FR 17667, April 25, 1983). No comments were received with respect to the proposed rule change or the proposed amendment.

The Commission find that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association and, in particular, the requirements of Section 15A and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

George A Fitzsimmons,

Secretary.

[FR Doc. 83-15371 Filed 6-7-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19839; (SR-NYSE-80-16)]

New York Stock Exchange, Inc.; Order Approving Proposed Rule Change

June 2, 1983.

The New York Stock Exchange, Inc. ("NYSE"), 11 Wall Street New York, NY 10005, submitted on April 16, 1980, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to modify NYSE Rules 109, 110, and 112 as they apply to NYSE Competitive Traders (formerly referred to under Exchange rules as Registered Traders). On January 5, 1983, the NYSE filed an amendment which would modify the original proposal as to NYSE Rules 110 and 116.

Rule 109

Rule 109, which prohibits a member from accepting "stops" in any account where the member has an interest, would be rescinded in its entirety and the use of "stops" in such cases would be governed solely by Section 11(a) of the Act, the rules thereunder, and NYSE rules dealing with a member's proprietary trading.[1]

The NYSE has stated to the Commission the following with respect to the effect of the repeal of Rule 109 on a Registered Competitive Market Maker's ("RCMM") ability to deal for his own accoun t: (i) NYSE Rule 107 greatly restricts the RCMM's ability to utilize "stops" and limits the RCMM's ability to effect proprietary transactions by purchasing at the offer or selling at the bid. Under Rule 107, an RCMM in most cases would be able to accept a "stop" only when the guaranteed or "stop" price represents a stablizing tick; (ii) RCMM's would be able to accept a "stop" on a destablizing tick only when the RCMM is purchasing to cover a "short" position at a loss or selling "long" at a loss; and (iii) RCMM's would also be required to meet the requirements of NYSE Rule 116, which governs "stopping stock." [2]

Rule 110

The Exchange in the original filing of April 16, 1980 had proposed to remove Section (2) of Rule 110 which states that Competitive Traders shall not effect purchases or sales for their own accounts except in a reasonable and orderly manner and shall not be conspicuous in the market. According to the Exchange, the proposed removal of this proscriptive language was designed to eliminate vague and duplicative language in light of Section (1) of the Rule and .10 of the Supplementary Material which contain specific restrictions against a Competitive Trader dominating the market. The Exchange, by the amendment of January 5, 1983, proposed to retain this section. The reasons for the amendment are as follows: (i) the repeal of Section (2) might be construed as an easing of a Competitive Trader's obligation to effect transactions in an orderly manner; and (ii) the proscription in Section (2) against being conspicuous in the market is not entirely duplicative of the "dominating" prohibition contained in other parts of Rule 110.

Rule 112

Paragraph (b) of Rule 112 would be modified to state that a member may not act as both a Competitive Trader and a floor broker in the same stock in the same trading session.

Paragraph (d) of Rule 112, which provides that 75 percent of a Competitive Trader's transactions must be stabilizing transactions (purchases on "minus" or "zero" ticks or sales on "plus" or "zero plus" ticks), would be modified. The modifications would exempt from the calculations (i) non-stabilizing purchases effected as part of the initial sale of a newly listed security; and (ii) non-stabilizing transactions effected to liquidate a position which had been acquired as a result of a Floor Official's express invitation to participate in a difficult market situation.

Paragraph .21 of Rule 112, which governs a Competitive Trader's ability to compete with quotations made on the floor by odd-lot dealers, would be rescinded since specialists have assumed the responsibilities once held by odd-lot dealers.

Paragraph .25 of Rule 112, which allows a Competitive Trader to acquire stock via a "stop" if all off-floor bids at the price in question are filled, would be rescinded and the use of a "stop" in such cases would be governed solely by Section 11(a) of the Act, the rules thereunder, and NYSE rules governing proprietary trading.[3]

Paragraph .26 of Rule 112, which requires specialists upon request to provide Competitive Traders with information concerning the previous

---

[1] NYSE Rule 90(c) prohibits an order for the account of any NYSE member or member organization subject to Section 11(a)(1)(G) of the Act and Rule 11a-1-1(T) thereunder from obtaining priority over, parity with, or precedence based on order size over any order for the account of a nonmember. *See also* NYSE Rule 108.

[2] *See* letter from Santo Famularo, Director, Market Surveillance, NYSE, to Michael Cline, Branch of Exchange Regulation, SEC, dated August 11, 1981.

[3] *See* NYSE Rules 90(c) and 108.

transactions of other Competitive Traders, would be rescinded.

Paragraph .30 of the Rule 112, which requires Competitive Traders to submit daily trading reports to the NYSE in duplicate, would be amended to require only a single copy of the trading reports. Certain additional modifications to Paragraph .30 of a "housekeeping" nature would be made to reflect changes of names, addresses, and telephone numbers within the NYSE's departments.

Paragraph .40(B) of Rules 112 would be rescinded as no longer necessary. It provides that any transaction for a member's account that is initiated off the trading floor by any member who is not a Competitive Trader and who was on the floor during the same day must be reported weekly to the NYSE on its Form 82–*O*. The same information would continue to be available to the Exchange on its Form 82–P, pursuant to Rule 112.10, but such forms would be submitted only if specifically requested by the Exchange.

Rule 116

Rule 116.30 prohibits a specialist from stopping stock against the book or for his own account at a price at which he holds an order capable of execution, unless one of four specified exceptions applies. The Exchange proposed by the amendment of January 5, 1983 to remove 116.30(3), the exception which permits a specialist to stop stock "when the specialist does not have an executable order at the stop price," since, according to the Exchange, this exception is clearly implied within the language in paragraph 116.30. The NYSE also proposed to amend Rule 116.30(4), the exception which applies in certain situations when a broker makes an unsolicited request for a "stop", in order to update the text of the rule and to reflect the proposed removal of Rule 109, by expanding the term "broker" to include a member acting on behalf of a proprietary account as well as a member acting on behalf of a public customer's account.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 16800, May 12, 1980) and by publication in the **Federal Register** (45 FR 32463, May 16, 1980). Notice of the amendment of January 5, 1983 together with its terms of substance was given by the issuance of a second Commission release (Securities Exchange Act Release No. 19440 (January 19, 1983) and by publication in the **Federal Register** (48 FR 3900, January 27, 1983). No comments were received with respect to the original rule filing or the amendment.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[File No. 1–0378]

Diamond International Corp., Application To Withdraw From Listing and Registration

June 1, 1983.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the New York Stock Exchange, Inc. ("NYSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

Diamond International Corporation ("Company"), 8.35% Sinking Fund Debentures (due 9–1–2006), has determined to withdraw its debentures from listing and registration on the NYSE because trading in the debentures has been sporadic. In addition, the Company feels that there will be no significant trading in the stock because of the small number of holders and the small principal amount of debentures held by individuals. Finally, the Company has determined that the continued costs and expenses of listing the debentures is no longer justified. The NYSE has posed no objection to this matter.

Any interested person may, on or before June 22, 1983, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of June 13, 1983, at 450 5th Street, NW., Washington, D.C.

An open meeting will be held on Thursday, June 16, 1983, at 2:30 p.m. in Room 1C30, followed by a closed meeting.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10).

Commissioner Evans, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the open meeting scheduled for Thursday, June 16, 1983, at 2:30 p.m., will be:

Consideration of whether to allow, or under what conditions to allow, the use of letters of credit: (1) As "cover," in lieu of margin, when establishing short options positions in foreign currency or stock index options; (2) as collateral for secured demand notes made by subordinated lenders contributing capital to broker-dealers; and (3) as margin deposits required by the Options Clearing Corporation for certain aggregate short or exercised options positions of participants. For further information, please contact Thomas V. Sjoblom at (202) 272–7379.

The subject matter of the closed meeting scheduled for Thursday, June 16, 1983, following the 2:30 p.m. open meeting, will be:

Access to investigative files by Federal, State, or Self-regulatory authorities.
Formal orders of investigation.
Institution of administrative proceeding of an enforcement nature.
Institution of injunctive actions.
Opinion.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Jerry Marlatt at (202) 272–2092.

June 3, 1983.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Presidential Determination No. 83–7 of June 3, 1983

Determination Under Subsection 402(d)(5) of the Trade Act of 1974—Continuation of Waiver Authority

Memorandum for the Secretary of State

Pursuant to the authority vested in me under the Trade Act of 1974 (Public Law 93–618, January 3, 1975; 88 Stat. 1978) (hereinafter "the Act"), I determine, pursuant to subsection 402(d)(5) of the Act, that the further extension of the waiver authority granted by subsection 402(c) of the Act will substantially promote the objectives of section 402 of the Act. I further determine that the continuation of the waivers applicable to the Hungarian People's Republic, the People's Republic of China and the Socialist Republic of Romania will substantially promote the objectives of section 402 of the Act.

This determination shall be published in the **Federal Register.**

Rules and Regulations

Federal Register
Vol. 48, No. 112
Thursday, June 9, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 413, Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This action increases the quantity of California-Arizona lemons that may be shipped to the fresh market during the period May 29–June 4, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the period due to the marketing situation confronting the lemon industry.

DATES: Effective for the period May 29–June 4, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910; 47 FR 50196), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met by telephone on June 2, 1983, to consider the current and prospective conditions of supply and demand and recommended an increase in quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons has improved.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this amendment is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportuntiy to present information and views on the amendment during the telephone meeting, and it relieves restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the Act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

1. Section 910.613 Lemon Regulation 413 (48 FR 23805) is revised to read as follows:

§ 910.613 Lemon Regulation 413.

The quantity of lemons grown in California and Arizona which may be handled during the period May 29, 1983, through June 4, 1983, is established at 310,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: June 3, 1983.

Charles R. Brader,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

FEDERAL RESERVE SYSTEM

12 CFR Parts 207, 220, 221, and 224

[Regs. G, T, U and X]

Securities Credit Transactions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The List of OTC Margin Stocks[1] is comprised of stocks traded over-the-counter (OTC) that have been determined by the Board of Governors of the Federal Reserve System to be subject to margin requirements under certain Federal Reserve regulations. The List is published from time to time by the Board as a guide for lenders subject to the regulations and the general public. This document sets forth additions to or deletions from the previously published List effective July 26, 1982 and the Supplements to that List, effective October 18, 1982, and February 22, 1983, and will serve to give notice to the public about the changed status of certain stocks.

EFFECTIVE DATE: June 20, 1983.

FOR FURTHER INFORMATION CONTACT: Jamie Lenoci, Financial Analyst, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202–452–2781.

SUPPLEMENTARY INFORMATION: Set forth below are stocks representing additions to or deletions from the Board's List of OTC Margin Stocks. A copy of the complete List incorporating these additions and deletions is also on file at the Office of the Federal Register. This complete List supersedes the last complete List published on July 26, 1982 and includes amendments to that List, effective October 18, 1982 and February 22, 1983 (see 47 FR 30719, July 15, 1982, 47 FR 44241, October 7, 1982, and 48 FR 6094, February 10, 1983). The List, as amended, includes those stocks that the

[1] Filed as part of the original document.

Board of Governors has found meet the criteria specified by the Board and thus have the degree of national investor interest, the depth and breadth of market, and the availability of information respecting the stock and its issuer to warrant incorporating such stocks within the requirements of Regulations G, T, U, and X or are being added pursuant to § 220.2(e)(4) of Regulation T which states that the Board may add any stock to the List "if in the judgement of the Board, such action is necessary or appropriate in the public interest." It should be noted that the company, Figgie International Holdings Inc., will become a publicly-held company as a result of a reincorporation merger in which the current public company, Figgie International Inc., will change its domicile to the State of Delaware. The common stock of Figgie International Inc., is now traded on the New York, Pacific and Midwest stock exchanges. The addition to the List of the common stock of Figgie International Holdings Inc., will become effective on or about July 18, when and if the merger is consummated and simultaneous with the commencement of trading in NASDAQ. Copies of the complete up-to-date List may be obtained from any Federal Reserve Bank.

The requirements of 5 U.S.C. 553 with respect to notice and public participation were not followed in connection with the issuance of this amendment due to the objective character of the criteria for inclusion on the List specified in 12 CFR 207.5 (d) and (e), 220.8 (h) and (i), and 221.4 (d) and (3). No additional useful information would be gained by public participation. The full requirements of 5 U.S.C. 553 with respect to deferred effective date have not been followed in connection with the issuance of this amendment because the Board finds that it is in the public interest to facilitate investment and credit decisions based in whole or in part upon the composition of this List as soon as possible. The Board has responded to a request by the public and allowed a two-week delay before the List is effective.

List of Subjects

12 CFR Parts 207 and 221

Banks, banking, Credit, Federal Reserve System, Margin, Margin requirements, Reporting requirements, Securities.

12 CFR Part 220

Banks, banking, Brokers, Credit, Federal Reserve System, Margin, Margin requirements, Investments, Reporting requirements, Securities.

12 CFR Part 224

Banks, banking, Borrowers, Credit, Federal Reserve System, Margin, Margin requirements, Reporting requirements, Securities.

Accordingly, pursuant to the authority of sections 7 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78g and 78w) and in accordance with § 207.2(f)(2) of Regulation G, § 220.2(e)(2) of Regulation T, and § 221.3(d)(2) of Regulation U, there is set forth below a listing of additions to and deletions from the Board's List:

By order of the Board of Governors of the Federal Reserver System acting by its Director of the Division of Banking Supervision and Regulation pursuant to delegated authority (12 CFR 265.2(c)). June 1, 1983.

William W. Wiles,

Secretary of the Board.

[FR Doc. 83-15364 Filed 6-6-83; 8:49 am]
BILLING CODE 6210-01-M

---

12 CFR Part 220

[Docket No. R-0389]

Credit By Brokers and Dealers; Complete Revision and Simplification of Regulation T; Technical Amendments

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule; technical amendments.

SUMMARY: The Board is making technical amendments to its final rule on Regulation T (Credit by Brokers and Dealers) published at 48 FR 23161, May 24, 1983. This action is necessary to

correct three typographical errors consisting of one letter and two numbers in section 12 of the regulation.

FOR FURTHER INFORMATION CONTACT: Robert Lord or Douglas Blass, Attorneys, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; (202) 452-2781.

SUPPLEMENTARY INFORMATION: Section 12 of the final rule in 12 CFR 220 (48 FR 23161, 23170, May 24, 1983) is corrected as follows:

Section 220.12(a) (48 FR 23170) is corrected by changing the letter "(f)" to "(e)".

Section 220.12(b)(4)(i) (48 FR 23170) is corrected by changing the number "(6)" to "(5)". The correct cross-reference is "paragraph (b)(5)".

Section 220.12(b)(6) (48 FR 23170) is corrected by changing the number "(4)" to "(3)". The correct cross-reference is "paragraph (b)(3)".

Board of Governors of the Federal Reserve System, June 2, 1983.

William W. Wiles,

Secretary of the Board.

[FR Doc. 83-15390 Filed 6-8-83; 8:45 am]

BILLING CODE 6210-01-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 505c

[No. 83-318]

Classified Information; Mandatory Review Requests

Dated: June 3, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") is re-publishing its regulations pertaining to the handling of classified information, and revising the time period for agency action on mandatory review requests. Publication of this material is required by Executive Order No. 12356.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Lynnae M. Henderson, Chief, Building Management Section, Administration Office, Federal Home Loan Bank Board, 1700 G Street, NW, Washington, D.C. 20552 (202-377-6229).

SUPPLEMENTARY INFORMATION: Executive Order No. 12356, 47 FR 27836 (1982), established revised policy for the classification, safeguarding, and declassification of national security information, i.e., information classified Top Secret, Secret, or Confidential. Under that Order, each agency that handles such information must establish procedures regarding such handling and publish them in the **Federal Register.** In accordance with that requirement the Board is re-publishing Part 505c of its General Regulations (12 CFR Part 505c) to provide such information, and is taking this opportunity to revise § 505c.3, regarding the time period for agency actions on declassification requests, in conformance with the Information Security Oversight Office's implementing directive for Executive Order No. 12356, § 2001.32 (June 25, 1982).

The Board finds that notice and public procedure are unnecessary under 12 CFR 508.11 and 5 U.S.C. 553(b) because the regulation concerns internal agency procedures, and that publication of the regulation for the 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to effective date is unnecessary for the same reason.

List of Subjects in 12 CFR 505c

Classified information.

Accordingly, the Board hereby amends Part 505c, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

Revise Part 505c as follows:

PART 505c—NATIONAL SECURITY INFORMATION

Sec.

505c. 1 Purpose and scope.
505c. 2 Policy.
505c. 3 Administration of program.
505c. 4 Procedures.

Authority: Sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); E.O. 12356, 47 FR 27836 (1982); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48, Comp. p. 1071.

§ 505c.1 Purpose and scope.

(a) This Part is issued by the Board pursuant to the requirement of Subpart E of Executive Order No. 12356, 47 FR 27839 (1982) ("the Order"), that unclassified regulations that establish information security policy and unclassified guidelines for systematic declassification review, which affect the public, be published in the **Federal Register.**

(b) This Part covers all information and material handled by the Board that is owned by, produced for or by, or under the control of, the United States Government, has been determined pursuant to the Order or prior Orders to require protection against unauthorized disclosure, and is so designated. Such material is referred to in this Part as classified information.

§ 505c.2 Policy.

It is the Board's policy to act in accordance with the Order with respect to all classified information.

§ 505c.3 Administration of program.

The Director, Office of Administration ("Director"), shall: (a) Implement and oversee the Board's information security program; (b) receive questions, suggestions, and complaints regarding it; (c) make changes to it as he deems advisable; (d) ensure that it is at all times consistent with the Order; (e) receive requests for declassification regardless of the origin of any such request, ensuring that requests are acted upon promptly and a final determination as to declassification is made within one year from the date or receipt except in unusual circumstances; and (f) ensure that requests submitted under the Freedom of Information Act are handled in accordance with that Act.

§ 505c.4 Mandatory review procedure.

The Director shall process requests for mandatory review for declassification. The Director shall not refuse to confirm the existence or non-existence of a document requested under the Freedom of Information Act or the Mandatory Review Provision of the Order, unless the fact of its existence or non-existence would itself be classified under the Order.

(E.O. 12356, 47 FR 27876 (1982))

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

[FR Doc. 83-15485 Filed 6-8-83; 8:45 am]

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-ANE-35; Amdt. 39-4658]

Airworthiness Directives; Bendix Engine Products Division S-20, S-200, S-1200, D-2000, and D-3000 Series Magnetos

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: Emergency airworthiness directive (AD) 82-20-01 was issued September 17, 1982, and made effective immediately upon receipt by the operators and owners of certain Bendix magnetos of the above noted series. This AD requires inspection in accordance

with instructions specified herein, and if defective (soft material), the impulse coupling or cam assembly must be replaced. The AD is needed to detect and replace impulse coupling flyweights which were improperly heat treated resulting in rapid wear and failure.

DATES: Effective June 14, 1983, to all persons except those persons to whom it was made immediately effective by priority mail, issued September 17, 1982. Comments on the rule must be received on or before July 14, 1983.

ADDRESSES: The applicable service bulletin may be obtained from Bendix Engine Products, Sidney, New York 13838.

A copy of the applicable service bulletin [1] is contained in the Rules Docket in the Office of the Regional Counsel, FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and in the New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581.

FOR FURTHER INFORMATION CONTACT: Mr. I. Mankuta, ANE-174, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581; telephone: (516) 791-7421.

SUPPLEMENTARY INFORMATION: There have been two incidents in which engine stoppage occurred due to failure of the impulse coupling (less than 200 hours operating time). It was found that the impulse coupling flyweights had been improperly heat treated (soft) and had worn rapidly and jammed. It is believed this damaged the engine accessory drive resulting in engine failure.

Since it was found that immediate corrective action was required, and notice of public procedure was impracticable and contrary to the public interest, good cause existed for making the AD effective immediately to all known U.S. operators and owners of aircraft with Bendix magnetos by individual priority mail letters dated September 17, 1982. (Emergency AD 82-20-01 issued September 17, 1982, specified 18-28 ft. lb. torque upon reassembly of the castellated nut securing the impulse coupling to the drive shaft. This AD specifies 15-25-ft.lb. torque. If compliance has already been accomplished based on AD 82-20-01, it is not necessary to retorque to 15-25 ft. lb.) These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective to all persons.

The FAA determined that this regulation only involves approximately 3,800 defective couplings (based on an estimated 2 percent defects in 190,000 impulse couplings in service). At a labor cost of $22/hour, and allowing 1½ hours for the replacement, the total labor cost would be $125,400. Material cost at $35/coupling add $133,000. Additional allowances for travel (to maintenance facilities), publication cost of bulletins, and shipping costs indicates a total industry cost of approximately $400,000.

Request for Comments on the Rule

Although this action is in the form of a final rule which involves requirements affecting immediate flight safety and, thus, was not preceded by notice and public procedure, comments are invited on the rule.

When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the AD and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. Send comments to Federal Aviation Administration, Office of Regional Counsel, 12 New England Executive Park, Burlington, Massachusetts 01803.

List of Subjects in 14 CFR Part 39

Aircraft, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR Part 39) is amended by adding the following new AD:

Bendix: Applies to Bendix Engine Products Division magnetos with type designations listed below:

Compliance required within the next 10 hours of engine operation unless already accomplished for all affected impulse couplings having less than 300 operating hours. (Compliance with this AD is not required for magneto impulse couplings having more than 300 operating hours.)

S4LN-21/S4RN-21, S6LN-21/S6RN-21, S6LN-23/S6RN-23, S6LN-25/S6RN-25—Except Bendix Red Label magnetos above Serial Nos. B-001171 or A297043.

S4LN-1225/S4RN-1225, S4LN-1227/S4RN-1227, S6LN-1225/S6RN-1225, S6LN-1227/S6RN-1227—Except Bendix Red Label magnetos above Serial Nos. B-001162 or A297043.

S4LN-200 P/N 10-163005-7—Except Bendix Red Label magnetos above Serial Nos. B-001732 or A297043.

D4LN-2021/D4RN-2021, D4LN-2031/D4RN-2031, D4LN-2021/D4RN-2021, D6LN-2021/D6RN-2021, D4LN-2031/D4RN-2031, D6LN-2031/D6RN-2031—Except Bendix Red Label magnetos above Serial Nos. 35550.

D4LN-3000/D6RN-3000—Except Bendix Red Label magnetos above Serial Nos. B-000249 or 5806.

All Blue Label impulse coupled magnetos of the above types—Except Serial Nos. 8238001 and above.

To prevent failure of impulse coupling due to improperly heat treated (soft) flyweights resulting in engine damage or failure, accomplish the following: (Ref. Bendix Service Bulletin No. 823 dated September 1982.)

Note.—The magneto should be removed from the engine only to the extent necessary to perform the inspection described herein. Depending on the engine application, it may not be necessary to remove the harness from the magneto for the inspection procedure.

Note.—All magnetos with the impulse coupling recessed into the magneto flange must have the impulse coupling removed from the magneto to perform the inspection. This is a bench operation and will require the magneto to be completely removed from the engine and the harness removed from the magneto.

Note.—Whenever an impulse coupling is removed from a magneto, it must be removed following the manufacturer's published procedures, paying strict attention to notes and conditions. Upon reassembly, the castellated nut securing the impulse coupling to the drive shaft must be torqued to 15-25 ft. lb. (Emergency AD 82-20-01 issued September 7, 1982, specified 18-28 ft. lb. torque. If compliance has already been accomplished based on AD 82-20-01, it is not necessary to retorque to 15-25 ft. lb.) The cotter pin, Bendix PN 10-80751-18 removed during disassembly, must be discarded and replaced.

1. Remove the magneto from the engine in accordance with the engine/aircraft manufacturer's published instructions.

2. Place the magneto in a suitable work stand with the impulse coupling facing up.

3. Use finger pressure to push inward on the toe (See Figure 1) of each flyweight so that the flyweight heel protrudes outward.

4. Using a fine #1, double cut, ½-inch wide file at least 5/32-inch thick, pass the file across the heel of the flyweight attempting to remove material (See Figure 1). If the flyweight has been properly heat treated, the file will "glide" smoothly over the heel of the flyweight, removing no material. If the flyweight is not properly heat treated (soft), the file will not "glide" easily across the surface of the flyweight heel, and material will be removed.

[1] Bulletin filed as a part of original document.

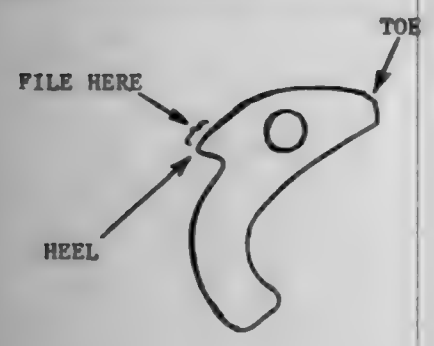

FIGURE 1

5. If an improperly heat treated (soft) flyweight is found, immediately remove and replace the cam assembly and/or the impulse coupling assembly with an assembly meeting the requirements of this AD, following procedures in the magneto overhaul instructions, and paying strict attention to notes and cautions.

6. Inspect the impulse coupling stop pins for wear and replace as necessary.

7. After flyweights have been identified, stop pins inspected, and the impulse coupling reinstalled on the magneto (if removed), identify the magneto by stamping a 1/16-inch letter "F" in the upper right corner of the identification plate to indicate that this AD and Bendix Service Bulletin No. 623 have been complied with.

8. Reinstall the magneto on the engine following the manufacturer's published procedures.

9. Make an appropriate engine logbook entry, recording magneto serial number to indicate that this AD and Bendix Service Bulletin No. 623 have been complied with.

10. Inspect all spare impulse coupling assemblies, cam assemblies, and magnetos following the same procedures described in Steps 3 and 4 of this AD. If both flyweights are found acceptable, identify the cam assembly by applying yellow dyken or yellow lacquer to the heel of each flyweight. Stamp "F" on data plate as described in Step 7.

11. An equivalent method of compliance with this AD may be used if approved by the Manager, New York Aircraft Certification Office, Federal Aviation Administration, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581.

This amendment becomes effective June 14, 1983 as to all persons except those to whom it was made immediately effective by priority mail, issued September 19, 1982.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958 as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and § 11.89 Federal Aviation Regulations (14 CFR 11.89))

Note.—The FAA has determined for the reasons stated in "SUPPLEMENTARY INFORMATION" that this regulation is not considered to be major under Executive Order 12291 or significant under the criteria of DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A regulatory evaluation has been prepared and placed in the regulatory docket. A copy may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Burlington, Massachusetts, on May 28, 1983.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-NM-41-AD; Amdt. 39-4659]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing Airworthiness Directive applicable to Boeing Model 747 series airplanes which requires inspection and replacement of the floor beams located over the main landing gear wheel wells. Recent service experience indicates that the AD is not adequate to detect cracks that have been found in floor beams on airplanes with less than 5000 landings and that the 175 landing visual inspection repetitive interval is not adequate to prevent the occurrence of cracking in two adjacent beams. Since cracking of the floor beams could lead to rapid decompression, a new AD is being issued to lower the threshold and reduce the inspection interval.

DATES: Effective June 20, 1983. Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained upon request from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information also may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Owen Schrader, Airframe Branch, ANM-120S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2516. Mailing Address: Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: AD 81-13-03 (Amdt. No. 39-4138; 46 FR 31873) as amended by (Amdt. No. 39-4485; 47 FR 49957), superseded AD 78-04-04 and AD 78-09-08, to combine inspections of floor beams into one AD and to properly account for earlier cracking. Service experience has shown that the thresholds and some repetitive intervals are inadequate. A 30" chord crack and full depth web crack was found on an aircraft which had accumulated 2534 landings. Two cases of adjacent beam web cracks were reported during the required 175 landing repetitive visual inspection. Another adjacent beam web failure was found within 349 landings after an eddy current inspection.

The current 5000 landing threshold and the repetitive inspections of 175 landings visual and 350 landings eddy current are inadequate to prevent the occurrence of full depth cracks in two adjacent floor beams.

Since this condition is likely to exist or develop on other 747 airplanes of the same type design, this amendment supersedes AD 81-13-03 (Amdt. No. 39-4485; 47 FR 49957) to require inspections at an earlier landing threshold of 2000 landings and repetitive inspections at 125 landings for certain areas of the floor beams. Further, since a situation exists for the Boeing Model 747 that requires immediate adoption of this regulation, it is found that notice and public procedure are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Boeing: Applies to those Model 747 series airplanes certificated in all categories listed in Service Bulletin 747-53-2224, Revision 3, or later FAA approved revisions. To prevent failure of the floor beams and webs, accomplish the following:

A. Visually inspect, or as an alternate, inspect using eddy current inspection techniques, the longitudinal floor beams in the areas noted in the appropriate table of Section III of Boeing Service Bulletin 747-53-2224, Revision 3, or later FAA approved revisions, unless previously accomplished. The inspections are to commence prior to the accumulation of one-half the number of cycles specified in the "Repeat Inspection Interval Cycles" column in the appropriate table in Section III of the service bulletin after the effective date of this AD for airplanes which have accumulated more than the number of cycles listed in the "Inspection

Threshold Cycles" column of the table, or prior to accumulating the inspection threshold number of cycles, whichever is later. Inspections are to be repeated at intervals not to exceed those specified in the table.

B. Webs or chords found cracked are to be repaired or replaced prior to further flight in accordance with the instructions of Section III of Boeing Service Bulletin 747–53–2224, Revision 3, or later FAA approved revisions, or repair of damaged structure may be deferred as noted therein.

C. Complete modification of the floor beam webs and chords in accordance with the terminating action procedures described in Boeing Service Bulletins 747–53–2224, Revision 3; 747–53–2176, Revision 4; and 747–53–2183, Revision 2; or later FAA approved revisions, constitutes terminating action for this AD.

D. After accomplishing each inspection, repairs, or the terminating modification, apply organic corrosion inhibitor (BMS 3–23) or equal to all exposed floor beams and pressure web structures as required.

E. For purposes of complying with this AD, subject to acceptance by the assigned FAA Principal Maintenance Inspector, the number of landings may be determined by dividing each airplane's hours time in service by the operator's fleet average from takeoff to landing for the airplane type. Only pressurized flights need be considered when establishing number of landings on the airplane.

F. Upon request of the operator, an FAA Principal Maintenance Inspector, subject to prior approval by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, may adjust the inspection interval, if the request contains substantiating data to justify the increase for that operator.

G. Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations to operate airplanes to a base for the accomplishment of the inspections and/or modifications required by the AD.

H. Alternate means of compliance or other actions which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

I. This amendment supersedes Airworthiness Directive (AD) 81–13–03; Amdt. No. 39–4138; (46 FR 31873), as amended by Amdt. No. 39–4485; (47 FR 49957).

All persons affected by this directive who have not already received the appropriate service bulletins from the manufacturer may obtain copies upon request to The Boeing Company, P.O. Box 3707, Seattle, Washington 98124. These documents also may be examined at FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective June 20, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in the aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Seattle, Washington, on May 31, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 83–NM–50–AD; Amdt. 39–4660]

Airworthiness Directives; McDonnell Douglas Model DC–10 Series Airplanes With Operable Galley Lifts

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This document amends an existing Airworthiness Directive (AD) applicable to certain McDonnell Douglas Model DC–10 series airplanes which requires modification of the galley lift electrical interlock system. This amendment is required because a spring assembly, required by the existing AD did not retain the proper design tolerances to assure proper interlock switch operation. For those who have yet to comply with the existing AD no additional burden is imposed. Anyone who has complied with the existing AD will be required to replace the existing spring assembly. The compliance time is being extended to account for parts availability.

DATES: Effective June 15, 1983. Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). This information also may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Gilbert L. Thompson, Aerospace Engineer, Systems and Equipment Branch, ANM–130L, Federal Aviation Administration, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 548–2831.

SUPPLEMENTARY INFORMATION: Airworthiness Directive AD 82–27–11, Amendment 39–4530 (48 FR 1935, dated January 17, 1983), applicable to McDonnell Douglas Model DC–10 series airplanes with operable galley lifts, requires modification of the galley lift electrical interlock system. After issuance of Amendment 39–4530 McDonnell Douglas found, upon initial installation of the galley lift modifications required by Paragraph (b) therein, that the material from which P/Ns AWJ 7445–1 or AWJ 7445–501 spring assemblies were constructed deformed under heat treatment. As a result of this deformation, the required tolerances on galley lift interlock switch actuation were not being maintained. This amendment requires installation of spring assemblies constructed from a material which retains its required tolerances assuring proper interlock switch actuation.

Amendment 39–4530 requires compliance with the modifications therein specified by June 15, 1983. Since the proper operation of the galley lift interlock switches depends upon installation of spring assemblies exhibiting correct design tolerances, an urgent need exists to amend AD 82–27–11. For those who have yet to comply with Amendment 39–4530, no additional burden is imposed. However, those who have complied will be required to accomplish the additional task of replacing the original spring assembly. This is estimated to take 1.5 manhours. This amendment provides for an extension of original compliance time to account for parts availability. As a result, this amendment is considered to have minimal economic impact.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation regulations (14 CFR 39.13) is amended by amending AD 82-27-11, Amendment 39-4530 (48 FR 1935, dated January 17, 1983), by amending the compliance period to read "Compliance required by January 30, 1984, unless already accomplished," and revising paragraph B to read as follows:

B. Replace the plunger type interlock switch actuators with leaf spring actuators, install structural protection for the interlock switches, and install additional warning placards as outlined in the Accomplishment Instructions of McDonnell Douglas DC-10 Service Bulletin 25-307, Revision 1, dated March 25, 1983, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—Airplanes modified in accordance with Service Bulletin 25-307 dated May 5, 1982, require rework.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1-750 (54-60). These documents also may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This amendment becomes effective June 15, 1983.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.— The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Seattle, Washington, on May 31, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 83-ASO-17]

Alteration of Transition Area, Beaufort, South Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment increases the size of the Beaufort, South Carolina, transition area to accommodate Instrument Flight Rule (IFR) operations at Beaufort County Airport. This action will lower the base of controlled airspace from 1,200 to 700 feet above the surface in the vicinity of the airport. An instrument approach procedure, based on the Beaufort MCAS Airport Surveillance Radar system, has been developed to serve the airport and the additional controlled airspace is required for protection of IFR aeronautical activities.

EFFECTIVE DATE: 0901 G.m.t., August 4, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, April 14, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by amending the Beaufort, South Carolina, transition area. This alteration will provide controlled airspace for aircraft executing a new instrument approach procedure to Beaufort County Airport (48 FR 16064). The operating status of the airport is changed from VFR to IFR. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received in response to the circularization. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Beaufort, South Carolina, transition area, by lowering the base of controlled airspace in the vicinity to Beaufort County Airport from 1,200 to 700 feet above the surface.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., August 4, 1983, as follows:

Beaufort MCAS, SC [Revised]

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Beaufort MCAS (Latitude 32°28'53" N.; Longitude 80°43'10" W.); within 5 miles each side of Beaufort TACAN 037° radial extending from the 8.5-mile radius area to 9 miles northeast of the TACAN; within a 6-mile radius of Beaufort County Airport (Latitude 32°24'45" N.; Longitude 80°38'00" W.), excluding that portion that coincides with the Hilton Head transition area.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia on June 1, 1983.

George R. LaCaille,

Acting Director, Southern Region.

[FR Doc. 83-15467 Filed 6-8-83; 8:45 am]

14 CFR Part 71

[Airspace Docket No. 83-AWA-4]

Alteration of VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the descriptions of several VOR Federal airways in the vicinity of Montpelier, VT, VORTAC. The Montpelier VORTAC has been relocated approximately 9 miles southeast of the present location. This action amends the descriptions of all airways affected by the relocation.

EFFECTIVE DATE: August 4, 1983.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On March 17, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the descriptions of VOR Federal Airways V-72, V-104, and V-447 (48 FR 11285). The Montpelier VORTAC is being relocated to lat. 44°05'08" N., long. 72°26'59" W., which is approximately 9 miles southeast of the present location. This action amends the descriptions of the affected airways. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the descriptions of several VOR Federal airways in the vicinity of the Montpelier, VT, VORTAC. The Montpelier VORTAC has been relocated approximately 9 miles southeast of the present location. This action amends the descriptions of all airways affected by the relocation.

List of Subjects in 14 CFR Part 71

VOR federal airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., August 4, 1983, as follows:

V-72 [Amended]

By removing all the words after the word "Lebanon, NH."

V-104 [Amended]

By removing all after the words "Bangor, ME." and substituting the words "The airspace within Canada is excluded."

V-447 [Amended]

By removing the words "From Cambridge, NY, via INT Montpelier 020° and Sherbrooke, PQ, Canada, 217° radials; Sherbrooke." and substituting for them the words "From Cambridge, NY, via INT Cambridge 025° and Montpelier 221° radials; Montpelier; to Sherbrooke, PQ, Canada."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on June 2, 1983.

B. Keith Potts,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 71

[Airspace Docket No. 83-ASO-23]

Alteration of Transition Area, Manning, South Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Manning, South Carolina, transition area by raising the base of controlled airspace in an area between the Clarendon County Airport and the Vance VORTAC from 700 to 1,200 feet above the surface. The instrument approach procedure which previously established the requirement for the 700-foot transition area arrival extension has been canceled, thus negating the need for the airspace.

DATES: Effective date: 0901 G.m.t., August 4, 1983.

Comments must be received on or before July 3, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Attn: Manager, Airspace and Procedures Branch, ASO-530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves raising the floor of controlled airspace and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to raise the floor of controlled airspace in an area southwest of Clarendon County Airport as there is no existing requirement for a 700-foot transition area arrival extension. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is a need to raise the base of controlled airspace from 700 to 1200 feet above the surface. The change relieves a restriction and is so minor I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Manning, South Carolina, transition area under § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., August 4, 1983, to read as follows:

Mannng Clarendon County Airport, SC— [Revised]

That airspace extending upwards from 700 feet above the surface within a 6.5-mile radius of Clarendon County Airport (Lat. 33°35'13" N., Long. 80°12'32" W.); within 3 miles each side of the 201° bearing from Manning RBN (Lat. 33°35'18" N., Long. 80°12'20" W.), extending from the 6.5-mile radius area to 8.5 miles south of the RBN.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on May 27, 1983.

George R. LaCaille,

Acting Director, Southern Region.

[FR Doc. 83-15343 Filed 6-8-83; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Parts 71 and 75

[Airspace Docket No. 83-AWA-5]

Alteration of Airways and Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revokes segments of VOR Federal Airways V-510 and V-90 and Jet Route No. J-85 to accommodate traffic flows within the terminal and en route environment.

EFFECTIVE DATE: August 4, 1983.

FOR FURTHER INFORMATION CONTACT: Boyd Archer, Airspace Regulations and Obstructions Branch (AAT-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On April 11, 1983, the FAA proposed to amend Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) to revoke VOR Federal Airways V-90 between Litchfield, MI, and Windsor, ON, Canada, and V-510 between Lansing, MI, and Salem, MI; and Jet Route No. J-85 between Salem, MI, and Dryer, OH (48 FR 15483). Changes in traffic flows within the terminal and en route environment and limited utilization justify cancellation of these airway and jet route segments. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, these amendments are the same as those proposed in the notice. Sections 71.123 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations were republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

These amendments to Parts 71 and 75 of the Federal Aviation Regulations revoke segments of VOR Federal Airways V-510 and V-90 and Jet Route No. J-85 to accommodate traffic flows within the terminal and en route environment.

List of Subjects in 14 CFR Parts 71 and 75

Airways, Jet routes.

Adoption of the Amendments

Accordingly, pursuant to the authority delegated to me, § 71.123 and § 75.100 of Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) are amended, effective 0901 G.m.t., August 4, 1983, as follows:

1. V-90 [Revised]

From Windsor, ON, Canada, via INT Windsor 083° and Dunkirk, NY, 266° radials; Dunkirk. The airspace within Canada is excluded.

2. V-510 [Amended]

After the words "Lansing, MI" delete the words "; INT Lansing 091° and Salem, MI, 308° radials; Salem".

J-85 [Amended]

After the word "DRYER" delete the words "; to Salem, MI".

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on June 2, 1983.

B. Keith Potts,

Manager, Airspace-Rules and Aeronautical Information Division.

CIVIL AERONAUTICS BOARD

14 CFR Part 204

[Economic Reg. Amdt. No. 6 to Part 204; Docket 40734; ER-1326]

Data To Support Fitness Determinations; Erratum

AGENCY: Civil Aeronautics Board.

ACTION: Erratum.

SUMMARY: This erratum notice corrects a typographical error in the information submission requirements for fitness proceedings to refer correctly to the CAB's rules on compliance with the Montreal Agreement for carrier liability limits.

FOR FURTHER INFORMATION CONTACT: Joseph A. Brooks, Office of the General Counsel, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673-5442.

SUPPLEMENTARY INFORMATION: In ER-1236 (48 FR 8048, February 25, 1983) a new § 204.7(r) was added to 14 CFR Part 204 (Data to Support Fitness Determinations), requiring submission of a signed counterpart to the Montreal Agreement with respect to liability limits for aircraft accidents, as part of a carrier's fitness proceeding. The amended section erroneously made reference to Part 202. The correct reference is Part 203, which contains the

Board's new rules concerning that Agreement.

PART 204—[AMENDED]

Section 204.7(r) should read as follows:

§ 204.7 Commuter carriers serving an eligible point but not providing essential air services or applying for certificate authority.

* * * * *

(r) A signed counterpart of CAB Agreement 18900 (CAB Form 263 or CAB Form 298–A (Rev.)), as required by Part 203 of this chapter. Those forms can be obtained from the Publications Services Division, Civil Aeronautics Board, 1825 Connecticut Ave., N.W., Washington, D.C. 20428.

Dated: June 6, 1983.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket C–3109]

Allied Corp.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement requires Allied Corporation (Allied), a Morristown, N.J. producer and seller of three high-purity acids, among other things, to divest Hi-Pure Chemicals, Inc. (Hi-Pure) within 15 months from the effective date of the order. Hi-Pure, acquired from Fisher Scientific Company (Fisher), has to be divested absolutely and in good faith as a visable business concern to a Commission-approved purchaser. Further, Allied is required to grant Hi-Pure's acquirer a ten-year royalty-free nonexclusive license to all patents owned or applied for by Fisher which are used by Hi-Pure in the manufacturing or packaging of any of the three high-purity acids. Additionally, the company is barred for a period of ten years from acquiring any business entity engaged in the manufacturing or packaging of high-purity acids, without prior Commission approval.

DATE: Complaint and order issued May 17, 1983.*

FOR FURTHER INFORMATION CONTACT: FTC/CS–1, Charles Corddry, Washington, D.C. 20580. (202) 724–1269.

SUPPLEMENTARY INFORMATION: On Thursday, Dec. 9, 1982, there was published in the **Federal Register**, 47 FR 55398, a proposed consent agreement with analysis In the Matter of Allied Corporation, a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

A comment was filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Acquiring Corporate Stock or Assets: § 13.5 Acquiring corporate stock or assets; 13.5–20 Federal Trade Commission Act. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533–43 Grant license(s).

[Docket No. C–2836]

E. & J. Gallo Winery; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying Order.

SUMMARY: This order reopens the proceeding and vacates in its entirety the order issued on Aug. 26, 1976 (October 26, 1976; 41 FR 46847). The order, which was due to expire by its terms on Aug. 26, 1986, prohibited respondent from engaging in exclusionary marketing practices.

DATE: Consent Order issued August 26, 1976. Modifying Order issued May 18, 1983.

FOR FURTHER INFORMATION CONTACT: FTC/CC, Elliot Feinberg, Washington, D.C. 20580. (202) 634–4604.

SUPPLEMENTARY INFORMATION: In the Matter of E. & J. Gallo Winery, a corporation. Codification appearing at 41 FR 46847 is deleted.

Trade practices, Wine.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended (15 U.S.C. 45))

The Order Reopening and Setting Aside Order Issued on August 26, 1976 is as follows:

Before Federal Trade Commission, Commissioners: James C. Miller III, Chairman, David A. Clanton, Michael Pertschuk, Patricia P. Bailey, George W. Douglas. In the matter of E. & J. GALLO WINERY, a corporation, Docket No. C–2836. Order Reopening and Setting Aside Order

Issued on August 26, 1976.

On September 23, 1982, respondent E. & J. Gallo Winery ("Gallo") filed a Petition requesting that the Commission reopen the proceeding in Docket No. C–2836 and set aside the Order. Absent Commission action, the order would expire by its terms on August 26, 1986. The Petition was placed on the public record pursuant to § 2.51 of the Commission's Rules of Practice, 16 CFR 2.51. Four timely comments were received requesting that the Commission deny Gallo's Petition. Thereafter, in response to requests of various parties, the Commission allowed further opportunity for comment upon all matters, including information released only after the first comment period had closed. Five comments have been received in the latest comment period which expired on April 29, 1983. Although Rule 2.51 and Section 5(b) of the Federal Trade Commission Act, 15 U.S.C. 45(b), require that the Commission decide petitions to reopen within 120 days of filing Gallo has voluntarily waived this deadline.

The complaint and Consent Order in this matter were issued in 1976. They were based on the belief that Gallo had a dominant position in the sale and distribution of wine in the United States and had used its market power to lessen or restrain competition in violation of Section 5 of the Federal Trade Commission Act. After the complaint and Consent Order in this matter were issued, the Commission issued decisions

* Copies of the Complaint and the Decision and Order filed with the original document.

in *Coca-Cola Bottling Co.*, 93 F.T.C. 110 (1979), and *Heublein, Inc.*, 96 F.T.C. 385 (1980), concerning the domestic wine market. The records in these cases predated the factual information which gave rise to the complaint in Gallo.

The complaint and resulting consent order against Gallo reflected the Commission's concern that the domestic wine market in the mid-1970's was sufficiently concentrated to warrant close scrutiny, particularly since Gallo was then, as now, the market leader. Morever, the Commission was concerned that Gallo may have used its dominant market position to establish and maintain exclusive dealing practices with its distributors. The Commission also believed, as evidenced by the allegations in the complaint, that: wine sales were either declining or at least stabilizing; there were no new entrants at the manufacturing level; Gallo's market share was increasing while concentration of domestic wine supply was rising; and entry barriers were substantial, in part, because of the perceived difficulty of obtaining access to distribution at the wholesale level.

In its Petition, Gallo argues that the structure of the wine market has changed, with concentration declining, demand increasing, significant new entry and low entry barriers. (Petition at 9–17). Gallo also asserts that the Commission's decision in *Coca-Cola* undercuts the rationale of the consent, especially with respect to whether distribution barriers are high at the wholesale level. (Petition at 17–19). In addition, Gallo claims that the consensual vertical practices prohibited by the Order are now analyzed under a rule of reason by the courts and the Commission and are almost always found to be procompetitive or neutral. *See, e.g., Continental T.V. Inc.* v. *GTE Sylvania, Inc.*, 433 U.S. 36 (1977); *In re Beltone Electronic Corp.*, 100 F.T.C. 68 (1982). Gallo contends that the Order hinders it from developing effective distribution programs that will promote interbrand competition. (Petition at 20–21).

The principal thrust of the comments filed in opposition to the Petition is that Gallo will engage in exclusive dealing to the detriment of competition if the Order is vacated in its entirety. (*See, e.g.*, November 5, 1982 Comment of Albert Kramer, Esquire, Cohn and Marks, on behalf of anonymous distributor; November 5, 1982 and January 6, 1983 Comment of Howry & Simon on behalf of *Heublein;* November 5, 1982 Comment of Michael J. Keady, Esquire, on behalf of an unnamed winery. *See also, e.g.*, April 28, 1983 Comments of Wine and Spirits Wholesalers of America, Inc.; April 29, 1983 Additional Comments of the Wine Spectrum.) These commenters contend that Gallo has the market power to impose exclusive dealing on distributors and that such action would raise entry barriers by restricting supplier access to wholesale distributors.

The Commission's decisions in *Coca-Cola* and *Heublein* paint a somewhat different picture of the wine market than is implicit in the Gallo complaint and consent order. Rather than describing a market with stable or declining demand and increasing concentration, these decisions reveal that the market was experiencing rapid growth during the periods in question. In addition, concentration was at moderate levels and increasing only slightly, if at all. Of even greater import, the Commission in *Heublein* noted that considerable entry had occurred and a large number of potential entrants existed who were capable of entering or expanding into the wine business. 96 F.T.C. at 590–91. While not specifically addressing the extent of entry barriers, the Commission's analysis indicates that potential entrants, particularly those in the spirits and beverage business, face no major obstacles to entering the wine market. In discussing the issue of supplier leverage vis-a-vis distributors, the Commission concluded that no significant potential for leverage existed—distributors appeared capable of resisting supplier pressure aimed at forcing dealers to carry a particular brand or line of products. 96 F.T.C. at 599. To be sure, the decision in *Heublein* did not specifically address the issue of exclusive dealing, nor did it suggest that all non-price vertical restraints in the wine market are legal, but it clearly casts doubt on the continued validity of the market assumptions that underlie the Gallo Order.

Apart from evidence presented concerning the competitive state of the wine market, the Petition also makes a strong case for eliminating many of the Order's prohibitions. The Order strictly limits the financial information Gallo can obtain from its distributors as well as any financial assistance that it may seek to provide to wholesalers. In addition, the Order places undefined limits on the extent to which Gallo may restrict the extra-territorial sales of its distributors. Finally, the Order prohibits any kind to tying or requirements arrangement and limits Gallo's ability to influence distributor inventory practices. These restrictions go far beyond concerns about exclusive dealing and the financial limitations, in particular, are highly regulatory in nature. (September 16, 1982 letter from Professor Lawrence A. Sullivan to Jack Owens, Vice President and General Counsel for Gallo.) The information submitted indicates that other wine suppliers use a variety of devices, including brand dedication requirements, to induce distributors to provide more effective promotional services. Although Gallo is permitted under Section II(2)(3) of the Order to terminate dealers for cause, the broad scope of the Order's prohibitions appears to hinder unnecessarily Gallo's ability to utilize many of the marketing devices that are freely employed by its competitors. The fact that some competitors utilize a practice does not, of course, make that practice lawful for all firms, irrespective of their market power. But the conditions in the wine market make it unlikely that competitive injury would result if Gallo were allowed greater flexibility in devising effective distribution programs. Thus, the Commission finds no reason to continue these provisions of the Order.

A closer question is raised by Paragraph I(3)(2) of the consent order, which prohibits exclusive dealing, and is the principal focus of the objecting commenters' concerns. After careful consideration of all comments submitted, the Commission has concluded that this portion of the Order, as well, should be set aside. We believe that the factual considerations identified by Gallo in its petition, and by the Commission in the *Coca Cola* and *Heublein* decisions, indicate that Paragraph I(3)(2) is not necessary or reasonably related to the prevention of competitive harm, and thus can only operate to chill procompetitive conduct by Gallo (*e.g.*, brand dedication efforts) that is open to its competitors. A blanket prohibition upon exclusive dealing is not necessary under all the facts presented, because Gallo's widespread resort to exclusive dealing arrangements would likely be thwarted by the competitive structure of the wine industry, while such resort to exclusive dealing as Gallo might attempt is unlikely to foreclose competitors from needed distributional outlets.

In reaching our conclusion, we do not suggest that use of exclusive distribution arrangements would be lawful in this market under every conceivable market scenario. That would remain to be determined on a case by case basis under the rule of reason. We conclude simply that under all the particular circumstances of this case the likelihood of competitive harm is sufficiently remote that it is in the public interest to

vacate the blanket prohibition on exclusive dealing contained in the order.

Therefore, it is ordered that the order of August 26, 1976 in this matter be, and it hereby is, set aside.

By direction of the Commission. Commissioner Bailey dissenting. Commissioner Pertschuk did not participate.

Issued: May 18, 1983.

Emily H. Rock,

Secretary.

Dissenting Statement of Commissioner Patricia P. Bailey

E. & J. Gallo Winery

May 19, 1983.

I oppose the Commission's decision to grant in full Gallo's petition to reopen and to vacate a 1976 consent order because of my concern about potential anticompetitive exclusive dealing in the wine industry. I support much of the relief requested by Gallo, except for that order provision barring efforts by Gallo to condition continued distribution of its wines on the exclusion of competing brands. I do believe that some relaxation of even this order provision is justified, in order to permit reasonable and non-discriminatory minimal performance standards on the part of wholesalers of Gallo products. These might include brand dedication efforts, such as some kind of volume sales requirements, forms of promotion and store display, inventory level standards, and assurances of dealer financial stability.

I am concerned by the public record comments received from participants in the wine industry who object to our vacating the exclusive dealing aspect of the Gallo petition. They have argued that vacating the entire order is unjustified because even the existing proscriptions permit Gallo to impose legitimate reasonable brand dedication requirements on wholesalers. They believe that exclusive dealing is potentially a genuine problem because of Gallo's role as the wine industry's "dominant" firm. They have argued that Gallo's inherent market power stems not just from its national market share (in excess of 25%), but from its market share edge over all other competitors. Gallo's market share in some geographic areas may even exceed its position nationwide. Gallo is larger than its next several rivals combined, has maintained this share by capturing more market growth than have its competitors, and throughout has remained the firm with the most desirable "full-line" offering of wine products. The thrust of all these arguments is that Gallo may have the ability to force wholesalers in at least some major markets to decide between carrying Gallo products, which may account for a fourth of sales or more, and the products of other major competitors. Gallo apparently engages even now in exclusive dealing in eleven major markets through wholesalers controlled by Gallo or Gallo executives.

To counter these concerns, the argument is made that barriers to entry into wine wholesaling are so low that any Gallo efforts at exclusive dealing will only cause new wholesaling outlets to appear and carry the lines ousted from wholesalers electing Gallo-only distribution. While it is true that there are few technical obstacles to entry into wine wholesaling, it also appears to be the case that this business is characterized by high volume/low margin sales, with only a half-dozen or fewer incumbent wholesalers serving most urban markets. Most markets, being saturated, may be unattractive to new distributors of the size needed to ensure profitability.

Finally, Gallo has argued that the order places it at a competitive disadvantage because the order inhibits its distributional efficiency. Given Gallo's steady and longterm role as the largest and most successful of the nation's wine distributors, and its success in exploiting market growth so as to retain its overall market share, I do not see how Gallo has demonstrated that the Commission's order has hampered the success of its marketing practices.

The Commission has also taken notice of its decisions in the *Heublein* and *Coca-Cola of New York* Section 7 wine merger matters as creating a "special circumstance" justifying application of the facts of those cases to the Gallo petition. Those merger cases did not focus on exclusive dealing, or the acts, practices and market position of the Gallo wine firm, or even, in detail, the subject of wine wholesale distribution. They do not compel the granting of the Gallo petition, particularly with regard to any specific Gallo decision that might be made to require wholesalers to exclude competing brands in Gallo's favor.

Respondent bears the burden of proof that altering any part of an FTC order is justified. With respect to exclusive dealing, I believe Gallo has failed to meet this burden, even though the Commission retains the right to sue Gallo in the future if any of its actions amount to violations of the antitrust laws under a rule of reason analysis. The course of action that I proposed as a substitute for the Commission's decision would have permitted Gallo all the relief it seeks, except with respect to a single course of action, which Gallo neither proves it needs nor states that it intends, yet which was a vital part of the original FTC settlement that respondent agreed to in 1976.

My fear is that the vacation of the Commission's order encourages exclusive dealing by Gallo in at least some large and important markets, and that such a signal in the marketplace is an ominous portent for product distribution in other industries.[1]

Special Local Regulations; LSCORA Downriver Offshore Classic

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special local regulations are being adopted for the LSCORA Downriver Offshore Classic. This event will be held on July 30, 1983 from 10:00 AM (EDT) until 2:00 PM with a rain date of July 31, 1983. The regulations are needed to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATES: These regulations become effective on July 30, 1983 and terminate on July 31, 1983.

FOR FURTHER INFORMATION CONTACT: MSTC Bruce Graham, Office of Search and Rescue, Ninth Coast Guard District, 1240 E 9th St., Cleveland, OH 44199, (216) 522-4420.

SUPPLEMENTARY INFORMATION: A notice of proposed rule making has not been published for these regulations. Following normal rule making procedures is unnecessary as per 5 U.S.C. 553(b)(3)(B). This has been an annual event for many years and no negative comments have been received concerning the holding of the event in the past.

Drafting Information

The drafters of this regulation are MSTC Bruce Graham, project officer, Office of Search and Rescue and LCDR A. R. Butler, project attorney, Ninth Coast Guard District Legal Office.

Discussion of Regulations

The Lake St. Clair Offshore Racing Association's 3rd Annual Southshore Classic will be conducted on the Detroit River on July 30, 1983. This event will have an estimated 20-30 high performance ocean racers which could pose hazards to navigation in the area. Vessels desiring to transit the regulated area may do so only with prior approval of the Patrol Commander (Officer-in-Charge, U.S. Coast Guard Station, Belle Isle, MI).

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Regulations

PART 100—[AMENDED]

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding a temporary § 100.35–0913 to read as follows:

§ 100.35–0913 Special local regulations.

(a) *Regulated Area.* That portion of the Detroit River in U.S. waters north of a line from Hickory Island to Celeron Island to Horse Island up to a line extending from Pt. Hennepin to Grassy Island to Mud Island, then along the north side of the Ecorse Channel to Mud Island Junction Lighted Buoy (LLNR 974) thence due west to shore. Also, the Fighting Island Channel from the Mud Island Junction Lighted Buoy (LLNR 974) south to where the course leaves the channel at approximately 44 degrees 11.2 minutes North, thence on a bearing of 206 degrees true and 200 yards wide to a point at 42 degrees 10.65 minutes North, thence on a bearing of 160 degrees true to the International Boundary. The Livingstone Channel from 42 degrees 08 minutes North to 42 degrees 06.5 minutes North. Also, from the International Boundary at 42 degrees 04 minutes North northwest on a bearing of 312 degrees true 200 yards wide to the previously mentioned line from Hickory Island to Celeron Island to Horse Island.

(b) *Special Local Regulations.* (1) The above area will be closed to recreational vessel navigation or anchorage from 10:00 AM (EDT) until 2:00 PM, or until the completion of the race.

(2) No vessel shall anchor in or around the main shipping channel of the Detroit River, Trenton Channel, nor shall any spectator craft interfere with the free passage of commercial traffic in the main fairways of the Detroit River.

(3) Recreational vessels desiring to transit the restricted area may do so only with prior approval of the Patrol Commander and when so directed by that officer. Vessels will be operated at a no wake speed to reduce the wake to a minimum and in a manner which will not endanger participants in the event or any other craft. These rules shall not apply to participants in the event or vessels of the patrol, in the performance of their assigned duties.

(4) A succession of sharp, short signals by whistle or horn from vessels patrolling the areas under the direction of the U.S. Coast Guard Patrol Commander shall serve as a signal to stop. Vessels signaled shall stop and shall comply with the orders of the Patrol Vessel; failure to do so may result in expulsion from the area, citation for failure to comply, or both.

(5) This section is effective from 10:00 AM (EDT) on 30 July 1983 until 2:00 PM on 31 July 1983.

Discussion of Regulations

The B&T Icebreaker Regatta will be conducted on the Niagara River, Tonawanda Channel, on June 25 and 26, 1983. This event will have an estimated 50 hydroplanes which could pose hazards to navigation in the area. Vessels desiring to transit the regulated area may do so only with prior approval of the Patrol Commander (U.S. Coast Guard Group Buffalo, NY).

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

PART 100—[AMENDED]

Regulations

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding a temporary § 100.35-0912 to read as follows:

§ 100.35-0912 Special local regulations.

(a) *Regulated Area.* That portion of the east branch of the Niagara River, Tonawanda Channel, from the overhead cable, 1300 yards northeast of the South Grand Island Bridge, to an east-west line through Tonawanda Channel Buoy 35 (LLP 29).

(b) *Special Local Regulations.* (1) The above area will be restricted to vessel navigation or anchorage from 1200 (local time) until 1900 on June 25 and 26, 1983.

(2) The patrol of a portion of Niagara River will be under the direction of a designated Coast Guard Patrol Commander who is empowered to forbid and control movement of vessels in the area before, during, and after the events for such time as he finds it necessary for the safe and orderly conduct of the events.

(3) A succession of sharp, short signals by whistle or horn from vessels patrolling the areas under the direction of the U.S. Coast Guard Patrol Commander shall serve as a signal to stop. Vessels signaled shall stop and shall comply with the orders of the Patrol Vessel; failure to do so may result in expulsion from the area, citation for faiure to comply, or both.

(46 U.S.C. 454; 49 U.S.C. 1655(b); 49 CFR 1.46(b); and 33 CFR 100.35.)

Dated: May 24, 1983.

Henry H. Bell,

U.S. Coast Guard.

BILLING CODE 4910-14-M

33 CFR Part 100

[CGD 09-83-10]

Special Local Regulations; Duluth Harbor Fireworks

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special local regulations are being adopted for Duluth Harbor Fireworks. This event will be held on July 4, 1983 at Duluth Harbor. The regulations are needed to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATE: These regulations become effective and terminate on July 4, 1983.

FOR FURTHER INFORMATION CONTACT: MSTC Bruce Graham, Office of Search and Rescue, Ninth Coast Guard District, 1240 E 9th St., Cleveland, OH 44199, (216) 522-4420.

SUPPLEMENTARY INFORMATION: A notice of proposed rule making has not been published for these regulations. Following normal rule making procedures is unnecessary as per 5 U.S.C. 553(b)(3)(B). This has been an annual event for many years and no negative comments have been received concerning the holding of the event in the past.

Drafting Information

The drafters of this regulation are MSTC Bruce Graham, project officer, Office of Search and Rescue and LCDR A. R. Butler, project attorney, Ninth Coast Guard District Legal Office.

Discussion of Regulations

The Duluth fireworks display will be conducted in Duluth Harbor on July 4, 1983. This event will have falling ash and debris and an unusually large concentration of spectator boats which could pose hazards to navigation in the area. Vessels desiring to transit the regulated area may do so only with prior approval of the Patrol Commander (U.S. Coast Guard Station, Duluth, MN).

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

PART 100—[AMENDED]

Regulations

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding a temporary § 100.35-0910 to read as follows:

§ 100.35-0910 Special local regulations.

(a) *Regulated Area.* That portion of Duluth Harbor Basin Northern Section bounded on the south by a line drawn on a bearing of 087 degrees true from the Cargill Pier through Duluth Basin Lighted Buoy 5 (LLNR 1813) to the opposite shore and on the north by the Duluth Aerial Bridge.

(b) *Special Local Regulations.* (1) The above portion of Duluth Harbor, Lake Superior will be closed to commercial vessel navigation or anchorage from 7:30 p.m. (local time) until 11:00 p.m. on 4 July 1983.

(2) The following portions of Duluth Harbor Basin Northern Section will be closed to all traffic from 7:30 p.m. until 11:00 p.m. on 4 July 1983.

(i) Within 300 yards of position 46 degrees 46 minutes 43 seconds North and 092 degrees 06 minutes 03 seconds West.

(3) Vessels desiring to transit the restricted area may do so only with prior approval of the Patrol Commander and when so directed by that officer. Vessels will be operated at a no wake speed to reduce the wake to a minimum and in a manner which will not endanger participants in the event or any other craft. These rules shall not apply to participants in the event or

vessels of the patrol, in the performance of their assigned duties.

(4) A succession of sharp, short signals by whistle or horn from vessels patrolling the areas under the direction of the U.S. Coast Guard Patrol Commander shall serve as a signal to stop. Vessels signaled shall stop and shall comply with the orders of the Patrol Vessel; failure to do so may result in expulsion from the area, citation for failure to comply, or both.

(46 U.S.C. 454; 49 U.S.C. 1655(b); 49 CFR 1.46(b); and 33 CFR 100.35.)

Dated: May 24, 1983.

Henry H. Bell,

U.S. Coast Guard.

BILLING CODE 4910-14-M

---

33 CFR Part 100

[CGD1 83-01]

Marine Parade; the Great Kennebec River Whatever Race

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is restricting the navigation of vessels not involved as participants or safety patrols on the Kennebec River during the 1983 Great Kennebec River Whatever Race on July 3, 1983. The purpose of this regulation is to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATE: July 3, 1983, 6:00 A.M. to 6:00 P.M.

FOR FURTHER INFORMATION CONTACT: LT M. J. Chaplain, USCG, Chief, Boating Standards/Affairs Branch (bc), Room 1102, First Coast Guard District, 150 Causeway Street, Boston, MA 02114, (617) 223-3607.

SUPPLEMENTARY INFORMATION: On March 17, 1983, the Coast Guard published a notice of proposed rule making in the **Federal Register** for this regulation (48 FR 11300). Additionally, Public Notification of the Notice of Proposed Rulemaking was forwarded to newspapers in Sagadahoc and Kennebec Counties, Maine, for publication. Interested persons were requested to submit comments. No comments were received.

Drafting Information

The drafters of this regulation are LT M. J. Chaplain, USCG, project officer, First Coast Guard District Boating Standards/Affairs Branch and LCDR S. C. Ploszaj, project attorney, First Coast Guard District Legal Office.

Discussion of Comments

No comments have been received. Accordingly, this final rule is published with no changes to the proposed regulation having been made.

Economic Assessment and Certification

This regulation is considered to be nonsignificant in accordance with DOT Policies and Procedures for Simplification, Analysis and Review of Regulations (DOT Order 2100.5). Its economic impact is expected to be minimal since the restriction to navigation is for only a short period of time, and only affects a small portion of the river. Additionally, since this regulation supports an area promotional activity sponsored by the Kennebec Valley Chamber of Commerce, an increase in area business due to this marine parade is anticipated. Based upon this assessment, it is certified in accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this regulation will not have a significant economic impact on a substantial number of small entities. Also, the regulation has been reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulation and has been determined not to be a major rule under the terms of that order.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

PART 100—[AMENDED]

Final Regulation

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding § 100.35-1-01 to read as follows:

§ 100.35-1-01 The Great Kennebec River Whatever Race, Regatta.

(a) Regulated Area: Kennebec River, bank to bank, between the State of Maine Route 126 Highway Bridge connecting Randolph, Maine, and Gardner, Maine, and the U.S. Route 201-202 Highway Bridge at Augusta, Maine.

(b) Effective Period: 6:00 am, July 3, 1983 until 6:00 pm, July 3, 1983 or completion of the Great Kennebec River Whatever Race, whichever is earlier.

(c) Special Local Regulations: Vessels not participating in, or operating as a safety patrol in support of, the Great Kennebec River Whatever Race shall:

(1) Observe a maximum speed limit of five (5) mph or "No Wake Speed", whichever is less.

(2) Be alert for disabled craft and persons falling overboard.

(3) Exercise extreme caution when operating in the area of this marine parade.

(46 U.S.C. 454; 49 U.S.C. 1655(b); 49 CFR 1.46; and 33 CFR 100.35)

Dated: May 26, 1983.

C. E. Robbins,

RADM, USCG, First Coast Guard District.

BILLING CODE 4910-14-M

---

33 CFR Part 117

[CGD 08-83-01]

Drawbridge Operation Regulations; Bayou Chico, Florida

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Florida Department of Transportation and the Pensacola Urbanized Area Metropolitan Planning Organization, the Coast Guard is changing the regulation governing the State Highway 292 (Barrancas Avenue) bascule span bridge across Bayou Chico, mile 0.3, Pensacola, Escambia County, Florida. The bridge provides a vertical clearance of 14.5 feet at the center of the closed span during mean low water and now opens on signal at any time for any vessel.

The change will require that the draw continue to open on signal from all vessels but will not need to open for pleasure vessels Monday through Friday excluding holidays, from 6:00 A.M. to 8:00 A.M., 11:00 A.M. to 1:00 P.M., and 3:00 P.M. to 6:00 P.M. Exceptions to this restriction for pleasure vessels will be for the draw to open (a) on the hour and half-hour if these vessels are waiting to pass (b) when at least five of that type are waiting to pass or (c) in case of an emergency or when they are seeking refuge from severe storms. Moreover, pleasure vessels will be able to pass through the draw while it is opened for non-pleasure vessels. This action is being taken to relieve overland traffic congestion during the peak morning, noon and afternoon vehicular traffic periods, while still providing for the reasonable needs of pleasure vessels.

EFFECTIVE DATE: This amendment is effective on July 11, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph Irico, Chief, Bridge Administration Branch, Eighth Coast Guard District, Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 70130 — (504) 589-2965.

SUPPLEMENTARY INFORMATION: On 28 February 1983, the Coast Guard

published a proposed rule (48 FR 8302) concerning this amendment. The Eighth Coast Guard District also published this proposal as a Public Notice dated 28 February 1983. Interested persons were given until 14 April 1983 to submit comments.

Drafting Information

The principal persons involved in drafting this rule are: Joseph Irico, Project Manager, District Operations Division, and Steve Crawford, General Attorney, District Legal Office.

Discussion of Comments

Twenty-nine comments were received in support of the change. Nineteen were from individuals, six from local civic or employee groups with extensive membership (one as high as 30,000 members), two from local governing bodies, and one each from a federal legislator and federal agency.

No comments were received from owners whose vessels or marinas are located downstream of the bridge. However, five comments were received in opposition to the change from four owners of individual pleasure vessels and one owner of a marina, whose vessels and marina are located upstream of the bridge. There are about 150 pleasure vessels berthed in four marinas above the bridge.

The five in opposition addressed five areas of concern in varying degree: (1) Vehicular congestion caused more by commercial than pleasure vessels (2) congestion and safety of the waterway (3) side effect on vehicular operations (4) loss of business (5) alternative vehicular routing. These areas of concern are discussed below.

During the peak vehicular traffic periods, Monday through Firday, 6:00 A.M. to 8:00 A.M., 11:00 A.M. to 1:00 P.M. and 3:00 P.M. to 6:00 P.M., the daily average number of bridge openings for pleasure vessels has been running at 0.16, 1.34 and 2.86, respectively. Except for the morning peak period, those openings exceed those for commercial vessels by a comfortable margin. Thus, limiting the openings for pleasure vessels during the peak traffic periods should have a salutary effect on traffic flow over the bridge. The daily average number of vehicles crossing the bridge has been running at 2721, 2498 and 4753 during the three peak traffic periods, respectively.

It is possible for waiting vessels to cause waterway congestion and safety hazards, although there is no reason to believe that this will occur in the instant case. There should be little waiting traffic, during the closure periods, given the passage through the bridge of pleasure vessels on the scheduled hour and half-hour openings and incidental to the openings for non-pleasure vessels, and with the tendency of mariners to time their arrivals to coincide with the scheduled openings based on our experience with other closures. Moreover, there is room for waiting vessels on both sides of the bridge—near the right descending bank upstream and at or near the confluence of Bayou Chico with Pensacola Bay downstream.

Traffic through the bridge has been averaging just over one vessel per opening. This is not expected to necessarily increase during the closure periods for pleasure vessels, considering the scheduled openings at half-hour intervals for these vessels and their use of openings made for commercial vessels. Nor is it expected that the situation would ever materialize, except in unique cases, where at least five sailboats would accumulate for passage within a half-hour interval. However, should the occasion arise where the programmed bridge opening is longer than with a random opening to pass waiting vessels, with a corresponding increased delay to vehicular operations, the motoring public has expressed a willingness to accept this side effect on those occasions in exchange for the programmed bridge operation.

The closure restrictions are not considered significant enough to cause pleasure boat owners to discontinue mooring or seeking service upstream of the bridge. There should be little inconvenience to pleasure boat owners in transiting the bridge site. No loss of business is anticipated.

There are two crossings of Bayou Chico, one on Barrancas Avenue where the subject bridge is located and the other on Navy Boulevard located upstream. These routes are not so much alternatives to each other as they are complementary. Both carry an average daily traffic of about 21,000 vehicles, with the Barrancas Avenue route being 3.5 miles long and the Navy Boulevard route being 4.17 miles long. Considering these factors, there is no incentive for motorists presently using the Barrancas Avenue route to shift to Navy Boulevard as an alternative.

To facilitate vessel movement and to minimize the opening time to pass waiting traffic, a sound signal will be given at least five minutes in advance of a scheduled opening. This notice will allow waiting vessels to make preparations to be underway as soon as the bridge is opened.

Economic Assessment and Certification

This final regulation has been reviewed under provisions of Executive Order 12291 and has been determined not to be a major rule. It is considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedure for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 22 May 1980). An economic evaluation has not been conducted since the impact is expected to be minimal for the reasons discussed above. In accordance with section 605(d) of the Regulatory Flexibility Act (94 Stat. 1164), it is also certified that this rule will not have a significant economic impact on a substantial number of small entities.

Bridges.

PART 117—DRAWBRIDGE OPERATION REGULATIONS

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising § 117.245(i)(11) to read as follows:

§ 117.245 Bayou Chico, mile 0.1, Pensacola, Florida.

* * * * *

(i) * * *

(ii) The draw shall open on signal but need not open for pleasure vessels from 6:00 A.M. to 8:00 A.M., 11:00 A.M. to 1:00 P.M. and 3:00 P.M. to 6:00 P.M., Monday through Friday excluding holidays, except (i) on the hour and half-hour (ii) when at least five such vessels are waiting to pass or (iii) in emergencies or severe storms. The draw when otherwise opened for other vessels may be used by pleasure vessels.

(33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05–1(g)(3))

Dated: May 27, 1983.

J. M. Fournier,

Acting Captain, U.S. Coast Guard Commander, Eighth Coast Guard District.

BILLING CODE 4910-14-M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 262

Law Enforcement Support Activity

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: This rule incorporates existing Forest Service procedure and direction on the purchase of information and evidence in investigating violations of laws and regulations related to administration of the Forest Service.

Previously, Forest Service officials have had to refer to the text of Comptroller General Decision No. B–172259, dated April 29, 1971, for this direction. Codification of this direction with related rules on law enforcement support activities will provide an easy-to-locate reference for both Forest Service personnel and National Forest users. In addition, the rule retitles Part 262 and reorganizes and recodifies existing material in Part 262.

EFFECTIVE DATE: July 11, 1983.

FOR FURTHER INFORMATION CONTACT: Wayne Wilson, Fiscal and Accounting Management Staff, USDA-Forest Service, P.O. Box 2417, Washington, DC 20013, (703) 235–8094.

SUPPLEMENTARY INFORMATION: Certain acts and behavior of persons using National Forest System lands or other lands under the care, custody, control, or otherwise administered by the Forest Service, are deemed felony and misdemeanor violations as set forth in Title 16, Conservation, and Title 18, Crimes and Criminal Procedures, of the United States Code. Unacceptable behavior may include: Theft and destruction of archaeological resources; destruction of Government property; theft of timber; and setting fire to timber, brush, or grass. When these acts occur, it is generally necessary to conduct an investigation to obtain information and evidence to apprehend and charge those responsible. Investigative procedures can include the purchase of information and evidence when all other investigative means have been exhausted. This procedure has been accepted by Forest Service line and staff personnel as a standard operating procedure to expedite investigations in a cost-effective manner.

The Forest Service has been operating under the Comptroller General Decision, No. B–172259, dated April 29, 1971, as the basis of using appropriated funds for the purchase of information and evidence which furthers the investigation of violations of laws and regulations relating to the administration of the National Forests. However, Forest Service managers have difficulty in locating and referencing this decision for the purpose of informing other Forest Service personnel and National Forest users of operating procedures and have recommended that this direction be codified with related material in 36 CFR Part 262.

The final rule incorporates in Part 262 the direction of the Comptroller General's decision, sets forth the amounts that may be paid for information and evidence, and specifies the officials who may authorize payments. This rule does not contain penalties for noncompliance. The rule will allow designated Forest Service personnel to purchase information and evidence within monetary constraints with oversight by certain line officers. Provisions are incorporated in the rule to monitor expenditures and to account for all information and evidence purchased.

The inclusion of regulations prescribing payment for information and evidence necessitates reorganizing and recodifying existing material in 36 CFR Part 262, Rewards and Impoundments. However, changes are not made in the existing rules. The title of Part 262 also is being changed to more appropriately reflect the material now contained in this Part.

In accordance with exceptions to rulemaking procedures in 5 U.S.C. 553 and Department of Agriculture policy (36 FR 13804), it has been determined that advance notice and request for comments are unnecessary. This rule incorporates a long-standing operating procedure authorized by a Comptroller General decision and is an interpretative rule of existing policy and law.

This action has been reviewed pursuant to Executive Order 12291, and it has been determined that this action is an administrative and procedural matter which is exempt from the requirements of the Executive order. In addition, the Assistant Secretary of Agriculture for Natural Resources and the Environment has determined that this action will not have a significant economic impact on small entities and does not directly affect the private sector. The rule will have no effect on competition, employment, investment productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 36 CFR Part 262

Law enforcement, National forests, Penalties, Seizures and forfeitures.

For the reasons set forth in the preamble, Part 262 of Chapter II of Title 36, Code of Federal Regulations is amended as follows:

1. The title and table of contents of 36 CFR Part 262 are revised to read as follows:

PART 262—LAW ENFORCEMENT SUPPORT ACTIVITIES

Subpart A—Rewards and Payments

Sec.

262.1 Rewards in connection with fire or property prosecution.
262.2 Purchase of information in furtherance of investigations.
262.3 Purchase of evidence in furtherance of investigations.
262.4 Audit of expenditures.
262.5 Disposal of purchased property.

Subpart B—Impoundments and Removals

262.10 Impoundment and disposal of unauthorized livestock.
262.11 Impounding of dogs.
262.12 Impounding of personal property.
262.13 Removal of obstructions.

Authority: 30 Stat. 35, as amended (16 U.S.C. 551); sec. 1, 33 Stat. 628 (16 U.S.C. 472); 50 Stat. 526 as amended (7 U.S.C. 1011(f)); 58 Stat. 736 (16 U.S.C. 559(a)), unless otherwise noted.

2. 36 CFR 262.2, 262.3, 262.4, and 262.5 are redesignated as 36 CFR 262.10, 262.11, 262.12, and 262.13 respectively.

3 New §§ 262.2, 262.3, 262.4, and 262.5, are added to read as follows:

Subpart A—Rewards and Payments

* * * * *

§ 262.2 Purchase of information in furtherance of investigations.

(a) *Approval of Payments.* Payments for purchase of information to further investigations of felonies and misdemeanors related to Forest Service administration are authorized for each transaction as follows:

(1) Criminal investigators in the GS–1811 series and such other personnel as the Chief of the Forest Service or a Regional Forester may designate, may, without prior approval, pay up to but not exceeding $200 for the purchase of information under this section.

(2) For payments of amounts over $200 but not exceeding $500, advance approval of the Forest Supervisor is required.

(3) For payments of amounts over $500 but not exceeding $2,500, advance approval of the Regional Forester is required.

(4) For payments of amounts over $2,500, advance approval of the Chief of the Forest Service is required.

(5) For purchase of information to further investigations within a Regional Office, Forest and Range Experiment Station, State and Private Forestry Area Office, or the National Office, payments in excess of $200 must be approved in advance by the Chief of the Forest Service or by such other personnel as the Chief may designate.

(b) *Limitations.* Purchase of information under this section is restricted to furthering investigations of felony and misdemeanor violations. Payment for information to further investigations of petty offenses as

classified in Title 18, U.S. Code, Section 1, are not authorized under this section.

§ 262.3 Purchase of evidence in furtherance of investigations.

(a) *Approval of Payments.* Payments for purchase of evidence to further investigations of felonies and misdemeanors related to Forest Service administration are authorized for each transaction as follows:

(1) Criminal investigators in the GS–1811 series and such other personnel as the Chief of the Forest Service or a Regional Forester may designate, may, without prior approval, pay up to but not exceeding $400 for the purchase of evidence under this section.

(2) For payments of amounts over $400 but not exceeding $1,000, advance approval of the Forest Supervisor is required.

(3) For payments of amounts over $1,000 but not exceeding $5,000, advance approval of the Regional Forester is required.

(4) For payments of amounts over $5,000, advance approval of the Chief of the Forest Service is required.

(5) For purchase of information to further investigations within a Regional Office, Forest and Range Experiment Station, State and Private Forestry Area Office, or the National Office, payments in excess of $400 must be approved in advance by the Chief of the Forest Service or by such other personnel as the Chief may designate.

(b) *Limitations.* Purchase of evidence under this section is restricted to furthering investigations of felony and misdemeanor violations. Payment for evidence to further investigations of petty offenses as classified in Title 18, U.S. Code, Section 1, are not authorized under this section.

§ 262.4 Audit of expenditures.

The Chief of the Forest Service shall, through appropriate directives to agency personnel, assure the accountability of all funds spent in carrying out the provisions of this subpart and safeguard the identity of those wishing to remain anonymous.

§ 262.5 Disposal of purchased property.

All evidence purchased under the authority of this subpart shall be maintained in accordance with all laws, regulations, and rules applicable to the care, custody, and control of evidence. Evidence purchased under this subpart shall be disposed of in accordance with laws, regulation, rules, and Forest Service policy applicable to the disposal of evidence.

Douglas W. MacCleery,

Deputy Assistant Secretary for Natural Resources and Environment.

June 3, 1983.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

41 CFR Part 3–3

Selection of Offerors for Negotiation and Award; Correction

AGENCY: Department of Health and Human Services.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule on the selection of offerors for negotiation and award that appeared at page 20904 in the Federal Register of Tuesday, May 10, 1983 (48 FR 20904). This action is necessary to correct typographical errors in cross references, a section number, and the text of one sentence.

FOR FURTHER INFORMATION CONTACT: Norman Audi, Division of Procurement Policy, (202) 245–6154.

Dated: June 2, 1983.

Henry G. Kirschenmann, Jr.,

Deputy Assistant Secretary for Procurement, Assistance, and Logistics.

The following corrections are made in FR Doc. 83–12448 appearing on 20904 in the issue of May 10, 1983:

1. On page 20906, under § 3–3.5107–6(a), the cross reference "(see § 3–1.353(f))" is corrected to read "(see § 3–1.353(e))".

2. On page 20907, under § 3–3.5109(a), the cross reference "3–3.807.2" is corrected to read "3–3.807–2".

3. On page 20909, the section number "§ 3–3.5515" is changed to read "§ 3–3.5115".

4. On page 20909, under § 3–3.5515, (corrected to read § 3–3.5115 in 3. above), the second sentence "However, awards should be made for research and development capabilities that exceed those needed for the successful performance of the particular project" is corrected to read "However, awards should not be made for research and development capabilities that exceed those needed for the successful performance of the particular project".

[FR Doc. 83–15428 Filed 6–8–83; 8:45 am]

BILLING CODE 3110–12–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA–6531]

Identification and Mapping of Special Flood Hazard Areas; Changes in Special Flood Hazard Areas Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Interim rule.

SUMMARY: This rule lists those communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) elevations for new buildings and their contents and for second layer insurance on existing buildings and their contents.

DATES: These modified elevations are currently in effect and amend the Flood Insurance Rate Map (FIRM) in effect prior to this determination.

From the date of the second publication of notice of these changes in a prominent local newspaper, any person has ninety (90) days in which he can request through the community that the Associate Director, State and Local Programs and Support reconsider the changes. These modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base (100-year) flood elevation determinations are available for inspection at the office of the Chief Executive Officer of the Community, listed in the fourth column of the table.

Send comments to that address also.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The numerous changes made in the base (100-year) flood elevations on the Flood Insurance Rate Map(s) make it administratively infeasible to publish in this notice all of the modified base (100-year) flood elevations contained on the map. However, this rule includes the address of the Chief Executive Officer of the community where the modified base (100-year) flood elevation determinations are available for inspection.

Any request for reconsideration must be based on knowledge of changed

conditions, or new scientific or technical data.

These modifications are made pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 65.4.

For rating purposes, the revised community number is listed and must be used for all new policies and renewals.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These elevations, together with the flood plain management measures required by 60.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time, enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities.

The changes in the base (100-year) flood elevations are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 0 and 97

[PR Docket No. 82-726; FCC 83-249]

Elimination of Logging Requirements in the Amateur Radio Service

AGENCY: Federal Communications Commission.

ACTION: Final rules (report and order).

SUMMARY: This Report and Order amends the Amateur Radio Service Rules, Part 97, to eliminate requirements that station licensees maintain detailed logs of station operation. It delegates authority to the Engineers-in-Charge of Commission field facilities to require individual station licensees to maintain a station record of third-party traffic. It places the implied operational requirements in the rule section to which they applied. This requirement that amateur radio stations maintain logs is being eliminated because it no longer serves a regulatory function and it will relieve licensees of an unnecessary paperwork burden.

DATE: Effective June 9, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: James C. McGrath, Private Radio Bureau, Washington, D.C. 20554; (202) 632–4964.

Radio.

Report and Order; Proceeding Terminated

In the matter of elimination of logging requirements in the Amateur Radio Service; PR Docket No. 82–726.

Adopted: May 26, 1983.
Released: June 6, 1983.

By the Commission: Commissioner Fogarty not participating; Commissioner Sharp absent.

1. On October 21, 1982, the Commission adopted a Notice of Proposed Rule Making in PR Docket 82–726 (47 FR 50726, November 9, 1982). The Commission, on its own initiative, proposed to remove station log requirements from the Amateur Radio Service Rules. The present rules require each amateur radio station to maintain such a log and to include in it a variety of information regarding station activity, operators, facilities and communications.[1] The Notice also proposed to remove the implied operational requirements from the logging rules and place them in the rule sections to which they apply. It was proposed to let individual licensees determine how they wished to document the identity of control operators other than the station licensee. Finally, the Commission proposed to allow licensees to keep those few records that it would still require—that is, certain technical documentation regarding repeater operation, auxiliary operation and operations by remote control—in any form which could be made readily available to the Commission. Comments were invited regarding the desirability of delegating authority to the Engineers-in-Charge (EIC's) of Commission field facilities to require individual station licensees in the future to maintain a log with certain items of information that are currently required.

2. As part of our regulatory review program we examined the necessity and usefulness of these station log requirements. We found no Commission need for a record of routine station activity. The requirements for noting various aspects of routine station

[1] There are over 413,000 amateur radio operators licensed by the FCC.

operation were intended to provide the Commission with a means to verify when the station was in operation and whether communications from the station were of a permissible nature. The Commission has rarely used this information from the log, preferring to rely instead on monitoring data it has collected.

3. Comments were received from over a dozen individuals and organizations representing a cross-section of the amateur radio community. The majority of the comments favored the proposed action. The Northern Virginia FM Association, Inc. (NVFMA) said, "Prior simplification of logging requirements in the Amateur Radio Service has had no apparent harmful effect on either compliance or enforcement of the substantive regulations". NVFMA also said, "The logging of third-party traffic transmitted by the users of the Association's repeaters has created a continuing heavy burden on the licensees and users of the repeaters". Those commenting who were in disagreement with the Commission's position, that keeping a station log no longer served a useful purpose, said that a station log created a record of station operation that was of value to the station licensee. However, licensees are always free to voluntarily keep records of whatever information they find to be of value.

4. The American Radio Relay League (ARRL), while agreeing generally with the Commission's proposals said that the current requirement for a specific notation of international third-party traffic should be retained in the regulations. The ARRL said "(T)he same would insure operator awareness of the international treaty requirements and permit the Commission to establish deviation from international third-party message limitations should such deviation occur." We believe there is no Commission need for station records of routine international third-party traffic. Self-regulation as it exists in the amateur community would eliminate any continued unintentional deviation from international treaty requirements. As to willful violations, we will retain logging requirements on a case-by-case basis through the EIC's.

5. The majority of those commenting on the proposal to delegate authority to the EIC's to require individual licensees to maintain a station log, were in favor of the proposal. They said they favored regulations that serve to enhance the efficient and lawful operations of stations in the Amateur Radio Service. The ARRL said they were supportive of the Commission's desire to investigate matters locally through Commission Field Offices. Accordingly, we will adopt a rule giving EIC's authority to require logs on a case-by-case basis as the conditions warrant.

6. We conclude it is in the public interest to remove the rules requiring stations in the Amateur Radio Service to maintain station logs. As we stated in the NPRM this will result in elimination of most of the record keeping burden placed on amateur radio operators. We estimate a savings to the public of over 300,000 paperwork burden hours annually. In addition, the considerable expense of tape-recording third-party transmissions will be eliminated for those operators who have satisfied the logging requirements in this manner.[2] We are also removing the implied operational requirements from the logging rules and placing them in the rule sections to which they apply. Also, we are allowing the licensees to keep those few records which we still require in any form which can be made readily available to the Commission. In order to provide a record of station operations for enforcement purposes, we are delegating authority to the EIC's to require individual station licensees to maintain a record of station operations.[3]

7. Nothing in this Order shall prevent station licensees from maintaining a station log in the current manner or from including in it any information they desire to keep.

8. The Secretary is hereby directed to forward a copy of this Report and Order to the Office of Management and Budget (Director, Office of Information and Regulatory Affairs) and to the Chief Counsel for Advocacy of the Small Business Administration. The Secretary shall also cause a copy of this Report and Order to be published in the **Federal Register.**

9. The Commission has determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not apply to this rule making proceeding since this proposal would simply eliminate certain individual record-keeping requirements for amateur radio operators. These proposals are either insignificant in effect or deregulatory. Consequently, there would be no economic impact on small businesses, small organizations or small governmental jurisdictions.

[2] The ARRL estimates a $200.00 equipment cost, for tape-recording third-party transmissions, for most of the estimated 7000–9000 amateur stations in repeater operation.

[3] We are changing the wording in § 97.79(b) from that proposed in the Notice of Proposed Rule Making in this proceeding to conform to the changes in this Section that were made in PR Docket No. 81-823, 47 FR 50702, November 9, 1982.

10. In view of the foregoing, it is further ordered, effective on the date of publication of this Order in the **Federal Register,** Parts 0 and 97 of the Commission's Rules and Regulations, 47 CFR Parts 0 and 97, are amended as set forth in the attached Appendix. This action is taken pursuant to the authority contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended, 47 U.SC. 154(i) and 303.

11. It is further ordered, That this proceeding is terminated.

12. Further information on this matter may be obtained by contacting James D. McGrath, (202) 632–4964, Private Radio Bureau, Federal Communications Commission, Washington, D.C. 20554.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 0 and 97 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 0—COMMISSION ORGANIZATION

A.1. Section 0.314 is amended by adding new paragraph (x) as follows:

§ 0.314 Additional authority delegated.

* * * * *

(x) When deemed necessary by the Engineer-in-Charge of a Commission field facility to assure compliance with the Rules, a station licensee shall maintain a record of such operating and maintenance records as may be necessary to resolve conditions of interference or deficient technical operation.

PART 97—AMATEUR RADIO SERVICE

B.1. In § 97.79, paragraph (b) is revised to read as follows:

§ 97.79 Control operator requirements.

* * * * *

(b) Every amateur radio station, when in operation, shall have a control operator. The control operator shall be present at a control point of the station, except when the station is operated under automatic control. (Automatic control is only permitted where specifically authorized by the rules of this part.) The control operator may be the station licensee, if a licensed amateur radio operator, or may be another amateur radio operator with the required class of license and designated by the station licensee. The control operator shall also be responsible,

together with the station licensee, for the proper operation of the station. (For purposes of enforcement of the rules of this part, the FCC will presume that the station licensee is, at all times, the control operator of the station, unless documentation exists to the contrary.)

* * * * *

2. In § 97.85, a new paragraph (g) is added to read as follows:

§ 97.85 Repeater operation.

* * * * *

(g) Each station in repeater operation transmitting with an effective radiated power greater than 100 watts on frequencies between 29.5 and 420 MHz, or 400 watts on frequencies between 420 and 1215 MHz, shall have the following information included in the station records during any period of operation:

(1) The location of the station transmitting antenna marked upon a topographic map having contour intervals and having a scale of 1:250,000 (indexes and ordering information for suitable maps are available from the U.S. Geological Survey, Washington, D.C. 20242, or from the Federal Center, Denver, CO 80255);

(2) The transmitting antenna height above average terrain (see Appendix 5);

(3) The effective radiated power in the horizontal plane for the main lobe of antenna pattern, calculated for the maximum transmitter output power which occurs during operation;

(4) The maximum output power which occurs during operations;

(5) The loss in the transmission line between the transmitter and the antenna (including devices such as duplexers, cavities or circulators), expressed in decibels; and

(6) The relative gain in the horizontal plane of the transmitting antenna.

3. In § 97.88, papragraph (a) is revised, and new paragraphs (f) and (g) are added to read as follows:

§ 97.88 Operation of a station by remote control.

* * * * *

(a) A photocopy of the license for the remotely controlled station shall be posted in a conspicuous place at the station location.

* * * * *

(f) The station records shall include during any period of operation:

(1) The names, addresses, and call signs of all persons authorized by the station licensee to be control operators; and

(2) A functional block diagram of the control link and a technical explanation sufficient to describe its operation.

(g) Each remotely controlled station shall be protected against unauthorized station operation, whether caused by activation of the control link, or otherwise.

4. Section 97.90 is added to read as follows:

§ 97.90 System network diagram required.

When a station has one or more associated stations, that is, stations in repeater or auxiliary operation, a system network diagram (see § 97.3(v)) shall be included in the station records during any period of operation.

5. Section 97.92 is added to read as follows:

§ 97.92 Record of operations.

When deemed necessary by the Engineer-in-Charge (EIC) of a Commission field facility to assure compliance with the rules of this part, a station licensee shall maintain a record of station operations containing such items of information as the EIC may require under Section 0.314(x).

§ 97.99 [Amended]

6. In § 97.99, paragraph (c) is removed.

§ 97.103 Undesignated heading. [Removed]

7. Section 97.103 and the undesignated heading "Logs" which precedes § 97.103 are removed in their entirety.

§ 97.105 [Removed]

8. Section 97.105 is removed.

§ 97.417 [Amended]

9. In § 97.417, papragraph (d) is removed.

47 CFR Part 73

[BC Docket No. 82-1; FCC 83-155]

Radio Broadcast Services; Amendment of the Commission's Rules

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action, initiated on the Commission's own motion, revises § 73.593 of the Commission's Rules to permit noncommercial educational FM stations to use their subcarrier capacity for remunerative purposes. This will enable these stations to obtain funds that are needed for their support. If a station engages in remunerative use of its subcarrier capacity, it must ensure that such use is not detrimental to the provision of existing or potential radio reading services for the blind or otherwise inconsistent with its public broadcasting responsibilities.

DATE: Effective July 5, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Jonathan David, Mass Media Bureau (202) 632-7792.

Radio broadcasting.

Report and Order; Proceeding Terminated

In the matter of amendment of § 73.593 of the Commission's rules, BC Docket No. 82-1.

Adopted: April 7, 1983.
Released: June 3, 1983.

By the Commission: Commissioner Fogarty absent.

I. Introduction

1. The Commission has before it the *Notice of Proposed Rule Making* in this proceeding (47 FR 2384, published January 15, 1982).[1] In the *Notice* we proposed to amend the provisions of § 73.593 of the Commission's Rules which govern the use of Subsidiary Communications Authorization ("SCA") by noncommercial educational FM stations.[2]

2. Section 73.593 of the Commission's Rules permits noncommercial educational FM stations to conduct subcarrier operations, but it places a limit on the subcarrier service these stations can provide. Unlike commercial FM stations, these stations are not permitted to use their subcarrier capacity for remunerative purposes. Instead, they are limited to noncommercial uses in furtherance of the station's overall educational purpose. In issuing the *Notice*, the Commission questioned whether it was appropriate to maintain these limitations, particularly in light of recent amendments to the Communications Act.[3] Section 399B of the

[1] In addition, we have before us the comments and reply comments submitted in response to the *Notice of Proposed Rule Making* in BC Docket No. 82-536 (47 FR 46118 (1982)) which explores a wide range of subcarrier issues affecting both commercial and noncommercial educational FM stations. Because of the overlapping nature of the issues in these two proceedings, insofar as public radio stations are concerned, the Commission earlier decided to act on both *Notices* simultaneously. To the extent that the comments in BC Docket No. 82-536 bear upon the issues in this proceeding, they are considered and resolved herein. The balance of the issues in 82-536 are addressed in a companion *Report and Order* adopted today.

[2] These stations also are referred to as public radio stations. The two terms are used interchangably herein.

[3] Public Broadcasting Amendments Act of 1981 (Pub. L. 97-35) (hereinafter the "1981 Amendments").

Communications Act, which was added as part of the 1981 Amendments, gave public broadcasters the authority to use their facilities for remunerative purposes.[4] The legislative history of the provision clearly reflects Congress' expectation that public stations do more to provide their own support in view of anticipated reductions in the level of government funding for such stations. Thus, the Commission inaugurated this proceeding to consider whether the subcarrier capacity of these stations could be used to obtain additional funds. Some background about subcarriers will help put the current proposal in context.

3. In addition to the programming FM stations present on their main channel, all FM stations have the capacity to program one or more subcarriers on a multiplex basis. One of these subcarriers may be used to provide the second signal needed for stereo operation. Conventional FM sets can receive the main channel and if they are so designed, the stereo channel as well. However, these sets are unable to receive other subcarrier signals that can be heard only on special receivers. In addition to the stereo signal, FM stations have one other subcarrier channel available for use.[5]

4. In conducting subcarrier operations, commercial and noncommercial FM stations are subject to the same engineering standards. Likewise, both are allowed to conduct subcarrier operations themselves or to contract with another party to act on their behalf. Moreover, in both instances, the required subcarrier receivers are made available by the party conducting the subcarrier operation. However, there are differences between commercial and noncommercial stations with respect to how they may use their subcarriers. In the case of commercial FM stations, the subcarrier operation can be run on profit making basis, with the subscriber paying a substantial monthly fee. Public radio stations, on the other hand, can only use the subcarrier for an educational purpose. In addition, they are limited by the provisions of Section 73.593 of the Commission's Rules to conducting subcarrier operations on a non-profit basis. Although this Section does allow public broadcasters to charge fees for providing instructional material to subscribers,[6] these fees are not permitted to exceed the cost of providing this service.[7]

5. Because of the current restrictions, only a small portion of noncommercial stations actually offer subcarrier service of any kind. For those that do, radio reading services for the blind represents the most frequent use.[8] By way of contrast, § 73.293 of the Commission's Rules gives commercial FM stations much greater latitude in the use of their subcarriers. They are allowed to use them commercially to present a wide variety of "broadcast like" material. The most frequent of these uses is the transmission of background music for stores and offices. In addition, in BC Docket No. 81–352, the Commission made it possible for commercial stations to use their subcarriers for utility load management, a non-broadcast use.[9] Moreover, in BC Docket No. 82–536 the Commission proposed, and is today adopting, a substantial expansion in the range of permissible broadcast and non-broadcast uses for commercial station subcarriers. These changes are clearly important for public broadcasters as well, because in this proceeding we proposed to allow public broadcasters the same flexibility in using their subcarriers as is accorded commercial FM stations.

II. The Comments

6. A large number of comments and reply comments was filed in response to the *Notice*.[10] Comments in support of the Commisson's proposal were filed by public broadcasting licensees and organizations and by companies interested in making use of the subcarrier capacity of public stations. Comments in opposition to the Commission's proposal were filed by radio reading services and by organizations representing the blind. In addition to these comments on the issues directly raised by the *Notice*, many of the supporting and opposing comments urged an expansion of the FM baseband so that each station could have an additional subcarrier channel. Although they approach this point from different perspectives, both sides agree that making an additional subcarrier channel available to each station could help respond to the various demands for subcarrier use, including reading services. Furthermore, comments directed to the impact and implications for public broadcasting of the availability of two subcarrier channels were filed by public radio station and radio reading service interests in BC Docket No. 82–536, where we explicitly proposed expansion of the FM baseband. These comments, as well as those filed here which urged and anticipated making an additional subchannel available, will be considered below.[11]

A. Comments in Support of the Proposal

7. *Public Radio Stations Need to Provide More of Their Own Support*—Virtually all of the comments in favor of the proposal assert that public radio stations need to use their subcarrier capacity as a fund raising mechanism to help replace previously available federal funds. For example, National Public Radio ("NPR") asserts that the federal contribution to public broadcasting of $172 million for fiscal year 1982 is being reduced to $137 million for fiscal year 1983. For fiscal years 1984, 1985 and 1986, the federal contribution may be no higher than $130 million each year. NPR insists that these sums fall far short of public broadcasting needs. Taking the effects of inflation into account, it states that public broadcasters will be hard pressed unless alternative funding sources are developed. This view is repeated in various other comments which assert a similar general need for additional funds. Some areas, such as Alaska, are said to be in even greater need. According to the Alaska Public Broadcasting Commission ("APBC"), the problem is particularly acute there because the communities are so small. APBC asserts that this means there are fewer local sources of funds. Consequently, APBC states that the typical Alaskan station is able to raise only 10 percent of its support locally, only about one-third of the national average.

8. *Remunerative Subcarrier Use Can Contribute to Station Support*—Virtually

[4] The only restriction in 399B was that these remunerative uses could not interfere with a station's public telecommunications function.

[5] A station operating monaurally thus has two channels available for subcarrier use. Most stations, however, operate stereophonically. In either case, we are here referring to full-service channels which could be used for broadcast-like purposes. The non-broadcast uses authorized in BC Docket No. 82–536 do not need as much bandwidth, so that more than two channels of operation could be conducted, depending on the nature of the services involved. However, the discussion here regarding number of channels refers to full-service channels.

[6] Section 73.593 specifies that charges can be made only for instructional material presented by or in conjunction with a bona fide educational institution or which is directed to the special needs of its particular subcarrier audience.

[7] In calculating these costs, § 73.593(a)(1)(iii) allows a station to include appropriate portions of its general overhead and operational costs.

[8] Radio reading services serve all who are unable to use written material, including those who are unable to hold written material, those who suffer from reading difficulties, such as dislexia, as well as persons who are blind.

[9] *Report and Order*, 47 FR 1388 (January 13, 1982).

[10] These comments and replies are listed in Appendix B hereto.

[11] A detailed summary of the comments and reply comments filed in BC Docket No. 82–536 addressing public telecommunications issues is attached hereto as Apprendix C.

all of the public broadcast comments make general reference to the revenue generating opportunities that the subcarrier could provide, but most do not provide specific information. There were exceptions, such as the licensee of public radio Station KLYT(FM) which notes that two groups have already approached it about leasing its subcarrier capacity. One of these groups proposes to use the subcarrier for stock market reports, while the other would transmit background music. Support for the proposal also comes from MUZAK and Bonneville International, two companies already involved in using subcarriers on commercial stations. They assert that there is sufficient demand to support use of subcarriers on public radio stations, and they think this expansion can help ensure the availability of low cost, high quality subcarrier facilities. In fact, without this expansion, they think the number of available subcarrier channels will not be sufficient to accommodate the specialized programming and other subcarrier uses that are being developed. Given this demand, they are convinced that there is a substantial revenue potential that can be used by public radio stations in the same way commercial FM stations did in their early days when revenues were inadequate to support main channel station operation. Overall, they believe that these revenues would make an important contribution to supporting the principal noncommercial services being provided by stations on their main channels.[12]

9. *Remunerative Subcarrier Use Reflects the Will of Congress*—According to supporters of the proposal, Congress has called upon public broadcasters to provide more of their own support and at the same time has given them the means to do so. In particular, they point to the statutory provisions in Section 399B(b)(1) of the Communications Act which allow public broadcasters to engage in entrepreneurial activities through the "offering of services, facilities, or products" in exchange for remuneration.[13] As they read this language, Congress intended the Commission to authorize public stations to use their facilities creatively to earn extra revenues. On this basis, they assert that the present Commission prohibition on remunerative subcarrier use is inconsistent with the intent of Congress. According to these parties, leasing a subchannel for commercial purposes, as the Commission proposes to allow, is an "offering of a facility" as contemplated under the 1981 Amendments. Likewise, they assert that transmission of special programming by the licensee to subscribers is an example of an "offering of a service" under the 1981 Amendments. Although the supporting comments acknowledge that Congress stipulated certain limits on the remunerative activities of public broadcasters, they insist that these restrictions do not apply here. Instead, they see such restrictions only as precluding the broadcast or transmission of advertisements or other actions that would subvert the noncommercial nature of the service offered on the main channel.

10. *Prohibition on Remunerative Subcarrier Use Is Out of Date*—Several parties, including the Corporation for Public Broadcasting, question the continued need for public radio subcarrier restrictions, even if funding were not so pressing an issue. According to this view, such restrictions were an outgrowth of an entirely different time when public stations offered only a narrow range of educational programming. In their view, it was appropriate then to require the subcarrier to be used for the same limited purposes. Now, these parties point out, the service provided by noncommercial stations has greatly expanded as educational broadcasting has evolved into general public broadcasting. They note, however, that there has been no equivalent change in the definition of the types of material that can be offered on a subcarrier. This leads them to believe that the present restriction is out of date and that the permissible uses should be expanded so that public radio stations can provide a wider range of subcarrier service. They believe that such an expansion also would be consistent with the Commission's action which allowed greater fund raising activities and on-air acknowledgments by public stations.[14]

11. *Remunerative Subcarrier Use Would Benefit the Public*—The Ohio Educational Broadcasting Network Commission asserts that allowing remunerative subcarrier use would permit public radio stations to provide an even wider range of services than they currently offer. It notes that many public radio stations have been forced to narrow the content of their broadcast offerings and have found it necessary to follow more rigidly "formatted" program schedules in order to attract an audience that can be persuaded to contribute to the support of preferred programming. This, it states, is the case because presenting a broader range of programming fare makes it harder to attract a loyal audience that can be relied on to provide substantial contributions. Although Ohio Network accepts the fact that this approach may have yielded greater contributions, it asserts that this has meant that public radio stations have not been able to present a broader variety of programs designed to appeal to appeal to differing segments of their audiences. It believes that revenues from remunerative subcarrier uses could provide support for main channel operations and could make it possible to use subcarriers to provide service to smaller audience groups with specialized interests. Other parties make similar observations about the possibilities for providing new and varied types of programs. Pacific Lutheran University, for example, mentions specialized course offerings, services for professional groups and programs directed to the legal, health care and law enforcement communities. They and several others mention that the subcarrier could be used to present important agricultural material. However, as all these parties agree, unless the Commission eliminates the present restrictions, public stations will not be able to present this material.

12. The Alaska Public Broadcasting Commission addresses the unique needs of Alaska. In particular, APBC notes that Alaska principally consists of small isolated communities that cannot support commercial stations. Instead, they must rely on service from public stations. In fact, APBC states that public broadcasting provides the principal service to virtually all of these communities, unlike the merely supplemental service provided by public stations in the lower 48 states. Among other things, this means that if these communities are to benefit from the types of service that can be offered on a subcarrier, such as utility load management, it must be done through use of the subcarrier of public stations.

13. *Impact on the Blind of Deregulating Subcarrier Use*—Supporters of remunerative subcarrier

[12] Because the proceeding in BC Docket No. 82-536 had not yet begun when these comments were filed, the parties here focused on a narrower range of possible subcarrier uses than that proposed in the 82-536 proceeding. However, the comments filed there reiterate and expand upon the observations made here about the contribution subcarriers could make to public radio station support.

[13] In addition, Congress created a Temporary Commission on Alternative Financing for Public Telecommunications to study various sources of funding. Recently, the Temporary Commission reported its findings and recommendations to the Congress. One such recommendation was that the Commission authorize public stations to use their subcarrier capacity for remunerative purposes.

[14] *Second Report and Order* in Docket No. 21130, 86 F.C.C. 2d 141 (1981).

use assert that the Commission should not refuse to authorize it because of fears about its impact on the blind. They do not believe that the proposed rule change necessarily would lead to displacing radio reading services, even if there is only one subcarrier channel available per station.[15] Rather, they assert that the likely impact has been greatly exaggerated. They expect a number of radio reading services to continue in operation much as before. Indeed, NPR indicates that a poll of its member stations providing radio reading services revealed that not one intended to reduce, much less eliminate, these services if subcarrier uses were deregulated.[16] NPR also notes its intention to provide incentives to its member stations to continue providing radio reading services both by offering such stations $500 per month to support these operations and by fashioning its commercial subcarrier ventures with public radio stations in a manner calculated to avoid adverse impact on radio reading services. Even for other reading services that may be affected, parties favoring subcarrier deregulation think time sharing is a feasible answer because many commercial subcarrier users do not need full-time use of their channels. Overall, they contend that the effect of any displacement would be less than the opponents assert because material for the blind can be, and in fact is, provided through means other than use of a subcarrier. For example, they refer to the distribution of recorded material through the Library of Congress and the circulation of audio tapes from various sources.

B. Opposition Comments

14. *Radio Reading Services Would Be Displaced*—The principal concern over the proposed rule is the impact it would have on the radio reading services which use subcarriers.[17] The opposition comments express the belief that if commercial subcarrier users become eligible to employ public radio station subcarriers, such users would be able to outbid radio reading services for subcarrier channel capacity. Under current restrictions, this is not a problem because commercial uses are precluded, thereby protecting the position of non-profit users like radio reading services. The reading service comments stress how dependent radio reading services are on contributions and volunteers and assert they are in no position to pay increased costs for subcarrier use. Moreover, in many cases they are said to lack the funds necessary to provide receivers for all those in need of them. As a result, blind people in many areas have to be put on a waiting list before funds are made available to provide a subcarrier receiver. While the reading services acknowledge that those who can afford to purchase their own receiver are able to avoid this delay, they state that this is of no help to those who lack the resources for such purchases. Further, they assert that this situation could only get worse if the Commission allowed remunerative subcarrier uses.

15. The American Foundation for the Blind ("Foundation") undertook an overall study of radio reading services. It was able to obtain data on 81 of the 113 operations being conducted. Of these 81, 47 were not being charged for use of the subcarrier channel. This group included 19 operations conducted by public radio stations themselves, as well as 28 others which were conducted by other entities. For those that did have a monthly charge, the Foundation found that the charges were as follows:

$1 to $249	3
$250 to $499	11
$500 to $749	14
$750 to $1,000	4
Over $1,000	1

16. By way of contrast, fees for commercial uses are said to average $2,000–$3,000 per month, an amount that can rise to $3,000—$5,000 per month in a major market. Overall, the commercial rates are said to average 5 times the rate paid by the radio reading services. According to the Foundation, the radio reading services are in no position to accept such an increase. Just as public broadcast funding has been reduced, organizations for the blind are said to be facing reductions in funding from local, state and federal sources. Private funding is also becoming scarce, apparently because of increasing demands on private contributors. Thus, even without having to face commercial competition, we are told that three radio reading services were forced off the air for lack of funds and others will be unless they are protected from the impact of commercial competition.

17. *Subcarriers Are Needed To Deliver Reading Service Material*—While the reading service comments acknowledge the possibility that other means could be used to deliver some material, they insist that subcarriers continue to be needed for such things as reading job vacancies listed in the newspaper or informing the audience about products available at a sale price in stores that day. Principally, they state that the reading of material in daily newspapers could not be replaced. According to the Chicagoland Radio Reading Service ("CRRS"), the Chicago operation devotes 3 hours and 45 minutes to reading the *Chicago Tribune* and *Sun-Times* each morning.[18]

18. According to the opposition comments, radio reading services provide a vital service to the 125,000 persons that are now served. In their view, this service needs to be continued and expanded to serve the almost three million additional individuals in need of reading services.[19] The Association of Radio Reading Services notes that an active effort is underway to extend service to those in need, with operations being planned in 45 additional locations. They and the other opponents fear that this process would be halted if the Commission's proposal is adopted, because organizations such as theirs, which have to depend on contributions, cannot bid effectively against commercial interests.

19. *The Proposal is Contrary to National Policy on the Handicapped*—The opponents assert that the proposal should not be adopted because it is contrary to the thrust of Commission policy which is designed to accommodate the needs of the handicapped wherever possible. In this

---

[15] They assert that there would be even less likelihood of displacement if the Commission enlarges the FM baseband and thereby permits an additional subcarrier operation at 92 kHz. In this regard, some of the apporters would open both channels to remunerative use, while others would rely on the second channel to provide radio reading service. Some of the comments support reservation of a channel for radio reading service use, but they express a preference for reserving the channel at 92 kHz rather than the channel at 67 kHz. This point is discussed further below.

[16] Greater Washington Educational Television Association, Alaska Public Broadcasting Commission, the University of Texas at Austin, Ohio Educational Broadcasting Network Commission, KMCR-FM, WVOL-FM and various other noncommercial educational station licensees reflect a similar commitment to continued radio reading services in their comments in BC Docket No. 82-5-36.

[17] Although a majority of these services use subcarriers on noncommercial stations, an appreciable number utilize other means of delivery, including commercial FM station subcarriers, public station main channel facilities or even cable television channels.

[18] This is repeated each evening. In addition, the Chicago reading service reads from the *New York Times, Wall Street Journal, Chicago Defender* and other publications. All together, the Chicago operation is on the air 24 hours daily Monday through Friday, from 6:00 a.m. Saturday to 2:00 a.m. Sunday and from 6:00 a.m. to 11:00 p.m. Sunday. Because most radio reading services did not provide program schedules, it is not clear whether this is at all typical.

[19] In addition to the blind, other groups of reading impaired persons are said to derive important benefits from radio reading services.

connection, CRIS makes reference to closed captioning to serve the hearing impaired, the inquiry into telecommunications services for the deaf, the expectation that news bulletins concerning public safety will be displayed on television screens and other actions designed to make communications services available to all. These are seen as reflecting a national policy of giving full consideration to the needs of the handicapped, concerns which are said to have been reflected in the 1981 Amendments Act. In particular, the Commission is referred to language in the conference Committee Report on the 1981 Amendments as follows:

> The Conferees, however, take note of the concerns that certain responsibilities public broadcasting does have, such as to the blind, cannot, in every instance, be met through the delivery of public television and radio stations alone, and hope that the Corporation (CPB) will give continuing attention to this issue.

In addition, the Foundation quotes from the House Report language which indicates that "* * * the particular needs of all persons, be they minorities, women, handicapped or otherwise must be served." The Foundation acknowledges that this language occurs in connection with a discussion of CPB. Nonetheless, it insists that its use reflects an overall policy that transcends its apparently exclusive application to CPB. According to the opponents, Congress intended for pubic broadcasting to continue to play an important role in serving the needs of the print handicapped. However, in their view the proposed change would lead to a decrease in the availability of subcarriers for radio reading services without providing a substitute method for delivering these services.

20. The Association of Radio Reading Services ("ARRS") argues that it would be improper to deregulate subcarrier use as proposed without taking measures to protect the blind. According to ARRS, the Commission is required to ensure that its public station licensees observe their special statutory duty to accommodate the needs of the handicapped wherever possible. This duty, ARRS contends, arises essentially from Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), as interpreted by the decision in *Gottfried* v. *FCC*, 65 F. 2d 297 (D.C. Cir. 1981)[20]

21. *The 1981 Amendments Preclude Adoption of the Proposal*—The opponents dispute the view that Section 399B of the Act, which authorized remunerative activities by public stations, provided grounds on which the Commission could base the action proposed. According to the oponents, when Congress allowed a public broadcast station "to engage in the offering of services, facilities, or products in exchange for remuneration," it also specified that this activity was not to "interfere with the provision of public telecommunications services by such station." In their view, the term "public telecommunications services" means the entire range of noncommercial educational and cultural radio and television programs and related noncommercial instructional or informational material provided by such stations. They insist that Congress intended to preclude activities that undermined these purposes. They assert that there is no indication that Congress was concerned only with protecting the program offerings on the main channel. Rather, the opponents believe that Congressional concern extended to the other public telecommunications services being offered by these stations, including radio reading services. As they see it, if the intent were only to protect the main channel, the statute would not have referred to the use of "certain" facilities rather than all facilities. Thus, they do not read the 1981 Amendments to require or even suggest that there should be a curtailment of existing services, such as those now provided to the blind on subcarriers. In fact, they point to a rule adopted by NTIA to define when remunerative uses "interfere" with providing public telecommunications services. Under this rule, stations are allowed to use their facilities for remunerative purposes only when they are not needed for public telecommunications purposes.

C. Comments Relating to the Availability of Two Subchannels

22. Various parties address, both here and in BC Docket No. 82–536, the issue of expanding the FM baseband in order to make available an additional subcarrier channel. Nearly all of these parties support such expansion, but they differ considerably on how the two subchannels should be used—particularly with respect to whether one of the two subchannels should be reserved for public telecommunications services as a means of ensuring these services' continued viability.

23. NPR supports expansion of the FM baseband to 99 kHz. It contends this would make operation of a second subcarrier service feasible [21] and would avert any necessary conflict between commercial and noncommercial users because there would be a channel for each to use. NPR opposes, however, explicit reservation of a channel for specific uses. The Association of California Public Radio Stations ("ACPRS") argues that the Communications Act precludes the Commission from reserving even a portion of a station's capacity for a specific use and that, in any event, such reservation would represent poor public policy since it would substitute the government's value judgments for more efficient marketplace forces in determining subcarrier uses. Other public broadcast licensees also oppose reservation of one of two subcarrier channels for public telecommunication services, pointing out that such reservation would raise difficulties in defining these services and would result in inefficient use of the spectrum.

24. The Corporation for Public Broadcasting asserts, on the other hand, that reservation is necessary to assure that commercial subcarrier ventures do not interfere with the continued provision of public telecommunications services. CPB would, however, permit remunerative uses of the reserved channel on a temporary waiver basis if doing so is shown not to interfere with any existing or anticipated public telecommunications uses. Moreover, some public broadcasters did support setting aside a new 92 kHz channel for noncommercial educational use so that continued operation of radio reading services could be assured.

25. The West Virginia Educational Broadcasting Authority ("WVEBA") does not believe it is necessary to reserve a subcarrier channel for radio reading services use. WVEBA suggests instead that the Commission authorize a three year trial period during which unrestricted remunerative subcarrier use would be permitted. The Commission then would evaluate public broadcasters' performance in this area to determine whether further action was warranted to ensure the continued availability of radio reading services.

26. Although reading services support the proposed creation of a new 92 kHz channel, they believe that the existing 67

[20] The Supreme Court's subsequent decision, however, reversing the holding in *Gottfried* undermines ARRS' contention in this regard. *See Community Television of Southern California* v. *Gottfried*, 51 U.S.L.W. 4134 (decided February 22, 1983).

[21] These parties focus on operation at 92 kHz. Station WETA in Washington, D.C. conducted tests which lead it to conclude that such an expansion is feasible and that a second subchannel could be operated at 92 kHz without causing deleterious effects. However, as the *Report and Order* in BC Docket No. 82–536 points out, the opportunities for additional use of a station's subcarrier capacity are not limited to 92 kHz.

kHz channel should be reserved for radio reading services and other present users. Their preference for this channel stems from the fact that all of their investment is in equipment designed for use at 67 kHz. They assert that moving to 92 kHz would require substantial expenditures which they are in no position to undertake. Therefore, they do not believe that their needs would be fully addressed, even if access to a new 92 kHz channel were assured.[22]

III. Discussion

27. The comments in this proceeding and in BC Docket No. 82–536 have helped to focus the issues which require resolution in deciding whether it is in the public interest to authorize remunerative subcarrier use by public radio stations. Essentially, the Commission must determine whether such uses could make a valuable contribution to public stations' support, whether such uses are consistent with applicable statutory provisions, and how remunerative subcarrier activities can be conducted in accord with these stations' continued provision of radio reading services.

28. Before turning to these issues, we need to consider the implications of the actions taken today in BC Docket No. 82–536 for the issues in this proceeding. As a result of our decision in BC Docket No. 82–536 to broaden the FM baseband, public radio stations are no longer limited to a single subcarrier channel. Instead, each station will be able to conduct two subcarrier operations. Because of the sequence of events, the comments in this proceeding that addressed the consequences of having only one subcarrier channel available are no longer pertinent now that a second subcarrier channel has been authorized. However, comments remain here that anticipated our action in BC Docket No. 82–536 and dealt with its implications. Basically, these comments raise two issues. First, they express the preference of the radio reading services to continue to operate on 67 kHz even though a second subcarrier channel is made available. Most of this concern focuses on the cost of changing to a new channel.[23] NPR's substantial offer of assistance in offsetting such changeover costs, however, should meet this concern.[24] Thus, we see no reason to restrict licensee discretion in determining which subcarrier channel should be used in providing radio reading services. Second, they pose the fundamental question of how best to harmonize public stations' response to demands for both remunerative and radio reading service uses of their subcarrier channels. This question, of course, remains relevant whether one or two subcarrier channels are authorized and we will consider it below.

29. *Public Radio's Need for Expanded Subcarrier Authority.* Over the years public broadcasting has obtained its support from three major sources: governmental funding, underwriting and individual contributions. As the record amply demonstrates, new sources of funds need to be developed to replace the funds being cut from federal sources. In fact, the pressure to develop these new sources of funds is heightened because state and local funds are also being cut. Obviously, remunerative use of the subcarrier is not the only outlet for obtaining these funds. Many other steps can be and in fact are being taken, but subcarriers could provide an important boost to this effort.

30. In a major market, for example, traditional remunerative use of a subcarrier could yield as much as $5,000 per month or $60,000 per year. In a smaller market, the revenue potential would be lower, but often the budget is lower as well. Some of the new subcarrier uses authorized in BC Docket No. 82–536 have considerable revenue potential, perhaps greater than traditional uses. Either way, it is clear that remunerative use of the subcarrier can provide substantial support to the station and can be expected to contribute to improving and extending the station's service.

31. The comments clearly reflect a substantial demand for remunerative use of these subcarriers. This demand is not merely theoretical; public radio licensees already have been approached by prospective users.[25] In addition, National Public Radio is engaged in extensive planning for nationwide use of these channels for information delivery. Further, corporations already involved in subcarrier operations on commercial stations have expressed interest in using the capacity of public radio stations. Moreover, in some parts of the country (especially in Alaska), public radio stations are the only local stations that could be used to respond to the demand for subcarrier service. Thus, unless the current restrictions are deleted, there would be no way to provide the benefits that can be offered by using the subcarrier, including utility load management.

32. *Statutory Consistency and Policy Concerns.* Having concluded that there is a demand for remunerative subcarrier use that could make a valuable contribution to public radio service, we must consider whether such use is consistent with applicable statutory requirements and advisable as a matter of public policy. In this regard, there is considerable disagreement among the parties concerning the meaning of the 1981 Amendments. One side focuses on the language authorizing the use of facilities and the offering of services for remuneration. To them, this language means that the new provisions allow—perhaps even require—the Commission to authorize remunerative subcarrier uses. The other side emphasizes the statutory limitation that these activities must not interfere with the provision of public telecommunications service by the station. They stress Congressional expressions of support for service to the handicapped.

33. It is clear that the 1981 Amendments, and Section 399B in particular, are intended to authorize a range of remunerative endeavors in which public broadcasters could engage as a means of generating the additional income needed to offset declining federal support.[26] In enacting these

[22] In this regard, it is important to point out that the Commission received submissions from National Public Radio on the use of the 92 kHz channel by radio reading services. In these submissions, NPR agreed to reimburse radio reading services for the cost of changing from their present 67 kHz channel of operation to the new channel. NPR offered $3 million, if necessary, for this purpose, although it doubted that the full amount would be needed. As noted earlier, NPR also has offered $500 monthly to support radio reading services on eligible stations. CPB argues that the NPR assurances of support for the continuation of radio reading services do not satisfy the requirements of Section 399B. According to CPB, the NPR offer applies only in localities where an NPR-sponsored commercial subcarrier venture is conducted. In addition, CPB does not believe that the $500 that NPR would pay monthly to a station is sufficient to ensure the continuation of radio reading services.

[23] Reference was also made to technical distinctions between subcarrier channels. We recognize that the frequency of a subcarrier is one of the factors that determines the utility of a subcarrier channel. However, given the many choices of modulation and other system characteristics that may be employed in providing subcarrier service, we do not believe that this particular factor is of decisional significance in this proceeding.

[24] We note that NPR's offer would reach 90% of existing radio reading service subscribers and could encompass all such subscribers. In any event, if a public radio station, in pursuing its commercial subcarrier goals, elects to change the subcarrier channel available to existing radio reading services, it would be ultimately responsible for the costs of such relocation, including the costs of modifying the subcarrier receivers used by the handicapped listeners of such radio reading services.

[25] These early expressions are particularly striking because they came before the Commission proposed expanding the range of possible SCA uses

[26] For example, the House Committee on Energy and Commerce noted in its Report on the 1981 Amendments that "public stations must be free to generate substantial sums of additional revenue from the pursuit of commercial activities if the nation's public broadcasting system is to survive . . ."

amendments, it is also clear that Congress intended that such endeavors should not result in a diminution of public telecommunications services provided by noncommercial broadcasters.[27] However, neither the express language nor the legislative history of Section 399B specifically addresses remunerative uses of ancillary capacity such as subcarriers. Therefore, the determination as to whether such uses are or should be permitted and, if so, what constraints on such uses might be appropriate, would appear to be a matter committed to our discretion. Nevertheless, in making this determination, we believe that the provisions of Section 399B offer useful, if not dispositive, guidance.

34. Given the broad nature of the language in Section 399B permitting the offering of "services, facilities, or products" on a for-profit basis, the plain intent of Congress to encourage public broadcasters' ability to generate self-supporting income and the clear capacity of commercial subcarrier use to help meet the demonstrated need of public radio stations for such income, we are convinced that, generically, remunerative use of subcarriers is not only consistent with the requirements and authorizations of the 1981 Amendments, but advisable as a matter of policy as well. Accordingly, we shall authorize public radio stations to engage in the same range of remunerative activities on their subcarriers as do commercial stations.[28] They shall be subject, as well, to the same technical standards as commercial stations.[29]

35. However, we also conclude that public radio stations subject to Section 399B that use subcarriers for remunerative activities must ensure that neither existing nor potential radio reading services for the blind are diminished in quantity or quality by the pursuit of commercial subcarrier undertakings. This public interest duty derives from Section 309 of the Communications Act, as instructed by the specific goals for public broadcasting stations set forth in Section 399B. Thus, we believe that a station utilizing one of its subcarriers for commercial purposes would be obliged to accommodate radio reading services on its other subchannel or to ensure the availability of alternative subchannel capacity for such services. We are confident that public broadcasters are cognizant of the importance of these services[30] and that they are well able to determine, and will determine, appropriate means by which to guarantee the compatability of their commercial and noncommercial ventures. We shall, therefore, leave to each licensee's discretion the decision as to how best to accommodate such uses. The availability, of course, of a second subcarrier channel, afforded by our action today in BC Docket No. 82-536, enhances the ability of licensees to make this accommodation. Among the alternatives which licensees might consider are, for example: (1) Reservation of one of the two available subcarrier channels for radio reading services; (2) a demand-based priority or preference system for such uses on one of the available channels [31]; or, (3) a guarantor approach, where the licensee undertakes to make available a suitable channel for such services on another market station. We stress that these approaches are not intended to be all inclusive. We are firmly convinced that this flexible approach will permit public broadcasters to maximize the benefits of remunerative subcarrier uses while ensuring that radio reading services will continue to be made available.

36. Licensees are not required to provide a subcarrier service of any kind nor must they bear the fixed or operating costs of a radio reading service should they provide one.[32] We emphasize the first point to make it clear that stations not using their subcarrier capacity for any purpose cannot be forced to do so. The new rules address only the situation where the licensee decides it does want to use this capacity. Once it has elected to use its subcarriers, the new rules would not permit the licensee to pursue its remunerative aims to the detriment of radio reading services. We believe that public radio licensees can be relied upon to meet this obligation. Thus, we do not see the desire to obtain revenues from subcarrier use as reflecting on licensees' commitment to public

---

[27] Section 399B(c) specifically provides that "[a]ny such (remunerative) offering by a public broadcast station shall not interfere with the provision of public telecommunication services by such station." In this regard, the Committee Report notes that "the intent of this provision is that the use of facilities for other than public telecommunications services should not impair the quantity or quality of the services that would be expected of public broadcast stations had this modification of law not occurred."

[28] We are not persuaded that remunerative subcarrier use is precluded by the cited language in the Conference Committee Report regarding service to the blind. The Report does no more than express a hope that the Corporation for Public Broadcasting will give attention to the provision of such service by means other than public radio and television stations. Likewise, the language regarding serving the handicapped, quoted from the House Report, refers to CPB's obligations. Here, too, the language does no more than urge consideration of service to the handicapped by CPB. We do not believe that the language in the Conference Committee Report or the House Report can reasonably be read to refer to subcarrier obligations of public stations. Similarly, the apparently broader interpretation of the work "interfere" taken from the regulations of the National Telecommunications and Information Administration is not relevant here. It deals with whether facilities obtained under a federal grant can be diverted to commercial purposes to the detriment of a station's public broadcasting obligations. No such factors are involved in our decision in this proceeding.

[29] In this connection, §§ 73.594 and 73.595 of the Rules are being deleted in our action today in BC Docket No. 82-536. Public stations will now be governed by Sections 73.293 through 73.295.

[30] In this regard, we note specifically the comments of NPR and others which reflect a particular sensitivity to the need for, and the apparent commitment of, public stations to continue to provide radio reading services.

[31] The preemptible nature of any service which might be rendered on a subchannel subject to a demand-based preference for radio reading services clearly reduces the commercial value of that subchannel because of the uncertainty which it introduces. CPB recognized this fact in connection with its reservation proposal and suggested that this uncertainty could be cured by a Commission-administered waiver process. Under this approach, reservation could be waived for the remaining period of a station's license term upon a showing that no existing or known potential radio reading services would be disadvantaged thereby. Once the initial waiver lapsed, it could be renewed for another fixed period upon the licensee making a similar showing. CPB considered this temporary, renewable waiver procedure to be the best method of maximizing the commercial utility of noncommercial stations' subcarrier capacity while avoiding untoward effects on radio reading services. We agree that this procedure might permit noncommercial stations to extract additional commercial value from reserved subchannels. We do not believe, however, that such a procedure is advisable. To permit, in effect, both subchannels to be obligated for commercial use on a non-preemptible basis for substantial periods of time would not protect adequately, in our view, the public interest in ensuring the provision of radio reading services to the widest possible audience in need of such services. Our decision herein affords public radio stations substantial commercial possibilities. One full-service subcarrier channel will be available for unrestricted commercial use and preemptible commercial service can be provided on the remaining subchannel. Moreover, we do not intend that preemption of an existing commercial use must be immediate. Rather, we would consider it reasonable for a station, faced with a proper request for subcarrier capacity by radio reading services, to take up to one year to arrange termination of ongoing services and to provide the requested capacity. This should improve the saleability of preemptible subchannels by removing the threat of unduly abrupt displacement of commercial users of these subchannels. Further, of course, dedicated commercial use of both subcarrier channels would be permitted provided the station involved can ensure the availability of subchannel capacity for radio reading services by some other means. We believe that these arrangements best balance the need of public radio stations for access to income-generating activities with our concern for the continued provision and growth of radio reading services.

[32] Conversely, public radio stations providing radio reading services would be expected to do so on a not-for-profit basis. To do otherwise would be inconsistent with their duty to avoid adverse effects on radio reading services as a consequence of their commercial use of subcarrier capacity.

broadcasting's traditional pursuits. Rather, it simply reflects the vital need to provide support for public stations. We believe that the method chosen can respond to this need while assuring that stations will continue to provide radio reading services. In so doing we have responded to both of the underlying concerns of Section 399B and have done so in a way that balances the obligations undertaken in exchange for the benefits received.

37. Although spectrum efficiency was given little attention in the comments, the current restrictions have an important impact in this area. Currently, few stations use their subcarrier capacity, so this sizable potential for reaching specialized radio audiences and for other non-broadcast purposes is left virtually unused. The principal reasons for this are the limits on the kinds of material that can be offered, combined with the prohibition on operating on a profit making basis. Our action herein removing these restrictions should encourage stations to explore many new uses and thereby more effectively utilize their spectrum resources.

38. Accordingly, it is ordered That, § 73.593 of the Commission's Rules is amended effective July 5, 1983, as set forth in the attached appendix.

39. Authority for this action is contained in Sections 4(1), 303 and 399B of the Communications Act of 1934, as amended.

40. *Regulatory Flexibility Analysis*

I. Need For and Purpose of the Rule

The Commission has concluded that the present limitations of § 73.593 on the use of a noncommercial educational FM station's subcarrier can be removed. The relaxation is based on the conclusion that these stations need to use these subcarrier channels for remunerative purposes barred by the present rule.

II. Summary of Issues Raised by Public Comment in Response to the Initial Regulatory Flexibility Analysis, Commission Assessment, and Changes Made as a Result

A. Issues Raised

1. Parties representing public broadcast stations and organizations favored the proposal as a way of providing more of their own financial support.

2. Parties representing radio reading services for the blind opposed the proposal, fearing that such services would be displaced by commercial parties able to outbid them.

3. Several parties favored expansion of the FM baseband to accommodate an additional subcarrier channel, with radio reading services supporting the reservation of one channel for noncommercial educational uses including radio reading services. This issue is being resolved in another proceeding.

B. Assessment

The Commission concluded that the current restrictions were wasteful of spectrum space and also interfered with the need of public radio stations to generate more of their own financial support.

C. Changes Made as a Result

The Commission did not find the arguments against relieving the restrictions on subcarrier use to be persuasive. It did not agree that radio reading services necessarily would be displaced or that there should be a reservation of an subcarrier channel for such use if the FM baseband is expanded. Other means are available to provide services to the blind, which in any event would be allowed to continue to use subcarriers as they now do.

III. Significant Alternatives Considered and Rejected

Other than the expansion of the baseband, and issue resolved in BC Docket No. 82–536, no significant alternatives were raised. Our reasons for acting on those issues properly before the Commission in this proceeding are described above.

41. It is further ordered, That this proceeding is terminated.

42. For further information concerning this proceeding, contact Jonathan David, Mass Media Bureau (202) 632–7792.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 73—[AMENDED]

1. Section 73.593 is revised to read as follows:

§ 73.593 Subsidiary communications services.

The licensee of a noncommercial educational FM station is not required to use its subcarrier capacity, but if it chooses to do so, it is governed by §§ 73.293 through 73.295 of the Commission's Rules regarding the types of permissible subcarrier uses and the manner in which subcarrier operations shall be conducted; *Provided,* however, that remunerative use of a station's subcarrier capacity shall not be detrimental to the provision of existing or potential radio reading services for the blind or otherwise inconsistent with its public broadcasting responsibilities.

Appendix C

The following summarizes comments and reply comments filed in BC Docket No. 82–536 which address public telecommunications issues relevant to and resolved in this proceeding.

1. *Public Telecommunication Services*—An issue that resulted in substantial comment concerned the impact that authorizing non-broadcast services on subcarriers would have on current users, specifically, the radio reading services for the visually impaired. Several parties representing radio reading services filed comments requesting that, if the new services were permitted, some protection should be accorded existing users.[33] The Association of Radio Reading Services (ARRS) is concerned that adoption of the proposed rules without making explicit changes to protect and foster radio reading services would have an adverse impact upon the blind and persons similarly afflicted. To avoid this situation, which ARRS argues would be illegal for the Commission to allow, it offers several suggestions. It first recommends adoption of the proposed rules insofar as they would allow the use of a second subcarrier by noncommercial FM stations. One of the two subcarriers of these stations could then be reserved for nonprofit educational use in a manner not inconsistent with the purpose and operation of the station's main channel. ARRS further asks that the subcarrier at 67 kHz be reserved for their service since noncommercial programming is now being offered on that subchannel. Thus, it states, adverse financial and disruptive operational effects on organizations such as itself would be minimized. ARRS asserts that a volunteer nonprofit organization, such as itself, cannot outbid commercial users for subcarrier frequencies. It believes, therefore, that such competition would result in a loss of service to the blind and other handicapped people. According to ARRS, the Commission and all noncommercial public broadcasting licensees have a statutory duty to accommodate the needs of the handicapped whenever possible and to take affirmative action when necessary to ensure that these needs are met. It states that these legal obligations stem from Sections 307 and 309 of the Communications Act (47 U.S.C. 307, 309); Section 399B of the Communications Act (47 U.S.C. 399B); and Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) as interpreted by the Court of Appeals in *Gottfried* v. *F.C.C.*, 65 F.2d 297 (1981). ARRS claims that the only way the Commission can legally accomplish its goal of allowing public broadcasters to use their subcarrier frequencies for remunerative purposes is to expand the frequency band of subcarriers to 99 kHz and reserve the existing 67 kHz subcarrier for noncommercial use. Several of the radio reading services endorsed ARRS' comments.

2. On the other side of the issue, public broadcast licensees generally favor the proposals for non-broadcast uses of subcarriers. The Association of California Public Radio Stations (ACPRS) states its belief that authority to use subcarriers for non-broadcast purposes will increase supplier competition and consumer choice in information and entertainment fields other than broadcasting. The ACPRS notes that there has been concern expressed in some quarters that operation of a second subcarrier by noncommercial stations should be conditioned on the station's using at least one of its subcarriers for a specific purpose, such as a radio reading service or general noncommercial, educational broadcast activities. According to the ACPRS, these concerns are misplaced for several reasons. First, the ACPRS interprets the Communications Act to preclude the Commission from requiring broadcast stations to use even a portion of their channel capacity for a specific use. This same issue is raised by San Diego State University (KPBS) in their comments. Second, ACPRS argues that such a reservation of a subcarrier for a particular purpose would be bad policy. The reservation of a subcarrier for a particular purpose would impose the government's own value judgments upon the natural marketplace process whereby consumer demands and supplier capacities adjust to each other to provide optimal satisfaction. ACPRS states that the use of subcarriers by noncommercial, educational broadcasters would in no way detract from or even affect the use of the main channel for its prescribed purpose.

3. Greater Washington Educational Television Association (GWETA), Alaska Public Broadcasting Commission (APBC), the University of Texas at Austin (U of T), Ohio Educational Broadcasting Network Commission (OEBNC), KMCR–FM, WUOL–FM, the staff of KMUW (licensed to Wichita State University) and Noncommercial Educational Licensees[34] reject the proposal made by radio reading services to reserve one subcarrier (specifically at 67 kHz) for noncommercial services. GWETA urges that each licensee be given full discretion as to the nature of services they provide. These parties believe that current financial exigencies require that licensees be accorded the fullest freedom to use all available revenue producing devices that would not interfere with the public broadcast services they were created to provide. The *raison d'etre* of educational stations is public service. Therefore, these parties argue that great internal motivation will continue to exist to devote at least some subcarrier capacity to this type of operation. Noncommercial Educational Licensees and the KMUW staff indicate they are now facing a financial crisis and submit that their good intentions, as reflected in providing radio reading services, will be worthless if they are forced to leave the air due to lack of resources.

4. Compromise positions on this issue were offered by the West Virginia Educational Broadcasting Authority (WVEBA) and the Corporation for Public Broadcasting. The WVEBA indicates that it remains unalterably committed to providing radio reading services. Rather than "casting the proposal in cement," as a reserved subcarrier would do, WVEBA argues that a wiser course of action would be to provide for a trial period to ascertain whether further Commission action should be taken to assure that special services to the handicapped would continue to be provided. It proposes a three-year trial period to afford the Commission an opportunity to evaluate the operation of two subchannels by public broadcast licensees. During this period, licensees could continue to file a simplified subcarrier application so that the Commission could determine how many stations were operating subcarriers and the purposes for which they were being used.

5. The WVEBA also believes that public telecommunication services using the 67 kHz subcarrier should be continued. However, at times when this subcarrier is not used for public telecommunications services, licensees should be permitted to engage in revenue-generating activities.

6. The Corporation for Public Broadcasting (CPB) believes that certain modifications are necessary to ensure that commercial services on noncommercial stations do not interfere with the provision of public telecommunications services as stated in Section 399B of the Communications Act. CPB recommends that the Commission reserve one subcafrier channel for noncommercial purposes but leave any additional capacity created free of regulatory restrictions. With respect to the reserved channel CPB states that licensees should be permitted to apply to the Commission for permission to conduct commercial operations on that channel, if such operations would not interfere with their provision of public telecommunications services. In situations where commercial use of the reserved subchannel would not interfere with public telecommunications use, CPB believes that a temporary, renewable waiver of the reservation would be appropriate. These renewable waivers would be granted upon a showing that the proposed remunerative use would not interfere with existing or known potential noncommercial use. This reservation policy is preferable to what CPB calls the alternative—allowing licensees to offer commercial subcarriers so long as they are preemptible by public telecommunications users. According to CPB, this alternative would render commercial services vulnerable to eviction and would fail to provide adequate stability for long-term business relationships.

7. National Public Radio (NPR) asserts that too much subcarrier capacity exists for radio reading services and other public telecommunications services to be crowded out by the introduction of new services and that, in fact, the real danger stems from the

[33] These parties include: Association of Radio Reading Services, Utah Radio Reading Services, University of Kansas Audio Reader Network, Corporation for Public Broadcasting, Oklahoma Radio Reading Services, New Jersey Library for the Blind and Handicapped, The Washington Ear, Georgia Radio Reading Service, Inc., El Paso Lighthouse for the Blind, Radio Talking Books, Inc., Minnesota Radio Talking Book Network, Sun Sounds Radio Reading Service, Office of Handicapped Concerns, Radio Reading Services of Greater Cincinnati, Inc., Minnesota Public Radio, Broadcast Services for the Blind, Inc., Read Out, West Tennessee Talking Library, American Foundation for the Blind, York County Blind Center, WBHM Radio Reading Service; Kentuckiana Radio Information Service, Golden Triangle Radio Information Center, and Houston Taping for the Blind.

[34] KQED, Inc., The Ohio State University, State of Wisconsin-Educational Communications Board, The Board of Trustees of the University of Illinois and the University of Maine.

financial crisis affecting public radio stations. NPR states that it and its member stations have been and continue to be strong supporters of subcarrier programming for print handicapped persons. It has surveyed its member stations on the subject and NPR reports that not one station presently carrying print handicapped services on its subcarrier said that development and implementation of new services would interfere with provision of these specialized services. Supplemental comments filed by NPR also reported a new policy to provide significant incentives to NPR affiliate stations to continue to offer public telecommunications services, and to introduce new services in the future.[35] This policy was adopted by NPR's Board of Directors. Essentially, this policy provides for NPR to pay member stations continuing to provide a radio reading service (or other qualified public telecommunications services) $500 per month in order to encourage the retention of these services. Additionally, NPR will formulate its venture agreements with all public radio stations in a manner designed to discourage the termination of a radio reading service solely in order to provide new, commercial service. NPR states that it believes this policy would provide a degree of protection to public telecommunications services sufficient to warrant adoption of the Commission's subcarrier proposals.

8. The CPB supplemental comments responding to NPR's proposals outline its objections. CPB argues that the NPR proposal does not satisfy the requirements of Section 399B of the Communications Act. It also argues that only a few stations will be affected by NPR's economic incentives. According to CPB, the offer applies only in communities in which NPR engages in its commercial subcarrier ventures. Additionally, CPB argues that $500 is not an adequate incentive to ensure subcarrier availability to public telecommunications services. To ensure access of public telecommunication services to a subcarrier, CPB reaffirms its proposals for reserving a subcarrier for public telecommunications services while permitting the possibility of income generating activities.

[Docket No. 18921; RM-1197; RM-1218; RM-1330; FCC 83-175]

New Practices and Procedures for Cooperative Use and Multiple Licensing of Stations in the Private Land Mobile Radio Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has modified the regulations adopted in the *Report and Order* in Docket No. 18921 (47 FR 19527, May 6, 1982) to eliminate the restrictions on the securing of packaged services, and on the licensing of radio equipment suppliers to use the same base station facilities offered for multiple licensed use by other licensees. The Commission has also modified its regulations governing sharing arrangements to permit both non-profit sharing and private carrier service. The Commission took these actions in response to petitions for reconsideration objecting to the third party licensing restriction, and in response to recent amendments to the Communications Act. The Commission decided that these policies were overly restrictive and were not necessary to its regulatory objectives.

DATES: Effective July 11, 1983.

Memorandum Opinion and Order on Resonsideration (Proceeding Terminated)

In the matter of amendment of Parts 89, 91 and 93 of the Commission's rules and regulations to adopt new practices and procedures for cooperative use and multiple licensing of stations in the private land mobile radio services[1]; Docket No. 18921, RM-1197, RM-1218, RM-1330.

Adopted: April 27, 1983.

Released: June 2, 1983.

By the Commission. Commissioner Jones absent.

I. Preliminary Statement

1. We have before us petitions for reconsideration and clarification[2] of our *Report and Order* in the above captioned proceeding.[3] After carefully considering the concerns expressed in these petitions as well as reexamining the regulatory policies we adopted in this proceeding in light of the record, the NARUC decision (see n. 9) and the recent amendments to the Communications Act[4], we have decided to modify certain of the rules we earlier adopted. Accordingly, we are eliminating the restriction on the securing of packaged services. We are also modifying our sharing requirements to permit both non-profit cost sharing and for-profit private carrier service. Lastly, we are authorizing radio equipment suppliers to be licensed on the same base station facilities that they offer for use by other licensees.

II. Background

2. The proceedings in Docket No. 18921 began in 1970 with the release of our *Memorandum Opinion and Order and Notice of Proposed Rule Making.*[5] We had received several petitions for rule making from radio common carriers requesting that we adopt regulations substantially restricting the multiple licensing and cooperative sharing of radio stations in the private land mobile services.[6] The petitioners had argued that authorization of shared and multiple licensed transmitting facilities in the private land mobile radio services contravended Title II of the Communications Act and presented unfair and destructive competition to the radio common carriers. In our *Memorandum Opinion and Order, supra,* we stated we were not persuaded by the arguments made, and we did not view shared or joint use of private communications facilities as common carriage. We pointed out that this had been the Commission's determination for many years, and we concluded both shared and joint use of transmitters promoted the public interest by encouraging the larger and more effective use of radio in the public interest, as mandated by the Communications Act of 1934, as amended.[7] [8]

---

[35] Late filed comments were submitted by NPR, CPB, ARRS, AFB and The Washington Ear. All these comments relate to the radio reading service issue and provide useful information on the subject. Accordingly, we have fully considered them in reaching our decision in this proceeding.

[1] Parts 89, 91 and 93 have been consolidated under new Part 90. *See* 47 CFR 90.1-90.657.

[2] A Petition for Reconsideration was filed by the General Electric Company (GE), Richardson Communications Company, C&E Service Co., AGS Electronics, Inc., Clark Communications, Inc. and Commercial Communications, Inc. essentially agreed with and supported the GE request. A Petition for Reconsideration And/Or Clarification also was filed by Telocator Network of America (TNA). TNA, however, subsequently filed a Notice of Withdrawal of Petition stating that the issues raised in the petition "are moot" because passage of new Section 331 of the Communications Act of 1934, as amended, "significantly alters the legal test of common carriage in the land mobile radio services." *See* Communications Amendments Act of 1982, 120(a), 47 U.S.C. 331. Replies to the petitions were filed by the National Association of Business and Educational Radio, Inc. (NABER) and Motorola, Inc.

[6] For a description of multiple licensing and cooperative sharing see *Report and Order,* Docket No. 18921, *supra,* and *Tentative Decision and Further Inquiry and Notice of Proposed Rule Making,* FCC 81-263; 46 FR 32099 (June 19, 1981).

[7] 47 U.S.C. 303(g).

[8] These conclusions have now been confirmed by the new legislation as set forth above

3. We did believe, however, that it was necessary to clarify the types of shared use arrangements we thought appropriate in the private services and we proposed rules with this goal in mind.

4. Concurrently with these deliberations, however, the dynamic state of growth in the land mobile services, both in terms of users and technologies, caused us, in a separate proceeding, to formulate a licensing approach for 800 MHz systems which permitted licensees to make private land mobile facilities available to multiple eligibles on a for-profit basis.[9] This decision and the appeals attendant thereon substantially delayed resolution of our proceeding in Docket No. 18921. When we again turned our attention to fashioning a regulatory plan for private shared use and multiple licensing arrangements below 800 MHz in our *Tentative Decision and Further Inquiry and Notice of Proposed Rule Making*, we adopted certain interim policies to avoid confusion, but we decided that interested parties should be given the opportunity to submit further comments on our proposals in light of the changes that had occurred and the staleness of the earlier comments. After reviewing the new comments, as well as the entire record in Docket No. 18921, we released our *Report and Order* in March, 1982. There we affirmed our earlier conclusions that shared use and joint licensing of private land stations did not constitute common carriage within the meaning of Title II of the Communications Act, and that authorization of these types of arrangements in the private land mobile services clearly was in the public interest because they "furthered the larger and more effective use of radio." We then adopted regulations clarifying the distinctions between multiple licensing and cooperative use arrangements and specifying how each was to be conducted.

5. However, in 1982 subsequent to our *Report and Order*, the Congress amended the Communications Act. It not only affirmed our earlier conclusions about multiple licensing and non-profit cooperative use, it also determined that for-profit shared use of private land mobile service facilities served the public interest and expressed the view that there should be minimal barriers to the ways licensees, equipment suppliers and other third parties are able to offer facilities and service to eligible users in the private services. While we had considered permitting licensees to profit in the bands below 800 MHz in our *Tentative Decision* and requested public comment thereon,[10] we did not adopt final rules authorizing such an approach in the bands below 800 MHz in our *Report and Order*, essentially because we were not persuaded of the need for such a regulatory approach here, and because the bands below 800 MHz were substantially occupied.[11] Thus, we continued, in this portion of the spectrum, to preclude licensees from profiting from the shared use of the facilities authorized to them.

Petitions for Reconsideration

6. In response to our *Report and Order* we received requests from the General Electric Co. and Telocator Network of America (TNA) to reconsider our decision. However on September 16, 1982, Telocator filed a Notice of Withdrawal of [its Reconsideration] Petition.[12]

7. We also received comments on the matters contained in the General Electric and Telocator petitions from the National Mobile Radio Association; Motorola, Inc.; Southeastern Electronics, Inc.; H.V. Church; PE, C&E Service Co.; Richardson Communications Co.; AGS Electronics, Inc.; Clark Communications; Communications Associated, Inc.; and Commercial Communications.

III. Discussion

Multiple Licensing—Payments Among Participants

8. While most of these parties endorsed the conclusions reached in the *Report and Order*, they generally felt our decision regarding the restriction on equipment suppliers operating on facilities they made available to others for multiple licensing was wrong.[13]

9. Commercial Communications, Inc., for example argued:

> For us to comply with these new restrictions would have a devastating effect on our operation, or put a serious burden on our clients, to whom we sold radio systems and the use of our repeater in good faith.
>
> If we are forced to vacate our frequency, then we will have to purchase a new repeater at a cost of thousands of dollars, which we simply cannot afford. This incidentally, would also involve our having to use another frequency pair of which there are few enough already. . . . We strongly urge the Commission to reconsider, and to not place this crushing burden on a small business (we are a three man operation) that is already having a hard enough time to survive.

10. Similar arguments were echoed by Clark Communications ("With the new ruling, operators will be forced to install mobile relays physically next to existing mobile relay equipment, even sharing the same frequencies as before. What a senseless duplication of equipment and cost burden.") and AGS Electronics, Inc. ("It will impose a considerable financial burden on any small business, such as ourselves, to have to vacate an existing Community Repeater and invest in expensive equipment purchases simply to have our own communications system, when one already exists and is available for our use").

IV. Decision

11. We have considered these arguments and we find them persuasive. Our concern, as expressed in the *Report and Order*, essentially turned on definitional purity (i.e. we thought the rule desirable to distinguish multiple licensed sharing arrangements from cooperative use, thereby drawing an absolute and very definitive line between the two). Cf. n. 13, *supra*. In considering this matter further, however,

---

[9] *Land Mobile Radio Services, Second Report and Order*, Docket No. 18262, 46 FCC 2d 752 (1974); *reconsidered, Memorandum Opinion and Order*, Docket No. 18262, 51 FCC 2d 945 (1975); *aff'd sub nom. NARUC v. FCC*, 525 F.2d 630 (D.C. Cir. 1976); *cert. denied*, 425 U.S. 992 (1976).

[10] *"Third Party Licensing.* Would direct licensing of any entrepreneurs now providing equipment or services to cooperative and multiply licensed private radio systems be permissible as a matter of law? Is either mandatory or voluntary licensing of such entrepreneurs a policy that would benefit either the users of these systems or the public interest? What would be the advantages and disadvantages of allowing or requiring the provision of radio communications services to current users of cooperative and multiply licensed systems in a manner analogous to the rules applied now to the Specialized Mobile Radio Service above 800 MHz." *Tentative Decision and Further Notice of Inquiry and Notice of Proposed Rule Making*, para. 82 (footnote omitted).

[11] "We also decline to adopt rules at this time which would license third party providers of equipment and service in the bands below 800 MHz and the record of this proceeding does not definitely support a need for such a service in these bands" (footnote omitted). *Report and Order*, para. 9

[12] In withdrawing its petition, TNA stated that new amendments to the Communications Act rendered moot the arguments it made challenging our conclusions with respect to multiple licensing and licensee control when third party equipment suppliers provide radio equipment on a joint use basis.

[13] In our *Report and Order* we stated:

"We also proposed in 1970 to forbid payments between persons sharing common transmitting facilities under multiple licensing. This we thought desirable to distinguish multiple licensed sharing arrangements from cooperative use, thereby drawing an absolute and very definitive line between the two. This approach was opposed by several parties. They argued that in many instances persons furnishing service, *e.g.*, equipment companies, have legitimate communications requirements of their own. In such circumstances, the option would be for such equipment companies to build a second facility for use by their customers. Notwithstanding this effect we feel that licensees of community repeaters should not be permitted to profit from the furnishing of equipment or service to other licensees. Therefore, payments among persons sharing common transmitting facilities under multiple licensing will be prohibited." 89 FCC 2d at 791.

we find the hardships it imposes, particularly on small business, is not commensurate with the benefits gained. For years there was no prohibition against permitting equipment suppliers to be one of the licensees authorized to operate on a facility which they made available to others for multiple licensing. During this time no regulatory problems arose which necessitated the discontinuance of this practice because of adverse public interest effects. Moreover, the new amendments to the Act and the NARUC case make clear that profit to the licensee of a private system is not the test of common carriage. In light of these things therefore, we are modifying our *Report and Order* to eliminate this restriction. We conclude it unnecessarily burdens licensees, particularly small businesses, while not conferring a public interest benefit sufficient to justify this burden.

Packaged Service Prohibition

12. Also, on our own motion we have reconsidered our decision to preclude private land mobile services licensees and users of shared and multiple licensed stations from securing from the same third party a "packaged service" for radio equipment and dispatching.

13. Since the inception of this proceeding we have put into issue the question whether or not licensees of private systems of communication should be permitted to obtain both equipment and dispatching service from the same third party when the station they used was shared or multiple licensed. Our concern with the desirability of such a practice has been whether in such instances licensees would maintain proper control of their systems, or would cede control to the equipment supplier/dispatcher. A second consideration was the common carriers' arguments that such arrangements "so closely paralleled common carriage offerings as to be common carriage."[14]

14. In our *Tentative Decision, supra,* we held that packaged service arrangements were not illegal and did not contravene public policy. We noted that licensees of private systems use authorized radio facilities as a tool to carry out their primary activities and functions. We also recognized that they often contract both for the radio equipment they need to enable them to operate on their authorized channels, and for the dispatch service they require, when they cannot operate their control points themselves. We concluded that the fact that they contracted with the same entity for both services did not necessarily mean they would cease to exercise proper control of their stations. We also found there was no underlying regulatory objective that required the retention of the packaged service policy.

15. However, in our *Report and Order* we retained the packaged service prohibition. While we felt the provision of packaged service did not constitute common carriage, we were faced with the comments in the proceeding that argued that the prohibition of the offering of packaged service would aid the "Commission in identifying private shared stations which are functionally equivalent with regulated carriers."[15] We did recognize, however, that throughout the proceeding the private land mobile user community had opposed retention of the packaged service prohibition and had asserted we were being overly restrictive in adopting the rule, since it did not necessarily follow that merely because licensees and users of shared stations contracted with a single entity for the services they needed, and for services which the Commission had found were necessary and served the public interest, that they would abdicate system control.

16. Obviously, the question of contracting for both dispatching and radio equipment from a single third party when a private land station is shared or multiple licensed is a matter to which we have devoted considerable thought. On the one hand, we wished to assure that licensees retained control of the systems. On the other hand, we did not want to impose unnecessary restrictions on licensees in the terms and persons with whom they contracted in the public marketplace for goods and services. After considering this entire matter again, we believe that we were overly restrictive in retaining the packaged service prohibition. Abdication of system control is not the natural consequence of securing goods and services from a single entity, though it may occur in isolated instances. What is determinative is not that the land station is shared or multiple licensed or that one or two third parties are involved, but rather that the licensee in fact exercises the supervision the system requires. To the extent that abdication of control occurs, it can be dealt with on a case by case basis, it need not be anticipated in a generic rule prohibition on securing package service for shared or multiple licensed land stations.

17. In reconsidering this matter, therefore, we are eliminating any restrictions on the persons from whom private land mobile service eligibles using shared or multiple licensed stations may secure radio equipment and services.

For Profit Licensing Arrangements

18. In our *Report and Order* we also adopted rules that required sharing of transmitting facilities, as opposed to multiple licensing, to be on a prorated, cost-shared basis. To assure this, we adopted rules which required that all costs associated with the shared service must either be absorbed by the licensee on a no-charge basis to other participants or must be prorated among all participants in the cooperative sharing arrangement. Thus, we determined not to permit the so called "stage two" and "stage three" cooperatives which we had hereto allowed. See generally Docket No. 18921, *supra.* We stated that both in stage two and in stage three cooperatives oftentimes costs and services associated with the shared use of transmitters are not prorated and cost apportioned among participants. This we concluded was not desirable in consideration of our conclusion that costs should be equitably apportioned among eligible users when they sought to operate pursuant to the Commission's cooperative sharing arrangements for the private land mobile services. We have examined this conclusion again, however, both in light of the NARUC case and the Congressional intent for the private services, as expressed in the new amendments to the Act. Both NARUC and the new amendments affirm that the status of a private system is not affected when the licensee or a third party makes a profit from a system licensed in the private service. Indeed, the new legislation makes the manner of obtaining telephone service the only line of demarcation between private and common carrier land mobile service and encourages allowing maximum flexibility in permitting licensees, equipment suppliers and other third parties to offer their services and facilities to eligible users as marketplace forces may dictate.[16]

19. In light of the fact that as a matter of law, private land mobile licensees may profit from making facilities licensed to them available to other

[14] *Tentative Decision and Further Inquiry and Notice of Proposed Rule Making,* Docket No. 18921, *supra,* at para. 60 *See also, Multiple Licensing Safety and Special Radio Services,* 24 FCC 2d, 510, 519 (1970).

[15] *Report and Order,* Docket No. 18921, 89 F.C.C. 2d at 785–788. (1982).

[16] *Cf.* Joint Explanatory Statement of the Committee of Conference on the subject of the Private Land Mobile Services.

eligibles, there seems to be no reason (1) for limiting in our rules a licensee's ability to charge for shared stations operating in bands below 800 MHz or (2) for limiting the licensee's ability to structure the cost sharing arrangement as the licensee sees fit. This being the case, we are modifying our rules governing the sharing of private land mobile stations to allow all kinds of for profit and non-profit sharing arrangements, including Stage II and Stage III cooperatives.[17]

20. Accordingly, to the extent indicated the General Electric petition is granted and it is ordered that the Commission's Rules and Regulations are modified as set forth in Appendix B.

21. It is further ordered, that the Secretary shall cause a copy of this Order to be published in the **Federal Register.**

22. It is further ordered, pursuant to 47 U.S.C. §§ 154(i), 301, 303(r), That Title 47 of the Code of Federal Regulations is amended as set forth in Appendix B. These amendments shall become effective July 11, 1983.

23. It is further ordered this proceeding is terminated.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

SEC. 120. (a) Part I of Title III of the Communications Act of 1934 (47 U.S.C. 301 et seq.) is amended by adding at the end thereof the following new section:

"Private Land Mobile Services

SEC. 331. (a) In taking actions to manage the spectrum to be made available for use by the private land mobile services, the Commission shall consider, consistent with section 1 of this Act, whether such actions will—

"(1) promote the safety of life and property;

"(2) improve the efficiency of spectrum use and reduce the regulatory burden upon spectrum users, based upon sound engineering principles, user operational requirements, and marketplace demands;

"(3) encourage competition and provide services to the largest feasible number of [illegible]; or

"(4) increase interservice sharing opportunities between private land mobile services and other services.

"(b)(1) The Commission, in coordinating the assignment of frequencies to stations in the private land mobile services and in the fixed services (as defined by the Commission by rule), shall have authority to utilize assistance furnished by advisory coordinating committees consisting of individuals who are not officers or employees of the Federal Government.

"(2) The authority of the Commission established in this subsection shall not be subject to or affected by the provisions of part III of title 5, United States Code, or section 3679(b) of the Revised Statutes (31 U.S.C. 665(b)).

"(3) Any person who provides assistance to the Commission under this subsection shall not be considered, by reason of having provided such assistance, a Federal employee.

"(4) Any advisory coordinating committee which furnishes assistance to the Commission under this subsection shall not be subject to the provisions of the Federal Advisory Committee Act.

"(c)(1) For purposes of this section, private land mobile service shall include service provided by specialized mobile radio, multiple licensed radio dispatch systems, and all other radio dispatch systems, regardless of whether such service is provided indiscriminately to eligible users on a commercial basis, except that a land station licensed in such service to multiple licensees or otherwise shared by authorized users (other than a nonprofit, cooperative station) shall not be interconnected with a telephone exchange or interexchange service or facility for any purpose, except to the extent that (A) each user obtains such interconnection directly from a duly authorized carrier; or (B) licensees jointly obtain such interconnection directly from a duly authorized carrier.

"(2) A person engaged in private land mobile service shall not, insofar as such person is so engaged, be deemed a common carrier for any purpose under this Act. A common carrier shall not provide any dispatch service on any frequency allocated for common carrier service, except to the extent such dispatch service is provided on stations licensed in the domestic public land mobile radio service before January 1, 1982.

"(3) No State or local government shall have any authority to impose any rate or entry regulation upon any private land mobile service, except that nothing in this subsection may be construed to impair such jurisdiction with respect to common carrier stations in the mobile service".

(b)(1) Section 3 of the Communications Act of 1934 (47 U.S.C. 153) is amended by adding at the end thereof the following new paragraph:

"(gg) 'Private land mobile service' means a mobile service which provides a regularly interacting group of base, mobile, portable, and associated control and relay stations (whether licensed on an individual, cooperative, or multiple basis) for private one-way or two-way land mobile radio communications by eligible users over designated areas of operation.".

(2) Section 3(n) of the Communications Act of 1934 (47 U.S.C. 153(n)) is amended to read as follows:

"(h) 'Mobile service' means a radio communication service carried on between mobile stations or receivers and land stations, and by mobile stations communicating among themselves, and includes both one-way and two-way radio communication services."

Appendix B

Part 90 of the Commission's Rules and Regulations is amended as follows:

PART 90—[AMENDED]

1. Section 90.7 is amended by the addition of the term "private carrier" to the list of definitions to read as follows:

§ 90.7 Definitions.

* * * * *

Person. An individual, partnership, association, joint stock company, trust or corporation.

Private carrier. An entity licensed in the private services and authorized to provide communications service to other private services on a commercial basis.

Radio call box. A transmitter used by the public to request fire, police, medical, road service, or other emergency assistance.

* * * * *

2. Section 90.35 is amended by revising paragrph (a)(6) to read as follows:

§ 90.35 Medical Services.

(a) * * *

* * * * *

(6) Physicians, schools of medicine, oral surgeons, and associations of physicians or oral surgeons.

* * * * *

3. Section 90.179 including the heading, is revised to read as follows:

§ 90.179 Shared used of radio stations.

Licensees of radio stations authorized under this rule part may share the use of their facilities. A station is shared when persons not licensed for the station control the station for their own purposes pursuant to the licensee's authorization. Shared use of a radio station may be on either a non-profit, cost shared basis or on a for-profit private carrier basis. Shared use of an authorized station is subject to the following conditions and limitations:

(a) Persons may share a radio station only on frequencies for which they would be eligible for a separate authorization.

(b) The licensee of the shared radio station is responsible for assuring that the authorized facility is used only by persons and only for purposes consistent with the requirements of this rule part.

(c) Participants in the sharing arrangement may obtain a license for their own mobile units (including control points and/or control stations for control of the shared facility), or they

[17] We address here solely profit which may be earned on the offering of shared radio facilities and do not reach issues which may arise if these facilities are interconnected with telephone service.

may use mobile stations, and control stations or control points authorized to the license.

(d) If the licensee shares the land station on a non-profit, cost shared basis to the licensee, this shared use must be pursuant to a written agreement between the licensee and each participant which sets out (1) the method of operation, (2) the components of the system which are covered by the sharing arrangements, (3) the method by which costs are to be apportioned, and (4) acknowledgement that all shared transmitter use must be subject to the licensee's control. These agreements must be kept as part of the station records.

(e) The licensee must keep an up-to-date list of persons who are sharing the station and the basis of their eligibility under Part 90 of the rules.

(f) If the land station which is being shared is interconnected with the public switched telephone network, the provisions of § 90.477 *et seq.* apply.

4. Section 90.185 is revised to read as follows:

§ 90.185 Multiple licensing of radio transmitting equipment in the mobile radio service.

Two or more persons eligible for licensing under this rule part may be licensed for the same land station under the following terms and conditions.

(a) Each licensee complies with the general operating requirements set out in § 90.403 of the rules.

(b) Each licensee is eligible for the frequency(ies) on which the land station operates.

(c) If the multiple licensed base station is interconnected with the public switched telephone network, the provisions of § 90.477 *et seq.* apply.

5. Section 90.129 is amended by revising paragraph (d) to read as follows:

§ 90.129 Supplemental information routinely to be submitted with application.

* * * * *

(d) Applicants proposing to share their authorized transmitters pursuant to § 90.179 shall so indicate in their application.

6. Section 90.443 is amended by the addition of new paragraph (e) to read as follows:

§ 90.443 Content of station records.

* * * * *

(e) For shared land stations, the records required by § 90.179.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 250

[Docket No. 30602-100]

Fisheries Loan Fund Procedures; Available Fisheries Loans and Open Season for Applications

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Rule-related notice.

SUMMARY: NOAA issues this notice that emergency loans from the Fisheries Loan Fund are available to qualified fishing vessel owners. Fishermen whose vessels are financed under the Fisheries Obligation Guarantee Program may apply at any time; however, *fishermen whose vessels are not financed under the Fisheries Obligation Guarantee Program may apply only during an open season from June 15 through July 29, 1983.* This notice will provide potential applicants with specific eligibility criteria and application instructions.

DATE: The deadline for applications is July 29, 1983.

ADDRESSES: Application instructions and information can be obtained from the nearest Regional Financial Services Branch of the National Marine Fisheries Service listed below:

Residents of New England, Mid-Atlantic, and Great Lakes areas, send to National Marine Fisheries Service, Northeast Region, Financial Services Branch, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930; (617) 281-3600.

Residents of Gulf of Mexico, and South Atlantic, and Caribbean areas, send to National Marine Fisheries Service, Southeast Region, Financial Services Branch, 9450 Koger Boulevard, St. Petersburg, Florida 33702; (813) 893-3148.

Residents of California, Hawaii, American Samoa, and Guam send to National Marine Fisheries Service, Southwest Region, Financial Services Branch, 300 South Ferry Street, Terminal Island, California 90731; (213) 548-2478.

Residents of Washington, Oregon, and Alaska, send to National Marine Fisheries Service, Northwest Region, Financial Services Branch, 7600 Sand Point Way, NE, BIN C15700, Seattle, Washington 98115; (206) 527-6122.

FOR FURTHER INFORMATION CONTACT: Michael L. Grable, Chief, Financial Services Division, National Marine Fisheries Service (202) 634-7496.

SUPPLEMENTARY INFORMATION: $9.7 million is available for emergency loans from the Fisheries Loan Fund. The purpose of these loans is to enable fishermen to avoid default on vessel mortgages which financed the construction, reconstruction, or reconditioning of their fishing vessels.

$3.9 million is reserved for fishermen *whose vessels are financed under the Fisheries Obligation Guarantee Program.* These fishermen may apply at any time. Their applications should, however, be submitted as soon as possible because applications have to be processed and loans committed before September 30, 1983 (at which time the program ends). These fishermen should call their nearest Regional Financial Services Branch of the National Marine Fisheries Service to get application advice.

$5.8 million is reserved for fishermen whose vessels are not financed under the Fisheries Obligation Guarantee Program. *These fishermen may apply only during the application open season from June 15 through July 29, 1983. The rest of this notice establishes application instructions and qualification criteria only for those fishermen whose vessels are not financed under the Fisheries Obligation Guarantee Program.*

This action has been submitted to Office of Management and Budget under the Paperwork Reduction Act.

What is available.

(1) $1.16 million in emergency loan funds are available to residents of each of the following areas:

(a) New England, Mid-Atlantic, and Great Lakes.

(b) Gulf of Mexico, South Atlantic, and Caribbean.

(c) California, Hawaii, American Samona, and Guam.

(d) Washington and Oregon.

(e) Alaska.

(2) Interest rate is 3 percent.

(3) Repayment maturity is up to 10 years.

To whom loans available.

(1) You must be a U.S. citizen.

(2) You must own a commercial fishing vessel of at least 5 net tons.

(3) You must be in jeopardy of defaulting on a mortgage which financed the above vessel's construction, reconstruction, or reconditioning.

(4) You must personally skipper and own the vessel whose mortgage you are in jeopardy of defaulting (vessels with hired skippers do not qualify).

(5) You must have at least 5 years experience as a skipper of vessels you owned.

(6) You must have made a profit during at least 2 of the 5 years above.

(7) You cannot be in bankruptcy.

(8) Your mortgate cannot already be in process of foreclosure.

(9) You cannot have any other assets capable of generating the funds for which this loan is sought.

(10) Your vessel must have a sufficient debt-to-equity ratio and insurable value to safely secure the loan amount requested (maximum loan amount is 1 year's mortgage debt service, but all loans will be kept as small as possible).

(11) Your situation must be such that the requested loan, if approved, will result in a strong assurance of continued operation and repayment of the loan.

(12) Only the owner of the vessel himself may apply (do not have someone apply on your behalf).

(13) Applications which are not materially complete at the time of our receipt will be returned.

(14) Do not apply unless you meet all the above requirements.

How loan will be made available.

(1) Applications submitted before or after the open season will not be accepted.

(2) Applications will be considered in the order of their receipt by us.

(3) Qualified applications will be approved in the order of their receipt until available funds are exhausted.

What must be included in applications. (Since no application form is available, send the following information in the order indicated).

(1) *Personal.*

(a) Name.

(b) Address.

(c) Telephone number.

(d) Marital status.

(e) Social security number.

(f) IRS taxpayer number.

(g) Complete biography. Include age, place of birth (proof of naturalization if naturalized), health, experience, references, operating history, accomplishments, etc. Be *specific* about what fishing vessels you owned and skippered, what they fished for, when you owned and skippered them, etc.

(h) Balance sheet for yourself (current within 60 days of application). All personal debts must be disclosed, with the amount and frequency of repayment requirements. List acquisition cost and market value for all non-cash assets. All items must be described thoroughly to permit our verification. Give names, addresses, and telephone numbers of each person you owe money to and each person who owes money to you.[1]

(i) Federal income tax returns for yourself for the last 5 years.[1]

(2) *Loan purpose.*

(a) Amount of loan requested (maximum is one year's debt service on mortgaged vessel).

(b) What loan will be used for (who it will be paid to and for what).

(c) Why a lesser amount would not be enough.

(d) Why the amount requested will assure your ability to continue in operation and repay the loan (be specific).

(e) Letters from two banks declining to loan the money you are requesting from the Fisheries Loan Fund Program.

(3) *Financial information.*

(a) Balance sheet for your vessel's business (this must be current within 60 days of application and must be for the vessel whose mortgage is in jeopardy of default). All vessel debts must be disclosed, with the amount and frequency of repayments. List acquisition cost and market value for all non-cash assets. All items must be described thoroughly enough to permit our verification. Give names, addresses, and telephone numbers of each person you owe money to and each person who owes you money.[1]

(b) Profit and loss statement for your vessel during last 12 months (this must be current within 60 days of application and must be for the vessel whose mortgage is in jeopardy of default). Please be specific about all items of profit and loss.

(c) Federal income tax returns for your vessel business for the last 5 years.[1]

(d) Trip settlement sheets for the past 90 days (for the vessel whose mortgage is in jeopardy of default).

(e) Current balance sheet and profit and loss statement for any other business you own.

(f) Name, address, and telephone number of your bookkeeper and your attorney.

(g) Name, address, and telephone number of the principal people who buy your vessel's catch and the principal people who sell supplies and services to your vessel.

(4) *Vessel information* (for the vessel whose mortgage is in jeopardy of default).

(a) Copy of all vessel mortgages (include names, addresses, and phone numbers of mortgagees and present outstanding balance of each mortgage).

(b) Current U.S. Coast Guard form 1330 (certificate of ownership).

(c) Recent photograph of vessel.

(d) Inventory of vessel equipment and description of vessel's rigging.

(e) Survey report for vessel (no older than 1 year).

(f) Copy of vessel's insurance policy (plus name, address, and telephone number of agent).

(g) Number of engine hours and date of last engine overhaul.

(h) Date of last vessel dry dock.

(i) Vessel acquisition cost and present market value.

(j) Complete disclosure of all lienable vessel debt.

Proposed Rules

Federal Register
Vol. 48, No. 112
Thursday, June 9, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 23

[Docket No. 23494; Notice No. CE-83-1A]

Small Airplane Airworthiness Review Program

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of reopening of proposal period.

SUMMARY: This notice reopens the period for interested persons to submit proposals for consideration concerning the Small Airplane Airworthiness Review Program, Notice No. CE-83-1 (48 FR 4290; January 31, 1983). The program objective is to provide public participation in improving, updating and developing the airworthiness standards applicable to small airplanes as set forth in Part 23 of the Federal Aviation Regulations (FAR).

DATE: Proposals must be received on or before May 3, 1984.

ADDRESS: Proposals prepared in response to this notice should be mailed or delivered in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, ACE-7, Attn: Rules Docket Clerk, Docket No. 23494, Room 1558, Federal Building, 601 East 12th Street, Kansas City, Missouri 64106. All proposals must be marked: Docket No. 23494. Proposals may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: William Olson, Regulations and Policy Office (ACE-110), Aircraft Certification Division, Central Region, Federal Aviation Adminstration, 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374-5688.

SUPPLEMENTARY INFORMATION:

Proposals Invited

Interested persons are invited to participate in the Small Airplane Airworthiness Review Program by submitting any proposal deemed appropriate as an amendment to Part 23 of the FAR. All proposals submitted should be in the format, including all of the information requested, in the required, FORMAT AND INFORMATION paragraph of notice CE-83-1. All proposals received on or before the closing date will be considered before taking further action on the Small Airplane Airworthiness Review Program. All proposals submitted will be available, both before and after the closing date in the Rules Docket, for examination by interested persons. Persons wishing the FAA to acknowledge receipt of their proposals submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Proposal to Docket No. 23494." The postcard will be date/time stamped and returned to the person submitting the proposal.

Availability of Notice

Any person may obtain a copy of notice CE-83-1 by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attn: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Requests must identify the notice number. Persons interested in being placed on a mailing list for future notices and Notices of Proposed Rulemaking (NPRM) related to this Review Program should also request a copy of Advisory Circular No. 11-2, which describes the application procedures.

Reopening of Period for Submitting Proposals

The FAA has determined that it is in the public interest to reopen the response period for Notice No. CE-83-1 to afford the public and the aviation industry sufficient time to review Part 23 of the FAR and submit proposals deemed appropriate as an amendment to Part 23.

Accordingly, the proposal period for Notice No. CE-83-1 is reopened to close on May 3, 1984.

List of Subjects in 14 CFR Part 23

Aircraft, Aviation safety, Safety, Air transportation, Tires.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c))

Issued in Kansas City, Missouri on May 26, 1983.

Murray E. Smith,

Director, Central Region.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 210

[Release Nos. 33-6469; 34-19834; 35-22980; S7-956]

Oil and Gas Producers—Full Cost Accounting Practices; Proposed Amendment of Rules

AGENCY: Securities and Exchange Commission.

ACTION: Re-opening of period for comment.

SUMMARY: The Commission announces that it is re-opening the period during which comments should be received on proposed amendments to its rules for application of the full cost method of accounting by oil and gas producers. The Commission is re-opening the comment period because of the substantial proportion of comments received subsequent to the original deadline.

DATE: Comments should be received by the Commission on or before June 30, 1983.

ADDRESS: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. Comment letters should refer to File No. S7-956. All comments will be available for public inspection at the Commission's Public Reference Room.

FOR FURTHER INFORMATION CONTACT: M. Elizabeth Rader or John W. Albert, (202) 272-2130, Office of the Chief Accountant, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: On December 21, 1982, the Commission

proposed amendments to its rules for application of the full cost method of accounting by oil and gas producers by issuing Release No. 33–6445 (December 30, 1982; 47 FR 58281). These amendments consisted of two alternative sets of rules for determining when capitalized costs may be excluded from immediate amortization and invited public comment by April 30, 1983. Because of the substantial proportion of comments received subsequent to that date, the Commission is re-opening the comment period on these proposed rules to inform all interested parties that comments will be considered if received on or before June 30, 1983.

By the Commission.

Dated: June 1, 1983.

Shirley E. Hollis,

Assistant Secretary.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 946

Public Comment Period and Opportunity for Public Hearing on Proposed Condition of Approval to the Virginia Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing a public comment period and opportunity for public hearing on a proposed action to impose a new condition on the Secretary of the Interior's approval of the Virginia Permanent Regulatory Program (hereinafter referred to as the Virginia program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed condition relates to the authority of the State to deny an application for a permit or permit renewal unless the applicant submits proof that all required Federal reclamation fees have been paid.

This notice sets forth the times and locations that the Virginia program is available for public inspection, the comment period during which interested persons may submit written comments on the proposed action, and information pertinent to the public hearing.

DATES: Written comments, data or other relevant information relating to the imposition of the condition to the Virginia program not received on or before 4:00 p.m. on July 11, 1983, will not necessarily be considered.

A public hearing on the proposed modifications has been scheduled for June 27, 1983, at the address listed under "ADDRESSES."

Any person interested in making an oral or written presentation at the hearing should contact Mr. Ralph Cox at the address or phone number listed below by June 21, 1983. If no one has contacted Mr. Cox to express an interest in participating in the hearing by the above date, the hearing will not be held. If only one person has so contacted Mr. Cox by the above date, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

ADDRESSES: Written comments should be mailed or hand delivered to: Ralph Cox, Director, Virginia Field Office, Office of Surface Mining Reclamation and Enforcement, Highway 23, South, P.O. Box 626, Big Stone Gap, Virginia 24219.

The public hearing will be held in the Conference Room of the Lebanon Area Office, Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll, Streets, Lebanon, Virginia 24266.

Copies of the Virginia program, a listing of any scheduled public meetings and all written comments received in response to this will be available for review at the OSM and State regulatory authority offices listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays:

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 "L" Street, N.W., Washington, D.C. 20240

Office of Surface Mining Reclamation and Enforcement, Highway 23, South, Big Stone Gap, Virginia 24219

Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll Streets, Lebanon, Virginia 24266

Virginia Division of Mined Land Reclamation, 622 Powell Avenue, Drawer U, Big Stone Gap, Virginia 24219

FOR FURTHER INFORMATION CONTACT: Ralph Cox, Director, Virginia Field Office, Office of Surface Mining, P.O. Box 626, Big Stone Gap, Virginia 24219, Telephone: (703) 523–4303.

SUPPLEMENTARY INFORMATION: The Virginia program was conditionally approved by the Secretary of the Interior on December 15, 1981 (46 FR 61088–61115). Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Virginia program can be found in the December 15, 1981 **Federal Register.**

Background

Sections 510(b) and 510(c) of SMCRA limit the issuance of new permits and permit renewals to those applicants who are in compliance with the requirements of SMCRA. As specified in section 402 of SMCRA and Subchapter R of 30 CFR, the operators of coal surface mines are to pay reclamation fees to the Secretary of the Interior. Further, section 402(f) of SMCRA specifically mandates full cooperation with the Secretary by all Federal and State agencies in the enforcement of this provision.

Recently it was brought to the Secretary's attention that the Virginia program does not contain regulatory language consistent with 30 CFR 786.19(h) which requires the State to deny permit applications and permit revision applications unless the applicant has submitted proof that all Federal reclamation fees required under 30 CFR Subchapter R have been paid.

To resolve this issue, on January 4, 1983, the Director, OSM, sent a letter to Virginia to request that Virginia either voluntarily amend its program to add a regulation consistent with 30 CFR 786.19(h), or revise its permitting procedures to ascertain such information prior to approving a permit application. To date, Virginia has not formally responded to the January 4 letter.

Therefore, the Secretary proposes to add a new condition to the Virginia program requiring the State to amend its program by a specified date to incorporate requirements no less effective than 30 CFR 786.19(h). The Secretary requests public comment on this proposed action.

Pursuant to 30 CFR 732.17(e), the Secretary notified Virginia by letter of June 1, 1983, that a State program amendment is required because conditions or events indicate that the approved State program no longer meets the requirements of SMCRA and the Federal regulations. Therefore, pursuant to 30 CFR 732.17(f)(1), Virginia shall submit to the Secretary within 60 days of receipt of notification either a proposed written amendment or a description of an amendment to be proposed that meets the requirements of SMCRA and the Federal regulations, and a timetable for enactment which is consistent with established

administrative or legislative procedures. Failure of the State to submit the proposed amendment or description and the enactment timetable within the prescribed 60 days, or subsequent failure to comply with the submitted timetable, or disapproval by the Secretary of the amendment, could result in proceedings under 30 CFR Part 733 to either enforce that part of the State program affected or withdraw approval, in whole or in part, of the State program and implement a Federal program.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared for this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSM is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 946

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, 30 CFR 946.11 is proposed to be amended as set forth herein.

Dated: June 1, 1983.

J. R. Harris,

Director, Office of Surface Mining.

Authority: Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

PART 946—VIRGINIA

30 CFR 946.11 is proposed to be amended by adding paragraph (t) to impose an additional condition as follows:

§ 946.11 Conditions of State regulatory program approval.

* * * * *

(t) Termination of the approval found in Section 946.10 will be initiated on _____, unless Virginia submits to the Secretary by that date a copy of promulgated regulations or otherwise amends it program to contain provisions no less effective than 30 CFR 786.19(h) to require the State to deny permit applications and permit revision applications unless the applicant has submitted proof that all Federal reclamation fees required under 30 CFR Subchapter R have been paid.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD 08-83-02]

Drawbridge Operation Regulations; Louisiana

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Louisiana Department of Transportation and Development (LDOTD), the coast Guard is considering changing the regulations governing nine LDOTD low level drawbridges in Louisiana.

This proposal is being made because of the infrequent requests for openings of the draws during the periods specified for advance notice. This action is designed to relieve the bridge owner of the burden of having a person constantly available at the bridge to open the draw, while still providing for the reasonable needs of navigation.

DATE: Comments must be received on or before July 25, 1983.

ADDRESS: Comments should be submitted to and are available for examination from 9:00 a.m. to 3:00 p.m., Monday through Friday except holidays, at the Eighth Coast Guard District, Bridge Administration Branch, Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 70130. Comments may also be hand delivered to this address.

FOR FURTHER INFORMATION CONTACT: Joseph Irico, Chief, Bridge Administration Branch, at the address given above (504) 589-2965.

SUPPLEMENTARY INFORMATION: At the request of the Louisiana Department of Transportation and Development (LDOTD), the Coast Guard is considering changing the regulations governing nine LDOTD low level drawbridges to provide the following:

(1) Require that at least four hours advance notice be given for an opening of the draw at all times, for the:

Swing span bridge, Amite River, mile 6.0, LA 22 at Clio, Livingston Parish.

Pontoon bridge, Belle River, mile 43.5, LA 70 near Belle River, Assumption Parish.

Pontoon bridge, Lower Grand River, mile 25.9, LA 977 at Pigeon, Iberville Parish.

Swing span bridge, Pierre Pass, mile 1.0, LA 70 at Pierre Part, Assumption Parish.

Swing span bridge, Plaquemine Bayou, mile 6.5, Spur 3066 at Indian Village, Iberville Parish.

Lift span bridge, West Pearl River, mile 7.9, U.S. 90 near Pearlington, St. Tammany Parish.

All of these bridges presently are required to open on signal at any time, except the bridges over the Amite and West Pearl Rivers. These two are required to open on signal from 5:00 a.m. to 9:00 p.m. and on a 12-hour advance notice otherwise at all times.

(2) Require that at least four hours advance notice be given for an opening of the draw from 9:00 p.m. to 5:00 a.m. and to open on signal otherwise at all times, for the:

Swing span bridge, Kelso Bayou, mile 0.7, LA 27 at Hackberry, Cameron Parish.

Swing span bridge, Mermentau River, mile 7.1, LA 82 at Grand Chenier, Cameron Parish.

These two bridges presently are required to open on signal at any time.

(3) Require that at least four hours advance notice be given for an opening of the draw from 6:00 p.m. to 6:00 a.m. and to open on signal otherwise at all times, for the:

Swing span bridge, Superior Oil Company Canal, mile 6.3, LA 82, Cameron Parish.

This bridge presently is required to open on a 12-hour advance notice from 9:00 p.m. to 5:00 a.m. and to open on signal otherwise at all times.

Interested parties are invited to participate in this proposed rule making by submitting written views, comments, data or arguments. Persons submitting comments should include their name and address, identifying the bridge, and

give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped self-addressed post card or envelope.

The Commander, Eighth Coast Guard District, will evaluate all communications received and determine a final course of action on this proposal. The proposed regulation may be changed in the light of comments receive.

Drafting Information

The principal persons involved in drafting this proposal are: Josep Irico, Project Manager, District Operations Division, and Steve Crawford, General Attorney, District Legal Office.

Discussion of the Proposed Regulations

Vertical clearances of the nine bridges in the closed to navigation position range from 0.0 feet at the pontoon bridges to 13.0 feet at the Mermentau River swingspan bridge. Navigation through the bridges consists in whole or in part of commercial shrimpers/fishers, barges, crew boats and pleasure craft. Data submitted by the LDOTD for the entire year 1982 indicate that there is infrequent traffic through the bridges, during the proposed respective advance notice periods, as reviewed below:

(1) Bridges with proposed four hour notice at all time:

Amite River. In 1982, there were no openings for navigation between 8:00 p.m. and 6:00 a.m. Between 6:00 a.m. and 8:00 p.m. the average monthly openings by the hour ranged from 0.2 to 4.7, with an average daily opening of 0.92.

Belle River. In 1982, the average monthly openings by the hour range from 0.8 to 6.3, with an average daily opening of 2.38.

Lower Grand River. In 1982, the average monthly opening by the hour ranged from 1.0 to 4.8, with an average daily opening of 2.21.

Pierre Pass. In 1982, the average monthly openings by the hour ranged from 0.1 to 4.2, with an average daily opening of 1.58.

Paquemine Bayou. In 1982, there were virtually no openings for navigation between 10:00 p.m. and 7:00 a.m. Between 7:00 a.m. and 10:00 p.m. the average monthly openings by the hour ranged from 0.4 to 2.7, with an average daily opening of 0.84.

West Pearl. In 1982, there were virtually no openings for navigation between 9:00 p.m. and 5:00 a.m. Between 5:00 a.m. and 9:00 p.m. the average monthly openings by the hour ranged from 0.1 to 1.4, with an average daily opening of 0.39.

(2) Bridges with proposed four hour notice at certain period at all times:

Kelso Bayou. In 1982, during the proposed advance notice period between 9:00 p.m. and 5:00 a.m., the average monthly openings by the hour ranged from 2.6 to 5.3, with an average daily opening of 0.92.

Mermentau River. In 1982, during the proposed advance notice period between 9:00 p.m. and 5:00 a.m., the average monthly openings by the hour ranged form 1.5 to 9.0, with an average daily opening of 1.27.

Superior Oil Company Canal. In 1982, during the proposed advance notice period between 6:00 p.m. and 6:00 a.m., the average monthly openings by the hour ranged from 0.0 to 6.6, with an average daily opening of 0.92.

The advance notice for opening the drawbridges would be given by placing a collect call at any time from ashore or afloat, as follows:

Bridge location	From ashore call	From afloat call
Amite River.	Hammond..... (504) 345-7390.....	Slidell Public Coast Station KUZ 557, VHF Channel 84.
Belle River...	Baton Rouge..... (504) 925-6786.....	Baton Rouge Public Coast Station KKM 648, VHF Channels 27 & 86.
Kelso Bayou.	Lake Charles..... (318) 439-2406.....	Cameron Public Coast Station KQU 437, VHF Channel 24.
Lower Grand River.	Baton Rouge..... (504) 925-6786.....	Baton Rouge Public Coast Station KKM 648, VHF Channels 27 & 86.
Mermentau River.	Lake Charles..... (318) 439-2406.....	Cameron Public Coast Station KQU 437, VHF Channel 24.
Pierre Pass..	Baton Rouge..... (504) 925-6786.....	Baton Rouge Public Coast Station KKM 648, VHF Channels 27 & 86.
Plaquemine Bayou.	Baton Rouge..... (504) 925-6786.....	Baton Rouge Public Coast Station KKM 648, VHF Channels 27 & 86.
Superior Oil Company Canal.	Lake Charles..... (318) 439-2406.....	Cameron Public Coast Station KQU 437, VHF Channel 24.
West Pearl River.	Hammond..... (504) 345-7390.....	Slidell Public Coast Station KUZ 557, VHF Channel 84.

Considering the few openings involved and the provision for a four hour advance notice in all cases, the Coast Guard feels that the proposed regulations should relieve the bridge owner of the burden of having a person constantly available at the bridge to open the draw, while still providing for the reasonable needs of navigation.

Economic Assessment and Certification:

These proposed regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. In addition, these proposed regulations are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5-22-80). An economic evaluation has not been conducted since the impact is expected to be minimal. In accordance with Section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is certified that this rule, if promulgated, would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

PART 117—DRAWBRIDGE OPERATION REGULATIONS

§ 117.540 [Amended]

In consideration of the foregoing, the Coast Guard proposes to amend § 117.540, Part 117, Title 33 Code of Federal Regulations, as follows:

Remove from § 117.540(b) the West Pearl River, mile 7.9, U.S. 90 highway drawbridge near Pearlington; Amite River, mile 6.0, S-22 highway drawbridge at Clio, and Superior Oil Company Canal, mile 6.3, S-82 highway drawbridge in Cameron Parish.

Redesignate § 117.540(c) and (d) as § 117.540(f) and (g), respectively.

Add new § 117.540(c), (d) and (e) immediately after § 117.540(b) to read:

* * * * *

(c) The draws of the bridges listed below shall open on signal if at least four hours notice is given.

Amite River, mile 6.0, LA 22 highway drawbridge at Clio, Livingston Parish.

Belle River, mile 43.5, LA 70 highway drawbridge near Belle River, Assumption Parish.

Lower Grand River, mile 25.9, LA 977 highway drawbridge at Pigeon, Iberville Parish.

Pierre Pass, mile 1.0, LA 70 highway drawbridge at Pierre Part, Assumption Parish.

Plaquemine Bayou, mile 6.5, Spur 3066 highway drawbridge at Indian Village, Iberville Parish.

West Pearl River, mile 7.9, U.S. 90 highway drawbridge near Pearlington, St. Tammany Parish.

(d) The draws of the bridges listed below shall open on signal from 5:00 a.m. to 9:00 p.m. From 9:00 p.m. to 5:00 a.m. the draws shall open on signal if at least four hours notice is given.

Kelso Bayou, mile 0.7, LA 27 highway drawbridge at Hackberry, Cameron Parish.

Mermentau River, mile 7.1 LA 82 highway drawbridge at Grand Chenier, Cameron Parish.

(e) The draws of the bridges listed below shall open on signal from 6:00 a.m. to 6:00 p.m. From 6:00 p.m. to 6:00

a.m. the draws shall open on signal if at least four hours notice is given.

Superior Oil Company Canal, mile 0.3, LA 82 highway drawbridge, Cameron Parish.

(33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05–1(g)(3))

Dated: May 24, 1983.

J. M. Fournier,

Captain, U.S. Coast Guard, Acting Commander, Eighth Coast Guard District.

BILLING CODE 4910–14–M

VETERANS ADMINISTRATION

38 CFR Part 17

Unauthorized Medical Services

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The Veterans Administration is amending its medical regulations (38 CFR Part 17), to define the point in time when an emergency ends, for the purpose of approval of claims by veterans for payment and reimbursement of the expenses of emergency hospital care and medical services not previously authorized.

DATES: Comments must be received on or before July 11, 1983. It is proposed to make this amendment effective the dae of final approval.

ADDRESS: Interested persons are invited to submit written comments, suggestions, or objections regarding this proposed regulation to: Administrator of Veterans Affairs (271A), 810 Vermont Avenue, N.W., Washington, D.C. 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 132, of the above address, between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday (except holidays) until July 25, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph F. Fleckenstein, (202) 389–3785.

SUPPLEMENTARY INFORMATION: Existing regulations specify the criteria for approval of claims by certain veterans for payment and reimbursement of the expenses of hospital care and medical services not previously authorized. One of the prerequisites is that the veterans must have received the care and services in a medical emergency of such nature that delay would been hazardous to life or health. However, there is no termination point defined for the emergency.

The new regulation accomplishes this. This action will correct an inequity which grants a greater benefit to veterans who file claims for payment or reimbursement for the expenses of non-VA hospital care or medical services not previously authorized than for veterans who request and receive prior authorization for such care. In the latter cases, the termination point for VA payment of costs of the emergency hospital care is already clearly defined. The Administrator has determined that this amendment to VA regulations is considered nonmajor under the criteria of Executive Order 12291 on Federal regulations. It will not have an annual effect on the economy of $100 million or more; it will not result in major increases in costs for consumers, individual industries, Federal, State or local government agencies, or geographic regions, nor will it have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The Administrator of Veterans Affairs certifies that this amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these regulations are exempt from the initial and final regulatory flexibility analyses requirments of sections 603–604. The reasons for this certification are as follows: This change will directly regulate only the entitlement of individual veterans and their beneficiaries. Any economic impact on small entities would be indirect and small because of the minimal part of their overall operation and income which this activity represents. Moreover, it has been a long-standing policy of the VA to authorize payment for treatment of certain eligible veterans admitted to non-Federal health care facilities in an emergency, for the period of the emergency following which, when appropriate, transfer to an appropriate VA health care facility may be carried out. Veterans Administration will enforce this policy in claims for payment or reimbursement of the expenses of emergency hospital care and medical services received without prior VA authorization. In some cases, it will reduce payment or reimbursement where the veteran's transfer could have been, but was not, carried out. It will encourage non-VA health care facilities to contact VA immediately to seek authorization for payment rather than await the veteran's discharge, to file claim for payment. The Catalog of Federal Domestic Assistance Program numbers are 64.009 and 64.011.

List of Subjects in 38 CFR Part 17

Alcoholism, Claims, Dental health, Drug abuse, Foreign relations, Government contracts, Grants programs—health, Health care, Health facilities, Health professions, Medical devices, Medical research, Mental health programs, Nursing homes, Philippines, Veterans.

Approved: May 25, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 17—[AMENDED]

38 CFR Part 17, *Medical*, is amended by adding a new § 17.80a to read as follows:

§ 17.80a Limitations on payment for emergency hospital care and medical services not previously authorized.

The VA will not reimburse a veteran for the costs of emergency hospital care or medical services for any period beyond the date on which the medical emergency ended. For the purpose of payment or reimbursement of the expense of emergency hospital care or medical services not previously authorized, an emergency shall be deemed to have ended at that point when a VA physician has determined that, based on sound medical judgment, a veteran:

(a) Who received emergency hospital care could have been transferred from the non-VA facility to a VA medical center for continuation of treatment for the disability, or

(b) Who received emergency medical services, could have reported to a VA medical center for continuation of treatment for the disability.

From that point on, no additional care in a non-VA facility will be approved for payment by the VA. (38 U.S.C. 210(c)(1))

BILLING CODE 8320–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 66 and 67

[OLEC–FRL 2235–5]

Assessment and Collection of Noncompliance Penalties by EPA and Approval of State Noncompliance Penalty Program

AGENCY: Environmental Protection Agency.

ACTION: Proposed interpretive rulemaking.

SUMMARY: On July 28, 1980, the Environmental Protection Agency ("EPA") promulgated rules for the assessment and collection of noncompliance penalties pursuant to Section 120 of the Clean Air Act, 42 U.S.C. 7420. (See 45 FR 50086.) One of the issues discussed in the preamble to the final regulations concerned the relationship between Section 120(g) and Section 172(a)(2) of the Clean Air Act. Section 120(g) provides that new or more stringent state implementation plan requirements become enforceable for Section 120 purposes no later than three years after they are approved or promulgated. Section 172(a)(2) allows such plans in some circumstances to provide for final compliance as late as 1987 (if approved) as long as the implementing regulations are submitted by July 1982. If such a revision were approved in 1983, Section 120(g) would appear to require enforcement of such revision in 1986 even against sources which are not required to comply until 1987. This anomaly was described but not resolved in the 1980 rulemaking. The preamble to the final Section 120 rules stated that EPA would separately announce a final interpretation and policy on this question.

This notice announces, for the purpose of obtaining public comment, the Agency's interpretation and policy on this issue. It states that EPA considers Section 172 to be the controlling provision. In the cases of SIP requirements that properly require compliance more than three years after they are approved or promulgated, EPA therefore will only seek Section 120 penalties for a violation after a source is required to be in compliance.

This policy represents a reversal of the Agency's analysis described in the preamble and a return to the Agency's analysis described in the rules as proposed (see 44 FR 17310). EPA proposes to make this interpretation, if adopted, effective immediately upon adoption.

DATES: Comments must be received on or before July 11, 1983.

ADDRESS: Comments should be addressed to U.S. Environmental Protection Agency, Control Docket Section, Docket No. EN–79–1, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Christopher C. Herman (202) 382–7630.

SUPPLEMENTARY INFORMATION: Section 120 of the Clean Air Act, added in 1977, authorizes EPA to assess and collect a penalty from designated sources no less than the economic value of delaying compliance with applicable legal requirements. Section 120(g) states that with respect to emission limitations which become final after the effective date of the 1977 amendments (August 7, 1977), the penalty shall be imposed on the later of two dates—either July 1, 1979 or the date on which a source is required to be in compliance. Section 120(g) adds that in no event is imposition to be delayed more than three years from the date the new limitations become final.

Section 172 of the Clean Air Act, also added in 1977, deals with state implementation plans to achieve and maintain national ambient air quality standards (NAAQS). It was designed to address the problems of states which did not achieve primary NAAQS by the statutory attainment date, generally 1975. Such nonattainment areas were allowed an extension to December 1982. Areas which could not achieve the NAAQS for ozone and carbon monoxide by that date could request and obtain an attainment date extension to not later than December 1987. Areas seeking extensions are required to submit a plan by July 1982 containing enforceable measures which provide for attainment no later than December 1987, Section 172(c).

The provisions of Section 120(g) and 172(a)(2) appear to be in conflict. Strict application of Section 120(g) could create anomalous results for some sources in areas receiving extensions beyond 1982. For example, a SIP revision for an extension area could contain compliance dates as late as December 1987. If that plan has been submitted by July 1, 1982, it could have been approved and in effect by December 31, 1982. Section 120(g) would seem to require EPA to enforce the Section 120 penalty against sources subject to more stringent new SIP requirements no later than three years after the SIP revisions became final, which in this example would be December 31, 1985, i.e., two years prior to the date on which the source is required to be in compliance under the applicable SIP.

In its proposed rulemaking on Section 120, EPA stated that it believed no penalty could be imposed until the compliance date specified in the approved SIP. 44 FR 17310. In its final rulemaking, the Agency discussed the question further. It stated that the provisions may mean that: (i) No major source regulated under a July 1982 SIP for an extension area may legally have a compliance date later than three years from SIP approval or promulgation; (ii) a source may have a lengthier compliance schedule but must be assessed the value of savings accruing after the third year; or (iii) penalties may not be imposed against a source three years after the SIP becomes final if a source has a lengthier SIP compliance schedule, provided the source is in compliance with any interim requirements. 45 FR 50088.

Upon further consideration, EPA has decided that, where SIPs in extension areas include compliance schedules extending beyond 1982 which are more than three years in length, Section 120 penalties should not be imposed until after the compliance date as long as the source complies with any interim requirements. Such sources will not be liable for a Section 120 penalty merely by virtue of the fact that a SIP requirement approved or promulgated under Section 172(c) allows compliance more than three years after approval or promulgation.

EPA sees no basis for imposing a penalty where no plan requirement has been violated. This reconciliation avoids inappropriate reference to Section 120(g) in developing compliance schedules for plans submitted for extension areas under Section 172(a)(2). This does not, of course, in any way alter the liability of sources subject to SIP requirements after the final compliance date required in the SIP whether more or less than three years from the date the requirement becomes final.

Public Comment

Public comment on this interpretive rule will be accepted until July 11, 1983. Since the interpretation involves a question of statutory construction rather than one of fact the only documents are those discussed above, all of which are in the public record.

This interpretation will be subject to the review provisions of Section 307(b) after EPA issues its final interpretative rule. Interested persons are reminded that Section 307(d)(7)(B) of the Clean Air Act provides that objections to proposed actions must be raised with reasonable specificity for those objections to be cognizable during judicial review.

BILLING CODE 1505-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

244 CFR Part 67

[Docket No. FEMA-6505]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule; correction.

SUMMARY: This documents corrects a notice of Proposed Modified Determinations of base (100-year) flood elevations previously published at 48 FR 16082 on April 14, 1983. This correction notice provides a more accurate representation of the revised Flood Insurance Rate Map for the Township of Center, Indiana County, Pennsylvania.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the correction to the Notice of Proposed Modified Determinations of base (100-year) flood elevations for selected locations in the Township of Center, Indiana County, Pennsylvania, previously published at 48 FR 16082 on April 14, 1983, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has not economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

Due to a clerical error, the Notice of Proposed Base Flood Elevations was not published in its entirety. The Source of Flooding of Yellow Creek and several location descriptions under Two Lick Creek were omitted. The following location descriptions and their corresponding existing and modified base flood elevations more accurately reflect the Flood Insurance Rate Map and Flood Insurance Study for the Township of Center. The remainder of the Notice of Proposed Base Flood Elevations remains unchanged.

Source of flooding	Location	#Depth in feet above ground. ^Elevation in feet (NGVD)	
		Existing	Modified
Two Lick Creek	Downstream corporate limits of Homer City.	^1,004	^1,005
	Upstream State Route 56.	^1,011	^1,015

BILLING CODE 6718-03-M

---

44 CFR Part 67

[Docket No. FEMA-6470]

National Flood Insurance Program; Proposed Flood Elevation Determinations; correction

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Village of Wyocena, Columbia county, Wisconsin, previously published at 45 FR 57079 on December 22, 1982.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Village of Wyocena, Columbia County, Wisconsin previously published at 45 FR 57079 on December 22, 1982, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a)).

The Base Flood Elevation Determination on Duck Creek, which reads, Just upstream of Breached Dam, has been changed from, Just upstream of Breached Dam to Just upstream of Dam and 799 feet to 800 to show the revised hydraulic analysis that includes the Duck Creek Dam.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies

that the (proposed) flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood Plains.

The listing appears correctly as follows:

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
[illegible]	(V) Wyoceria, Columbia County	Duck Creek	Just upstream of Private Drive	*794
			Just downstream of Dam	*795
			Just upstream of Dam	*800
			At upstream corporate limits	*803

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director)

Issued: May 23, 1983.

Dave McLoughlin,

Deputy Associate Director, State and Local Programs and Support.

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-6532]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Propsed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed modified base flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of the proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The proposed modified flood elevations for selected locations are:

PROPOSED MODIFIED BASE FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)	
				Existing	Modified
Missouri	(C) Sarcoxie, Jasper County	Center Creek	About 2,200 feet downstream of Business Loop 44	*1,082	*1,083
			About 2,500 feet upstream of Business Loop 44		*1,089
		Swifty Creek	About 1,050 feet downstream of Reed Avenue	*1,082	*1,083
			Just upstream of Cross Street	1,090	1,092
			About 550 feet upstream of the St. Louis-San Francisco Railway.	1,108	1,111

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 125 Through 136

[CGD 82-004]

Offshore Supply Vessel Regulations

AGENCY: Coast Guard, DOT.

ACTION: Extension of comment period.

SUMMARY: In the **Federal Register** of February 14, 1983, the Coast Guard proposed regulations for new offshore supply vessels. The public comment period was due to close on June 14, 1983. This notice extends the comment period to September 12, 1983.

DATE: Comments on the proposed regulations must be received on or before September 12, 1983.

ADDRESSES: Comments should be mailed to Commandant (G-CMC/44) (CGD 82-004), U.S. Coast Guard, Washington, D.C. 20593. The comments and materials referenced in the notice of

February 14, 1983, will be available for examination and copying between 8 a.m. and 4 p.m., Monday through Friday,except holidays, at the Marine Safety Council (G-CMC/44), Room 4402, Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593. Comments may also be hand delivered to this address.

FOR FURTHER INFORMATION CONTACT: LCDR Kevin V. Feeney (202) 426–2187.

SUPPLEMENTARY INFORMATION: The proposed regulations were published as an advance notice of proposed rulemaking (ANPRM) beginning at page 6636 of the **Federal Register** of February 14, 1983 (48 FR 6636). As stated in the ANPRM, the proposed regulations would apply to new offshore supply vessels in lieu of other existing regulations. The proposal contains many changes and relaxations to standards presently applied to existing offshore supply vessels. The purpose of the ANPRM is to solicit comments on both the technical merits of the proposal and its probable economic effect. All comments received will be considered in preparing the Notice of Proposed Rulemaking.

Drafting Information

This document was drafted by LCDR K.V. Feeney, Office of Merchant Marine Safety. Mr. W. R. Register, Office of the Chief Counsel, provided assistance.

Discussion

The Offshore Marine Services Association (OMSA) has submitted a request for a public hearing and a 45 day extension of the comment period. In support of the request, OMSA states that it needs additional time to fully review the proposed regulations and expresses concern that smaller operators not affiliated with OMSA may be unaware of the proposed regulations. The Coast Guard agrees that the additional time would be beneficial and has decided to extend the comment period for 90 days. Notice of the extension will be given wide distribution in order to ensure that small operators are aware of the proposed regulations. This ninety day extension should provide adequate time to distribute the notice and submit comments and, accordingly, a public hearing on the ANPRM is not being planned. However, a hearing may still be scheduled after publishing the Notice of Proposed Rulemaking if sufficient requests are received to warrant one.

BILLING CODE 4910–14–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 69

[CC Docket No. 78–72; Phase III; FCC 83–178]

MTS and WATS Market Structure

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This notice proposes adoption of rules and requirements to complement the adoption of access charges in Phase I of this proceeding, and the revised telecommunications industry structure which will result from implementation of the Modification of Final Judgment (Consent Decree) governing AT&T and the Bell Operating Companies. Comment is sought in three major areas: (1) A proposal that interconnection ("access") obligations be imposed on Independent telephone companies which are analogous to those imposed in the Modification of Final Judgment on the Bell Operating Companies; (2) a proposal that interconnection offerings by exchange carriers be made in the access tariffs required to be filed with the FCC as a result of Phase I of this proceeding; and (3) a proposal that limited joint planning among exchange carriers, with participation in the process by others, be sanctioned by the FCC with limited involvement by the FCC and its staff.

The proposals are made necessary by the substantial changes now underway in the industry, through increasing competition and divestiture by AT&T of the Bell Operating Companies, and the requirement that important policies of the Communications Act continue to be served. The intended effect of the proposals is to ensure that nationwide service continues to be promoted, and that long-established interconnection requirements continue in effect.

DATES: Comments must be received on or before August 8, 1983 and Reply Comments must be received on or before October 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C 20554

FOR FURTHER INFORMATION CONTACT: Michael S. Slomin or John Cimko, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554; (202–632–9342).

Notice of Proposed Rulemaking

In the matter of MTS and WATS Market Structure, Phase III: establishment of Physical connections and through routes among carriers; establishment of physical connections by carriers with non-carrier communications facilities; planning among carriers for provision of interconnected services, and in connection with national defense and emergency communications services; and regulations for and in connection with the foregoing, CC Docket No. 78-72, Phase III.

Adopted: April 27, 1983.
Released: May 31, 1983.

By the Commission: Commissioner Fogarty issuing a separate statement; Commissioner Jones absent.

I. Introduction

1. Interstate and foreign communications provided by common carriers have historically been offered through electrical connection ("interconnection") of communications facilities operated by different entities. In decisions tracing virtually to the inception of the FCC in the 1930's, we have addressed carriers' obligations to interconnect their facilities with one another, and with non-carrier facilities (*e.g.*, Private communications channel facilities and terminal equipment). The development of Commission policies relating to carriers' interconnection obligations is complex. We summarize our current policies below, as they relate to this proceeding.

2. As a general proposition, carriers today are under a legal obligation to offer interconnection (both to other carriers, and to noncarrier facilities and equipment) under tariffs which are subject to FCC regulation. There are normally two basic dimensions to carriers' interconnection obligations. First, arrangements are required to compensate a carrier offering interconnection for use of its facilities in

interconnected service. Second, physical, technical and operating arrangements are required to ensure that interconnection is feasible and workable, and that such interconnection does not create unacceptable levels of interference or harm to service.

3. In view of the wide range of different service offerings which are subject to the Communications Act of 1934 as amended (the "Act"), we have appropriately tailored our interconnection regulation in each instance to the specific carriers and services involved. For example, in the traditional telephone service field, compensation and physical arrangements for carrier-to-carrier interconnection historically were largely worked out by the industry itself without direct regulatory intervention. The FCC served primarily as a forum for complaints concerning issues which could not satisfactorily be resolved by the carriers through negotiation, and as a forum for resolving issues of jurisdictional cost and revenue apportionment ("separations") which had bearing upon provision of interconnected telephone services. With the advent of new entry by competitive common carriers, this Commission was called upon to take a more active regulatory role with respect to carrier-to-carrier interconnection for telephone services.

4. In the telegraph and record service field, under provisions of 1943 legislation permitting Western Union to acquire Postal Telegraph's facilities,[1] the Commission was required specially to regulate compensation and traffic division arrangements for traffic involving interconnection of Western Union's domestic facilities with the international facilities of international record carriers ("IRCs").

5. Other communications services have directly or indirectly involved interconnection of carriers' facilities to those of one another or to non-carrier facilities, including domestic satellite services, microwave radio services and video services. Here too, we have addressed the compensation and physical arrangements for such interconnection.

6. In some of the foregoing interconnection circumstances, we have merely clarified that a legal obligation to offer interconnected service exists, and have allowed the carriers themselves in carrier-initiated tariffs (or private contracts in some circumstances) to determine the arrangements for interconnection. This largely was the historic pattern for traditional telephone services provided jointly by the integrated Bell System and the Independent telephone companies. The involved carriers had great incentives to interconnect with one another and the details, while sometimes controversial, could usually be worked out by the involved carriers without regulatory intervention. The American Telephone and Telegraph Company ("AT&T") controlled (and controls) the great bulk of all telephone facilities in this nation, through direct control of long distance facilities by its Long Lines Department, and through indirect control through ownership of the associated Bell Operating Companies ("BOCs"). The BOCs access approximately 80% of the nation's telephones (and approximately 50% of the land area of the nation). Quite naturally, with this degree of direct and indirect control, AT&T largely could itself determine the evolution of telephone service, including the terms of interconnection. Moreover, even without such control, the research and development resources of AT&T (primarily in the Bell Telephone Laboratories and in Western Electric Company, and to some extent in AT&T's General Department) effectively could exercise strong influence over the evolution of telephone servies, including interconnection.

7. Moreover, AT&T's strong influence over interconnection has not been limited to traditional telephone services, as many non-telephone common carrier services have required interconnection to AT&T or BOC facilities. For example, while Western Union itself has the right to construct long distance and local telegraph facilities (a right which predates the development of the telephone and of AT&T), in fact Western Union almost exclusively employs local telephone facilities to reach its subscribers. Similarly, while we have authorized the provision of specialized and domestic satellite services by new entrants since the late 1960's, because of spectrum congestion the carriers involved have been unable to bring their services directly to their subscribers in urban areas, and have been required to use local telephone facilities on an interconnected basis to reach their urban subscribers.[2] Again, given AT&T's predominant control of such facilities, AT&T has largely determined the evolution of these interconnection offerings, subject to regulatory contraint.

8. Finally, the Act itself has of course, affected this Commission's historic role with respect to interconnection. For example, all carriers engaged in the provision of interstate and foreign communications, including carriers which do so solely by virtue of interconnection, are subject to Sections 201 through 205 of the Act, which provisions include interconnection requirements. However, under Sections 2(b) and 221(b), the states and not the FCC regulate the offering of local (*i.e.*, exchange) services to carriers' subscribers. Where carrier-to-carrier interconnection for provision of interstate and foreign services is involved, this commission's authority over all interconnection arrangements, including compensation arrangements, is preeminent. But, where interconnection of carriers' local facilities to those of non-carriers is involved (*i.e.*, for interconnection of terminal equipment, or of non-carrier private communications facilities), we have limited our role to one of assuring that interconnection is made available without discrimination, but without otherwise regulating local service compensation arrangements.[3]

A. Changes Necessitating Action

9. A number of recent major events are causing us to examine comprehensively issues which bear upon carriers' interconnection offerings. First, we recently adopted a *Third Report and Order* in this proceeding, —— FCC 2d ——, FCC 82–579, released Feb. 28, 1983 (hereafter, "Third Report"), addressing access charges. In the Third Report we, examined the more competitive nature of communications, and unreasonable and discriminatory ratemaking practices which existed in connection with provision of interstate and foreign services on a direct and interconnected basis. We concluded that the historic traditional telephone industry revenue division practices must be replaced by a system of access charges (*i.e.*, new arrangements for compensating carriers for use of their facilities when providing service on an interconnected basis). In part, this was the result of the increasingly competitive nature of telecommunications, and various forms of disparate treatment of service offerings and interconnection offerings made to other carriers and to subscribers by carriers. In part, this was

[1] These provisions were formerly in Section 222 of the Act, and were recently supplanted by the Record Carrier Competition Act of 1981, Pub. L. 97–130, 95 Stat. 1687, Dec. 29, 1981 ("RCCA").

[2] Such facilities have been termed "entrance facilities."

[3] *See, e.g.*, Carterfone, 13 FCC 2d 420, recon. denied, 14 FCC 2d 571 (1968); North Carolina Utilities Comm'n v. FCC., 537 F. 2d 787 (4th Cir.), cert. denied, 429 U.S. 1027 (1976) ("NCUC I"); North Carolina Utilities Comm'n v. FCC 552 F. 2d 1036 (4th Cir.), cert. denied, 434 U.S. 874 (1977) ("NCUC II").

a response to changes, discussed below, which are likely to flow from the revised antitrust decree governing AT&T and the BOCs. While our Third Report revises, on a nationwide basis, the compensation arrangements for interconnected service, it does not address the physical, technical and operational details of such interconnection. We believe that such matters are important, that they similarly should be addressed, and we propose to do so in these further proceedings.

10. Second, on August 24, 1982, the United States District Court for the District of Columbia entered a Modification of Final Judgment ("MFJ") in *United States* v. *Am. Tel. and Tel. Co.*, 552 F. Supp. 131 (D.D.C. 1982), 1982–2 Trade Cas. (CCH) ¶ 64,979, *aff'd sub. nom., Maryland* v. *United States*. —— U.S. ——, 51 U.S.L.W. 3628 (U.S., Mar. 1, 1983), requiring AT&T to divest the BOCs no later than eighteen months from entry, and establishing constraints and obligations on the subsequent activities of AT&T and the divested BOCs. Bearing most importantly on provision of interstate and foreign services through interconnection is a requirement in Section II of the MFJ, and related Appendix B, that each BOC:

> Provide to all interexchange carriers and information service providers exchange access, information access, and exchange services for such access on an unbundled tariff basis, that is equal in type, quality, and price to that provided to AT&T and its affiliates.

As noted, the Third Report in this proceeding addresses the "price" aspects of the BOCs' access and service provision obligations uder the MFJ, but it does not address directly the physical, technical and operating arrangements for such interconnection.[4]

11. To some extent, these issues are addressed in the MFJ. For example, Appendix B acknowledges that equal treatment of access will require a phasing-in during 1984–86, and even thereafter in the case of smaller, older central offices upon an appropriate showing to the court. However, the MFJ is silent with respect to interconnection obligations which might govern AT&T after diverstiture of the BOCs. Moreover, the exchange access provisions of the MFJ apply generally to provision of interconnection by the BOCs to "interexchange carriers" and, except with respect to provision of information access, the decree is silent as to an obligation of the BOCs to offer interconnection to facilities of non-carriers. These interconnection issues are important, and have been addressed by this Commission in the past. For that reason, we believe it appropriate to clarify their treatment in the changing industry structure.

12. Third, the industry structure that would result from implementation of the MFJ would, through the provisions of the MFJ, create specifically detailed arrangements for access to the BOCs' subscribers (as noted, approximately 80% of the nation's telephones), but not to the subscribers of non-Bell Independent telephone companies. We believe that the purpose of the MFJ is consistent with regulatory policy of this Commission to create, on a nationwide basis, opportunities for competitive providers of interstate and foreign services to access their subscribers through interconnection with local telephone companies' facilities. The FCC and the courts have explicitly imposed such interconnection obligations on all local telephone companies, BOCs and Independents, and as noted we have addressed the compensation aspects of such interconnection in the Third Report herein.

13. In the altered industry structure of the MFJ, competitive interexchange carriers will have a detailed blueprint for interconnection to facilities for access to BOC subscribers (through the provisions of the MFJ), but not for subscribers in Independents' service areas. The object of the MFJ under the antitrust laws is creation of a competitive telecommunications marketplace nationwide, which is complementary to our mandate under the Act to ensure the availability of rapid, efficient communications with adequate facilities at reasonable charges, also on a nationwide basis. We have fostered the development of nationwide services in the past, and we believe it important to continue to do so upon implementation of the MFJ. For that reason, we propose generally to require, pursuant to our authority under the Act, that the Independent telephone companies offer interconnection (or in MFJ terms, exchange and information access) on a basis similar to that of the divested BOCs, in order that interstate and foreign services may be planned and offered on a reasonably uniform basis nationwide.

14. Fourth, the physical, technical and operational details of interconnection have increasingly become controversial in recent years, across a broad range of services and carriers. In some cases, we have been required to adopt specific regulations governing interconnection, *e.g.*, regulations in Part 68 of our rules governing interconnection of terminal equipment, wiring, and protective apparatus. In other cases, we have adopted specific tariff-prescribing orders governing carriers' interconnection offerings, *e.g.*, our original *Carterfone* decisions,[5] our "piece out" decision,[6] and our decisions implementing the Record Carrier Competition Act of 1981.[7] In other cases, we have served as a forum for carriers themselves to negotiate interconnection arrangements.[8]

15. While we have no desire unnecessarily to extend direct and active regulation to activities which satisfactorily may be resolved without or with reduced regulatory intervention, it is clear that in a more fragmented and competitive telecommunications industry the interconnection "ground rules" must be set at the outset, particularly inasmuch as interconnection often represents the sole means for competitive carriers (and providers of equipment and facilities) to access their customers. When Congress considered this issue recently in the context of enacting the RCCA it recognized that the record carriers'

---

[4] The entered Modification of Final Judgment is reproduced in United States v. Am. Tel. and Tel. Co. *supra.*, and parties may refer thereto in formulating their comments in this proceeding. Furthermore, if less than equal access is provided by a BOC, it is permitted to file access tariffs reflecting the lesser cost of such access, section VIII.F of the MFJ. This BOC tariff filing obligation does not affect the authority of regulators subsequently to prescribe the rates, terms and conditions of such access (or, in the terms of this notice, "interconnections").

[5] Carterfone, supra. n.3.

[6] Am. Tel. and Tel. Co., 60 FCC 2d 939 (1976) ("Piece out"); *se also* Am. Tel. and Tel. Co., 71 FCC 1 (1979) ("ARINC").

[7] Interconnection Arrangements Between and Among Domestic and International Record Carriers, 89 FCC 2d 986 (1982) ("Interim Order"), —— FCC 2d ——, FCC 82–264, released June 11, 1982 ("Rejection Order"), —— FCC 2d ——, 48 FR 12372 (Mar. 24, 1983) ("Store-and-forward and TWX/Telex Conversion").

[8] E.g., AT&T (Facilities for Use by Other Common Carriers), 52 FCC 2d 727 (1975) ("Docket 20099") and Exchange Network Facilities for Interstate Access, 71 FCC 2d 440 (1979) ("ENFIAA"). While these proceedings were resolved to some extent through informal carrier negotiation under FCC auspices, it should be noted that subsequent thereto, compensation issues have remained controversial, and we have been almost continuously called upon to interpret their results and to rule on proposed tariffs which affect or change their results. Thus, even where carrier agreements in lieu of direct FCC regulatory intervention have been employed, the net result has largely been one of FCC regulation in any event, with respect to compensation.

Conversely, technical, operational, maintenance and administrative issues have largely been resolved by the affected carriers informally during the course of periodic public meetings among the carriers, under the supervision of the Common Carrier Bureau, *see*, 52 FCC 2d at 733, to address such issues, as they arose in implementation of the Docket No. 20099 and ENFIA settlement agreements.

interconnection practices largely would determine the extent of competition. For this reason, the FCC was directed to prescribe record carriers' interconnection arrangements if the carriers could not themselves reach a voluntary agreement (which, in fact they were unable to do). This principle is not limited to record services, and in our view applies to all interconnection in a more fragmented and competitive telecommunications environment.

16. Moreover, we believe that the developing pattern of AT&T no longer unilaterally controlling the planning and evolution of communications services in this nation, which pattern was developing as a consequence of competition and new entry, will likely be accelerated upon implementation of the MFJ. While AT&T will continue itself to control a very large portion of this nation's long distance facilities, over time it is likely that the scope of this control may well diminish as competition continues to develop, which well impair AT&T's ability itself to implement its planning decisions. Concommitantly, AT&T will be divested of the BOCs and will lose the ability directly to mandate implementation of much such planning.

17. Our policies are to promote the ability of competitive carriers (and non-carriers through use of private facilities) to innovate and to offer diverse communications services, a result which may have to some extent been impeded in the past by AT&T's control over telecommunications planning and evolution. Such innovation is a positive benefit of competition and new entry. However, we cannot fail to recognize that we have a statutory mandate to foster the development of nationwide (and worldwide) services; at some point, if communications becomes too "balkanized" this mandate might be frustrated. Furthermore, communications is a capital-intensive industry which often involves relatively long planning periods for construction of new facilities [measured in years and in some cases in decades]. AT&T in the past was a forum for amalgamation of various carriers' and subscribers' future communications needs for service, and for synthesis of appropriate advance construction plans. In the more competitive telecommunications industry which is evolving, and with divestiture by AT&T of the BOCs, and alternative advance planning mechanism to that traditionally performed by AT&T would appear to be required, and we are proposing in this proceeding to establish such a mechanism.

18. Finally, some forms of planning among carriers will be required to fulfill mandates of the Communications Act other than those related to nationwide service, most notably creation of administrative mechanisms and standby capabilities to support emergency communications bearing upon national defense and safety of life and property (national security and emergency preparedness, or "NSEP," communications capabilities). Here too, AT&T has generally coordinated the telephone industry's role in such matters in the past and upon implementation of the MFJ alternatives may be required.[9] In this Notice, we are proposing the creation of appropriate mechanisms to address advance planning of interconnection by carriers, and we envision that these mechanisms will be useful both for planning associated with provision of routine services, and for NSEP communications. With respect to the latter, it should be noted that we are proposing in this proceeding to create a framework for planning which might involve NSEP implementation, but we are not addressing the important issues of what planning will be required, and the voluntary and regulatory administrative and other mechanisms which may prove necessary to carry out such planning.[10]

19. Furthermore, while we are proposing in this Notice creation of a framework for advance planning by carriers, we do so in full awareness that such planning among competitors (and potential competitors) must be limited to the absolute minimum consistent with achievement of our statutory mandate, to minimize any distortion of competition. As is discussed below, in addressing limited joint planning generally, and planning in behalf of NSEP communications specifically, we propose to be guided by analogous statutory provisions which have been in force since the early 1950's and which appear to achieve an appropriate balance between competition objectives and emergency planning objectives.

[9] Under the MFJ, the divested BOCs are required to establish a single point of contact organization for these emergency services, to coordinate and to direct provision by the BOCs of NSEP services. However, it is unclear how this point of contact organization will relate to planning for administrative mechanisms and standby facilities arrangements involving AT&T and other interexchange carriers, or to such arrangements involving non-BOC independent telephone companies.

[10] Thus, we conclude that other planning issues, which are focused primarily on exchange carriers' interconnection offerings, and which are involved in the proposals in this proceeding, are sufficiently related to planning for NSEP capabilities to justify our proposing that the planning addressed herein include NSEP.

B. Summary of Proposals

20. We view this proceeding as complementary both to the Third Report addressing access compensation arrangements, and to the provisions of the MFJ addressing certain BOC interconnection obligations. With respect to the former, we are proposing to address the physical, technical and operational details of interconnection among carriers' facilities and between carriers' facilities and those of non-carriers, generally through a proposed requirement that such details be addressed in carriers' exchange access tariffs subject to FCC regulation. With respect to the latter, we are proposing to extend to all carriers interconnection requirements analogous to those of the MFJ (the latter of which is limited solely to the BOCs), and to clarify that such interconnection obligations apply both to interconnection with other carriers' facilities and to interconnection with non-carrier communications facilities.[11] Finally, we are proposing to create carefully circumscribed mechanisms for the planning by carriers for the provision of interconnected services.

II. Discussion of Specific Proposals

A. Interconnection by Independent Telephone Companies

21. As noted, if the MFJ is implemented in its present form,[12] the BOC facilities which offer access to approximately 80% of the nation's telephone subscribers will be required

[11] To the extent that exchange services may be involved in the offering of interconnection to subscribers' terminal equipment or private communications facilities, we shall limit our consideration solely to the physical, technical and operational details of such interconnection, and not to the exchange rates themselves, consistent with the provisions of Sections 2(b) and 221(b) of the Act and NCUC I, 537 F.2d at 789–95 and NCUC II, 552 F.2d at 1045–48, supra, n. 3. It is our intent in this proceeding neither to seek to extend, nor to contract, our limited interconnection jurisdiction over exchange offerings which, through interconnection, support the provision of interstate and foreign services.

[12] Implementation of many aspects of the MFJ is subject to approval by the Commission. It might be noted that the Commission has expressed general approval of the MFJ in its amicus comments to the federal district court during the course of the court's Tunney Act proceeding on the public interest implications of the MFJ. *See*, United States v. AT&T, 552 F.Supp. at 211. In such circumstances, it is reasonable to explore in this proceeding extension of the overall principles of the MFJ to other carriers (e.g., non-Bell telephone companies) or to other circumstances not specifically addressed therein (e.g., interconnection with non-carrier facilities) subject to the outcome of any FCC approval proceedings on the MFJ itself. The instant proceeding may prove lengthy, and we conclude, consistent with the provisions of Section 4(j) of the Act, that such an approach is warranted to permit this proceeding to proceed to conclusion prior to full implementation of the MFJ.

to be made available for interconnection under the exchange and information access provisions of the MFJ. These obligations are addressed variously in the MFJ, using concepts which are complementary to, but somewhat different than, concepts employed by the Commission in addressing analogous interconnection issues in the past. While we do not disagree with the structure envisioned by the MFJ, we believe it important to clarify the following discussion by identifying differences between the access structure of the MFJ and the jurisdictional split between intrastate offerings, and interstate and foreign offerings, in the Communications Act, as our proposals in this proceeding are pursuant to our authority under the Act.

1. Access Jurisdiction

22. Under the Act, the FCC is granted jurisdiction over interstate and foreign communication by wire and radio generally, but jurisdiction is reserved to the states over intrastate and exchange communications. Initially, under this jurisdictional split of regulatory authority, we regulated rates, tariffs and associated practices governing interstate and foreign services alone. However, often the same facilities are employed both for provision of interstate and foreign communications subject to our direct jurisdiction, and for the intrastate and exchange services over which state authority is reserved. In such circumstances, under developed case law [12] the FCC has plenary jurisdiction over interconnection even to exchange facilities, where such interconnection is required for interstate and foreign communications to proceed. However, we have not exercised jurisdiction over the rates for the intrastate toll and exchange offerings made over such facilities, and have limited our exercise of ratemaking jurisdiction to use of such facilities for interstate and foreign calling. In sum, under the Act there is a division of regulatory responsibilities between the commission and the states with respect to ratemaking, and there is preemptive federal authority over the tariffs and associated practices governing interconnection. Where ratemaking authority is so divided, the division is between intrastate and exchange services on the one hand, and interstate and foreign services on the other.

23. The MFJ also establishes market definitions, for division of responsibilities and opportunities for AT&T and the BOCs. Rather than using the state line boundaries used primarily in the Act, the MFJ appears generally to seek a division between those local service undertakings which are implemented using exchange-like facilities, and those service undertakings which are implemented using long distance facilities which connect groups of exchanges with one another. The basis analytic distinction in the MFJ is between a species of exchange service (which may encompass more than than "telephone exchange service" definition of Section 3(r) of the Act), and interexchange service. Under the MFJ, the BOCs are limited to provision of the former (*i.e.*, exchange-like services) and are not permitted to offer the latter (*i.e.*, interexchange services). They are, however, permitted and indeed required to participate in the provision of interexchange services by others on an interconnected basis (deemed "access" in the MFJ).

24. To describe the exchange-like offerings which may be made by the BOCs under the MFJ, and the concommitant interconnection ("access") obligations of the BOCs, the term Local Access and Transport Area ("LATA") has generally been employed to distinguish the exchange-like services of the MFJ from the traditional "exchange" and "toll" classifications used in regulatory statutes such as the Communications Act.[13]

25. While the BOCs are limited to provision of communications within such a LATA, and are prohibited from offering communications between LATAs, they are required to offer interconnection to others so that such others may provide inter-LATA and information services to the BOCs' subscribers. As is discussed below, we are proposing to impose on non-Bell telephone companies interconnection obligations patterned after those of the MFJ. However, in pursuing such an approach, we must be mindful of the differences between the jurisdictional divisions of the Act, and the interexchange/LATA distinctions employed in the MFJ. Interstate and foreign communications are subject to our jurisdiction regardless of whether the interexchange or LATA classifications of the MFJ are applicable to such communications. Conversely, intrastate toll and exchange communications are not (except with respect to interconnection to facilities used in common for such state-regulated offerings and interstate or foreign communications), even if within the competitive inter-LATA category of the MFJ (for which interconnection by the BOCs is mandated under the MFJ).

26. In sum, because the jurisdictional divisions of the Act are somewhat different than the distinctions of the MFJ, we must of necessity decouple from the interexchange/LATA distinctions of the MFJ. To the extent that a LATA crosses state boundaries, interstate services within such a LATA may be subject to full Commission regulatory authority (if such service is not "exchange" service within the meaning of Sections 3(r) and 221(b) of the Act).[14] Conversely, AT&T has proposed establishment of multiple LATAs in many states. Service between such LATAs, while "interexchange" within the meaning of the MFJ and invoking the "access" obligations of the MFJ, is intrastate toll service under Section 3(s) of the Act and not necessarily subject to full Commission jurisdiction. As a practical matter, it would be desirable for local telephone companies to interconnect with intrastate toll services on the same basis as they might with the interstate and foreign services subject to our direct jurisdiction. Such an approach would promote technical uniformity, and potentially might well contribute to telecommunications efficiency. Indeed, because unitary exchange facilities have historically been interconnected both with intrastate and interstate (and foreign) toll facilities on the same basis,

[12] *E.g.*, NCUC I and NCUC II, n. 3 supra.

[13] The "LATA" does not appear in the MFJ; it has been used by various parties in their filings with the district court to avoid confusion. What is now generally termed a LATA is defined in Section IV.G of the MFJ as an "exchange area" or "exchange." Absent court approval, such a LATA is confined to the boundaries of a single state, and encompasses contiguous local exchange areas (presumably, in the traditional regulatory sense) which serve common social, economic, and other purposes. With court approval, a LATA may extend across a state boundary (somewhat similar to exchanges under Section 221(b) of the Act). Also, with court approval, a LATA may include multiple standard metropolitan statistical areas (or consolidates statistical areas in the case of densely populated states), but otherwise. Also, the MFJ utilizes a facilities split between "class 4" and "class 5" switching facilities; groups of "class 5" facilities may be accessed in common for "acess" under the MFJ.

These definitions do not preclude the creation of geographically very large LATAs, and indeed in its filings with the federal district court AT&T had sought to treat whole states as single LATAs, notwithstanding that much communication within such a large LATA would be viewed as intrastate toll service, and not exchange service, under traditional regulatory classifications such as those of Sections 3(r) and 3(s) of the Act. Certain of these were approved by the district court. United States v Am. Tel. and Tel. Co., No. 82-0192, slip op. at 141-45 (D.D.C. Apr. 20, 1983.)

[14] AT&T had sought from the district court exemptions from the provisions of Section IV.G of the MFJ to configure certain interstate LATAs, and in its recent decision addressing AT&T's LATA proposals, the district court has approved many LATAs which cross state boundaries. *See*, United States v. Am. Tel. and Tel. Co., slip op. at 23-24, n. 13 supra.

disparate interconnection arrangements for the two groups of services may not be feasible. However, in this proceeding we shall address solely interconnection to exchange facilities to provide interstate and foreign communications. We do not at this time propose either expansion, or contract, of our regulatory authority over such interconnection.[15]

2. Access Offerings of Independent Telephone Companies

27. We propose in this section to extend, pursuant to our regulatory authority under the Act, to non-Bell (Independent) telephone carriers interconnection obligations patterned after those which will govern the BOCs under the MFJ. Independent telephone companies currently are required to interconnect their exchanges with terminal equipment, with non-carrier communications facilities, and with competitive interstate carriers' facilities, pursuant to decisions of this Commission and of the courts.[16] However, as was the case of interconnection to the BOCs' facilities prior to adoption of the MFJ, the Independents' interconnection obligations have not been fully described and "fleshed out" in the past. Rather, we have reacted to specific complaints and have resolved controversies which have arisen.[17]

28. What is altered in the environment of implementation of the MFJ is that under the provisions of the decree, competitive providers of interexchange services will in the future have a detailed "blueprint" for interconnection to the BOC's exchange facilities. In these circumstances, we believe it most appropriate, in view of our statutory mandate to promote the development of efficient and broadly available service on a nationwide basis, to ensure the establishment of a similarly detailed "blueprint" for interconnection to the Independents' facilities. However, in so doing, we must be mindful that truly equal access to carriers' exchange facilities is not immediately possible in the BOC's service areas, and that it may be less so in the Independents' areas because of intrinsic limitations of existing facilities. We discuss below the treatment in the MFJ of transition towards interconnection equality for the BOCs, and our proposals to address these issues analogously in the context of interconnection to the Independents' facilities.

29. The facilities of neither the BOCs nor the Independent telephone companies are homogeneous. Both include central offices which range from relatively older electro-mechanical (*e.g.*, step-by-step, crossbar and panel) offices which are inflexible in their capabilities, to modern stored-program controlled electronic offices the capabilities of which may be changed (consistent with the limitations of the overall hardware) through software modifications. Both the relatively inflexible older offices and the more flexible newer electronic offices were designed in a monopoly environment to perform switching within a single supplier's central office and to perform switching to a single supplier of intrastate, interstate, and foreign long distance services. As interstate service competition was introduced in the recent past, an issue of significant controversy has concerned whether and to what extent other (interstate) long distance service providers may achieve access to telephone companies' central offices which is equal to that provided the traditional single supplier. It generally was claimed that equal access was not feasible because of the inherent design of the existing central office facilities, and for that reason interconnection has not been equal. Several remedies for this unequal access have been proposed, including a requirement that the inequality be minimized to the extent feasible, and proposals have been made that those who obtain better access should provide more compensation than others. We shall not address the latter remedy in these proceedings, as this "compensation" issue has been addressed in the Third Report and Order. Rather, we shall confine our proposals to ones which minimize, to the extent feasible, any interconnection inequality.

30. The MFJ represents one approach to the difficult issues surrounding the inability of existing non-electronic central offices, as a practical matter, to support truly equal access. First, as was noted previously, the MFJ contains phasing-in procedures to provide the BOCs an opportunity to replace with newer stored-program controlled switches many of the older central offices to which equal access will be sought. Equal access overall is not required until 1986 under the phasing-in schedule of the MFJ. Second, the MFJ contains exception provisions under which the BOCs may refuse provision of equal access in older and smaller central offices. The specific mechanism of the MFJ is to create a defense for the BOCs for failure to make equal access available in such offices in the event that an interexchange carrier complains to the district court of a refusal to provide equal access.

31. Broader transitional procedures are also specified in the MFJ. For example, until such time as the nationwide numbering plan is revised, access to all long distance service providers under the MFJ need not be on the same dialing basis. A customer may be permitted to access one service provider without dialing extra digits, although extra digits may be required to access other suppliers' services. However, the BOCs must give each of their subscribers the opportunity to preselect *which* interexchange service provider will automatically be accessed without dialing extra digits. When the nationwide numbering plan ultimately is revised, access to all interexchange carriers' services is to be placed on the same basis.

32. We tentatively conclude that the approach of the MFJ as a general matter would be workable if applied to the Independent telephone companies. However, we must acknowledge that the Independents' central offices may be statistically weighted more towards the less flexible older electro-mechanical switching facilities than are those of the BOCs. In the MFJ, there is an exception mechanism applied to the BOCs for such cases. If the Independents' facilities

[15] As an example of the circumstances which require such a decoupling, and without our reaching a judgment on the desirability of such an example, AT&T had sought from the district court authority to include an entire state, Delaware, in a Pennsylvania LATA. The FCC has authorized competitive provision of interstate service, which authorization would include service between Delaware and portions of Pennsylvania in this LATA. While the district court has sought to ensure that competitive interexchange service providers are not disadvantaged by this arrangement, which it approved, United States v. Am. Tel. and Tel. Co., slip op. at 72–76, n. 13 supra, the interconnection obligations of the MFJ are addressed generally to provision of interconnection to facilitate inter-LATA service, not intra-LATA service as might be involved in Delaware to Pennsylvania calling. Thus, a "gap" could be created between the interconnection "blueprint" of the MFJ and the less detailed existing federal interconnection requirements for such interstate services. Similar such circumstances might arise elsewhere, where portions of states have been included in interstate LATAs, supra n. 14, and interstate service not qualifying for "exchange" treatment under Section 221(b) of the Act is involved. It is important that our pro-competitive interstate service policies not be frustrated, directly or indirectly, by the failure of the MFJ more explicitly to address such interconnection.

[16] *E.g.*, Interstate and Foreign Message Service, 56 FCC 2d 593 (1975), 57 FCC 2d 1216, 58 FCC2d 736, 59 FCC 2d 83 (1976), *aff'd sub. nom.* North Carolina Utilities Comm'n v. FCC ("NCUC II"), supra. n. 3; AT&T (Piece out) and AT&T (ARINC), supra. n. 6; Specialized Common Carrier Services, 24 FCC 2d 318 (1970), *aff'd sub. nom.* Washington Utilities & Transportation Comm'n v. FCC, 513 F.2d 1142 (9th Cir.), cert. denied, 423 U.S. 836 (1975), *see also*, Bell Tel. Co. of Penn. v. FCC, 503 F.2d 1205 (3d Cir. 1974), *cert. denied*, 422 U.S. 1028 (1975); Lincoln Telephone and Telegraph Co., 72 FCC 2d 724, 74 FCC 2d 198 (1979), 78 FCC 2d 1219 (1980), *aff'd*, 659 F.2d 365 (D.C. Cir. 1981); MCI Telecomm'ns Corp. v. FCC, 561 F.2d 365 (D.C. Cir. 1975), *cert. denied*, 434 U.S. 1040 (1978) ("Execunet I"), 580 F.2d 590 (D.C. Cir.), *cert. denied*, 439 U.S. 980 (1978) ("Execunet II"), and Order reproduced in appendix to Lincoln Telephone, 659 F.2d 365, supra. ("Execunet III").

[17] *E.g.*, Lincoln Telephone and Telegraph Co., supra.; United Tel. Co., 77 FCC2d 1015 (1980).

more commonly would qualify for such exception treatment than those of the BOCs, the exception could well become the rule. The specific approach of the MFJ is to permit the BOCs to refuse equal access to these exceptional cases, and the BOCs are provided a defense before the district court. Such an administrative approach may be warranted for truly exceptional cases, but in our view it could prove unworkable if such situations were common, as may prove to be the case of the Independents' central offices.

33. It should be noted that access to interstate services is required to be offered pursuant to access tariffs which are subject to our regulatory review and jurisdiction, under principles adopted in the Third Report and Order, and as is discussed below, we are proposing that interconnection be offered generally in the access tariffs. In view of this, we believe it reasonable to utilize such tariffs as an appropriate administrative mechanism for addressing unequal interconnection offerings by Independents. We tentatively conclude that the issues of unequal access may best be addressed by adopting principles in this proceeding governing tariffs which are to be filed, and we propose to do so herein. As an express goal of this proceeding, we are seeking to address all major possibilities which may arise. But, to the extent that a given Independent telephone company might wish to raise special circumstances not previously addressed or accommodated in the principles which might be adopted, we believe that flexible treatment might be warranted, in view of the disparities in size, resources, and facilities, which may exist among various Independent telephone companies. Thus, a given company should be free to do so upon an appropriate showing that special treatment is warranted.

34. Specifically, we propose to adopt principles requiring that interconnection be offered by the Independents in their access tariffs, to be filed subject to our regulatory jurisdiction in accordance with the Third Report and Order. Furthermore, we propose to review such tariffs initially under principles patterned generally after the substantive "access" requirements of the MFJ, as follows:

a. *Access to existing stored-program controlled central offices.* Programming of existing stored-program controlled central offices shall be modified, during a three year period,[18] to support access to the services of all interexchange carriers which is equal in all respects, except that the minimum number of digits necessary to reach other than a carrier pre-selected by the subscriber may be utilized until such time as the nationwide numbering plan is changed. At such time as the central office modification is completed, existing subscribers shall be given an option to pre-select a specific interexchange carrier which is interconnected with the exchange, and no additional digits shall be required for the subscriber to reach the services of that carrier. Thereafter, new subscribers shall be given this choicd at the time when service is initially arranged. In both cases, the selection may subsequently be changed by the subscriber at his or her option. Until such time as access is provided under this subparagraph, access shall be made available in accordance with subparagraph c. below.

b. *Access to newly-installed stored-program controlled central offices.* Within two years,[19] all new stored-program controlled offices shall be initially deployed with the capabilities required under subparagraph a. above.

c. *Access to existing electro-mechanical central offices (e.g., step-by-step, crossbar and panel).* To the extent feasible, such offices shall be modified to offer the capabilities identified in subparagraph a. above, utilizing techniques such as interconnection on a tandem basis where common equipment is capable of supporting such operation. If ANI (automatic number identification) capabilities or subscriber billing capabilities are capable of being made available to more than one interexchange carrier, to the extent the same is requested by such carriers they shall be made available in the same manner as is specified in the MFJ. If preselection of a particular carrier which might be accessed without dialing additional digits is not possible because of inflexibility of the electro-mechanical switching facilities, at minimum the exchange carrier must make available seven digit local telephone number access, with facilities and capabilities no worse than those provided in connection with PBX trunk service by the carrier. The carrier must make available transmission capabilities (as opposed to switching and billing) which are no worse than those provided the traditional interexchange service provider accessing its office, and it shall provide access, to the extent possible, which uses the minimum number of accessing digits, and which makes possible access from rotary dial equipment to the services of each interexchange carrier.[20]

35. To ensure that the foregoing principles, or alternatives which may be adopted as a result of these proceedings, are complied with, and to fulfill the substantive requirements of Sections 202(a) and 203(c) of the Act, as noted we are proposing to utilize the vehicle of access tariffs for carriers to make known the basis upon which interconnection will be offered to interexchange carriers. However, we wish to minimize our regulatory role over such offerings, and to encourage, to the maximum extent feasible, voluntary resolution by the affected interexchange and exchange carriers of any disputes which may arise. We believe that one method of achieving this result might be to require the access tariff filings to indicate whether there has been precoordination of the filing with interexchange carriers, as a means of "flagging" to our staff and to interested interexchange carriers the filings which will not be controversial. Furthermore, to the extent that exchange carriers may file joint or common access tariffs (i.e., through the Exchange Carriers Association procedures in the Third Report and Order) it would be desirable to create a mechanism under which individual carriers might continue to concur in joint or common access tariffs, but still indicate their particularized interconnection offerings. We invite comment on procedural and

[18] The BOCs will have had approximately three years from initial adoption of the MFJ to relatively full implementation, and this strongly suggests that a three year period for the Independents to make similar programming modifications to their existing stored-program control switching facilities is reasonable. We specifically invite comment on the reasonableness of this proposed period, and on whether different periods may be appropriate for different types or units of stored-program control central office switching equipment.

[19] It is assumed that suppliers of central office switches which are to be newly deployed will be able to create programming to support equal access more expeditiously for new equipment (i.e., in two years) than might be the case for programming modifications to existing switches (i.e., the three year period proposed in the previous subparagraph). Furthermore, it would appear that such suppliers would have great incentives to do so, if they wish to seek to supply new central office switches to the BOCs. However, we specifically invite comment on the reasonableness of the proposed two year period.

[20] We recognize that there is wide variability in deployed electro-mechanical central office switching equipment, and in proposing adoption of the principles in subparagraph c. we have sought to differentiate dialing and billing capabilities, to which equal access may be impracticable, from communications channel capabilities (e.g., gain, linearity, noise characteristics, etc.), to which equal access would appear practicable without material modifications. Our guiding principle in phrasing the proposed requirements is that any inequality in the treatment of interexchange carriers must be minimized to the extent practicable. We invite specific comment on our proposed formulation, and upon alternatives which might be more reasonable or more practicable.

administrative mechanisms to achieve these results, and which minimize, to the extent possible, the flow of unnecessary paper. In any event, it might be noted that the administrative framework which we are proposing to accommodate offerings of unequal access is somewhat different than the exception approach of the MFJ, but in view of the possibility that unequal access will be more common in the Independents' service areas than those of the BOCs, we believe that it better will comport with the requirements of Sections 202(a) and 203(c) of the Act.[21]

C. Interconnection of Exchange Carrier's Facilities With those of Non-Carriers, and Related Tariff Issues:

36. Our considerations here are related to, but somewhat different than, those involved in the previous section. There, we have clarified that existing interconnection policies remain applicable to Independent telephone companies, but we have, to some extent, proposed that additional interconnection capabilities which are not necessarily being made available currently be made available by the Independents in the future. Here, we are addressing solely existing interconnection obligations of the Independents and the BOCs, and we are proposing merely to clarify how these offerings are to be made to the public, as a matter of tariff policy, in the future.

37. Specifically, in the past the Commission has mandated interconnection to non-carrier communications facilities and premises terminal equipment through orders and rules in Part 68 of the Commission's rules which prescribed provisions in AT&T's interstate tariffs, and which also effectively prescribed the terms of exchange carriers' offerings. This use of our prescriptive authority over the interstate tariffs subject to our direct jurisdiction under the Act ensured that all telephone companies would be bound by our specific prescribed requirements, since all telephone companies concurred in AT&T's tariffs in the monopoly supply environment of the past.

38. However, telecommunications is changing. First, it is unclear whether local telephone companies will continue to concur in tariffs of a single entity, AT&T, for the provision of interstate and foreign services in the future. An end-on-end tariff environment, with separate tariffs for the exchange access portion and for the long distance service portion, may become possible or desirable in the increasingly competitive telecommunications industry. Second, AT&T is no longer the sole long distance service provider. To maintain the obligation of exchange carriers to interconnect with non-carriers' facilities to facilitate interstate and foreign communications in a manner consistent with that of the past, it might prove necessary to prescribe terms of interstate and foreign service tariffs of entities other than AT&T. But, as competition develops, the present requirement for such tariffs might prove unnecessary.

39. While we believe that Part 68 of our rules will continue to govern exchange carriers, independently of whether they do or do not concur in interstate tariffs which reference or incorporate these rules, we conclude that any potential confusion on this point should be resolved now.[22] We have an appropriate vehicle to do so, namely the exchange access tariffs which will govern participation in interstate and foreign service of all exchange carriers, Independents and BOCs, and which will be subject to our direct jurisdiction. Accordingly, we hereby propose to require that interconnection to non-carrier facilities (i.e., communications systems and terminal equipment) be offered in each exchange access tariff, with an appropriate reference to Part 68 of our rules in each such tariff. As was the case in our discussion of analogous tariff requirements in para. 35 above, we invite comment on how best to implement such a requirement in a manner which minimizes the flow of unnecessary paper.

40. A requirement that interconnection to non-carrier facilities and terminal equipment be offered in exchange access tariffs also will have the effect of addressing several issues concerning the BOCs which arose during the course of the district court's Tunney Act proceeding,[23] but which were not explicitly resolved in the MFJ. First, the MFJ as initially proposed would have barred the BOCs from providing terminal equipment. Since they could not do so, it had the effect of ensuring that others' terminal equipment could be interconnected with the BOCs' exchange facilities on a fair basis, else the BOCs could not provide service. But, as ultimately modified during the course of the Tunney Act proceeding, the MFJ now permits the BOCs to supply (but not manufacture) terminal equipment. Specific reference in the BOCs' tariffs to Part 68 of our rules will ensure that they do not discriminate in their treatment of others' terminal equipment as opposed to their own. Second, the MFJ contains provisions which address interconnection of other carriers' facilities and, to some extent, terminal equipment, to exchange facilities. It does not explicitly address interconnection with non-carrier communications systems or facilities. An offering of such interconnection in the BOCs' exchange access tariffs, in accordance with the Commission's decision in *AT&T (ARINC)*, 77 FCC2d 1 (1978) and its decision interpreting the requirements of Part 68 of the rules, *Memorandum Opinion and Order*, 59 FCC2d 83, 86 (1976), will clarify to the public that the BOCs' established obligation to provide such interconnection will continue to be discharged.[24] [25] Such a clarification is similarly desirable for subscribers of non-Bell Independent telephone companies.

---

[21] Of course, the BOCs will remain bound by the exception requirements of the MFJ. Furthermore, identification in their tariffs by the BOCs of locations where equal access will not be made available would similarly comport with the requirements of the Communications Act, and for that reason our proposal in this regard is not limited to the Independent telephone companies.

[22] Furthermore, even currently not all forms of interconnection which have been sanctioned or required by this Commission are prescribed in Part 68 of our rules; forms of interconnection are authorized under the tariffs which are not explicitly addressed in the rules because in certain circumstances it has proven more desirable and flexible to utilize tariffs.

[23] Pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h) (the "Tunney Act"), the district court examined the public interest ramifications of the settlement agreement between AT&T and the Department of Justice as a prelude to entering the MFJ.

[24] In its decision approving the MFJ, the district court assumed that the BOCs will continue to be obliged to offer interconnection to others' terminal equipment and communications facilities. *See*, 552 F. Supp. at 191–93. Furthermore, under the MFJ the BOCs will be under an overriding obligation not to discriminate in their treatment of terminal equipment provided by AT&T and by others. It is to be expected that the BOCs will permit full access to their facilities of equipment provided by AT&T, which would trigger this obligation to similarly treat others.

[25] We believe that two related interconnection offerings should also be made, where appropriate, in access tariffs. First, in circumstances addressed in our AT&T (Piece out) and AT&T (ARINC) decisions, supra, n. 6, AT&T itself is obliged to offer interconnection to its facilities. Upon implementation of the MFJ, to the extent that AT&T might discharge this obligation through the use of interposed exchange facilities provided by the BOCs, we believe the latters' access tariffs should offer such interconnection. To the extent that AT&T may be authorized to provide service directly to subscribers' premises, AT&T's own tariffs should offer such interconnection. Second, the status of resellers under the MFJ is unclear. The MFJ establishes specific exchange access requirements for access by interexchange carriers to the BOCs' facilities, but it is unclear whether resellers are to be treated as carriers for this purpose. To the extent that interconnection is to be offered to resellers, we tentatively conclude that such interconnection be offered in the access tariffs. We invite comment on the foregoing proposals.

D. Planning

41. As was noted in the introduction to this Notice, forms of joint action by carriers, in some cases under this Commission's sponsorship, and in many cases by the carriers themselves, have historically proved necessary in telecommunications to achieve important objectives: development of industrywide technical standards, operating principles, administrative procedures and maintenance procedures; informal resolution of service and maintenance disputes which may arise where there is divided responsibility for elements of a joint through service; development of standby procedures and facilities to support extraordinary communications requirements (*e.g.*, NSEP communications); and development of appropriate forecasting and circuit requirements amalgamation procedures to facilitate planning for construction of new facilities with relatively long "lead" times. Because of AT&T's preeminence, many of these activities were performed or sponsored by AT&T, and because of its ownership of the BOCs, AT&T was able to ensure that the results of these activities would be carried out.

42. With divestiture of the BOCs, and the more competitive nature of telecommunications, it is apparent that dominance over such activities by a single firm, AT&T, is neither likely nor desirable. Concerted action by competitors may, if carried too far, be anticompetitive and inimical to the pro-competitive policies of this Commission. However, many forms of planning are not necessarily anticompetitive, and indeed may be desirable. Moreover, the fact is that such planning has proceeded for over a century, and immediate discontinuance of all such planning could disrupt the provision of service to the public.

43. We propose below to establish limited joint planning procedures to ensure continued attainment of important efficiency, service, defense, and emergency communications objectives under the Act, but in full awareness of the requirement that such activity not frustrate our pro-competitive policies. We shall carefully consider the competitive implications of any planning which is to be sanctioned, and we make tentative proposals below which, in our view, will ensure that anticompetitive problems will not arise.[27]

1. Basis for Proposing Limited Joint Planning

44. Limited joint planning among exchange carriers for interconnection arrangements offers several advantages as a means of assisting carriers in meeting interconnection obligations and carrying out the purposes of the Act.[28] Joint planning is an effective means of standardizing equipment and system design and functions at the point of interconnection (but not necessarily the internal design of equipment and facilities). This standardization, and the resulting compatibility among equipment and systems used by different carriers and other users, promotes the efficient operation of the telecommunications system. This efficiency has attendant advantages for subscribers to carrier services. As we previously have noted, planning among carriers also is an important means of securing appropriate standby communications capabilities to serve the NSEP needs of the Nation.[29]

45. The development of competition among long distance carriers raises the possibility that joint planning among exchange carriers for interconnection with the competitive long distance carriers will become increasingly necessary in order to ensure efficient operations. As the number of competing carriers increases, it is possible that the risks of inefficiency also will increase if the various carriers employ incompatible designs and functions for interconnected equipment.[30] It should be noted, however, that any such inefficiencies would diminish (and the need for joint planning consequently could decrease) if technological developments evolve in the direction of telecommunications systems which operate independently, and for which interconnection is neither necessary nor desirable.

46. In the past, AT&T has been the locus of joint planning for interconnection arrangements. AT&T's control of the BOCs, and its working relationships with the Independent telephone companies, has enabled AT&T to initiate and oversee joint planning in a manner which has been sufficient to mitigate any need for this Commission to take an active role in providing structures for this planning. Because of this preeminence AT&T has also largely served as a locus for accommodation by the traditional telephone carriers of the needs of other carriers as well (*e.g.*, specialized carriers, record carriers). AT&T's role, however, necessarily will be altered by the divestiture to be carried out in accordance with the MFJ.[31] Although the long-term effects of the divestiture on joint planning cannot be assessed with certainty, it is reasonable to conclude that short-term dislocations are likely to occur if joint planning is disrupted during the period following divestiture. Further, since AT&T is proposing that the divestiture be effected on January 1, 1984,[32] there may not be sufficient time for carriers to work out planning arrangements to replace the existing structure, in the absence of action by this Commission.

47. Although there are benefits to be gained from joint planning for interconnection arrangements, it should be recognized that joint planning poses two sets of potential risks. Product and service innovation generally can be expected as a by-product of competition,[33] and innovation usually results in benefits to the public in the form of quality improvements and cost reductions. If, however, joint planning for interconnection results in excessive standardization of design and operational specifications at the point of interconnection, then this very success could have a dampening effect on innovation. As connectivity tolerances

[27] It might be noted that Commission sanctioning of joint planning by carriers has been sought in a pending petition by the National Telecommunications and Information Administration which predated the structural industry changes addressed in this Notice. *See*, Petition for Notice of Inquiry and Proposed Rulemaking, Oct. 10, 1980, RM–3781. A basis was shown in that petition for Commission sponsorship of limited joint planning among carriers even in the absence of the major changes now underway, and, as is discussed below, we believe that there is even more of a basis for limited joint planning now. In view of the substantial changes in the predicate for any such planning, we shall merge the record therein with this proceeding.

[28] These interconnection obligations have been addressed in the previous sections of this Notice.

[29] See para. 18, *supra*.

[30] *See* Lavey, *Joint Network Planning in the Telephone Industry*, 34 Fed. Comm. L.J. 345, 348 (1982) (hereinafter cited as Lavey).

[31] See para. 16 *supra*.

[32] Plan of Reorganization of AT&T in United States v. AT&T at 5 (D.D.C., filed Dec. 16, 1982) (hereinafter cited as Plan of Reorganization). In any event, the divestiture must take place not later than February 24, 1984, in accordance with Section I.A of the MFJ. *See also*, n. 12 *supra*, relating to FCC approval.

[33] *See* Specialized Common Carrier Services, 24 FCC 2d 318, 333 (1970). It has been noted, as a general matter, that "freedom of entry and competition [serve] as a device for innovation—for encouraging the development of new and different services and for assuring the optimal development and exploitation of new technology." 2 A. Kahn, *The Economics of Regulation: Principles and Institutions* 169 (1971) (footnote omitted). It also has been argued that this general principle applies in the communications industry: "[T]here are concrete evidences of the contribution competitive innovation can make in communications where it has had an opportunity to work * * *. The revolutionary development in the last decade of microwave and satellite communications, the burgeoning of user-owned attachments and in particular those associated with the use of shared computer facilities * * * have * * * been vigorously pressed not only by large users and independent entrepreneurs in communications but also, at least with equal vigor, by competing manufacturers of equipment." *Id.* at 304 (footnote omitted).

are narrowed through standardization, design and operational variations which would result from innovation could become dysfunctional. Thus, the incentives for innovation could diminish to the extent that carriers and equipment vendors opted to take advantage of the benefits of standardization.[34] It must be stressed, however, that the joint planning we are proposing involves the achievement of standardization and compatibility *only* at the point of interconnection. Innovation in overall system design and operation, which would be fostered by competition among long distance carriers and among equipment vendors, should not be seriously affected by this limited form of standardization in most cases. However, there might be circumstances in which a particular innovation (*e.g.*, digitized voice transmission at less than 64 kbits/sec) might be adversely affected by a standard which did not accommodate that innovation. We are interested in comments on how best to balance this potential effect in formulating our approaches herein.

48. A second set of potential risks posed by joint planning involves the possibility of abuse of the joint planning mechanism. Various types of anticompetitive practices—including price-fixing, market and capacity allocation, exclusionary standard-setting—can be germinated through joint planning activities. The rules proposed here will seek to confront these potential abuses and establish requirements and constraints intended to prevent them from occurring.[35]

49. A decision regarding the efficacy of joint planning for interconnection involves a balancing of the advantages and risks which we have outlined. It is our tentative conclusion that the advantages to be gained from joint planning, as well as the short-term dangers posed by disruptions in this planning, outweigh the potential risks involved and point toward a conclusion that joint planning under the aegis of this Commission will serve the public interest.

2. Authority of Commission To Require Limited Joint Planning

50. Federal agencies, in the absence of specific statutory prohibitions, have authority to require concerted action on the part of private entities subject to their regulatory authority if this concerted action is necessary or appropriate to further the statutorily established goals and functions of the agencies. Such authority, in fact, has been exercised by this Commission in this proceeding.[36] Section 222 of the Act, as amended by RCCA, provides a recent example of the imposition of negotiation requirements upon carriers.[37] Negotiations to arrive at the Docket No. 20099 Settlement Agreement and thereafter [38] and the ENFIA negotiations [39] are further examples of carrier negotiations conducted under our aegis.

51. There is ample authority in the Act to support the establishment of joint planning requirements by this Commission. Section 1 of the Act, 47 U.S.C. 151, provides that this Commission was established "[f]or the purpose of * * * [making] available * * * to all the people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges * * *." Since we perceive the goal of joint planning for interconnection to be the promotion of efficiency, with the resulting provision of adequate facilities at reasonable charges, we conclude that a rulemaking to provide for joint planning is within our statutory authority. A further basis for Commission action is found in Section 201(a) of the Act, 47 U.S.C. 201(a), which requires carriers to furnish service upon reasonable request, to establish physical connections with other carriers, and to establish through routes. Joint planning for interconnection arrangements can be viewed as an appropriate means for enabling carriers to comply with these requirements of Section 201(a). Section 201(b) of the Act, 47 U.S.C. 201(b), requires all carrier practices relating to the provision of service and the establishment of physical connections and through routes to be just and reasonable. Furthermore, certain communications facilities require authorization by this Commission under the provisions of Section 214(a) of the Act, 47 U.S.C. 214(a). Limited joint planning by carriers under our aegis has proven useful as a mean of aiding us in carrying out our responsibilities under Section 214(a). Moreover, Section 214(d) of the Act, 47 U.S.C. 214(d), authorizes this Commission to require any carrier "to provide itself with adequate facilities for the expeditious and efficient performance of its service as a common carrier * * *." It is our view that this Commission can further the goals expressed in Section 214(d) by establishing joint planning procedures.[40] Also, Section 218 of the Act, 47 U.S.C. 218, mandates that we be informed of the manner in which service is rendered; planning under our sponsorship is an appropriate mechanism to discharge this Section 218 mandate. Further, Section 4(i) of the Act, 47 U.S.C. 154(i), grants this Commission broad authority to carry out its responsibilities under the Act.[41] We conclude that the

---

[34] This Commission has taken notice of this disadvantage of central planning in a different context: "Implicit in the central planning approach to designing and engineering the telephone network is the assumption that the planners know what is best for the customers. However, in the present era of rapid technological change and computerization of communications functions, it is difficult if not impossible for a centralized planning system to detect and respond to the many diverse needs of customers who continually seek to make more efficient use of the telecommunications system." Economic Implications and Interrelationships Arising From Policies and Practices Relating to Customer Interconnection, Jurisdictional Separations, and Rate Structures (Docket No. 20003), 75 FCC 2d 508, 547 (1980) (discussing the appropriateness of integrated control and planning regarding specialized private line services).

[35] See para. 58, *infra*.

[36] Third Report at paras. 398–44 (establishment of an intra-industry association to carry out tariff filing and pool distribution functions under the access charge system). We have rejected the notion that we lack authority to provide for the establishment of a private association which would engage in joint actions. Third Report at para. 343. We have noted, in addressing the issue of joint planning in an earlier phase of this proceeding, that we have sufficient authority to require exchange carriers "to acquire facilities and to adopt design criteria that will make interconnection effective." MTS and WATS Market Structure, Report and Third Supplemental Notice of Inquiry and Proposed Rulemaking, 81 FCC 2d 177, 207 (1980).

[37] Section 222(c)(3)(A) of the Act, 47 U.S.C. 222(c)(3)(A), required this Commission to convene meetings of IRCs for purposes of negotiating an interconnection agreement.

[38] Paragraph 16 of the Settlement Agreement provided as follows: "16. The parties agree that on the second Monday of each month after the effective date of this Settlement Agreement, or on such other day as the parties may from time to time determine, they shall meet under aegis of the Commission's Common Carrier Bureau to review the progress made in implementing this agreement. In addition, subcommittee meetings between Bell System company and OCC representatives will be held during the Interim Period with respect to technical, engineering, maintenance and test procedures." American Telephone & Telegraph Co., (Offer of Facilities for Use by Other Common Carriers), 52 FCC 2d 727, 742 (1975). The parties conducted meetings over a period of approximately 15 months and reached agreement regarding principles of interconnection, organization, operations, administrative matters, interconnection facilities and arrangements, and other matters, and pursuant to the settlement agreement and the Commission's acceptance, they have done so on a continuing basis since. *See also*, Interconnection Between Wireline Telephone Carriers and Radio Common Carriers Engaged in the Provision of Domestic Public Land Mobile Radio Service under Part 21 of the Commission's Rules, 63 FCC 2d 67, 69 (1977).

[39] Exchange Network Facilities for Interstate Access (ENFIA), 71 FCC 2d 440 (1979).

[40] Consistent with these mandates, under Sections 214(a) and 214(d), we have sponsored facilities planning by United States international carriers and have accommodated the views of their foreign correspondents through a related consultative process.

[41] Section 4(i) of the Act, 47 U.S.C. 154(i), provides that "[t]he Commission may perform any and all acts * * * as may be necessary in the execution of its functions."

establishment of joint planning procedures by this Commission falls within the ambit of the authority established in Section 4(i) of the Act. Finally, we believe that the flexibility accorded us in ordering our procedures under Section 4(j) of the Act, 47 U.S.C. 154(j), permits us to sponsor activity of this nature to carry out the express goals of the Act. We conclude that limited joint planning is, as constrained below, an appropriate mechanism for ensuring the just and reasonable administration of interconnection arrangements.

3. Structure for Limited Joint Planning

52. It is our tentative belief that the carrier association established by the Third Report [42] affords an appropriate structure for limited joint planning. The Third Report found that a carrier association is necessary to prepare and file joint tariffs and to administer distributions from a joint revenue pool because AT&T cannot be called upon to perform such a role in the post-divestiture environment. The Third Report further found that action by this Commission to mandate creation of the association is necessary because there is not sufficient time to permit institutional arrangements among carriers for these purposes to develop spontaneously. Under the framework established in the Third Report, the association will be comprised only of exchange carriers participating in access charge revenue pools administered by the association. This Commission subsequently will adopt a supplemental order establishing membership rules providing for appropriate representation of different classes of exchange carriers. [43] The association is barred from engaging in any activity not related to the preparation or filing of access charge tariffs or the collection and distribution of access charge revenues, unless the additional activity is approved by this Commission.

53. We tentatively conclude that the association established by the Third Report is a readily available mechanism for joint planning, and that there is no need to establish some form of parallel organization the membership of which would overlap extensively with the membership of the established association. The association already will be involved with access issues as a result of the functions assigned to it by the Third Report, and it thus becomes logical to extend these functions to include the administrative, technical, and operational aspects of interconnection planning which are involved in this Notice. We propose to impose procedural requirements and guidelines which will have application only in the context of the joint planning activities of the association and not in the context of other activities carried out in accordance with the Third Report, but it is our preliminary belief that this bifurcated approach to the operational rules of the association should not hamper its ability to carry out any of the functions assigned to it. Further, the fact that the association will be performing tariff preparation and revenue collection and distribution functions in addition to the joint planning functions we are here proposing will not, in our preliminary view, increase the potential for the development of anticompetitive practices to which we previously alluded. [44] In this respect it should be emphasized that the interexchange carriers which are in direct competition will not be members of the association. Their projections and other information will be considered by the association for planning purposes, but, as is discussed below, we propose to prohibit such information from being disseminated except in amalgamated form.

54. We tentatively have concluded that the membership of the association, as established in the Third Report, is suitable for the joint planning functions which we envision. It is our preliminary belief that it is appropriate to exclude representatives of this Commission, representatives of State public utility commissions, members of the general public, and interexchange carriers from membership on the association for joint planning purposes. However, as will be discussed subsequently, [45] it is our tentative belief that this Commission should be assigned responsibilities and functions regarding the joint planning activities of the association which are designed to ensure that the association does not operate in a manner which frustrates the goals and policies which we are establishing. This result can be achieved without requiring that this Commission be given membership on the association. A main objective of our proposals is to ensure the continuation of joint planning activities regarding interconnection which presently are being carried out on an informal basis, largely through the efforts and under the auspices of AT&T, but which may be seriously disrupted in the post-divestiture period if we do not act to establish a structure for planning. We are preliminarily satisfied with the assumption that this continuity can be achieved without carving out a direct role for this Commission in the planning functions of the association. It does not seem to us to be appropriate to propose that this Commission should take an active policymaking or management role in the planning negotiations of the association—such a role appears to be unnecessary and would constitute a departure from the manner in which joint planning historically has been carried out. [46]

55. As to representation of State public utility commissions and the general public on the association for joint planning purposes, we tentatively reiterate our finding in the Third Report that the interests of the State commissions and the public are amply protected by safeguards already established in the Act. [47] With repect to public representation, it is our further view that the technical nature of the interconnection planning deliberations to be conducted by the association are such that a direct decision-making role for representatives of the general public does not seem apt. Membership for interexchange carriers on the association for joint planning purposes, in our tentative view, would pose special problems sufficient to warrant the conclusion that interexchange carriers should be excluded from membership. At least for the foreseeable future, local exchange service and exchange access will be provided by exchange carriers which are regulated monopolies in their service areas. [48] This fact in itself lends credence to the argument that an association of local carriers for joint planning purposes will not pose serious anticompetitive risks. Stated another way, anticompetitive conduct by local carriers will increase in likelihood only as competitive forces are sought to be introduced in the local exchange and local access markets. The

[43] See Third Report at para. 340.

[44] See para. 48, *Supra*.

[45] See paras. 61, 62, and 64, *infra*.

[46] This Commission has taken a similar approach regarding the general area of network planning: "[P]lanning of the nationwide network has been and remains today primarily a private activity. While * * * we intend to monitor the network to ensure it is not designed in a manner that forecloses entry, technical and design disputes among the different entities who comprise the network largely have been resolved without Commission intervention." In re Applications of Winter Park Tel. Co. and Orange City Tel. Co., 84 FCC 2d 669, 696 (1981).

[47] Third Report at para. 345 (citing Fourth Supplemental Notice of Inquiry and Proposed Rulemaking, 89 FCC 2d 135, 150 (1982)).

[48] *See* Majority Staff of Subcomm. on Telecommunications, Consumer Protection, and Finance of House Comm. on Energy and Commerce, *Telecommunications in Transition: The Status of Competition in the Telecommunications Industry*, 97th Cong., 1st Sess. 228 (1981).

situation with respect to interexchange carriers, however, is different. The interexchange market is increasingly becoming subject to competition.[49] Interexchange carriers operating in a competitive environment might sieze upon their membership on the association as a device for effecting exclusionary and other anticompetitive interconnection practices. Since interexchange carriers obviously are affected by interconnection planning, it is important that they be allowed to play some role in this planning.[50] It is our preliminary belief, however, that this role should stop short of membership on the association.[51]

56. We seek comments on the following issues regarding the structure for joint planning arrangements and our proposal thereupon set out in this section. First, should a framework other than the association established by the Third Report be utilized for this joint planning? Are these alternative existing structures which could be better utilized for this purpose? Would it be more appropriate to establish a new organization for the exclusive purpose of engaging in joint planning for interconnection arrangements? Second, if the association established by the Third Report is used for this joint planning, should we modify our tentative conclusions regarding representative of State public utility commissions, the general public, and interexchange carriers as members of the association? We also request comments regarding whether other groups should be represented as members of the association for joint planning purposes, or, in the alternative, whether and how others might best participate in the planning process, but short of actual membership. Finally, we would like the parties to comment upon whether we should modify our tentative conclusion regarding membership of this Commission on the association with respect to its planning activities.

[49] United States v. AT&T, 552 F. Supp. at 171. In 1980, revenues earned by specialized common carriers constituted 1.3 percent of the toll service revenues of the telephone industry and their plant had 0.5 percent of the value of the gross communications plant of the telephone industry. Lavey, *supra* note 30, at 367.

[50] See para. 63, *infra*, for a discussion of our tentative conclusions regarding the nature of this role.

[51] We recognize, however, that certain larger Independent telephone companies will perform the dual role of being exchange and interexchange service providers. In present circumstances, however, they would not appear to have sufficient market power to change our belief that the proposed structure is appropriate. Parties may wish to comment on this.

4. Functions of Association[52]

57. It is our preliminary belief that the joint planning functions of the association should be grouped into three areas. First, the association should conduct advance planning regarding administration of interconnection procedures, technical standards for the provision of interconnection, design and operational standards relating to interconnection equipment and systems and related administrative and maintenance procedures. The primary purposes of this planning should be to make adjustments to interconnection processes on an ongoing basis in order to achieve operational efficiency, to promote nationwide compatibility, and to anticipate future needs and problems so that adjustments can be planned and carried out on the basis of these projections. It should be stressed that it is our tentative conclusion that these functions of the association shouold be limited to the point of interconnection. Interexchange network design and planning will be beyond the scope of the association's activities. Second, it is our tentative veiw that the association should be involved in the collection of information to be used in connection with short- and long-term forecasting regarding patterns of interconnection demand and construction needs. Necessary exchange facilities to meet interexchange carrier's needs often requir long periods for construction and deployment. The efficiency with which exchange carrier are able to provide interconnection servies is in some measure dependent upon the carriers' accuracy in assessing trends in the level and nature of demand for these services. The rapid pace of technological developments in this field, and the impact of these developments on interconnection demand, places, a premium upon the need for effective forecasting. It is our preliminary belief that the effectiveness of this forecasting can be maximized if it is performed on a central basis.

58. The structure of the association would enable it to collect and collate data from exchange carriers, to review and analyze this information, and to arrive at planning decisions based upon these analyses. It is our tentative view that the association should develop alternative plans for responding to projected demand, study these options in order to select the most appropriate plan, and carry out reviews of the implementation of the selected plan. In this way, interconnection procedures and standards would be responsive to changing needs. However, we propose to restrict dissemination to interexchange carriers of forecasting information except in amalgamated form in order to ensure that the projections themselves do not become a mechanism for impermissible concerted action by the competitive interexchange carriers.[53] Third, it is our preliminary view that NSEP planning functions could be carried out by the association.[54] Concern has arisen over a claim that the divestiture, and the attendant changes in AT&T's emergency planning role,[55] could result in the disruption of telecommunications functions which are deemed critical to the Nation's defense and emergency communications capabilities.[56] Although the MFJ requires the BOCs to establish a point of contact for NSEP purposes,[57] it is our tentative

[52] For the convenience of discussion, our subsequent comments make reference to the "association" based upon our tentative conclusion that the association created by the Third Report is the proper structure for interconnection planning. These references, however, should not be construed to preclude designation of one or more different entities to carry out these planning functions.

[53] *See, e.g.*, Maple Flooring Manufacturers Ass'n v. United States, 268 U.S. 563 (1925); United States v. American Linseed Oil Co., 262 U.S. 371 (1923); American Column & Lumber Co. v. United States, 257 U.S. 377 (1921).

[54] The important role played by communications carriers in connection with NSEP often has been recognized. *See* Section 1 of the Act, 47 U.S.C. 151; Section I.B. of the MFJ; H.R. Rep. No. 1252, pt. 1, 96th Cong., 2d Sess. 90 (report on H.R. 6121, Telecommunications Act of 1980) ("It is important and valuable to the Nation that carrier networks be interconnected (or capable of interconnection) and capable of interoperation in emergencies * * *."); S. Rep. No. 170, 97th Cong., 1st Sess. 52 (1981) (report on S. 898, Telecommunications Competition and Deregulation Act of 1981).

[55] For an example of the role AT&T has played in meeting national defense needs, see Bell Telephone Laboratories, Inc., *A History of Engineering and Science in the Bell System* 232–38 (1978).

[56] *See, e.g.*, In the Matter of MTS and WATS Market Structure, Report and Third Supplemental Notice of Inquiry and Proposed Rulemaking, 91 FCC 2d 177, 206–07 (1980). After divestiture an AT&T government communications organization will act as the point of contact between AT&T and the government for NSEP purposes, including NSEP technical standards, NSEP network planning, and all other aspects of AT&T's role (as an interstate regulated entity) in nationwide NSEP planning or exercises. AT&T has indicated that: "AT&T will retain its network operations center and established NSEP relocation sites, which will continue to perform, among other things, NSEP alerting services with respect to AT&T's network and interconnected carrier networks, if those carriers and the government so desire." Consolidated Application of American Telephone & Telegraph Company and Specified Bell System Companies, In the Matter of AT&T (Consolidated Applications), No. W–P–C–4955, at 74 (FCC, filed March 1, 1983).

[57] Section I.B of the MFJ requires a BOC single of contact for NSEP purposes. Under the Plan of Reorganization submitted by AT&T, the BOCs will establish a specialized government communications group within the Central Staff Organization in order to comply with this MFJ requirement. The functions of this group will include: (1) The development of

view that the MFJ requirements should be supplemented, to the extent necessary or desirable, by a limited planning process involving all exchange carriers, to minimize disruptions in emergency communications by all involved sectors of the industry.

59. Furthermore, we propose that explicit restrictions be placed upon the functions of the association in order to eliminate any potential anticompetitive problems which might be an outgrowth of the association's activities. The Third Report achieves this result in a general sense by barring any additional activities by the association unless these activities have been approved by this Commission.[58] It is our preliminary conclusion that the rules of this Commission also should specify that the association may not, in connection with the planning activities addressed in this Notice, collect or share any information relating to pricing [59] or procurenment, [60] and that the association may not take any action which is intended to allocate, or has the effect of allocating, any markets or facilities. These rules should provide that information which the association is authorized to collect and collate may be disseminated to interexchange carriers only in amalgamated form in order to prevent any possibility of anticompetitive collusion by these carriers. Further, these rules should require that interconnection standards and procedures must be established by the association on an objective basis, so that the standards and procedures do not amount to anticompetitive devices for excluding potential competitors.[61]

60. With respect to the functions of the association, we request the parties to comment on the nature and scope of the functions which we have outlined, with particular attention to whether these functions are necessary or appropriate functions for the association to perform. We also seek comment regarding whether other functions should be assigned to the association, either in lieu of or in addition to the functions we have outlined. We further would like the parties to comment on the limitations we tentatively have decided to place upon the activities of the association. Again, we seek comment regarding whether these limitations are necessary or appropriate and regarding whether other limitations should be established. Finally, we request comments regarding the nature of the relationship, if any, which should be established between the association, the BOC point of contact for NSEP purposes to be created under the MFJ, and other carriers' administrative elements with NSEP communications responsibilities. In this regard, we seek comments on the following questions: What should be the nature and extent of coordination between these entities? Should any such entity have any "veto" authority over the decisions of the others?

5. Procedures of Association

61. It is our tentative view that procedures applicable to the operation of the association should serve three primary objectives. First, the public should be given ample opportunity to observe the processes of the association and to examine the decisions and other actions of the association. Second, this Commission should reserve sufficient authority to oversee the operations of the association in order to ensure that actions taken by the association are consistent with the policies of the Act and any rules we may adopt herein. And third, sufficient flexibility should be incorporated in the procedures of the association to enable it to carry out its planning functions efficiently and effectively. It should be noted that the procedures which we tentatively are proposing, in seeking to meet these and other objectives herein, have been drawn in large measure from provisions contained in Section 708 of the Defense Production Act of 1950, 50 U.S.C. App. section 2158, which addresses analogous issues.

62. We propose that the association be governed by bylaws submitted to, and approved by, this Commission. We propose that the chairman of the association be selected from among its membership and serve for a term to be fixed by the members in the bylaws of the association. Meetings for planning

---

technical standards for use by the BOCs: (2) operations as a single point of contact for alerting BOCs in emergency situations; and (3) cooperation "with AT&T and its affiliates and other carriers to effectuate NSEP communications requirements * * *." Plan of reorganization, *supra* note 32, at 418.

The Plan of Reorganization describes the manner in which the communications group will coordinate with interexchange carriers and other vendors in the following terms:

[T]he BOCs and the centralized government communications group will cooperate fully with the interexchange carriers and equipment vendors involved to provide efficient service. Specifically, the centralized group will, if the government desires, serve as a point of contact for other carriers and vendors to arrange for the installation, joint testing, maintenance, restoration, repair and all other operational aspects of BOC-provided NSEP services that are interconnected with services provided by other carriers.

Id. at 421. It should be noted that the arrangements described in the Plan of Reorganization do not appear to include coordinated planning and do not appear to involve Independent telephone companies. *See* Comments of United States Independent Telephone Association on the Plan of Reorganization, at 4 (D.D.C., filed Feb. 16, 1983).

AT&T in materials filed with this Commission subsequent to the filing of the Plan of Reorganization with the District Court of the United States for the District of Columbia, has alluded to the possibility of coordinated planning between the BOCs and other carriers for NSEP purposes.

[T]he CSO [the central staff organization for the BOCs] would, if requested by the government, act as the point of contact for other carriers to coordinate the installation, joint testing, maintenance, restoration, repair, and all other operational aspects of BOC-provided intral.ATA NSEP services that are interconnected with services provided by other carriers and terminal equipment vendors. To effect this coordination, it is assumed that the involved carriers, including the independent telephone companies, would designate NSEP coordinators and would be in communication with CSO's national alert center. Neither the BOCs nor the government communications groups in the CSO will select interexchange carriers or terminal equipment vendors for the government.

Consolidated Application of American Telephone Telegraph Company and Specified Bell System companies, In the matter to AT&T (Consolidated Applications), No. W–P–C–4955 at 78 (FCC, filed March 1, 1983). The Department of Justice had indicated to the district court that it would require the Plan of Reorganization to be amended to clarify that the central staff organization will have authority to "require" that the BOCs carry out NSEP activities on a coordinated basis, and that the central staff organization would bill and collect from federal agencies on a centralized basis. These changes have been accepted.

[58] Third Report at para. 344.

[59] The exchange carrier association is necessarily involved in the collection and sharing of pricing information in connection with its preparation of access tariffs. Third Report at para. 348. The pricing restrictions we propose to establish here relate exclusively to the planning activities of the association and would in no way constrain or impair the functions established in the Third Report.

[60] We recognize that the functions of the association in establishing technical interconnection standards, see para. 57, *supra*, may pose the risk that technical standards might be adopted which indirectly lead to creation of procurement guidelines. That is, technical standards could be fashioned in a way that would tend to favor the facilities and equipment of certain vendors. However, our goal is to delineate the functions of the association and restrictions applicable to its activities in a manner which minimizes this risk, while maintaining the potentially desirable goal of permitting operational problems to be avoided through the use of appropriate technical standards. We seek comments regarding possible ways in which reconciliation of these goals may appropriately be achieved.

[61] The Supreme Court, in holding that an industry standard-setting organization is civilly liable under antitrust law for antitrust violations of its agents acting with apparent authority, noted that:

[A] standard-setting organization like ASME can be rife with opportunities for anticompetitive activity. Many of ASME's officials are associated with members of the industries regulated by ASME's codes * * *. [S]ame may well view their positions with ASME, at least in part, as an opportunity to benefit their employers. When the great influence of ASME's reputation is placed at their disposal, the less altruistic of ASME's agents have an opportunity to harm their employers' competitors through manipulation of ASME's codes.

American Society of Mechanical Engineers, Inc. v. Hydrolevel Corp., 50 U.S.L.W. 4512, 4516 (U.S. May 17, 1982) (footnote omitted). *See*, Radiant Burners, Inc. v. People Gas Light & Coke Co., 364 U.S. 656 (1961) for a discussion of the unlawfulness of exclusionary standard-setting.

purposes will be held at the call of the chairman or upon the request of a majority of the membership, and reasonable public advance notice of meetings must be given by the association. The association will have the discretion to establish permanent or ad hoc subcommittees to be responsible for various aspects of the association's planning activities. This Commission will have authority to monitor the activities of the association by sending an official representative to its meetings. The Commission representative will have authority to require the association to terminate any particular proceeding if he concludes that actions taken in the proceeding, or the manner in which the proceeding is being conducted, violate the Act or the rules established by this Commission. We propose that the representive may exercise this authority without being required to obtain any further approval from the Commission. If the representative terminates a meeting, then the association may not reconvene to discuss the topic which caused such termination without the express prior approval of the Commission.[62] Meetings of the association will be open to the public, unless the association determines (by majority vote of those members of the association who are present) that matters to be discussed at the meeting are within the purview of matters described in paragraph (1), (3), (4) of subsection (b) of Section 552 of Title 5, United States Code.[63] The association will be required to keep minutes of its meetings. These minutes must be filed with this Commission and made available for public inspection, except that information in the minutes pertaining to matters described in paragraph (1), (3), or (4) of subsection (b) of Section 552 of Title 5, United States Code, would not have to be disclosed to the public.[64]

63. The procedures we are proposing also would require the association to permit interexchange carriers (including voice and data communications carriers) and other users of exchange access facilities to make written and oral presentations to the association regarding interconnection planning matters under consideration by the association.[65] The rules we are proposing will not specify the extent to which the association must take these presentations into account in arriving at planning decisions, but we note that it is not our intent that participation by interexchange carriers and other users force the deliberations of the association to take on the strictures of an adversary proceeding. Rather, it is our tentative view that these carriers and other users will be in a position to assist the association, and to affect the decisions of the association in a positive way, through the provision of information and comments to the association. It is our opinion that, by barring interexchange carriers and other users from playing an active role in the decision-making of the association, the proposed rules will mitigate the types of anticompetitive problems we previously have discussed.[66] Furthermore, it would appear that equipment manufacturers would have an interest in, and the ability to contribute to, deliberations concerning technical standards. Thus, we would propose that such entities also have the right to make presentations to the association with respect to standards.

64. The proposed rules also would require the association to disseminate information regarding its interconnection decisions and policies in a manner which is sufficient to keep the industry and the public adequately informed of association actions.[67] Further, we propose that the association be required to file planning decisions and related information with this Commission.[68]

65. We request parties to comment generally regarding the procedural requirements we are proposing, and we would like the parties to suggest additional or alternative procedural requirements. We also seek comments regarding the following specific issues: First, is the role we have outlined for this Commission appropriate, or should it be modified? Should the Commission role be narrowed (*e.g.*, by eliminating the monitoring function)? Or should the Commission role be expanded (*e.g.*, by making a Commission representative a member of the association, by authorizing this Commission to screen interconnection planning topics in advance of meetings, or by barring planning decisions from taking effect unless they specifically are approved by this Commission)? Second, should the proposed rules require this Commission to oversee the implementation of association decisions after they have been made? This Commission has general authority under the Act to prohibit interconnection policies and actions which are not consistent with the Act, but we request comments regarding whether the proposed rules should formalize this function of this Commission by setting up specific monitoring procedures and requirements. Third, should modifications be made in the role established for interexchange carriers, other users of exchange access facilities, and equipment manufacturers, under the proposed rules? For example, should these interests to given any decision-making authority regarding the planning activities of the association?[69] Should these interests be permitted to propose or to initiate planning topics for consideration and action by the association, or should their role be limited to commenting upon planning activities initiated by the association?

66. Fourth, should the role of the general public in the proceedings of the association be expanded, with due regard to procedures to accommodate classified information (*e.g.*, by permitting members of the public to make oral or written presentations, or both)? Or should the public role be restricted (*e.g.*, by barring public attendance at association proceedings)? Fifth, we invite comment regarding whether the proposed rules should address informal planning contacts and other arrangements among exchange carriers. Up to this point, our discussion has focused on more formal carrier

[62] See Section 708(d) of the Defense Production Act of 1950, 50 U.S.C. App. section 2158(d).

[63] See Section 708(e)(3)(D) of the Defense Production Act of 1950, 50 U.S.C. App. section 2158(e)(3)(D). Paragraph (1) of subsection (b) of Section 552 of Title 5, United States Code, relates to information classified as nonpublic under Executive orders; paragraph (3) relates to information which is exempted from disclosure by statute; and paragraph (4) relates to trade secrets and commercial or financial information which is privileged or confidential. It should be noted that the exclusions established in Section 708(e)(3)(D) of the Defense Production Act of 1950 embrace only the information described in paragraphs (1) and (3).

[64] See Section 708(d) of the Defense Production Act of 1950; 50 U.S.C. App. section 2158(d).

[65] This Commission, in discussing the overall network planning process, has noted that:

[T]he public is well served when * * * users and constituents of the network also are involved in the planning process. Joint planning introduces more directly the perspective and experience of other responsible entities, bringing to light viewpoints that might otherwise go unnoticed. We expect that a broader planning perspective will lead to the consideration of alternative plans and ultimate improvement of the network.

In re Applications of Winter Park Tel. Co. and Orange City Tel. Co., 84 FCC 2d 669, 697 (1981).

[66] See para. 48, *supra*.

[67] It is useful to note that section II.B.2 of the MFJ requires the BOCs to establish and disseminate "technical information and * * * interconnection standards."

[68] See Section 708(e)(3)(F) of the Defense Production Act of 1950, 50 U.S.C. App. section 2158(e)(3)(F). It should be noted that, in the area of telecommunications network planning, requirements have not been established for the systematic filing of planning decisions. Lavey, *supra* note 30, at 346.

[69] See para. 56, *supra*, for a decussion of whether interexchange carriers should be represented as members of the association.

arrangements for interconnection planning through the association established in the Third Report and through subcommittees which may be established for planning purposes by the association. We note, however, that exchange carriers engage in a variety of informal contacts relating to interconnection planning,[70] and it is appropriate to conclude that these contacts may make important contributions to the efficiency of interconnection planning. We are interested in receiving the views of the parties regarding whether it is appropriate for the proposed rules to be applicable to these informal contacts and, if so, the nature of procedures and requirements which would have the most utility in this informal setting. In this regard, we should note our particular concern that these informal contacts should not become a vehicle through which competing interexchange carriers obtain information which may be used in connection with their competitive activities. Finally, we seek comments regarding the proposed requirement that minutes of association meetings be kept and filed with this Commission. Specifically, would such a requirement prove to be an undue constraint upon planning negotiations? Or should the requirement be strengthened (*e.g.*, by requiring transcripts, rather than minutes) as a means of further ensuring against anticompetitive activities?

6. Antitrust Considerations

67. It is our conclusion that the interconnection planning activities and the organizational structure for this planning which we are proposing in this Notice are consistent with the antitrust laws. The Third Report, in fact, already has rejected arguments that the access charge functions of the association pose antitrust problems, noting that "[t]he Sherman Act does not prohibit concerted activities, it merely prohibits concerted activities that are likely to produce an unreasonable restraint of trade." [71] It has been our intent in fashioning our proposals herein to assign to the association functions which are important for the provision of efficient planning but which will not create a basis for anticompetitive conduct. We also have proposed restrictions upon association activities as a means of protecting competition.[72] Finally, we have proposed procedural requirements which will act as a further bar against anticompetitive activities. It also should be noted that, although it is true that competition is an important factor which should be given weight in the administration of the Act,[73] this Commission also is required by the public interest standards of the Act to consider factors other than competition, such as the efficiency of the communications network, the provision of reliable service to the public, and the future needs of carriers and users.[74] In sum, we believe that we have sufficient authority under the Act to sponsor procedures as outlined, and that use of such procedures would not raise antitrust issues. Of course, in formulating final rules and requirements herein, we will give weight to the views of the Attorney General of the United States regarding any aspects of the association's activities which may have anticompetitive effects.

IV. Regulatory Flexibility Act Analysis

68. We have found at an earlier stage of this proceeding that the Regulatory Flexibility Act is not applicable to this proceeding because no local exchange carrier falls within the definition of "small entity" for purposes of that Act. Third Report at paras. 358–62. We noted in the Third Report, however, that the policy objectives of the Regulatory Flexibility Act are also encompassed in Sections 2(b) and 203(a) of the communications Act of 1934, the provisions of which are intended to relieve many small telehpone companies from various reporting and other requirements established in the Communications Act. Any recordkeeping and other requirements (*e.g.*, tariff requirements) imposed by any final decision in this proceeding would be applicable to all exchange telephone companies, regardless of their size. See paras. 27–40, *supra*, for a detailed discussion of the proposed requirements. However, it is important to note that in fashioning these proposals, we have been cognizant of the differences in resources availble to the BOCs and the larger Independent telephone companies, on the one hand, and the smaller Independents, on the other, and we have sought to tailor our proposed requirements to accommodate the limited resources of the smaller companies. We specifically request small Independent telephone companies, their trade associations and others which may represent their interests, to comment on the implications of these requirements in the light of their operations, and to propose appropriate administrative mechanisms which will minimize the flow of unnecessary paperwork.

V. Ordering Clauses

69. It is hereby ordered, pursuant to Section 1, 4(i), 4(j) 201–205, 214, 218 and 403 of the Communication Act of 1934, and 5 U.S.C. 553, That notice is hereby given of the proposed adoption of rules in part 69 of title 47 of the Code of Federal Regulations, in accordance with the discussion and delineation of the issues and the specific proposals made herein.

70. It is further ordered, pursuant to § 1.419 of the Commission's Rules, 47 CFR 1.419, That an original and five copies of comments may be filed with the Secretary, Federal Communications Commission, Washington, D. C. 20554 on or before August 8, 1983, and that replies may be filed on or before October 7, 1983. In reaching its decision in this proceeding, the Commission may take into consideration information and ideas not contained in the comments provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's relince on such information is noted in the Report and Order.

71. It is further ordered, pursuant to § 1.2 of the Rules of the Commission, 47 CFR 1.2, and authority delegated under Section 0.291 of the Rules of the Commission, 47 CFR 0.291, That meetings among carriers, under the aegis of the Common Carriers Bureau, may continue during the pendency of this proceeding pursuant to the decision of the commission in *American Telephone and Telegraph Company (office of Facilities for Use by Other Common Carriers)*, Docket No. 20099, 52 FCC 2d 727, 733 (1975).

---

[70] *Cf. Hearings on S. 898 Before the Senate Comm. on Commerce, Science, and Transportation*, 97th Cong., 1st Sess. 445 (1981) (testimony of T. Brophy, Chairman and Chief Executive Officer, GTE Corp.) (informal contacts among telephone companies regarding planning for toll switching and transmission facilities), *cited in* Lavey, *supra* note 30, at 376 n.126.

[71] Third Report at para. 333.

[72] *See* para. 59, *supra*.

[73] FCC v. RCA Communications, Inc., 346 U.S. 86, 94 (1953). The Court also noted, in the *RCA* case, that "encouragement of competition as such has not been considered the single or controlling reliance for safeguarding the public interest." *Id.* at 93 (footnote omitted).

[74] Phonetele, Inc. v. American Tel. & Tel. Co., 664 F.2d 716, 722 (9th Cir. 1981), *cert. denied*, 51 U.S.L.W. 3533 (U.S. Jan. 17, 1983) (No. 81–2359). We do not find it necessary here to address the question of whether the planning requirements which would be imposed upon exchange carriers under our proposed rules would have the effect of establishing any antitrust immunity for such carriers, although we do note the general principle that "[a]ctivities which come under the jurisdiction of a regulatory agency nevertheless may be subject to scrutiny under the antitrust statutes." Jarvis, Inc. v. American Tel. & Tel. Co., 461 F. Supp. 120, 123 (D.D.C. 1978) (citing Otter Tail Power Co. v. United States, 410 U.S. 366, 372 (1973)).

72. It is further ordered, That this proceeding shall be continued as a non-restricted notice and comment rulemaking proceeding. for purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff, which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not covered fully in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. *See generally,* § 1.1231 of the Commission's rules, 47 CFR 1.1231.

73. And, it is further ordered, That the Secretary shall cause a copy of this Notice of Proposed Rulemaking to be published in the **Federal Register.**

(Secs. 1, 2, 4, 201–205, 208, 215, 218, 313, 314, 403, 404, 410, 602; 48 Stat as amended; 1064, 1066, 1070, 1071, 1072, 1073, 1076, 1077, 1087, 1094, 1098, 1102; 47 U.S.C. 151, 152, 154, 201–205, 208, 215, 218, 313, 314, 403, 404, 410, 602)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Separate Statement of Commissioner Joseph R. Fogarty

In Re: MTS and WATS Market Structure, CC Docket No. 78–72, Phase III, Notice of Proposed Rulemaking on Interconnection in the Wake of Access Charges and Implementation of the MFJ.

I am pleased to see that the Regional Bell Operating Companies and the major Independent exchange carrier companies have already begun to form an association of exchange carriers for the specific purpose of structuring, planning, and formulating telephone network standards in the coming post-divestiture era.* Such an industry planning organization is, in my judgment, absolutely vital for this nation's national defense and emergency preparedness, as well as the basic integrity and viability of our national telecommunications network. I am also pleased that this *Notice* promises that the Commission's public interest imprimatur will be given to an industry planning body in the performance of its appointed interconnection and exchange access tasks.

47 CFR Part 97

[PR Docket No. 83–524; FCC 83–250]

Amendment of the Commission's Rules To Make Additional Frequencies Available to the Radio Amateur Civil Emergency Service During Declared National Emergencies

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to amend Part 97, Amateur Radio Service, to make additional frequencies available to the Radio Amateur Civil Emergency Service (RACES) during emergency periods when the President's War Emergency Powers have been invoked. The Department of Defense has requested additional Amateur Radio Service frequencies for use by RACES under war emergency conditions.

DATES: Comments are due by August 2, 1983 and replies by September 1, 1983.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: James D. McGrath, Private Radio Bureau, Special Services Division (202) 632–4964.

List of Subjects in 47 CFR Part 97

Civil defense, Defense communications, Radio.

Notice of Proposed Rulemaking

In the matter of amendment of the Amateur Radio Service Rules, Part 97, to make additional frequencies available to the Radio Amateur Civil Emergency Service during declared national emergencies, PR Docket No. 83–524.

Adopted: May 26, 1983.
Released: June 3, 1983.

By the Commission: Commissioner Fogarty not participating; Commissioner Sharp absent.

Introduction

1. Notice of Proposed Rulemaking in the above-captioned matter is hereby given.

2. The Commission is proposing to amend Part 97 to make additional frequencies available to the Radio Amateur Civil Emergency Service (RACES) in the event of an emergency which necessitates the invoking of the President's War Emergency Powers under the provisions of Section 606 of the Communications Act of 1934, as amended. Changes in the rules to govern operations on these frequencies are also proposed.

Background

3. The National Telecommunications and Information Administration (NTIA), United States Department of Commerce, has requested that additional frequencies be made available to RACES during declared national emergencies. NTIA, with the assistance of the Interdepartment Radio Advisory Committee (IRAC), acting on a request by the Department of Defense (DOD) that additional frequencies be authorized for use by RACES under war emergency conditions, has completed a review of those frequency resources identified in Part 97 of the Commission's Rules for RACES.[1]

4. The Department of Defense, in support of the need for additional frequencies, stated:

a. "Frequency bands now authorized for RACES use in wartime have proved inadequate during peacetime disasters. As such, we conclude that the situation under conditions of war would be completely unsatisfactory."

b. "Many more amateur equipments, especially repeaters, are now available for use than was the case when RACES was established. These assets, which would be most valuable to civil defense needs, operate on frequencies which are not presently assigned to RACES."

c. "From an operational standpoint, it is important to be able to use existing amateur configurations without change when RACES is activated under war emergency conditions on short notice. This includes use of existing frequencies employed by HF emergency nets as well as repeaters in higher bands."

5. NTIA concurs with the assessment made by DOD and the Federal Emergency Management (FEMA)[2] that

---

*See Telecommunications Reports, Vol. 49, No 16, at 44 (April 25, 1983), "Washington Legislative Council Members Move on Group to Set Network Standards."

[1] Part 97, Subpart F, § 97.185 of the Commission's Rules.

[2] FEMA is responsible for the management of RACES during declared national emergencies, see Executive Order 12148, 44 FR 43239 (1979).

frequencies now allocated to the Amateur Radio Service should be made available to RACES during declared national emergencies.

6. We agree that there is merit in making additional amateur radio frequencies available to RACES during declared national emergencies so that wartime communication capabilities would be enhanced.

7. We propose herein to make such additional frequencies available and to make appropriate changes in the operational rules governing RACES. The proposed operational limitations would provide protection from inteference by RACES stations to the Government radiolocation service, the aeronautical radionavigation service and to Canadian radio services. Additional Amateur Radio Service frequencies may also be considered, in the 10 MHz and 18 MHz frequency bands, if during this rule making proceeding, the United States ratifies the final acts of the World Administrative Radio Conference (WARC), 1979.[3]

8. We propose that § 97.185(c)(2) limiting the use of certain frequency bands by RACES to thirty days, during periods of actual civil defense emergency, unless otherwise ordered by the Commission, be deleted. No useful function is performed by requiring Commission approval to extend the thirty day limitation for RACES operations because Commission approval would be routinely granted if the emergency situtation continued beyond the thirty day period.

9. We propose that § 97.185(c)(4) limiting the use of frequencies assigned to RACES to specific geographical areas, during declared national emergencies, be deleted. With the availability of additional frequencies to RACES stations during these emergency periods it is unnecessary to continue to limit RACES operations to these areas.

Conclusion

10. Notice is hereby given that it is proposed to amend 47 CFR Part 97 in accordance with the proposed rules set forth in the attached Appendix.

Procedural Matters

11. For purposes of this non-restricted notice and comment rule making proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a Notice of Proposed Rule Making until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final Order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, Section 1.1231 of the Commission's rules, 47 CFR 1.1231. A summary of the Commission's procedures governing *ex parte* contacts in informal rule making proceedings is available from the Commission's Consumer Assistance Office, FCC, Washington D.C. 20554; (202) 632–7000.

12. Authority for issuance of this Notice is contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r). Pursuant to applicable procedures set forth in § 1.415, of the Commission's Rules, 47 CFR Part 1415, interested persons may file comments on or before August 2, 1983 and reply comments on or before September 1, 1983. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information, or a writing indicating the nature and source of such information, is placed in the public file, and provided further that the fact of the Commission's reliance on such information is noted in the Report and Order.

13. In accordance with § 1.419 of the Commission's Rules, 47 CFR Part 1.419, formal participants must file an orginal and five copies of their comments and other materials. Participants who wish each Commissioner to have a personal copy of their comments should file an original and eleven copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. Each set of comments must state on its face the proceeding to which it relates (PR Docket Number) and should be submitted to: The Secretary, Federal Communications Commission, Washington, D.C. 20554. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

14. The Commission has determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not apply to this rule making proceeding since this proposal would simply allow the use of additional frequencies by RACES licensees during declared national emergencies. No RACES licensees would be compelled to purchase new radio equipment. Consequently, there would be no significant economic impact on a substantial number of small entities.

15. It is ordered, That the Secretary shall cause a copy of this Notice to be served upon the Chief Counsel for Advocacy of the Small Business Administration and that the Secretary shall also cause a copy of this Notice to be published in the **Federal Register.**

16. For information concerning this proposal, contact James D. McGrath, Federal Communications Commission, Private Radio Bureau, Personal Radio Branch, Washington, D.C. 20554; (202) 632–4964

(Secs. 4, 303, 48 stat., as amended. 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

It is proposed to amend Part 97 of the Commission's Rules, 47 CFR Part 97, as follows:

PART 97—[AMENDED]

1. Section 97.185 would be revised to read as follows:

§ 97.185 Frequencies available.

(a) All of the authorized frequencies and emissions allocated to the Amateur Radio Service are also available to the Radio Amateur Civil Emergency Service on a shared basis.

[3] WARC, Geneva, 1979, allocated additional frequencies in the 10 MHz and 18 MHz frequency bands to the Amateur Radio Service.

(b) In the event of an emergency which necessitates the invoking of the President's War Emergency Powers under the provisions of Section 606 of the Communications Act of 1934, as amended, unless otherwise modified or directed, RACES stations and amateur radio stations participating in RACES will be limited in operation to the following:

FREQUENCY OR FREQUENCY BANDS

	Limitations [1]
kHz:	
1800 to 1825	1
1975 to 2000	1
3500 to 3550	
3930 to 3980	
3984 to 4000	
3997	2
7079 to 7125	
7245 to 7255	
14047 to 14053	
14220 to 14230	
14331 to 14350	
21047 to 21053	
21228 to 21267	
MHz:	
26.55 to 26.75	
29.237 to 29.273	
29.45 to 29.65	
50.35 to 50.75	
53.30	2
53.35 to 53.75	
145.17 to 145.71	
146 to 148	3
220 to 225	5
420 to 450	4, 5, 6
1240 to 1300	4
2390 to 2450	4

[1] See paragraph (c).

(c) Limitations:

(1) Use of frequencies in the band 1800–2000 kHz is subject to the priority of the LORAN system of radionavigation in this band and to the geographical, frequency, emission, and power limitations contained in § 97.61 governing amateur radio stations and operators (Subparts A through E of this part).

(2) For use in emergency areas when required to make initial contact with a military unit; also, for communications with military stations on matters requiring coordination.

(3) Those stations operating in the bands 420–450, 1240–1300 and 2390–2450 MHz shall not cause harmful interference to, and must tolerate any interference from, the Government radiolocation service; and also the aeronautical radionavigation service in the case of the 1240–1300 MHz band.

(4) Those stations operating in the band 220–225 MHz shall not cause harmful interference to, and must tolerate any interference from, the Government Radiolocation Service until January 1, 1990. Additionally, the Fixed and Mobile Services shall have equal right of operation.

(5) In the band 420–430 MHz, no station shall operate North of Line A. Line A begins at Aberdeen, Washington running by great circle arc to the intersection of 48° N., 120° W., thence along parallel 48° N., to the intersection of 95° W., thence by great circle arc through the southernmost point of Duluth, Minn., thence by great circle arc to 45° N., 85° W., thence southward along meridian 85° W., to its intersection with parallel 41° N., thence along parallel 41° N., to its intersection with meridian 82° W., thence by great circle arc through the southernmost point of Bangor, Maine, thence by great circle arc through the southernmost point of Searsport, Maine at which point it terminates.

(6) In the band 420–450 MHz and within the following areas, the DC plate power input to the final stage of a transmitter employed in the amateur service shall not exceed 50 watts, unless expressly authorized by the Commission after mutual agreement, on a case-by-case basis, between the Federal Communications Commission Engineer in Charge at the applicable District Office and the Military Area Frequency Coordinator at the applicable military base:

(i) Those portions of Texas and New Mexico bounded on the south by latitude 31° 45′ North, on the east by 104° 00′ West, on the North by latitude 34° 30′ North, and on the west by longitude 107° 30′ West;

(ii) The entire State of Florida including the Key West area and the areas enclosed within a 200-mile radius of Patrick Air Force Base, Florida (latitude 28° 21′ North, longitude 80° 43′ West), and within a 200-mile radius of Eglin Air Force Base, Florida (latitude 30° 30′ North, longitude 86° 30′ West);

(iii) The entire State of Arizona;

(iv) Those portions of California and Nevada south of latitude 37° 10′ North, and the areas enclosed within a 200-mile radius of the Pacific Missile Test Center, Point Mugu, California (latitude 34° 09′ North, longitude 119° 11′ West).

(v) In the State of Massachusetts within a 160-kilometer (100 mile) radius around locations at Otis Air Force Base, Massachusetts (latitude 41° 45′ North, longitude 70° 32′ West).

(vi) In the State of California within a 240-kilometer (150 mile) radius around locations at Beale Air Force Base, California (latitude 39° 08′ North, longitude 121° 26′ West).

(vii) In the State of Alaska within a 160-kilometer (100 mile) radius of Clear, Alaska (latitude 64° 17′ North, longitude 149° 10′ West). (The Military Area Frequency Coordinator for this area is located at Elmendorf Air Force Base, Alaska.)

(viii) In the State of North Dakota within a 160-kilometer (100 mile) radius of Concrete, North Dakota (latitude 48° 43′ North, longitude 97° 54′ West). (The Military Area Frequency Coordinator for this area can be contacted at: HQ SAC/SXOE, Offutt Air Force Base, Nebraska 68113.)

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 25

[OST Docket No. 79; Notice No. 83-11a]

Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; Acquisition for Federal and Federally-Assisted Programs

AGENCY: Department of Transportation, Office of the Secretary.

ACTION: Extension of comment period.

SUMMARY: This document extends the period for comments on the notice of proposed rulemaking published on April 14, 1983, (48 FR 16197), requesting comment by May 31, 1983, on a proposed regulation that would establish uniform cost-effective policies and procedures governing implementation of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act) (42 U.S.C. 4601 *et seq.*) for all programs within the Department of Transportation (DOT). The DOT published this proposed rule at the request of the Office of Management and Budget and it is anticipated that, when a final rule is issued, it will serve as a model for other Federal agencies covered by the Uniform Act. Since the proposed rule may ultimately have effects upon members of the public not normally affected by DOT actions, the comment period is being extended to July 1, 1983, in order to provide the public additional time in which to respond to the notice of proposed rulemaking.

DATE: The comment period is extended to July 1, 1983.

ADDRESS: Comments should be submitted to the Docket Clerk, OST Docket No. 79; Notice No. 83-11a, Department of Transportation, 400 7th Street, SW., Room 10105, Washington, D.C. 20590. Commentors wishing to have their submissions acknowledge should include a stamped, self-addressed postcard with their comments. Comments will be available for review

at the above address from 9:00 a.m. to 3:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne Kennedy, Director, Office of Right-of-Way (202–426–0342); Mr. Reid Alsop, Office of the Chief Counsel (202–426–0800); Ms. Martha Schwendeman Gurin, Office of Economics (202–426–4493); or Ms. Lynne Adams-Whitaker, Office of the General Counsel (202–426–4723); Federal Highway Administration, 400 7th Street, SW., Washington, D.C. 20590. Office hours are Monday through Friday from 7:45 a.m. to 4:15 p.m., ET.

Issued at Washington, D.C. on May 31, 1983.

James H. Burnley, IV,

Acting Secretary.

[FR Doc. 83–15164 Filed 6–8–83; 8:45 am]

BILLING CODE 4910–62–M

Research and Special Programs Administration

49 CFR Parts 172 and 173

[Docket No. HM–186; Notice No. 83–3]

Shipment of Matches

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: MTB proposes to simplify and clarify the requirements in 49 CFR 173.176 pertaining to safety matches and strike anywhere matches. This proposal is based on three petitions for rulemaking and a number of public inquiries requesting clarification of the requirements for shipping matches. The intended effect of this action is to delete unnecessary requirements and to reduce misunderstanding of the regulations applying to matches.

DATE: Comments must be received by August 30, 1983.

ADDRESS: Dockets Branch, Materials Transportation Bureau, Research and Special Programs Administration, U.S. Department of Transportation, Washington, D.C. 20590. Comments should identify the docket and be submitted, if possible, in five copies.

FOR FURTHER INFORMATION CONTACT: Hattie L. Mitchell, Office of Hazardous Materials Regulations, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590, (202) 426–2075.

SUPPLEMENTARY INFORMATION: Few changes have been made to the requirements pertaining to the shipment of matches since they were originally adopted as regulations over 40 years ago. MTB has received three petitions for rulemaking and a number of inquiries requesting interpretations of the requirements for shipping matches. MTB believes the provisions for matches in § 173.176 should be revised for simplification and clarification.

MTB is proposing to place all requirements for safety matches (book, card, and strike-on-box) in § 173.176. The requirements covering strike anywhere matches would be placed in a new § 173.176a.

As suggested by a petitioner, safety matches would be required to be tightly packed in securely closed inside packagings to prevent movement within the package and accidental ignition. Each outside package would be required to be marked "**SAFETY MATCHES**" in conformance with § 172.301. When prepared for shipment in this manner, safety matches in outside fiberboard, wooden or other equivalent-type packagings would not be subject to other requirements of the subchapter. No distinction would be made between safety matches packed alone or packed in the same outside package with nonhazardous material. This will eliminiate the need for two exemption. DOT–E–8726 issued to Whitehall Laboratories, Inc., to ship safety matches and small boxes of pain reliever in the same package, and DOT–E–8866 issued to Norcliff Thayer, Inc., to ship safety matches and small boxes of antacid tablets in the same package.

In this proposal, the requirements covering strike anywhere matches in new § 173.176a are simplified. Basically, the regulations would require that strike anywhere matches be tightly packed in chipboard, fiberboard, wooden or metal inside packagings and further packed in outside specification packagings. The types of specification packagings authorized would remain the same.

MTB believes the requirement in present paragraph (a) requiring that strike anywhere matches not exceed 3 inches in length nor have a stick exceeding .015 square inch in cross section lacks sufficient safety justification and, therefore, should be deleted.

The provision in paragraph (c)(1) requiring approval by the Bureau of Explosives of "hang up" type packagings also should be deleted. MTB believes these packagings are obsolete. MTB is not aware of any approvals issued by the Bureau of Explosives for "hang up" type packagings in the past several years.

A petitioner has requested that strike anywhere matches when ". . . in not over 3 outside containers per vehicle totalling not over 100 pounds net weight . . ." be excepted from shipping paper requirements. The petitioner argued that in the event of a fire, there would be no difference if the shipment involved strike anywhere matches or safety matches. MTB takes the position that since it is easier to ignite strike anywhere matches than safety matches, a greater potential hazard may exist; therefor, shipping papers should be available to assist emergency response personnel in identifying the hazards and quantities of strike anywhere matches involved. The suggested change has not been included in the proposal.

Comments are invited concerning the stability criteria specified in § 173.176(a) since they have not been modified since May 12, 1930. In addition, comments are invited on any matters related to the safe transportation of matches including any pending petitions for rulemaking or outstanding exemptions, in addition to the two exemptions discussed above.

MTB has determined that this proposed regulation is not a "major rule" under the terms of Executive Order 12291 or a significant regulation under DOT's regulatory policy and procedures (44 FR 11034), nor require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321 *et seq.*).

Based on limited information available concerning size and nature of entities likely to be affected by this proposal, I certify that this proposal will not, if promulgated, have a significant economic impact on a substantial number of small entities because the overall economic impact of this proposal will be minimal. A regulatory evaluation and environmental assessment are available for review in the docket.

List of Subjects

49 CFR Parts 172

Hazardous materials transportation, Labeling, Packaging and containers.

49 CFR Parts 173

Hazardous materials transportation, Packaging and containers.

In consideration of the foregoing, Parts 172 and 173 of 49 CFR would be amended as follows:

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

1. Section 172.101 would be revised to read as follows:

§ 172.101 Hazardous materials table

(1)	(2)	(3)	(3 A)	(4)	(5)		(6)		(7)		
					Packaging		Maximum net quantity in one package		Water shipments		
EAW	Hazardous materials descriptions and proper shipping names	Hazard class	Identification number	Label(s) required (if not excepted)	Exceptions	Specific requirements	Passenger carrying aircraft or railcar	Cargo only aircraft	Cargo vessel	Passenger vessel	Other requirements
					(a)	(b)	(a)	(b)	(a)	(b)	(c)
	(Revise)										
	Matches, safety, *book, card, or strike-on-box.*	Flammable solid	UN 1944	Flammable solid	173.176		50 pounds	50 pounds	1, 2	1	
	Matches, strike anywhere.	Flammable solid	UN 1331	Flammable solid	None	173.176a	Forbidden	Forbidden	1, 2		

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENT AND PACKAGINGS

2. Section 173.176 would be revised to read as follows:

§ 173.176 Safety matches.

(a) Safety matches (strike-on-box, book, and card) are matches which are intended to be ignited on a prepared surface. Safety matches, when offered for transportation, must be of a type which will not ignite spontaneously or undergo marked decomposition when subject for eight consecutive hours to a temperature of 200°F. (93.3°C.). As used in this section, the term "safety matches" includes the match combined with the box, book, or card containing or attached to the matches.

(b) Safety matches which are tightly packed in securely closed inside packagings to prevent accidental ignition, and further packed in outside fiberboard, wooden, or other equivalent-type packagings are not subject to any other requirement (except marking) of this subchapter. Safety matches may be packed in the same outside package with nonhazardous materials.

3. Section 173.176a would be added to read as follows:

§ 173.176a Strike anywhere matches.

(a) Strike anywhere matches are matches which may be ignited by friction on a solid surface. Strike anywhere matches, when offered for transportation, must be of a type which will not ignite spontaneously or undergo marked decomposition when one complete inside package is subjected for eight consecutive hours to a temperature of 200°F (93.3°C.).

(b) Strike anywhere matches may not be packed in the same outside package with any material other than safety matches that are packed in separate inside packagings.

(c) *Inside packagings.* Strike anywhere matches must be tightly packed in chipboard, fiberboard, wooden, or metal inside packagings that are securely closed to prevent accidental ignition. Each inside packaging may contain no more than 700 strike anywhere matches.

(d) *Outside packagings.* Strike anywhere matches must be packed in specification packagings as follows:

(1) Spec. 15A or 19B (§§ 178.205, 178.191 of this subchapter). Wooden boxes, with inside packages. Gross weight must not exceed 100 pounds.

(2) Spec. 12B or 12C (§§ 178.205, 178.206 of this subchapter). Fiberboard boxes with inside packages; not over 60 pounds gross weight each. Fill-in pieces specified by § 178.205–14 or § 178.206–14 of this subchapter are not required.

(49 U.S.C. 1803, 1804, 1808, 49 CFR 1.53; 49 CFR App. A to Part 1, and paragraph (a)(4) of Appendix A to part 106)

Issued in Washington, D.C. on June 1, 1983.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation Materials Transportation Bureau.

[FR Doc. 83–15091 Filed 6–8–83; 8:45 am]

BILLING CODE 4910–60–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 23

Export of American Ginseng Harvested in 1983 Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of intent to propose findings.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) regulates the international trade in certain animal and plant species. Export of animals and plants listed in Appendix II of CITES may occur only if the Scientific Authority has advised the permit-issuing Management Authority that such exports will not be detrimental to the survival of the species, and if the Management Authority is satisfied that the animals or plants were not obtained in violation of laws for their protection.

This notice announces the Service's intent to propose findings by the Management Authority (MA) of the United States on the export of American ginseng from this country. Until recently, such findings have been made *annually* on a State-by-State basis. In 1982, the Service began to make multi-year findings for the export of American ginseng. It issued Scientific Authority (SA) and MA findings covering the 1983–84 seasons. The Service requests comments on MA guidelines for export findings and current information on the species involved. The Service also requests information on environmental and economic impacts that might result from the findings, and information on possible alternative approaches to meeting CITES requirements.

DATE: The Service will consider information and comments received by July 11, 1983 in making its proposed findings and rule.

ADDRESS: Please send correspondence concerning this notice to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240. Materials received will be available for public inspection from 7:45 a.m. to 4:15 p.m., Monday through Friday, at the Federal Wildlife Permit Office, room 620, 1000 N. Glebe Road, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT:

Scientific Authority: Dr. Richard L. Jachowski, Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (202) 653–5948.

Management Authority: Mr. Richard K. Robinson, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (703) 235–2481.

SUPPLEMENTARY INFORMATION: The Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) regulates the international trade in listed species. Export of these species may only occur upon approval of both the Scientific and Management Authorities of the country of origin. In

the United States, the Scientific and Management Authorities are within the Fish and Wildlife Service. This is the first in a series of notices concerning the Service's finding on export of American ginseng (*Panax quinquefolius*) taken in the 1983 harvest season.

In this notice, the Service requests current information on the status and management of this species and seeks comments on guidelines to be used in making MA findings on whether the ginseng was obtained in violation of laws for its protection.

Scientific Authority Findings

General criteria used by the SA in advising on whether export will not be detrimental to the survival of a species are as follows (see notice of July 10, 1980, 45 FR 46464):

(1) Whether such export has occurred in the past and has not reduced the numbers or distribution of the species, nor caused signs of ecological or behavioral stress within the species, or in other species of the affected ecosystem;

(2) Whether such export is expected to increase, decrease, or remain constant; and

(3) Whether the life history of the species and the structure and function of its place in its ecosystem indicate that the present or proposed level of export will not appreciably reduce the numbers or distribution of the species, nor cause signs of ecological or behavioral stress within the species or in other species of the affected ecosystem;

For ginsena, the determination of non-detriment by the SA, in accordance with the above-listed general criteria, has been and will continue to be based on an evaluation of the following information concerning each affected State (see notice of April 5, 1982, 47 FR 14666):

(1) Historic, present, and potential distribution of ginseng on a county basis, using county outline maps, and indicating the source(s) and accuracy of this information. Include also the distribution of preferred habitat on a regional or Statewide basis, indicating recent trends in loss or protection of habitat;

(2) Approximate number or density of ginseng populations per county or region, and the approximate number of all known ginseng localities in the State, including also the source of this information;

(3) Average number of plants per population or patch, or local abundance of wild ginseng on a county or regional basis in the State, indicating the source(s), general reliability, and accuracy of the information. Include also any changes from previous years or differences from historical population sizes;

(4) An assessment of population trends on a county or regional basis indicating if populations of ginseng are believed to be increasing, decreasing, stable, extirpated or unknown. Included in this assessment should be source(s) and general reliability and accuracy of this information;

(5) An assessment of harvest intensity on a county or regional basis indicating if the relative collecting intensity is heavy, moderate, light, none, or unknown, and any changes from previous years. The State to provide also the known or estimated number of ginseng collectors in the State;

(6) A county map showing those counties in which ginseng is reported to be commercially cultivated. Included are to be figures on the amount of cultivated ginseng reported to be harvested and certified for export Statewide;

(7) Average number of roots per pound harvested, preferably on a county or regional basis or, if these are not available, on a Statewide basis. Included also is to be an assessment of any trend in root sizes or number of roots per pound over previous years;

(8) A description of the State's current research program on ginseng and its progress, including a summary of results so far obtained;

(9) A description of the State's harvest practices and controls, including regulations on length of harvest season, any harvest restrictions such as size and age of collected plants, and any seed planting requirements.

Management Authority Findings

In addition to the SA advice that the ginseng exports will not be detrimental to the survival of the species, the MA must be satisified that the ginseng was not obtained in contravention of laws for its protection.

Criteria used by the MA in determining if a State program qualifies for export are that the State has adopted and is implementing the following regulatory measures (Relisted from notice of July 10, 1980):

(1) State licensing or regulation of dealers purchasing or selling ginseng in the State;

(2) State requirements that these licensed or registered ginseng dealers maintain true records of their commerce in ginseng, and report such commerce to the State;

(3) Inspection and certification by State personnel of all ginseng shipments from the State. This certification is necessary to authenticate that the ginseng was legally taken from wild or cultivated sources within the State. Experience has shown the value of a State official inspection and certification program which can document that the weight of the roots in question were legally taken from the wild or artifically propagated in that State; and, that the State has supplied the following information to the Service:

(a) A copy of the State ginseng law and regulations;

(b) State dealer, grower, or digger license or registration rules;

(c) Cost of license or registration;

(d) Season of selling/buying operation;

(e) Dealer records, maintenance and reporting requirements;

(f) Samples of current year dealer certificates and reporting forms;

(g) Sample of current year State certificate of legal take and origin; and

(h) Sample of diggers license, if any, indicating cost of license and date of harvest;

(i) Description of State certification system for wild and cultivated ginseng legally harvested within the State, including controls to minimize uncertified ginseng from moving into or from the State; and

(j) Name, address, and telephone number of the State person to contact concerning such information.

In this notice of December 4, 1982, the Service announced that the MA would approve export of artifically propagated ginseng only from the States approved for export of wild-collected ginseng, because they had the program necessary to document the source of roots (45 FR 80444). However, the Service also announced in the December 4 notice that it would approve the export of artificially propagated ginseng from other States if acceptable procedures have been implemented to minimize the risk that wild-collected plants will be exported as cultivated.

In 1982, the Service SA reported that it had found that the status of wild ginseng does not vary greatly from year to year within any given State, and that information compiled to date was adequate to justify multi-year findings under CITES. As described in April 5, 1982, notice (47 FR 14664), the Service used information compiled since 1977 to make multi-year findings under CITES. Even though findings were made for the export of ginseng harvested in certain States in the 1982–84 seasons, the Service indicated it would continue to monitor the status of ginseng each year, and would retain the option of revising the findings at any time if new information shows the need for change. Through this notice, current information

as described in (47 FR 14664) above is requested to enable the Service to perform such monitoring. In addition, the Service will also consider any biological and harvest information submitted by those States seeking export approval for 1983 American ginseng that are not currently approved. Information submitted in the past need not be resubmitted if it is incorporated by reference and its validity is affirmed.

The Service has previously noted (47 FR 3869) that, beginning with the 1983 harvest season, the MA would require all States seeking export approval for their wild or cultivated American ginseng to have a legally established ginseng program requiring that a State official examine and certify all ginseng moved from the State. This certification must verify State of origin, legal take, year of take, weight of shipment, whether wild or artificially propagated, date of certification, shipment number, dealer's State registration number, and signatures of both the dealer and State certifying official. The Service believes that a program of State inspection remains the proper method of insuring legal ginseng export. However, in an attempt to examine other possible methods, the Service will examine and decide on programs other than State examination of ginseng leaving the State. Such a proposed system must offer the same assurance, as does an actual examination of the shipment and dealers records, of origin, legal take and whether wild or cultivated roots, and involved in the shipment.

It was decided to grant multi-year export approval for (1982–1984) only to States with a current ginseng program that provides for a State inspection and certification system and otherwise satisfied the criteria of both the SA and MA in 1982 (47 FR 43702).

In a notice of October 4, 1982 (47 FR 43702), the Service approved export of ginseng lawfully taken during the 1982–84 harvest seasons from the following States, on the grounds that both SA and MA criteria had been met: Georgia, Kentucky, Minnesota, North Carolina, Vermont (artificially propagated only) and Virginia.

In the same notice, the Service approved export of American ginseng lawfully taken only during the 1982 season for the following States that did not all meet MA criteria: Arkansas, Illinois, Indiana, Iowa, Maryland, Ohio, Missouri, Tennessee, West Virginia, and Wisconsin.

As announced in that notice, States approved for the export of only 1982 harvested ginseng would not be granted further export approval until an acceptable ginseng program was developed. The Service did not grant general approval for exports of American ginseng taken from any other State during 1982–84 harvest seasons.

Schedule: The Service intends to publish final export findings in advance of the 1983–85 harvest season according to the following schedule:

June 1983—Publish notice of proposed findings and rule, and invite public comment;

August 1983—Publish notice of final findings and rule, effective upon the date of publication.

Request for Information and Comments: The Service requests comments on the guidelines to be used in MA findings, and information on the biology and management of American ginseng. The Service also requests information on environmental and economic impacts and effects on small entities (including small business, small organizations, and small governmental jurisdictions) that would result from findings for or against export. This information will aid the Service in complying with requirements of the National Environmental Policy Act, Executive Order 12291, and the Regulatory Flexibility Act, and in preparing any required analyses of effect.

List of Subjects in 50 CFR 23

Endangered and threatened wildlife, Exports, Fish, Imports, Plants (Agriculture), Treaties.

This notice of intent to propose findings is issued under authority of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.; 87 Stat. 884 as amended), and was prepared by S Ronald Singer, Federal Wildlife Permit Office.

Dated: June 3, 1983.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife Parks.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

Commercial and Recreational Salmon Fisheries

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of an amendment to a fishery management plan and request for comments.

SUMMARY: NOAA issues this notice that the Pacific Fishery Management Council has submitted a fishery management plan amendment for the Commercial and Recreational Salmon Fisheries off the coast of Washington, Oregon, and California, for Secretarial review and is requesting comments from the public. Copies of the amendment may be obtained from the address below.

DATE: Comments on the plan should be submitted on or before August 10, 1983.

ADDRESSES: All comments should be sent to: H. A. Larkins, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE, BIN C15700, Seattle, Washington 98115; or A. W. Ford, Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

Copies of the amendment are available upon request from the Pacific Fishery Management Council, 526 SW Mill Street, Portland, Oregon 97201.

FOR FURTHER INFORMATION CONTACT: H. A. Larkins, 206–527–6150; or A. W. Ford, 213–548–2575.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) requires that each regional fishery management council submit any fishery management plan or plan amendment it prepares to the Secretary of Commerce (Secretary) for review and approval or disapproval. This act also requires that the Secretary, upon receiving the plan or amendment, must immediately publish a notice that the plan or amendment is available for public review and comment. The Secretary will consider the public comments in determining whether to approve the plan or plan amendment.

This amendment proposes measures for managing the Commercial and Recreational Salmon Fisheries off the Coasts of Washington, Oregon, and California, during 1983. On Friday, February 4, the Environmental Protection Agency published a notice of availability of a draft supplemental environmental impact statement for this amendment (48 FR 5306).

Regulations proposed by the Council and based on this amendment are scheduled to be published within 30 days.

(16 U.S.C. 1801 *et seq.*)

Dated: June 6, 1983.

Joe P. Clem,

Acting Chief, Fisheries Process Division, National Marine Fisheries Service.

Notices

Federal Register
Vol. 48, No. 112
Thursday, June 9, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Public Information Meeting

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice.

SUMMARY: Notice is hereby given pursuant to § 800.6(b)(3) of the Council's regulations, "Protection of Historic and Cultural Properties" (36 CFR Part 800), that on June 21, 1983, at 7:00 p.m., a public information meeting will be held in the Killian Room, (1st Floor), International Trade Center, 250 N. Water Street, Mobile, Alabama.

This meeting is being called by the Executive Director of the Council in accordance with § 800.6(b)(3) of the Council's regulations. The purpose of the meeting is to provide an opportunity for representatives of national, State, and local units of government, representatives of public and private organizations, and interested citizens to receive information and express their views concerning the proposed construction of the Interstate 210 Connector in Mobile, Alabama, an undertaking of the Federal Highway Administration and the Alabama Highway Department. The project as proposed would affect the Mobile City Hall, a National Historic Landmark; the G.M. & O. Railroad Station, the Church Street East Historic District, the Lower Dauphin Street Commercial Historic District, and the DeTonti Square Historic District, properties listed in the National Register of Historic Places; and the Africatown Historic District and historic archeological resources along Water Street, properties which appear to be eligible for inclusion in the National Register. Consideration will be given to the undertaking, its effects on the National Register and eligible properties, and alternate courses of action that could avoid, mitigate, or minimize adverse effects on these properties.

The following is a summary of the agenda of the meeting:

I. An explanation of the procedures and purpose of the meeting by a representative of the Executive Director of the Council.
II. A description of the undertaking and an evaluation of its effects on the properties by the Federal Highway Administration.
III. A statement by the Alabama State Historic Preservation Officer.
IV. Statements from local officials, private organizations, and the public on the effects of the undertaking on the properties.
V. A general question period.

Speakers should limit their statement to 5 minutes. Written statements in furtherance of oral remarks will be accepted by the Council at the time of the meeting. Additional information regarding the meeting is available from the Executive Director, Advisory Council on Historic Preservation, 1522 K Street, N.W., Washington, D.C. 20005, telephone number 202–254–3495. Attention: Amy P. Schlagel.

Dated: June 6, 1983.

Robert R. Garvey, Jr.,

Executive Director.

BILLING CODE 4310–10–M

CIVIL AERONAUTICS BOARD

[Fitness Investigation 83–6–12; Docket 41388]

Application of Airspur Helicopters, Inc. for Unused Authority Under Section 401(d)(5)

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order Instituting the *Airspur Helicopters, Inc. Fitness Investigation*, 83–6–12, Docket 41388.

SUMMARY: The Board is instituting an investigation to determine the fitness of Airspur Helicopters to operate unused authority between Los Angeles-Fullerton, California.

DATES: Persons wishing to intervene in the *Airspur Helicopters, Inc. Fitness Investigation* shall file their petitions in Docket 41388 by June 20, 1983.

ADDRESSES: Petitions to intervene should be filed in Docket 41388, and addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C.

In addition, copies of such filings should be served on Airspur Helicopters, Inc., the mayors and airport managers of Los Angeles and Fullerton, California, the California Transportation Commission, the FAA and any other person filing petitions.

FOR FURTHER INFORMATION CONTACT: Phyllis Solomon, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673–5340.

SUPPLEMENTARY INFORMATION: The complete text of Order 83–6–12 is available from our Distribution Section, Room, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 83–6–12 to that address.

By the Bureau of Domestic Aviation: June 3, 1983.

Phyllis T. Kaylor,

Secretary.

DEPARTMENT OF COMMERCE

International Trade Administration

[C–580–051]

Bicycle Tires and Tubes From Korea; Revocation of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of revocation of countervailing duty order.

SUMMARY: As a result of a request by a Korean producer and exporter, the International Trade Commission conducted an investigation and determined that revocation of the countervailing duty order on bicycle tires and tubes from Korea manufactured by Korea Inoue Kasei Co., Ltd., would not cause injury to an industry in the United States. The Department of Commerce consequently is revoking the countervailing duty order. All entries of this merchandise made on or after August 10, 1981 shall be liquidated without regard to countervailing duties.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: John McKean or Larry Hampel, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION: On January 12, 1979, the Department of the Treasury published in the **Federal Register** (T.D. 79–13, 44 FR 2570) an affirmative final countervailing duty determination regarding bicycle tires and tubes manufactured by one Korean producer, Korea Inoue Kasei, Co., Ltd. ("KIK").

On August 10, 1981, the International Trade Commission ("the ITC") notified the Department of Commerce ("the Department") that KIK had requested an injury determination for this order under section 104(b) of the Trade Agreements Act of 1979 ("the TAA"). It was not necessary for the Department, upon notification by the ITC, to suspend liquidation of entries of the merchandise pursuant to that section of the TAA, since previous suspensions remained in effect.

On May 20, 1983, the ITC notified the Department of its determination that an industry in the United States would not be materially injured, or threatened with material injury, by reason of imports of Korean bicycle tires and tubes if the order were revoked (48 FR 24795). As a result, the Department is revoking the countervailing duty order concerning bicycle tires and tubes manufactured by KIK with respect to all merchandise entered, or withdrawn from warehouse, for consumption on or after August 10, 1981, the date the Department received notification of the request for an injury determination.

The Department will instruct Customs officers to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after August 10, 1981 without regard to countervailing duties and to refund any estimated countervailing duties collected with respect to these entries.

The ITC's decision and this revocation do not affect shipments of the merchandise entered on or before August 9, 1981. These shipments are subject to the administrative review procedures set forth in section 751 of the Tariff Act of 1930.

This revocation and notice are in accordance with section 104(b)(4)(B) of the TAA (19 U.S.C. 1671 note).

Dated: June 2, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 83–15450 Filed 6–8–83; 8:45 am]

BILLING CODE 3510–25–M

[C–583–002]

Bicycle Tires and Tubes from Taiwan; Revocation of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Revocation of Countervailing Duty Order.

SUMMARY: As a result of a request by a Taiwanese producer and exporter, the International Trade Commission conducted an investigation and determined that revocation of the countervailing duty order on bicycle tires and tubes from Taiwan manufactured by Cheng Shin Rubber Co., Ltd. would not cause injury to an industry in the United States. The Department of Commerce consequently is revoking the countervailing duty order. All entries of this merchandise made on or after December 30, 1982 shall be liquidated without regard to countervailing duties.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: John McKean or Larry Hampel, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION: On February 17, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 6913) a countervailing duty order on bicycle tires and tubes manufactured by one Taiwanese producer, Cheng Shin Rubber Co., Ltd.

On December 30, 1982, the International Trade Commission ("the ITC") notified the Department of Commerce ("the Department ") that Cheng Shin had requested an injury determination for this order under section 104(b) of the Trade Agreements Act of 1979 ("the TAA"). It was not necessary for the Department, upon notification by the ITC, to suspend liquidation of entries of the merchandise pursuant to that section of the TAA, since previous suspensions remained in effect.

On May 20, 1983, the ITC notified the Department of its determination that an industry in the United States would not be materially injured, or threatened with material injury, by reason of imports of Taiwanese bicycle tires and tubes if the order were revoked (48 FR 24795). As a result, the Department is revoking the countervailing duty order concerning bicycle tires and tubes manufactured by Cheng Shin with respect to all merchandise entered, or withdrawn from warehouse, for consumption on or after December 30, 1982, the date the Department received notification of the request for an injury determination.

The Department will instruct Customs officers to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after December 30, 1982 without regard to countervailing duties and to refund any estimated countervailing duties collected with respect to these entries.

The ITC's decision and this revocation do not affect shipments of the merchandise entered on or before December 29, 1982. These shipments are subject to the administrative review procedures set forth in section 751 of the Tariff Act of 1930.

This revocation and notice are in accordance with section 104(b)(4)(B) of the TAA (19 U.S.C. 1671 note).

Dated: June 2, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–25–M

[C–301–001]

Leather Wearing Apparel From Colombia; Final Results of Administrative Review of Suspension Agreement

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of suspension agreement.

SUMMARY: On April 20, 1983, the Department of Commerce published the preliminary results of its administrative review of the agreement suspending the countervailing duty investigation on leather wearing apparel from Colombia.

The review covers the period September 1, 1981 through June 30, 1982.

We gave interested parties an opportunity to comment on the preliminary results. We received no comments. Based on our analysis, the final results of review are the same as the preliminary results.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Susan Silver or Joseph Black, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On April 20, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 16929) the preliminary results of its administrative review of the agreement suspending the countervailing duty investigation on leather wearing apparel from Colombia (46 FR 19963, April 2, 1981). The Department has now completed that review.

Scope of the Review

Imports covered by the review are shipments of Colombian men's, boys', Women's, girls' and infants' leather coats and jackets, and other leather wearing apparel (such as vests, pants and shorts), as well as parts and pieces thereof. Such merchandise is currently classifiable under items 791.7620, 791.7640 and 791.7660 of the Tariff Schedules of the United States Annotated. The review covers the period September 1, 1981 through June 30, 1982, and one program: the Tax Reimbursement Certificate Program ("CAT").

Final Results of Review

We gave interested parties an opportunity to comment on the preliminary results. We received no comments. Based on our analysis, the final results of review are the same as the preliminary results. We determine that Confecciones Amazonas Orinoco ("CAO"), the predominant exporter of such Colombian apparel to the U.S., has complied with the terms of the suspension agreement for the period September 1, 1981 through June 30, 1982. CAO renounced all CAT benefits associated with exports of leather wearing apparel to the United States, did not accept substitute or equivalent benefits and met all of the reporting requirements of the agreement. CAO continues to account for at least 85 percent of imports of all such Colombian leather wearing apparel into the United States.

Therefore, the suspension agreement for Colombian leather wearing apparel shall remain in effect. The Department is now beginning the next administrative review of the agreement.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information in the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: June 2, 1983

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 83–15451 Filed 6–8–83; 8:45 am]

BILLING CODE 3510–25–M

Mount Sinai Medical Center; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 98–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83–35. Applicant: Mount Sinai Medical Center, Department of Biochemistry, One Gustave L. Levy Place, New York, N.Y. 10029. Instrument: Pulse Nanosecond Fluorometer with Accessories. Manufacturer: Photochemical Research Associates, Canada. Intended use of instrument: See notice on page 53760 in the **Federal Register** of November 29, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (May 5, 1982).

Reasons: The foreign instrument provides good (single photon) sensitivity and operates in the fractional nanosecond range. The Department of Health and Human Services advises in its memorandum dated April 4, 1983 that (1) the capabilities of the foreign instrument described above are pertinent to the applicant's intended purpose and (2) it knows of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

BILLING CODE 3510–25–M

Rensselaer Polytechnic Institute; Decision on Application For Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 82–00279R. Applicant: Rensselaer Polytechnic Institute, 110–Eight Street, Troy, NY 12181. Instrument: Excimer-Multi-Gas Laser EMG 101/95. Original notice of this resubmitted application was published in the **Federal Register** of August 23, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States

at the time the foreign instrument was ordered (June 7, 1982).

Reasons: This application is a resubmission of Docket No. 82-00279 which was denied without prejudice to resubmission on December 30, 1982 for informational deficiencies. The foreign instrument provides tunability through the visible range down to 220 nanometers (frequency doubled) with pulse energies of 15 millijoules, and repetition rates in excess of 10 hertz. The National Bureau of Standards advises in its memorandum dated April 22, 1983 that (1) the capabilities of the foreign instrument described above are pertinent to the applicant's intended purpose and (2) it knows of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

BILLING CODE 3510-25-M

Rowland Institute for Science, Inc., et al.; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83-157. Applicant: Rowland Institute for Science, Inc., 100 Cambridge Parkway, Cambridge, MA 02142. Instrument: Analytical Electron Microscope, Model #JEM-1200EX and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of instrument: See notice on page 13476 in the **Federal Register** of March 31, 1983. Instrument ordered: December 31, 1982.

Docket No.: 83-159. Applicant: The Pennsylvania State University, Materials Science and Engineering, University Park, PA 16802. Instrument: Electron Microscope, EM 420T with Accessories. Manufacturer: Philips Gloeilampenfabrieken, The Netherlands. Intended use of instrument: See notice on page 15303 in the **Federal Register** of April 8, 1983. Instrument ordered: November 2, 1982.

Docket No.: 83-160. Applicant: University of Illinois at Chicago, Office of Business Affairs, Health Science Center, 833 S. Wood, Chicago, Ill. 60612. Instrument: Electron Microscope, EM 410 and Accessories. Manufacturer: Philips Electronic Instruments Inc., The Netherlands. Intended use of instrument: See notice on page 15303 in the **Federal Register** of April 8, 1983. Instrument ordered: February 22, 1983.

Docket No.: 83-161. Applicant: National Bureau of Standard, Bldg. 233, Room B266, Washington, DC 20234. Instrument: Electron Microscope, EM 430T with Accessories. Manufacturer: N.V. Philips Gloeilampenfabrieken, The Netherlands. Intended use of instrument: See notice on page 16310 in the **Federal Register** of April 15, 1983. Instrument ordered: December 15, 1982.

Docket No.: 83-165. Applicant: University of Iowa, College of Dentistry, Dental Research, Iowa City, IA 52242. Instrument: Electron Microscope, EM 10CA and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: See notice on page 16311 in the **Federal Register** of April 15, 1983. Instrument ordered: February 17, 1983.

Docket No.: 83-166. Applicant: State University of New York, Downstate Medical Center, 450 Clarkson Ave., Brooklyn, NY 11203. Instrument: Electron Microscope Model #EM 109 complete with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: See notice on page 16932 in the **Federal Register** of April 20, 1983. Instrument ordered: March 11, 1982.

Docket No.: 83-167. Applicant: Case Western Reserve University, Department of Macromolecular Science, 10900 Euclid Avenue, Cleveland, OH 44106. Instrument: Electron Microscope, Model #JEM-100SX and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of instrument: See notice on page 16311 in the **Federal Register** of April 15, 1983. Instrument ordered: January 17, 1983.

Docket No.: 83-168. Applicant: University of Washington, School of Medicine, Seattle, WA 98195. Instrument: Electron Microscope, Model #EM 420T and Accessories. Manufacturer: Philips Electronic Instruments, Inc., The Netherlands. Intended use of instrument: See notice on page 16311 in the **Federal Register** of April 15, 1983. Instrument ordered: March 14, 1983.

Docket No.: 83-169. Applicant: President and Fellows of Harvard College, 9 Oxford Street, Gordon McKay Lab, Cambridge, MA 02138. Instrument: Electron Microscope, Model #EM 420T with Accessories. Manufacturer: N.V. Philips Electronic Instruments, The Netherlands. Intended use of instrument: See notice on page 16932 in the **Federal Register** of April 20, 1983. Instrument ordered: March 11, 1983.

Docket No.: 83-141. Applicant: University of Minnesota, Minneapolis, MN 55455. Instrument: Electron Microscope, Model H-600-2 and Accessories. Manufacturer: Hitachi Ltd., Japan. Intended use of instrument: See notice on page 19766 in the **Federal Register** of May 2, 1983. Instrument ordered: May 19, 1983.

Docket No.: 83-174. Applicant: Riverside Methodist Hospital, 3535 Olentangy River Road, Columbus, OH 43214. Instrument: Electron Microscope, EM 109 with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: See notice on page 19766 in the **Federal Register** of May 2, 1983. Instrument ordered: November 10, 1982.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered.

Reasons: Each foreign instrument to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each instrument establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each instrument described above or at the time of receipt of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of

equivalent scientific value to any of the foreign instruments to which the foregoing applications relate, for such purposes as these instruments are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Service.

BILLING CODE 3510-25-M

St. Mary's Medical Center; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83-64. Applicant: St. Mary's Medical Center, 3700 Washington Avenue, Evansville, IN 47750. Instrument: #7809 III Gamma Med III Afterloading Irradiation Device for Interstitial Therapy and 2 #7809 SC Source Containers. Manufacturer: Isotopen Technik, GmbH, West Germany. Intended use of instrument: See notice on page 56533 in the **Federal Register** of December 17, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides programmable movement and a 10 curie iridium-192 source small enough to pass through needles for interstitial insertion. The Department of Health and Human Services advises in its memorandum dated April 29, 1983 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such pruposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

University of Illinois at Chicago; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83-155. Applicant: University of Illinois at Chicago, Department of Physics, P.O. Box 4348, Chicago, Ill. 60680. Instrument: X-Ray to Visible Streak Camera System, X500, including Conversion Kit. Manufacturer: Hadland Photonics Inc., United Kingdom. Intended use of instrument: See notice on page 13475 in the **Federal Register** of March 31, 1983.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument can record optical events with a 10 picosecond (or shorter) time resolution in the visible, ultraviolet, extreme ultraviolet and X-ray region. The National Bureau of Standards advises in its memorandum dated May 4, 1983 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

Frank W. Creel,

Acting Director, Statutory Import Programs Staff.

BILLING CODE 3510-25-M

U.S. Army Natick Res. & Dev. Laboratories et al.; Consolidated Decision on Applications for Duty-Free Entry of Accessories for Foreign Instruments

The following is a consolidated decision on applications for duty-free entry of accessories for foreign instruments pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereto (15 CFR Part 301 as amended by 47 FR 32517). (See especially § 301.5(f).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 A.M. and 5:00 P.M. in Room 1523 of the Department of Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83-47. Applicant: U.S. Army Natick Res. & Dev. Laboratories, Directorate for Procurement, Attn: DRDNA-PB, Kansas Street, Natick, MA 01760. Instrument: Electron Microscope Accessories (R.E. Detector and H5014 AE Amp Unit). Manufacturer: Hitachi Scientific Instruments, Japan. Intended use of instrument: See notice on page 55987 in the **Federal Register** of December 14, 1982. Advice submitted by: Department of Health and Human Services: April 29, 1983.

Docket No.: 83-57. Applicant: University of Rochester, School of Medicine, Box 605, Strong Memorial Hospital, 601 Elmwood Avenue, Rochester, NY 14642. Instrument: EM Micro-Dosage Focusing System. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: See notice on page 56533 in the **Federal**

Register of December 17, 1982. Advice submitted by: Department of Health and Human Services: April 29, 1983.

Docket No.: 83–87. Applicant: Sandia National Laboratories, P.O. Box 5800, Division 1111, Albuquerque, NM 87185. Instrument: Electron Microscope Accessories. Manufacturer: JEOL Limited, Japan. Intended use of instrument: See notice on page 57982 in the Federal Register of December 29, 1982. Advice submitted by: Department of Health and Human Services: April 29, 1983.

Docket No.: 83–93. Applicant: Massachusetts Institute of Technology, 77 Massachusetts Avenue, Cambridge, MA 02139. Instrument: Heating Stage for Electron Microscope, Model #200 CX–SHTH. Manufacturer: JEOL Limited, Japan. Intended use of instrument: See notice on page 4018 in the Federal Register of January 28, 1983. Advice submitted by: Department of Health and Human Services: April 29, 1983.

Docket No.: 83–99. Applicant: FDA/OMD Center for Medical Device Analysis, 8757 Georgia Avenue, Silver Spring, MD 20910. Instrument: ASID–4 Scanning Attachment for Electron Microscope. Manufacturer: JEOL, Japan. Intended use of instrument: See notice on page 1529 in the Federal Register of January 13, 1983. Advice submitted by: Department of Health and Human Services: April 29, 1983.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign instruments, for the purposes for which the instruments are intended to be used, is being manufactured in the United States.

Reasons: The applications relate to compatible accessories for instruments that have been previously imported for the use of the applicant institutions. The instruments are being manufactured by the manufacturers which produced the instruments with which they are intended to be used. We are advised by the Department of Health and Human Services in its respectively cited memoranda that the accessories are pertinent to the applicant's intended uses and that it knows of no comparable domestic accessories.

The Department of Commerce knows of no similar accessories manufactured in the United States which are interchangeable with or can be readily adapted to the instrument with which each accessory is intended to be used.

BILLING CODE 3510-25-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Restraint Level for Certain Cotton Textile Products From the Republic of the Philippines

June 6, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Charging 1982 overshipments to the level of restraint established for men's and boys' cotton coats in Category 333/334, produced or manufactured in the Philippines and exported during the twelve-month period which began on January 1, 1983. The level will be reduced from 83,475 dozen to 72,630 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175) and May 3, 1983 (48 FR 19924)).

SUMMARY: Under the terms of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of November 24, 1982, between the Governments of the United States and the Republic of the Philippines, the United States Government is charging 1982 overshipments of cotton textile products in Category 333/334 to the 1983 level.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT: Carl Ruths, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

SUPPLEMENTARY INFORMATION: On December 29, 1982, there was published in the Federal Register (47 FR 57986) a letter dated December 22, 1982 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established levels of restraint for certain specified categories of cotton, wool and man-made fiber textile products, including Category 333/334, produced or manufactured in the Philippines, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1983 and extends through December 31, 1983. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to adjust the level of restraint for Category 333/334 to account for 1982 overshipments.

Walter C. Lenahan,

Chairman, Committeee for the Implementation of Textile Agreements.

June 6, 1983.

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 22, 1982 from the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactured in the Philippines.

Effective on June 10, 1983, paragraph 1 of the directive of December 22, 1982 is further amended to include an adjusted twelve-month level of restraint for cotton textile products in Category 333/334 of 72,630 dozen.[1]

The action taken with respect to the Government of the Republic of the philippines and with respect to imports of cotton textile products from the Philippines has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83–15449 filed 6–8–83; 8:45 am]

BILLING CODE 3510-25-M

Soliciting Public Comment on Bilateral Textile Consultations With the Government of Hong Kong To Review Trade in Categories 336 and 434

June 6, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: On May 13 and May 17, 1983 the Government of the United States requested consultations with the Government of Hong Kong with respect to Categories 336 (dresses) and 434 (other coats, men's and boys'). These requests were made on the basis of the Agreement of June 23, 1982, as amended, between the Governments of the United States and Hong Kong relating to trade

[1] The level of restraint has been reduced by 10,845 dozen representing overshipments from 1982.

in cotton, wool, and man-made fiber textiles and textile products.

The purpose of this notice is to advise the public that if no solution is agreed upon in consultations between the two governments, the Committee for the Implementation of Textile Agreements may later establish limits for the entry and withdrawal from warehouse for consumption of textile products in Categories 336 and 434, produced or manufactured in Hong Kong and exported to the United States during the twelve-month period which began on January 1, 1983 and extends through December 31, 1983. The Government of the United States also reserves the right to control imports of these categories at the established limits.

Any party wishing to comment or provide data or information regarding the treatment of Categories 336 and 434 under the bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement with the Government of Hong Kong or on any other aspect thereof, or to comment on domestic production or availability of textile products included in these Categories, is invited to submit such comments or information in ten copies to Walter C. Lenahan, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Since the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C., and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 533(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP83-24-002]

Alabama-Tennessee Natural Gas Co.; Filing of Revised Tariff Sheet

June 3, 1983.

Take notice that on May 25, 1983, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee) submitted for filing the following revised tariff sheets to the Alabama-Tennessee's FPC Gas Tariff, Third Revised Volume No. 1:

Forty-first Revised Sheet No. 3-A superseding Substitute Fortieth Revised Sheet No. 3-A
Second Substitute Sixth Revised Sheet No. 5 superseding Fifth Revised Sheet No. 5
Second Substitute Sixth Revised Sheet No. 6 superseding Substitute Sixth Revised Sheet No. 6
Third Substitute Sixth Revised Sheet No. 11 superseding Second Substitute Sixth Revised Sheet No. 11
Second Substitute Fifth Revised Sheet No. 13-B superseding Fourth Revised Sheet No. 13-B
Second Substitute Sixth Revised Sheet No. 14 superseding Substitute Sixth Revised Sheet No. 14.

Also enclosed with the filing is a motion by Alabama-Tennessee filed pursuant to Section 4(e) of the Natural Gas Act and the Commission's order issued in the above-entitled proceeding on December 30, 1982, together with an undertaking and related documents called for by 154.67 of the Commission's Regulations under the Natural Gas Act, including a list showing service upon the purchasers under the rate schedules and affected state regulatory commissions. The motion is designed to make effective on May 31, 1983, the above-described revised tariff sheets.

Alabama-Tennessee states that the revised tariff sheets are designed solely to reflect the rates suspended by the Commission's December 30, 1982 order, as adjusted, for the removal of storage and storage transportation costs, for the purchased gas cost changes since December 30, 1982, shown in Section 20.3 of the revised tariff sheets, and for the unrecovered purchased gas costs shown in Section 20.2 of the revised tariff sheets.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15476 Filed 6-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket Co. RP83-65-002]

Alabama-Tennessee Natural Gas Revised PGA Rate Adjustment

June 3, 1983.

Take notice that on May 19, 1983, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), Post Office Box 918, Florence, Alabama, 35631, tendered for filing the following tariff sheets as part of its FPC Gas Tariff, Third Revised Volume No. 1.

Second Substitute Thirty-Ninth Revised Sheet No. 3-A
Second Substitute Sixth Revised Sheet No. 11.

These tariff sheets are proposed to become effective April 3, 1983, and Alabama-Tennessee requests that there be granted any necessary waivers of the Commission's Regulations to accomplish this proposed effective date.

Alabama-Tennessee states that the purpose of the revised tariff sheets is to correct an inadvertent error in its restatement of its Base Tariff Rates as required by the Commission's order issued on April 27, 1983, in the above referenced docket.

These revised tariff sheets provide for the following rates:

Rate schedule	Rates after current adjustment
G-1:	
Demand	$6.05
Commodity	421.04
SG-1:	
Commodity	465.24
I-I:	
Commodity	440.91

Alabama-Tennessee states that copies of the tariff filing have been mailed to all of its jurisdictional customers and affected State Regulatory Commissions.

Any person desiring to be heard or to protest such filing should file a petition to intervene of protest with the Federal Enery Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further pleading. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15477 Filed 6-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-348-000]

Algonquin Gas Transmission Co.; Application

June 2, 1983.

Take notice that on May 26, 1983, Algonquin Gas Transmission Company (Algonquin), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. CP83-348-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the interruptible sale of natural gas by Algonquin pursuant to its proposed Rate Schedule I-2 utilizing gas made available by Texas Eastern Transmission Corporation (Texas Eastern), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Algonquin seeks authority to render interruptible sales of natural gas to its Rate Schedule F-1 customers pursuant to its proposed Rate Schedule I-2. It is further stated that the service proposed under Rate Schedule I-2 would be rendered during the period between April 16 and November 15 and would be available to the extent that Algonquin obtains gas by purchase from Texas Eastern under Texas Eastern's existing Rate Schedule I-D. Algonquin asserts that all deliveries made pursuant to the proposed Rate Schedule I-2 would be considered surplus gas, subject to curtailment or interruption at any time an may be required by Texas Eastern or as may be requested by Algonquin.

Algonquin asserts that the rate it would charge for service under the proposed Rate Schedule I-2 would consist of a gas cost reimbursement charge to reimburse Algonquin for the cost of Rate Schedule I-D gas purchased from Texas Eastern; a handling charge of 14.74 cents per million Btu; and a GRI surcharge of 0.7 cent per million Btu.

Algonquin states that it is requesting permission to file its proposed Rate Schedule I-2 concurrently with its certificate application or, alternatively, that the Commission indicate in the certificate order that it would accept the proposed Rate Schedule I-2 for filing effective as of the date of such certificate authorization when such Rate Schedule is tendered for filing under Part 154 of the Regulations. Algonquin further states that it is requesting permission to include in its Rate Schedule I-2 provisions for the recovery of the cost of purchasing gas from Texas Eastern for resale under Rate Schedule I-2 on a current basis.

It is stated that the proposed service would enable customers purchasing gas under Algonquin's firm Rate Schedule F-1 to receive additional quantities of surplus gas during the off-peak delivery period to the extent that Texas Eastern makes such gas available and operating conditions allow.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Algonquin to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15478 Filed 6-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-524-000]

Dayton Power & Light Co.; Filing

June 3, 1983.

The filing Company submits the following:

Take notice that on May 24, 1983, the Dayton Power and Light Company (DP&L) tendered for filing an executed Service Agreement For Partial Requirements And/Or Transmission Wheeling Service To Municipalities For Resale (Service Agreement) between DP&L and the Village of New Bremen, Ohio.

The proposed Service Agreement permits the Village of Bremen to receive partial requirements and transmission wheeling service from DP&L under its FERC Electric Tariff, Original Volume No. 2. The proposed Service Agreement also provides for a change in delivery voltage to 69,000 volts. The previous service agreement between DP&L and the Village of New Bremen under which the Village of New Bremen received service pursuant to DP&L's FERC Electric Tariff Original Volume No. 1, is superseded.

DP&L requests the Commission waive its notice and filing requirements and permit the proposed New Bremen Service Agreement to become effective June 1, 1983.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 21, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to

intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15481 Filed 6-8-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA82-2-12-000]

Distrigas Corp. and Distrigas of Massachusetts Corp.; Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

June 3, 1983.

Take notice that on May 25, 1983, Distrigas Corporation (Distrigas) tendered for filing Thirteenth Revised Sheet No. 1 to its FERC Gas Tariff and Distrigas of Massachusetts Corporation (DOMAC), on May 25, 1983, tendered for filing Thirteenth Revised Sheet No. 3A.

Thirteenth Revised Sheet No. 1 and Thirteenth Revised Sheet No. 3A are being filed pursuant to Distrigas' and DOMAC's purchased LNG cost adjustment provision set forth in their respective tariffs. The Distrigas rate change is being filed to reflect in its sales rate to DOMAC a redetermination (decrease) of the price paid for the purchase of LNG from its supplier SONATRACH in accordance with the Distrigas-SONATRACH Agreement for Sale and Purchase of Liquefied Natural Gas, together with demurrage and amortization over the six-month period, July 1, 1983 through December 31, 1983, of the balance of the unrecovered purchased LNG gas account.

The DOMAC rate change is being filed to reflect the Distrigas rate change in DOMAC's rates for resale to its distribution customer companies and the amortization over the six-month period, July 1, 1983 through December 31, 1983, of the balance in DOMAC's unrecovered purchased LNG cost account and the GRI surcharge.

Distrigas and DOMAC request that the proposed tariff sheets become effective July 1, 1983, to coincide with the change in LNG costs from SONATRACH.

A copy of this filing is being served on all affected parties and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-519-000]

Cincinnati Gas & Electric Co.; Filing

June 3, 1983.

The filing Company submits the following:

Take notice that on May 20, 1983, the Cincinnati Gas & Electric Company (CG&E) tendered for filing proposed changes in its FERC Electric Tariff, Original Volume No. 1 which cancel and supersede the rate schedules in said tariff. The proposed changes would increase revenues from jurisdictional sales and service by $5.2 million Phase I and an additional Phase II increase of $4.1 million for a total increase of $9.3 million, based on the 12 months period ending December 31, 1983.

The reasons stated by CG&E for the change in rate schedules are:

(1) To overcome a revenue deficiency for wholesale service occasioned by additions to rate base and the continued inflationary impact on its costs; and,

(2) To update the fuel adjustment clause to comply with Commission regulations governing their content.

CG&E proposes an effective date of July 19, 1983.

Copies of the filing were served upon the Villages of Bethel, Blanchester, Georgetown, Hamersville and Ripley, municipalities in the State of Ohio; and the Union Light, Heat and Power Company, West Harrison Gas and Electric Company, Public Utilities Commission of Ohio, Kentucky Public Service Commission and the Public Service Commission of Indiana.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 20, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the Proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA82-2-22-005 (PGA82-2, IPR82-2, RD&D82-2)]

Consolidated Gas Supply Corp.; Filing of Revised Tariff Sheet

June 3, 1983.

Take notice that on May 23, 1983, Consolidated Gas Supply Corporation (Consolidated) submitted for filing Second Revised Substitute Thirty-First Revised Sheet No. 16 to its FERC Gas Tariff, Third Revised Volume No. 1, pursuant to the Commission's order dated February 4, 1983, as modified by order issued April 6, 1983, in these proceedings. The revised tariff sheet reflects a decrease of 2.53¢ in the Surcharge Rate for the period September 1, 1982 to December 31, 1982. Consolidated states that there is no change in rates, and therefore no refunds for the period subsequent to December 31, 1982. Schedules showing the calculation of the surcharge decrease and the amount of the principal refund by customer are included with the filing.

Consolidates states that its decision to make the tariff change and refund at this time shall in no way be construed as a waiver of Consolidated's rights to appeal the February 4, 1983 and April 6, 1983 orders in this docket.

Copies of this filing has been sent to the applicable state commissions and all parties to these proceedings.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the Proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file

with the commission and are available for public inspection.

[Docket No. CP83-313-000]

El Paso Natural Gas Co.; Application

June 2, 1983.

Take notice that on May 4, 1983, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP83-313-000 an application, as supplemented May 26, 1983, pursuant to Section 311(a)(1) of the Natural Gas Policy Act of 1978 and § 284.107 of the Commission's Regulations for approval of the transportation service and delivery of natural gas to Southwestern Public Service Company (Southwestern) for the account of Cabot Pipeline Corporation (Cabot), an intrastate pipeline company, for a primary term of 3 months and from month to month thereafter up to a period of 2 years, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant asserts that Southwestern generates electricity for sale at its Cunningham Plant located in Lea County, New Mexico, and at its Plant X located in Lamb County, Texas, with Cabot's supplying natural gas at both facilities. Applicant further asserts that Southwestern has scheduled repairs at its Cunningham Plant to commence on or about June 15, 1983, and to continue for approximately a 90-day period, which will cause it to reduce purchasing natural gas from Cabot at the Cunningham Plant. It is submitted that Southwestern's take-or-pay obligation at its Cunningham Plant could be alleviated by Applicant's transporting such volumes of natural gas deemed to be excess at Southwestern's Cunningham Plant to Southwestern's Plant X.

Applicant states that on February 18, 1983, it entered into a gas transportation agreement with Cabot, to perform the requested transportation service, whereby Cabot would tender natural gas to Applicant at Cabot's Hobbs Plant located in Lea County, New Mexico, for transportation by Applicant to Southwestern's Plant X, for the account of Cabot.

Applicant states it is not obligated to accept on any day gas in excess of 20,000 Mcf for the account of Cabot and that it would transport approximately 900,000 Mcf of gas during the term of the transportation agreement.

For such transportation service, Applicant proposes to charge Cabot the rate in effect and reflected from time to time as the "Back Haul Charge" as set forth on Sheet No. 1-D.2 of Applicant's FERC Gas Tariff, Third Revised Volume No. 2, or superseding tariff.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-523-000]

Florida Power & Light Co.; Filing

June 3, 1983.

The filing Company submits the following:

Take notice that Florida Power & Light Company (FPL), on May 23, 1983, tendered for filing an Agreement for Specified Transmission Service between FPL and Seminole Electric Cooperative, Inc. (SEC). The Agreement provides the rates, terms, and conditions for delivery of the output of SEC's Seminole Units, Nos. 1 and 2 by FPL to SEC, SEC member delivery points, or to third parties.

FPL requests an effective date of June 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon SEC and the Florida Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 21, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-34-002 (PGA, IPR)]

Florida Gas Transmission Co.; Revised Tariff Filing

June 3, 1983.

Take notice that on May 19, 1983, Florida Gas Transmission Company (FGT) filed a revised purchase gas adjustment (PGA) with a proposed effective date of May 1, 1983. Such filing was made pursuant to a letter order of the Commission of May 17, 1983, wherein the Commission required FGT to refile its PGA to incorporate the rates in effect as applicable to FGT, of its supplier, Southern Natural Gas Company. The revised tariff filing is composed of:

Original Volume No. 1

31st Revised Sheet No. 3-A

Original Volume No. 2

21st Revised Sheet No. 128

Listed below is a table summarizing the effect of the Commission's letter order on FGT's jurisdictional rates to be effective May 1, 1983.

FGT JURISDICTIONAL RATES EFFECTIVE MAY 1, 1983

(In cents)

	As adjusted	As filed Apr. 4, 1983	Difference
Rate Schedule G (¢/Therm)	32.769	32.904	(.135)
Rate Schedule I (¢/Therm)	31.968	32.404	(.436)
Rate Schedule T-3 (¢/Therm)	43.55	43.68	(.13)

FGT states that a copy of its filing has been served on all customers receiving gas under its FERC Gas Tariff, Original Volume Nos. 1 and 2 and interested state comissions and is being posted.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211,

385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-4-000 (PGA83-3)]

Granite State Gas Transmission, Inc.; Proposed Revised Changes in Rates Pursuant To Purchase Gas Cost Adjustment Provisions

June 3, 1983.

Take notice that Granite State Gas Transmission, Inc. (Granite State), 120 Royall Street, Canton, Massachusetts 02021, on May 23, 1983, tendered for filing Second Substitute, Fourth Revised Sheet No. 7 in its FERC Gas Tariff, First Revised Volume No. 1, containing revised proposed changes in its rates for jurisdictional wholesale sales for effectiveness on May 1, 1983.

According to Granite State, on May 11, 1983, the company filed proposed rates on Substitute Fourth Revised Sheet No. 7 to reflect the effect in its rates of a reduction in the cost of gas purchased from its sole supplier, Tennessee Gas Pipeline Company, a Division of Tenneco (Tennessee) that Tennessee proposed to make effective May 1, 1983 in a filing in Docket No. TA83-2-9-000 (PGA 83-2). Granite State further states that it has discovered an error of $0.0016 in the revised commodity rates for sales to its affiliate, Northern Utilities, Inc. under Rate Schedule CD-2. The revised rate on Second Substitute Fourth Revised Sheet No. 7 corrects for the overstatement of the adjusted commodity component in Rate Schedule CD-2, according to Granite State.

Granite State requests permission to effect its rate reductions through its purchased gas cost provisions concurrent with the effectiveness of the proposed Tennessee reduction.

According to Granite State, copies of the filing were served upon its customers and the regulatory commissions of the States of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Office of Assistant Secretary for International Affairs

International Atomic Energy Agreements; Proposed Subsequent Arrangement; European Atomic Energy Community (EURATOM)

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation Between the Government of the United States of America and the Government of the Republic of Indonesia Concerning Peaceful Uses of Nuclear Energy.

The subsequent arrangement to be carried out under the above mentioned agreements involves approval of the following retransfer: RTD/ID(EU)-3, from the Federal Republic of Germany to Indonesia, 64.752 kilograms of uranium, containing 12.787 kilograms of U-235 (19.75% enrichment) in the form of fuel elements, for use in the Janus type research reactor, Serpong, Java.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: June 3, 1983.

George Bradley,

Principal Deputy Assistant Secretary for International Affairs.

BILLING CODE 6450-01-M

Office of the Secretary

National Petroleum Council, Miscible Displacement Task Group of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Miscible Displacement Task Group of the Committee on Enhanced Oil

Recovery will meet in July 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location, and agenda of the Miscible Displacement Task Group meeting follows:

The Miscible Displacement Task Group will hold its seventh meeting on Wednesday and Thursday, July 13 and 14, 1983, starting at 9:00 a.m. each day, in Room 1603, Mobile Exploration and Production Services, Inc., 7200 North Stemmons Freeway, Dallas, Texas.

The tentative agenda for the Miscible Displacement Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review progress of Task Group study assignments.
3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Miscible Displacement Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Miscible Displacement Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas and Shale Technology, Fossil Energy, 301/353-3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on June 3, 1983.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

Pesticides; Triforine; Establishment of Temporary Tolerance

Correction

In the document beginning on page 22361 in the issue of Wednesday, May 18, 1983, make the following corrections.

1. On page 22362, first column, at the end of the document the FR Doc. number in the file line now reading "FR Doc. 83-13004" should have read "FR Doc. 83-13064".

2. In the same column, below the last paragraph, the following authority should appear:

"(Sec. 408(j), 68 Stat. 516, (21 U.S.C. 346a(j)))".

BILLING CODE 1505-01-M

[OPTS-59124A ; BH-FRL 2379-1]

Toxic Substances; Certain Chemicals; Approval of Test Marketing Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of TM83-47, TM83-48, TM83-49 and TM 83-50, applications for test marketing exemptions (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA). The test marketing conditions are described below.

EFFECTIVE DATE: June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Theodore C. Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-204, 401 M St., SW., Washington, DC 20460, (202-382-3825).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and to permit them to manufacture or import new chemical substances for test marketing distribution in commerce, finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities.

EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the applications, and four the time periods specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, number of workers exposed to the new chemical, and the levels and duration of exposure must not exceed that specified in the applications. All other conditions described in the applications must be met. The following additional restrictions apply:

1. The applicant must maintain records of the date(s) of shipment(s) to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

2. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME.

TME 83-47

Date of Receipt: April 19, 1983.

Notice of Receipt: May 6, 1983 (48 FR 20486).

Applicant: Confidential.

Chemical: Modified poly (amido-amine) (Generic).

Use: Confidential.

Production Volume: Confidential.

Number of Customers: 3 to 4.

Exposure Information: Chemical operators will potentially be exposed to the new TME substance during discharge of the batch into drums and during the cleaning of the filtration equipment. The TME substance is one of the components of a mixture and is prepared *in situ*.

Test Marketing Period: 90 days.

Commencing on: June 1, 1983.

Rish Assessment: No significant health concerns were identified for the TME substance. Exposure to workers will be very low. Although some ecological effects from the TME substance could be expected, the TME substance is prepared *in situ* and will not be released to the environment.

Public comments: None.

TME 83-48

Date of Receipt: April 19, 1983.
Notice of Receipt: May 6, 1983 (48 FR 20486).
Applicant: Confidential.
Chemical: Diamino heteropolycyclic compound (Generic).
Use: Water colorant used as a minor component in industrial, commercial and consumer applications (Generic).
Production Volume: 500 kg.
Number of Customers: 3.
Process Information: Confidential.
Testing Marketing Exemption Period: 120 days.
Commencing on: June 1, 1983.
Risk Assessment: No significant health or environmental effects were identified for the TME substance. Furthermore, any concerns would be mitigated because of low worker exposure during manufacture, processing and use of the chemical. Concern for releases to the environment is further mitigated by information submitted by the company based on results of aquatic testing on the TME substance. Therefore, the Agency finds that the test marketing activities will not result in an unreasonable risk.
Public Comments: None.

TME 83-49

Date of Receipt: April 19, 1983.
Notice of Receipt: May 6, 1983 (43 FR 20486).
Applicant: Confidential.
Chemical: Spiro [isobenzofuran xanthene] (Generic).
Use: Minor color-forming component in paper coatings (Generic).
Production Volume: 1400 kg.
Process Information: Confidential.
Testing Marketing Period: 210 days.
Commencing on: June 1, 1983.
Risk Assessment: Some health concerns were identified for the TME substance based on an analogue. The nature of the process for manufacture and use of the substance is such that no significant worker exposure is expected. Minimal consumer exposure is expected once the chemical is incorporated into an article. There are no significant concerns for environmental effects. Any concerns would be mitigated by low releases to the environment.

TME 83-50

Date of Receipt: April 19, 1983.
Notice of Receipt: May 6, 1983 (48 FR 20486).
Applicant: Confidential.
Chemical: Dialkylphenyl substituted amine (Generic).
Use: Captive intermediate used in the manufacture of a minor component for paper coatings.
Production Volume: 1900 kg.
Process Information: Confidential.
Testing Marketing Period: 210 days.
Commencing on: June 1, 1983.
Risk Assessment: EPA has established that the new test market substance, submitted under TM 83-50, will not present an unreasonable risk of injury to health or to the environment under specific conditions set out in the application. There are no significant health concerns for the TME substance. There are some concerns for environmental effects. However, the concerns are mitigated by the expected low release of the TME substance and on-site treatment of wastes prior to discharge to a publicly owned treatment works (POTW).
Public Comments: None.
The Agency reserves the right to rescind approval of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk to health or the environment.

Dated: June 1, 1983.

Don R. Clay,

Acting Assistant Administrator for Pesticides and Toxic Substances.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

National Industry Advisory Committee; Radio Communications Subcommittee; Meeting

Pursuant to the provisions of Public Law 92-463, announcement is made of a public meeting of the Radio Communications Subcommittee of the National Industry Advisory Committee (NIAC) to be held Tuesday, June 28, 1983. The Subcommittee will meet at the Radio Technical Commission for Aeronautics, 1425 K Street, NW., Suite 500, Washington, D.C. at 10:00 A.M.

Purpose: Initial meeting of the Subcommittee

Agenda: As follows:

1. Opening remarks by Co-Chairmen and introduction of members.
2. Development of Radio Communications Subcommittee Charter.
3. Subcommittee task assignments.
4. Preparation of presentation to the NIAC Long Range Planning Committee.
5. New business.
6. Adjournment.

Any member of the public may attend or file a written statement with the Committee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Those desiring more specific information about the meeting may telephone the NIAC Executive Secretary in the FCC Emergency Communications Division at (202) 634-1549.

[FEMA-683-DR]

Mississippi; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Mississippi (FEMA-683-DR), dated June 1, 1983, and related determinations.

DATED: June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287-0501.

Notice

Notice is hereby given that, in a letter of June 1, 1983, the President declared a major disaster under the authority of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288) as follows:

I have determined that the damage in certain areas of the State of Mississippi, resulting from severe storms, tornadoes and flooding beginning on or about May 18, 1983, is of sufficient severity and magnitude to warrant a major disaster declaration under Pub. L. 93-288. I therefore declare that such a major disaster exists in the State of Mississippi.

In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Pub. L. 93-288 for Public Assistance will be limited to 75 percent of total eligible costs in the designated area.

Pursuant to Section 408(b) of Pub. L. 93-288, you are authorized to advance to the State its 25 percent share of the Individual and Family Grant program, to be repaid to the United States by the State when it is able to do so.

The time period prescribed for the implementation of Section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, and redelegated to me, I hereby appoint Mr. Paul E. Hall of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Mississippi to have been affected adversely by this declared major disaster: Hinds, Madison, and Rankin Counties for Individual Assistance.

FEDERAL MARITIME COMMISSION

Agreements Filed; Port of Seattle/ Foss-Alaska Line Terminal, et al.

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of each agreement and the supporting statement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after the date of the Federal Register in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No. T-3591-1.

Title: Port of Seattle/Foss-Alaska Line Terminal Lease Agreement Amendment.

Parties: Port of Seattle and Foss-Alaska Line.

Synopsis: Agreement No. T-3591-1 amends the basic agreement by granting the lessee one additional five-year renewal option, increasing the leased premises from 14.951 acres to 17.435 acres with an option for an additional 5.667 acres, with a corresponding increase in rental.

Filing party: H. H. Wittren, Associate Director of Real Estate, Leasing, Port of Seattle, P.O. Box 1209, Seattle, Washington 98111.

Agreement No. T-3685-3.

Title: City of Long Beach ((City)/ Maersk Line Pacific, Ltd. (Maersk) Preferential Assignment Agreement Amendment.

Parties: City of Long Beach and Maersk Line Pacific, Ltd.

Synopsis: Agreement No. T-3685-3 amends the basic agreement by adjusting the compensation for the two container cranes which are assigned by City to Maersk. Compensation consists of a fixed amount to cover depreciation and return on investment, plus payment of actual operating expenses.

Filing party: Richard L. Landes, Deputy Office of the City Attorney of Long Beach, Harbor Administration Building, P.O. Box 570, Long Beach, California 90801.

Agreement No. 9847-8.

Title: U.S. Atlantic Ports/Brazil Pooling Agreement.

Parties: Companhia De Navegacao Loide Brasileiro, Moore McCormack Lines, Netumar Line.

Synopisis: This amendment changes the minimum sailing requirements of both parties to four direct sailings in each two-month periods, but with a minimum of thirteen direct sailings and forty direct port calls per six-month pool accounting periods.

Filing agent: John D. Straton, Jr., Esquire, Moore McCormack Lines, 12 Commerce Drive, Cranford, New Jersey 07016.

Agreement No. 10414-3.

Title: People's Republic of China-USA Eastbound Rate Agreement.

Parties: American President Lines, Ltd., Lykes Bros. Steamship Company, Inc., Sea-Land Service, Inc., United States Lines, Inc., Waterman Steamship Corporation.

Synopsis: The amendment proposes to (1) Extend the effectiveness of the basic Agreement beyond its current expiration date of September 30, 1983, for an indefinite term, and (2) amend the basic Agreement to provide for the addition of intermodal ratemaking authority.

Filing agent: Robert A. Peavy, Esquire, Morgan, Lewis & Bockus, 1800 M Street, N.W., Washington, D.C. 20036.

Dated: June 6, 1983.

By order of the Federal Maritime Commission.

Francis C. Hurney,

Secretary.

BILLING CODE 6210-01-M

United National Bancorporation; Bank Holding Company; Proposed de Novo Nonbank Activities

The organization identified in this notice has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to the application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment on the application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *United National Bancorporation*, Huntingdon, Pennsylvania (mortgage banking activities; Pennsylvania): To engage *de novo* through its proposed subsidiary, Unitas Mortgage Corporation, Harrisburg, Pennsylvania, in making or acquiring, for its own account or for the account of others, loans and other extensions of credit secured by a lien on real estate in accordance with the Board's Regulation Y. These activities would be conducted from offices located in Huntingdon, Willow Hill, and Chambersburg, Pennsylvania. Comments on this application must be received not later than June 29, 1983.

Board of Governors of the Federal Reserve System, June 3, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:
